 elimination of sp. substances of, in tuberculosis, 2729².
 encalyptol effect on, 756².
 fat decompn. by, 3646².
 filterable elements in virus of, 3926².
 growth of, effect of reaction of medium on, 2291².
 growth of, effect of vitamins on, 2008².
 homogeneous cultures in medium of NH₃ base, 2007¹.
 immunity with, 265², 266².
 infertilizing power of vegetable essences against, 3928¹.
 lipid sepn. from, 3923¹.
 mineral nutrition of, 1134².
 N utilization by dioxopiperazinic form of, 2292².
 parasitology of, 957².
 partitions of, activation with "Promonta," 265².
 permeability of fatty capsule to metal ions, 605².
 phosphatide fraction of, 3923².
 protein (alkali-sol.) of, 434².
 sanocrysin effect on, 771².
 skin reaction antigens of, complement fixation and, 608².
 staining of, 2007².
 surface compn. of, 2716².
typhosus, bactericidal powers of phenol and hexylresorcinol against, surface tension and, 2291¹.
 bacteriolysis of, 957².
 effect on milk, 3066².
 heat resistance of, effect of glucose on, 934².
 incubator air as source of N and C for, 1474¹.
 sensitivity to $\text{Na}_2\text{S}_2\text{O}_8$, 1473².
 toxin, pharmacodynamic action of, 1682².
 of Unna-Sabouraud, culture medium for, 2007².
vaginalis, 2707².
vulgatus, vitamin B formation by, from vitamin-free nutritive media, 2715².
 vitamin formation by, effect of H-ion concn. of nutrient soln. on, 3067².
 of Weeks and of Pfeiffer, agglutination of, 1471².
 Welch, carbohydrases and lipase of, 2716².
xylinum, AmOH production by, 1998².
 "Backmassen," starch detn. in, 2747².
Bacteremias, of intestinal origin in parathyroidectomized animals, 953².
Bacteria. (See also Ammonification; *Bacillus*; Culture mediums; Denitrification; Disinfectants; Microorganisms; Mycobacteria; Nitrication; Nitrogen fixation; Pasteurization; Phagocytosis; Sewage; Toxins; Water, analysis; Water, purification of.)
 acetic acid, stereochemistry of, 1998².

- acetone influence on development and compn. of, 3926^a.
- acid action on, 3926¹.
- acid-fast, serological relationship of, 607¹.
- acid-fast, surface compn. of, 2716^a.
- adsorption by soils, 1322^a, 1513^r.
- aerobic spore-forming, which ferment lactose, 3998^a.
- age of, effect on bacteriostatic properties of aniline dyes, 1287^a.
- agglutinated, elec. charge of, 1474^a.
- agglutination of—see *Agglutination*.
- alc. exts. of, engendering antibodies against lipids by, 1674^a.
- alkaloids and, 2290^a.
- allergy, 272^a.
- amylase of, 3634^a.
- anaerobes, 1472^r.
- anaerobe source in explosion of chocolate candies, sugar as, 2201³.
- anaerobic, cultivation with cysteine in media, 598^a.
- anaerobic metabolism, energy source in, thermal study of, 2288^a.
- anaerobiosis production, 2287^a.
- antigens (non-protein) of, 3646^a.
- assocn. studies of, 935^a.
- assocn. with legumes, importance in disease causation, 2547^r.
- autolysis of, 2288^a.
- butter aroma, 935^a.
- butyric acid, hydrogen formation by, 3913¹.
- carbon dioxide influence on, 3925².
- catalase and peroxidase activity of, 2915^a.
- cellulose-decompg., 114¹, 2042³, 3924^r.
- cellulose decompn. by, 821³, 4062^a.
- chemistry of, 4344^a, 2288^a.
- colon-aerogenes group, destruction of acetyl-methylcarbinol by, 2290^a.
- detection of, 3998^a.
- diagnostic value of neutral red lactose peptone media for, 598^a.
- fermentation of sugar by, 2008^a.
- fermentative sugar dissimilation by, 473^a.
- in creamery wastes, 1160^r.
- cyanides and, 1474^a.
- decompn. of lighting gas and of CO by, 2488^a.
- decompn. of toxins by, 935^a.
- detn. of, 934¹, 4000³.
- in food and water, 1852^a.
- in milk, 1683^a, 2745^a.
- differentiation of members of the Salmonella group of food-poisoning, 3927¹.
- diffusion products of cells of, as influenced by presence of various electrolytes, 3924^r.
- digestion of pectin and methylated glucoses by, 4006¹.
- dye action on, 113^a.
- effect on decompn. of Na cacodylate, 2283^a.
- on genesis of sulfide ores, 879¹.
- on H-ion concn. of natural waters, 2158^a.
- in enamel in dental caries, 3954^a.
- enteritidis, antigens of, 2008^a.
- enzymes of, 2716^a.
- enzymic metabolism of, 3923^a.
- fat in, 3913^a.
- fermentation of substituted carbohydrates by, of colon-lactic aerogenes group, 3927^a.
- ferment metabolism of, 1473^a.
- in fertilizer composts, 977¹.
- for fertilizing purposes, app. for propagation of, P 1164^r.
- on flour sacks (new and refilled), 2036^a.
- gas formation by, in water supplies, 1451^{a,3}.
- gas requirements of, in sugar fermentation with agar media, 2010^a.
- Gram-negative, 935¹.
- Gram reaction for, stability of, 1287^r.
- growth of, on blood of diabetic children, 266^a.
- CO₂ and, 2008^a.
- effect of double bond in paraffin wax on, 3213¹.
- effect of HCN on, 2915^a.
- gelatin for, 2009^a.
- interfacial tension and, 3924^a.
- in planted and in unplanted soil, 788^a.
- vapor pressure and humidity for, 3647^r.
- hemolysis by, 1281^a.
- hydrogen- and S oxidizing, 2485¹.
- hydrogen sulfide production by, 1134^r.
- β -hydroxybutyric acid-producing products of, dehydration and of polymerization of, 1133^a.
- immunization with, detoxicated by AuCl₃, 3673^a.
- inhibition by aniline dyes, 1286^a.
- injections of, effect on blood sugar, 2314^r.
- inoculation in legumes, 2954^r.
- intestinal, in disease, identification of, 3645^a.
- effect of diets of starch, dextrin, sucrose, maltose or lactose on, 1478^a.
- regulation by bile, 3662^a.
- iron, of the Gallionella group, 3924^a.
- isoelec. point of, relation to Gram reaction, 3922^a.
- lactic acid, cheese ripening with, 285².
- fermentation products of, 435¹.
- growth in intestines, compn. for promoting, P 2533^a.
- isomer production from phenylglyoxal by action of, 426¹.
- lactic acid formation by, 1473^a.
- legume, in soil, 787^r.
- leguminous nodule, fixation of atm. N by, 599^a.
- lipases, synthetic action of, 598^a, 3924^a.
- lipids of, antigenic function of, 1674^a.
- manganese, in water, 2517^a.
- metabolism, AcH origin in, 2141³.
- cond. in studies of, 114^a.
- enzymes in, 2289¹.
- metabolism of autotrophic, energy relations in, 3645^a.
- in milk, 1683^r, 2745¹.
- chem. activity of, 2745^a.
- effect of pasteurization temp. on, 2745¹.
- keeping quality and, 1316³.
- movement of thio-, temp. and, 935^r.
- myco—see *Mycobacteria*.
- nitrate-forming, in sea water, 1825^r.
- nitrogen fixation by, detn. of assimilability of phosphates by their action on, 2953^a.
- nitrogen-fixing, cellulose decompn. in soil by, 788^a.
- nitrogen-fixing, cooperation between maize and, 943^a.
- nitrogen, importance for plants, 3929^a.
- nuclei formation in, 1287^a.
- nutrition of, 2288^a.
- obligate thermophilic, from soil, 1513^a.
- oxidation-reduction of, in relation to peroxide formation by pneumococcus, 2009^a.

- oxygen requirement of anaerobic, 3381⁴.
 paracolon mutable colon group, Mendelian variation in, 1135⁸.
 in paratyphoid-enteritidis infection, effect of diet on resistance to, 3938⁹.
 paratyphoid group of, fermentation by, 2290².
 paunch, detn. of digestibility of cellulose-contg. foods with, 1480⁸.
 permeability of alveoli of lungs to, 132⁸.
 in petroleum well brine, 1135⁷.
 physico-chem. antagonism of, 3926⁸.
 poisoning by CO in absence of hemoglobin, 2292⁴.
 precipitation by dyes, 2714⁷.
 protecting living organisms against, 1993⁹.
 protecting wool against, P 3471³.
 protein decompn. by, 1661³.
 proteins (intracellular) of, 2008³.
 proteolysis by, of milk proteins in milk and synthetic butter, 1153⁴.
 proteoses of, prepn. from fluid cultures, 2015⁷.
 radon effect on, 2292².
 resistance to chemicals, modification of, 434⁵.
 resistance to, in avitaminosis, 3933⁷.
 resorcinolcarboxylic acid effect on, 2328¹.
 respiration of, 113³.
 resting, effect of chem. and phys. changes in environment on, 2715¹.
 Röntgen rays and, 434⁴.
 salt effect on, from Liman estuary at Odessa, 3924⁴.
 in sauerkraut during fermentation, 1504¹.
 in sea water in relation to concn., 935⁴.
 sewage, decompn. of sugars and acids by, 1134⁸.
 sodium chloride effect on formation of involution forms of spore-forming, 3924².
 sodium ricinoleate action on, 1288⁷.
 in soils, 976⁷, 1323⁴.
 antagonism to plants in mineral nutrition, 3099².
 of Bara, 2753⁷.
 daily changes in nos. in, 4006².
 effect of growing legumes on, 1163².
 effect of potash fertilizers on, 3247⁴.
 of forests, 2162².
 in orchards, 976⁸.
 stain for, 1163⁸.
 in soils left fallow after drying in the open air, 4004^{2,3}.
 in soils (serpentine), 976⁸.
 specific constituents of, physicochem. study of, 3922⁴.
 spore staining of, 1283¹, 2010⁸.
 staining, Gram reaction in, 3645².
 stains for—see *Stains*.
 sulfur compd. formation by, 1135⁸.
 sulfur-contg. gas production by, 934⁸.
 sulfur, layer in Black Sea, 2139⁷, 2140⁸.
 surface anaerobes, culture of, 2292⁴.
 surface layer of, compn. of, 3633⁸.
 surface tension and development of, 3924⁹.
 typhoid-paratyphoid group, effect of Bi and NaSO₃ on, 114⁸.
 typhoid-paratyphoid group, enrichment of, 1473⁸.
 of typhus-coli group, effect of H-ion concn. of culture medium on biol. properties of, 3066⁸.
 urea, 2289².
 effect of salts on, 2290⁸.
 effect of NaCl and (NH₄)₂CO₃ on, 113⁹.
 of water, 974¹.
 urea production by, 435⁸, 1135⁵.
 urea splitting by, regeneration of ability of, 1474².
 urea-splitting, in human intestinal tract, 3924⁷.
 uric acid production by, 598⁸.
 in vagina, 2707⁹.
 viability in aq. suspensions, 2291⁸.
 virulence of, effect of vitamin-free media on, 3213⁴.
 virulence of, electrophoretic potential and, 599².
 viscosity of suspensions of, effect of H-ion concn. on, 114¹.
 vitamin requirements of, in relation to phosphatides and Fe salts, 2009².
 of Wood's clover, 1163⁸.
 wool damage by, prevention of, P 2990⁸.
Bacterial preparations, *Bacillus tuberculosis* cultivation for, P 988⁸.
 for bathing, 833⁸.
 in leather industry, 1564⁹.
 therapeutic, P 3426⁴.
Bacterial toxins. See *Toxins*.
Bactericidal action, of blood, effect of coagulation on, 2152⁹.
 of blood, effect of NaCl content on, 267⁸.
 of blood serum following injections of adrenaline, 600⁹.
 chem. structure and, 1129¹.
 of dyes, 461¹.
 of egg white, H ion concn. and, 3230⁸.
 of enzymes, 416⁸.
 of ethyl alc., 1287⁴.
 of ethyl alc. in spirits, 3926⁷.
 fluorescence in, excitation with x-rays, 2715².
 of gastric juice, 266⁸.
 of high-voltage cathode rays, 1056⁸.
 cis-trans-isomerism in, 922⁸.
 of leucocytes, relation of β -lysine of serum to, 2028⁹.
 light and, 2290².
 of milk, 1136¹, 3686⁹.
 of monohydric alcs. and phenols, chem. constitution and, 935².
 of phenols and derivs. on *B. pestis*, 3922⁷.
 of Röntgen rays, 2291⁷.
 selective, 3925⁴.
 of selenium and Te compds., 2044¹.
 of soaps, effect of serum on, 3927⁸.
 of soaps, H-ion concn. and, 1288¹.
 testing, 2531⁷.
 by vegetable essential oils, 3646⁷.
Bactericides. See *Disinfectants*.
Bacterins. See *Vaccines*.

- in clay bodies, mech. introduction of, 2966^a.
- effect on action of acetylcholine on blood vessels, 777¹.
- on aorta, 3964^a.
- on blood vessels, 3978^a.
- electrode potential of, 3806^a.
- industry, 3714¹.
- in insecticides for boll weevil, 794¹.
- pharmacol action of, effect of Pb acetate on, 1312^a.
- poisoning, detection by dissection, 931¹.
- positive ions of, source of, 2425¹.
- sepn. from oxide, 1940^a.
- sepn. of Ra and MsTh I from, 530^a.
- spectrum of, 16¹, 359^a, 856^a, 857^a, 2609¹, 3020^a, 3022^a, 3159^a, 3557^a, 3829^a, 3830^a.
- toxicology of, 2236^a.
- Barium, analysis**, detection, 720^a, 2233^a, 2236^a.
- detection in presence of Ca and Sr, 3030¹.
- detn., 368¹, 1072^a, 2233^a, 2448^a, 2632¹.
- detn. in Mg alloys, 1074^a.
- Barium alloys**, P 3040^a.
- amalgams, elec. cond. of, 3037^a.
- calcium-Pb., as bearing metals, 3036^a.
- Barium aluminate**. See *Alkaline earth aluminates*.
- Barium borates**, anhydrous, 1771¹.
- Barium borofluoride**, prepn. of, 214^a.
- Barium bromide**, hydrolysis by steam, 1397^a.
- luminescence of, under action of α-, β- and γ-rays, 207^a.
- manuf. of, 1333^a.
- Barium carbonate**. (See also *Alkaline earth carbonates*.)
- as catalyzer in CH₂O decompn., 3530^a.
- colloidal, constitution of, 3521, 2586^a.
- colloidal MgCO₃, CaCO₃, SrCO₃ and, reciprocal protective effects of, 2587^a.
- detn. of sulfide, thiosulfate and S in presence of, 3855^a.
- dissocn. pressure of, 3301¹.
- manuf. of, P 804^a, P 2964^a, P 3429^a.
- reaction with SiO₂, velocity of, 3798^a.
- specifications for, 2109^a.
- spectrum of, 360^a.
- Barium chloride**. (See also *Alkaline earth chlorides*.)
- action on Cu or Fe, 2854^a.
- activity coeff. of HCl in aq. solns. with, 3008^a.

- activity in solns. of, 1051⁹.
 adsorption by parchment paper, electro-
 osmosis and, 518¹.
 antagonism of ephedrine and adrenaline to,
 2937¹.
 dielec. const. of aq. solns. of, 3782⁹.
 effect on anesthetic action of cocaine, stovaine
 and novocaine, 1845⁷.
 on blood vessels during perfusion with con-
 stant or pulsating flow, 2336⁹.
 on blood vessels of adding, to calf's blood
 in perfusion of surviving dog leg,
 459¹.
 on blood vessels of liver, 1495⁴.
 on breeding of flies in feces of cattle,
 2741¹.
 on colon, 2933².
 on gall bladder, 3962⁸.
 on muscle, 1495⁴.
 on Purkinje's fibers, 281¹.
 on uterus, action of lipoids of placenta,
 ovaries and corpus luteum on, 278¹.
 on uterus, inversion by yohimbine, 1850⁹.
 elec. cond. of, in fused acetamide, 3298⁹.
 electron affinities in, 1752⁷.
 fusion of, anode effect in, 1934⁹.
 hydrolysis by steam, 1397⁴.
 manuf. of, 989¹, P 2537⁴.
 mixts. with SrCl₂, x-ray fluorescence of,
 3551¹.
 occlusion by BaSO₄, 2624⁹.
 pharmacol. action of, 3974⁸.
 system: BeCl₂, thermal analysis of, 1216⁹.
 system: CoCl₂-H₂O-, 850².
Barium chromate, adsorption on fibers from
 aq. suspensions of, 518².
 fractional pptn. of, 1590⁹.
Barium compounds. (See also *Alkaline earth
 compounds.*)
 complex oxalates, 3322⁴.
 manuf. of, P 3108².
 org., 3901⁸.
 prepn. of, electrolytically, 3563⁷
 resources of U. S. in 1925, 1167⁸.
Barium cyanoplatinite, dehydration and hy-
 dration of, 1772⁹.
Barium fluoride. (See also *Barium halides*)
 as insecticide for boll weevil, 794¹.
Barium fluosilicate, thermal dissocn. of,
 202⁷.
Barium glycerophosphate, α -, diacetate,
 1630⁹.
 prepn. of, 2461¹.
Barium hydride. (See also *Alkaline earth
 hydrides.*)
 lattice energy of, 1222⁴.
Barium hydrosulfide, manuf. of, P 2964⁴.
Barium hydroxide, diffusion into gelatin,
 Liesegang ring formation in, 1911⁸.
 manuf. and industrial application of, 3426⁸.
 manuf. of, P 992⁸, P 3428².
 reaction velocity with org. halides, 1581¹.
 specifications for, 2109⁹.
 surface tension and viscosity of aq. solns. of,
 1741⁹.
Barium iodide. (See also *Alkaline earth io-
 dides; Barium halides.*)
 cellulose dispersion in, 2187¹.
 system: I-H₂O-, 3302⁴.
Barium ion, detn. of, 1778³.
 reaction with sulfate ion, 3799⁴.
Barium metagermanate, trihydrate of, 1008¹.
Barium metatungstate, 3840⁹.
Barium molybdate, specific heat of, 3814¹.
Barium nitrate, absorptive power of, detn. of,
 3557⁹.
 activity coeff. of, 1579⁹.
 elec. cond. of, 1861¹.
 manuf. of, P 804⁴.
Barium oxalate. (See also *Alkaline earth
 oxalates.*)
 soly. and elec. cond. of, 3322².
Barium oxides. (See also *Alkaline earth ox-
 ides.*)
 BaO, manuf. of, P 2537⁴, P 3428².
 reaction with CaSO₄, 2620².
 reaction with MnO₂, 1419².
 silica melts of, immiscibility of, 1240⁸.
 BaO₂, manuf. of, P 2537⁴.
Barium perchlorate. (See also *Alkaline earth
 perchlorates.*)
 cond. in acetone, 1397².
 as drying agent, 1579².
Barium permanganate, in analysis, 3852¹.
Barium phosphotungstovanadate, 1233⁹.
Barium salts. (See also *Alkaline earth salts*)
 effect on blood vessels, 2739⁹.
 effect on cocaine anesthesia, 3680⁴.
 manuf. of, P 2537⁴.
 of oxalic acid, 3349¹.
 reaction with H₂SO₄, volatility of compds
 formed in, 1425².
 sepn. from Ra salts, P 2436¹, 3820⁸.
 tuberculosis treatment with, 963⁹.
Barium selenate, solid solns. with KMnO₄,
 3290⁴.
Barium silicates, in glass manuf., P 3438⁸.
 regeneration of contaminated, P 992⁸.
Barium subsalts. See *Alkaline earth subsalts*.
Barium sulfate. (See also *Barium*)
 adsorption of electrolytes by, 2827⁹.
 as catalyzer in CO decompn., 3530².
 coalescence of unfilterable ppt. of, 1739¹.
 colloidal, in MeOH, 3788⁸.
 crystals colored with KMnO₄ by diffusion,
 1602⁹.
 detn. in fluor-spar, 720¹.
 as filler for pigments, 656⁹.
 formation of, 3799⁴.
 industry, 627⁸.
 from Italian "Stassfurt" salts, 1784⁷.
 in lead accumulators, 3565⁸.
 manuf. of, P 479², P 2537⁷, P 3255⁴.
 microscopical character of, 180⁹.
 occlusion of BaCl₂ by, 2628⁹.
 precipitation in presence of KMnO₄, 29⁹.
 purification of, P 305¹.
 solid solns. contg., 3502⁴.
 solid solns. with KMnO₄, 517⁴, 3290⁴.
 soly. of, grain size and, 3510⁹.
 spectrum of, 2431¹.
 system: NaMnO₄-, 517⁴.
 testing, 797⁹.
 in titanium white, 1715⁷.
 volatile, 720².
Barium sulfide. (See also *Alkaline earth
 sulfides.*)
 manuf. of, 3024¹, P 2764².
Barium telluride. (See also *Alkaline earth
 tellurides.*)
 crystal structure of, 1922⁸.
Barium tetramolybdate, prepn. and properties
 of, 3171⁴.
Barium vanadymalonate, 2230⁸.
Bark, chemistry of, 599⁸.
 diseased condition in trees, treating, P 2354⁴.
Barley. (See also *Malt.*)

- amylase of germinated, hydrolysis of starch by, 2278².
 brewing, difference in varieties of, 2295².
 compn. of, 982².
 decompn. in soil, food substances from, 1514¹.
 detection in flour, 288², 969².
 diastase content of, 3913².
 for distillery purposes, evaluation of, 2755².
 feeding stuffs from, 2156².
 fertilizers for, Mg phosphates as, 3100².
 in flour as partial substitute for wheat, 288².
 flour contg., analysis of, 1855⁴.
 germinating seed, effect of electromagnetic field on, 938⁷.
 germination ability of, as measure of toxicity of halogenated hydrocarbons, 3415².
 metabolism of reserve materials of young, grown in dark, effect of K salts and Na salts on, 2293².
 protein content of, effect of preceding crop on, 3649¹.
 seedlings, effect of ionized air on growth of, 3215⁴.
 silage, compn. of, 2157².
 smut, control of, 4008².
 fungicides for, 3249².
 fungicides for, HgCl₂, CuCO₃, uspulun and gernisan as, 3249⁴.
 sodium chloride tolerance of, 936².
 straw, decompn. by mixed and pure cultures of microorganisms, 1512².
 sugars in, during maling, 981².
 yield from seed of same stock but of diff. N content, 3248².
Barlow's disease. See *Scurvy*.
Baryta. See *Barium oxides*.
Barytes. See *Baryte*.
Basalts, as concrete aggregate, 1173².
 doleritic, of Jan Mayen (Egg Bluff), 3701¹.
 feldspar-, 42².
 iodine content of, 2862¹.
 radium and Th content of, 3016².
 of Sudan (Eastern), 3033².
Basanite, -nephelite, compn. of, 1241⁴.
Basedow's disease. See *Goiter*.
Base-exchanging compounds. (See also *Permutite*; *Zeolites*; etc.) P 306², P 620², P 3696².
 regeneration of, app. for, P 1511⁴.
Bases. (See also *Alkalies*.)
 acid-, equil., of blood, 1485², 2.
 of blood after epinephrectomy, 1670².
 of blood after hemorrhage, 2031².
 of blood after nephrectomy, 270⁴.
 of blood, effect of acid and base ingestion on, 2304⁷.
 of blood, effect of air pressure on, 126⁴.
 of blood in angiotomized dogs, 1142⁷.
 of blood in fever, 3082².
 of blood in pregnancy, age and, 609².
 of blood in pregnancy, effect of glucose on, 264².
 of blood in relation to tissue, 3946².
 of blood in secretion disturbances of stomach, 3953⁴.
 of blood of mother and of child removed by Caesarian operation, 2299⁷.
 of blood plasma in health and disease, 1302⁴.
 of blood, regulation of, 1145².
 in children, disturbances of, 768⁷.
 of diet, effect of sudden alteration of, 3933⁴.
 in edema, 3677⁴.
 effect of salicyl and caffeine on, 1149².
 in gas phase, 3301².
 in health and in nephritis, effect of HCl on, 3971².
 acid-, metabolism, 2028².
 activity coeffs. for strong, in homocationic salt solns., 3812².
 activity coeffs. of, in salt solns., 1918².
 adsorption by humic acid, 7².
 adsorption by SiO₂, 351⁷.
 adsorption of inorg., effect of salts on, 3147⁷.
 asymmetric allene, use of Grignard reagents in prepn. of, 909².
 catalysis by, theory of, 3803².
 cyclic, oxidation of hydrogenated, by chromic acid, 583², 2.
 cyclic, relative stabilities of rings in, 901¹, 409¹, 1652².
 detn. of, 2234².
 effect on surface tension of Na oleate solns., 1041⁷.
 exchangeable, of Scottish drift soil, 468².
 exchange of, on interfaces of permutite, 3785².
 nature of, 2410⁴.
 in permutites, 3795².
 in river water, 3996².
 -forming elements in foods, 3094¹.
 heterocyclic, secondary from tertiary, 1654².
 keto, intramol. alkylation in the bromination of β , α -unsatd., 1812⁷.
 neutralization curves for, 1604².
 optically active, 2657⁴.
 org., in non-aq. solns., 202², 1579⁴, 3188².
 phenol, 1449².
 precipitation as Ag compds., 519².
 reaction of org., with sol. tungstates, 3171².
 reaction with feldspar and flint, 1874².
 sepn. from alkaloids, H-ion concn. in, 2234².
 standard solns. of, prepn. of, 2620².
 titration of weak, borax in, 215².
Basicity, detn. in Cr salts, 3140¹.
Basophiles, 3634².
Bassia, oil from seeds of *B. latifolia* and *B. longifolia*, 1719².
Bast fiber. See *Fibers*.
Bates. See *Hides*.
Baths. (See also *Electrolysis*; *Thermoregulators*; *Water baths*.)
 chlorine metabolism under influence of a course of, 269¹.
 liquid-air, thermometer for, 1033².
Bating. See *Hides*.

Benzal chloride. See *Toluene, α,α -dichloro-*.

Benzaldehyde, acetal formation with, 3888².

bis(*o*-bromobenzyl)hydrazone, 2685².

carbohydrazones and 4-aminosemicarbazone, 1249¹.

as catalyst in prepn. of SO₂Cl₂, 55⁷.

chlorine detn. in, 4015².

condensation with dimethylbarbituric acid, 3185².

cyclohexylhydrazone-HCl, 1802².

cyclohexylhydrazone peroxide², 1802².

cyclohexyl-2-naphthylhydrazone, 2672².

cyclohexylphenylhydrazonol, 1102².

2-cyclohexyl-4-phenylsemicarbazone, 1802².

2-cyclohexyl-4-phenylthiosemicarbazone, 1802².

disson. study on, at high temps., 3800².

from fermentation of phenylglyoxylic acid, 426².

as fungicide, 1864².

N- and *O*-methyloximes, and derivs., 742², 257².

O-*p*-nitrobenzylloxime, 2257².

oxidation of, activation of O during, 1582⁷.

oxidation of, negative catalysis in, 73², 2835².

oxime, catalytic action of reduced Cu on, 75².

phenylhydrazonol, SnCl₄ addn. compd., 3902¹.

reaction with azobenzene, 1801².

with cyclohexanone, 230².

with Grignard reagents, 1254².

with PrNC, 1095².

with S, 2472².

semicarbazones, 69².

sol. in liquid NH₃ and in liquid SO₂, 3047².

vapor pressure of, 1216².

 in spray painting, 1888⁸.
 prepn. of, from C₆H₆, 3046⁸.
 purifying, P 491⁸, P 3123⁸.
 radon effect on, 1596¹.
 reaction with benzoyl peroxide, 1454².
 with H, Ni catalysts for, 3804⁸.
 with P₂O₅ in drying, 2827¹.
 recovery and purification by adsorptive
 substances, 4050⁴.
 recovery of, from coke-oven gases, etc., app.
 for, P 3123⁷.
 from coke-oven or illuminating gases,
 P 1505⁸.
 through distn. *in vacuo*, 4050⁴.
 from gases with active C, P 466⁹.
 in gas manuf., plant for, 3789⁸.
 vacuum distn. in, 313⁵.
 removal from gases, P 3123⁷.
 Röntgen-ray diffraction in, 3827¹.
 scrubbers, spray for, 3204⁴.
 sepn. from toluene in distn. app., 3505⁴.
 solidifying, P 3434².
 soly. in liquid NH₃ and in liquid SO₂, 3047⁴.
 soly. of C₁₀H₈ in, 2211⁵.
 soly. of SnI₄ in, 1578⁸.
 sorption of vapors by silicic acid gel impreg-
 nated with C, 1091⁹.
 spectrum of, 858⁹, 1059².
 spontaneous ignition temp. of, effect of anti-
 knock compds. on, 324¹.
 sulfonation of, 1450⁸.
 sulfuric acid used in refining, recovery of, P
 3454⁴.
 system: butane-, vapor pressure-compn.
 data for, 1583⁴.
 system: EtOH-H₂O-, 1744⁴.
 systems: Et₂O-, and acetone-, freezing
 curves of, 690⁴.
 systems with nitrobenzene and nitrophenols,
 2414⁴.
 in tar oils from Russian bituminous shales,
 490⁴.
 temp. for initial combustion of, 1697².
 -toluene, distn. curve of, detn. of, 3505⁴.
 vapor, adsorption at liquid-vapor interface,
 2410⁴.
 vapor, adsorption on glass, fused quartz and
 Pt, 1576⁴.
 vapor pressure of, effect of intensive drying
 on, 1049⁸.
 water detn. in mixts. of EtOH and, 3857⁸.
 from water gas, equil. in formation of,
 2783⁴.
 wetting power and evapn. of, 2749⁴.
 yield from coal tar, effect of steaming on,
 486².

- 1,3 - Benzodithylum,

1,3-

Benzodithylum compounds, 2-*p*-anisyl

1,3— salts, 1985¹.

— salts, 72^a, 73¹.

2-styryl-1,3— nitrate, 1985²

5,6-Benzoflavone, 2-acetyl-, 2472^a.

1,2-Benzofluorene. See *Chrysofluorene*

Benzofluorindine,

1,2-

3,4-

- 1,2 - Benzofluorindine, 7,14 - diphenyl-, 2272^a.

—, 7-phenyl-, 2272^a.

- 3,4 - Benzofluorindine, 5 - acetamido-, 2272^a.

Benzofluorindinium compounds, 14 - methyl-7,9-diphenyl-1,2— salts, 2272^a.

Benzofuran (coumarone),

- , 1,2 - dihydro - 1,2 - dimethyl-, 396⁷.

—, dihydroketo-. See *Benzofuranone*.

- , 1,2 - dihydro - 1,4,6 - trimethyl-, 71^a.

1 - Benzofurancarboxylic acid. See *Coumarilic acid*.

3,5 - Benzofurandiold, 1,2 - dihydro - 4 - (α - 3,4 - trihydroxybenzyl)-. See *Catechol*.

1,2 - Benzofurandione, derivs., condensation with 3,5 - dimethyl - 2(1) - benzofuraneone, 4071¹.

- derivs., opening and closing of the ring in, 1116⁷.
- 1 - oxime, benzoxazine derivs. from, 1268⁴.
- 1-oxime, effect on body temp., 1678⁷.
- , 3,5-dimethyl-, derivs., 1116^{7,8,9}.
- , 6 - isopropyl - 4 - methyl-, 1 - oxime, effect on body temp., 1678⁷.
- , 4(5 and 6) - methyl-, 1 - oxime, benzoxazine derivs. from, 1269⁴.
- 1 - Benzofuranmalonic acid, 1,2 - dihydro-2 - keto - 1,4 - dimethyl-, and diethyl ester, 911⁷.
- 2 - Benzofuranol. See 2(1) - Benzofuranone.
- 1(2) - Benzofuranone, 2,2 - bis(1,2 - dihydro - 2 - keto - 3,5 - dimethyl - 1 - benzofuryl) - 3,5 - dimethyl-, 407¹.
- , 2,2 - bis(1,2 - dihydro - 2 - keto - 3,5 - dimethyl - 1 - benzofuryl) - 3 - isopropyl - 6 - methyl-, 407².
- , 4 - chloro - 2,2 - bis(1,2 - dihydro-2 - keto - 3,5 - dimethyl - 1 - benzofuryl) - 3,5 - dimethyl-, 407².
- 2(1) - Benzofuranone, effect on body temp., 1678⁷.
- , prepn. of, 1269².
- , 3(and 4) - acetamido-, effect on body temp., 1678⁹.
- , 1 - (o - aminobenzal) - 5,6 - dihydroxy-, diacetate, -HCl, 1984⁵.
- , 1 - anilino - 1,4 - dimethyl-, stability of ring in, 911².
- , 1 - anilino - 1,3,5 - trimethyl-, stability of ring in, 911⁷.
- , 1 - benzal - 5,6 - dihydroxy - 4 - isopropyl-, diacetate, 1984⁵.
- , 1-benzal-4-methyl-, 1984⁵.
- , 1 - bromo - 1 - (α - bromobenzyl) - 4-methyl-, 1984⁵.
- , 1 - bromo - 1 - (α - bromoveratryl) - 5,6-dihydroxy-, diacetate, 1984⁵.
- , 1 - (5 - bromosalicylal) - 5,6 - dihydroxy-, triacetate, 1984⁵.
- , 4-chloro-1,1-dimethyl-, 1117².
- , 3,5 - dihydroxy - 1 - p - hydroxybenzyl - 4 - methoxy-(?), and derivs., 3050⁹, 3051¹.
- , 5,6 - dihydroxy - 1 - (2 - hydroxy-1 - naphthylmethylene)-, triacetate, 1984⁵.
- , 5,6 - dihydroxy - 1 - veratral-, diacetate, 1984⁵.
- , 1 - (3,5 - dimethoxybenzal) - 5,6-dihydroxy-, diacetate, 1984⁵.
- , 3,5 - dimethyl-, condensations with 1,2-benzofurandione derivs., 407¹.
- , 4,6-dimethyl-, semicarbazone, 1117⁷.
- , 1,4 - dimethyl - 1 - [1(and 2) - naphthylamino]-, stability of ring in, 911⁶.
- , 1,4 - dimethyl - 1 - thiocyno-, stability of ring in, 911⁷.
- , 1,4-dimethyl-1-o-toluidino-, stability of ring in, 911².
- , 4(5 and 6)-methyl-, effect on body temp., 1678⁷.
- , prepn. of, 1269².
- , 4-nitro-, 1117⁷.
- , 1,1,4,6-tetramethyl-, 1117².
- , 1,1,6-trimethyl-, and semicarbazone, 1117².
- , 1,3,5 - trimethyl-1-(1-naphthylamino)-, stability of ring in, 911⁷.
- , 1,3,5 - trimethyl-1-thiocyno-, stability of ring in, 911⁷.

2(1) - Benzofuranone[Δ^{1,2}] - 1(2) - benzofuranone. See Oxindirubin.

2 - Benzofuranpropionic acid, 2-bromo-6-hydroxy-2a-hydroxy-1-keto-, and 8-lactone, 3053⁹, 3054¹.

—, octahydro - 2,3a-dihydroxy-1-keto-, and 7-lactone, 3054¹.

Benzofurfuran. See Benzofuran.

Benzofurinium,

Benzofurinium compounds, 2-(3,5 - dimethoxybenzal) - 3,6,7 - trihydroxy-2- perchlorate, 6,7-diacetate, 1984⁵.

7,8-Benzoseptamethylenimine*, and derivs., 2695², 2696².

—, benzenesulfonyl-, 2696².

—, nitroso-, 2696².

2,3 - Benzo - 1,4,7 - heptatriazine, 5,6-diphenyl-, 2132².

4,5 - Benzohept - 1,2,6 - ordiazine. See also the acyl derivs. of Isoindazole, Isoindazolol, etc.

—, 7-hydroxy-, and carbethoxy deriv., 1119².

Benzohydro (diphenylcarbinol).

—, α-(α-aminoisosamyl)-, 567².

—, α-(aminomethyl)-, reaction with mineral acids, 567².

—, α-benzyl-p,p'-bis(dimethylamino)-†, 1110⁷.

—, p,p' - bis(dimethylamino)-, salts, 1110⁷.

—, p,p' - bis(dimethylamino)-α-vinyl-, and perchlorate, 1110⁸.

—, α - tert - butyl-p,p'-bis(dimethylamino)-, 1110⁷.

—, o,o'-dimethyl-, 2266⁹.

—, α-dinitromethyl-, 52².

—, p,p'-diphenyl-, isomers, 578².

—, α-nitromethyl-, 52².

—, α-phenyl-. See Carbinol, triphenyl-.

—, α-(phenylethynyl)-, and esters, 1980^{2,3}.

—, 3,4,3',4' - tetramethoxy-α-methyl-, 1975².

Benzohydroxamamide, catalytic action of reduced copper on, 75^{2,3}.

—, 2,3-methylenedioxy-, 588².

Benzohydroxamamide, p-isopropyl-. See Cumohydroxamamide.

Benzohydroxamic acid, 1097^{2,3}.

—, 3,4-methylenedioxy-. See Piperonylhydroxamic acid.

p-Benzohydroxamotoluide, 1106².

Benzohydroxamyl chloride, o-chloro-, 1107¹.

—, p-cyano-, 1107².

Benzohydryl, α - (phenylethynyl)-, attempted prepn. of, 1980².

Benzohydrylamine, from benzophenone oxime, 2681².

—, oxidation of, 2671².

—, N-chloro-, 2671².

—, N-diphenylmethylene-, and picrate, 3052².

—, o(and p)-methoxy-, and salts, 3340^{2,3}.

—, p-methyl-, and -HCl, 3340².

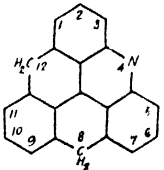

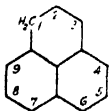

Benzoic acid. (Simple esters (ethyl, methyl, etc.) are entered here, and the others as

- derivatives under the names of the corresponding hydroxy compounds.)*
 absorption of rays by, 1129^a.
 amino derivs., double compds. with sulfonic acids, P 3425^a.
 ammonium salt, as urinary antiseptic, 3235^a.
 ammonium salt, effect on urine, 2739^a.
 cellulose esters of, 4062^a.
 β - (*p* - chlorophenyl) - β - cyclohexylhydrazide, 2672^a.
 combustibility of, 950^a.
 decyl ester, 2658^a.
 detection in milk, 2943^a.
 detn. of, 2004^a, 3581^a.
 in egg yolk, 781^a.
 in foods, 282^a, 3685^a.
 in milk, butter, margarine, meat and egg yolk, 3985^a.
 in mince meat, 1684^a.
 detoxication in man, 1308^a, 3969^a.
 diethylhydrazide, 570^a.
 effect on body temp., 1679^a.
 on fermentation, 3067^a.
 on rancidity in lard, 2170^a.
 on starfish eggs, 2940^a.
 elec. moment of, in C₆H₅, 3783^a.
 and esters, as catalysts in prepn. of SO₂Cl₂, 557^a.
 esters, nitration of, 2668^a.
 ethyl ester, sapon. of derivs. of, 1214^a.
 sapon. velocity of, 77^a.
 spectrum of, 1933^a.
 β - ethyl - β - (*p*-nitrophenyl)hydrazide, 1251^a.
 excretion of, 2312^a.
 in fruits, 2155^a.
 heat of combustion of, 1040^a, 1916^a.
 hydrazides, 11027^a.
 hydrogenation of, and its salts, 3608^a.
 manuf. of, P 3625^a, P 3906^a.
 methyl ester, system: MeOH-H₂O-, 3303^a.
 molybdenyl salt of, prepn. of, 2620^a.
 2-naphthyl ester, system: sulol-, 3102^a.
 nitration of, 2255^a.
 peroxide—see *Benzoyl peroxide*.
 phenyl ester, spectrum of, 2430^a.
 powder pellets of, hardness of, 3321^a.
 reaction with ZrCl₄, 1069^a.
 sodium salt—see *Sodium benzoate*.
 soly. in liquid NH₃ and in liquid SO₂, 3047^a.
 soly. in salt solns., 3296^a.
 system: S-, 2089^a.
 systems with org. bases, 3188^a.
 system: *p*-toluidine-, cooling curves in, 3011^a.
 o(*m* and *p*)-tolyl esters, reaction with AlCl₃, 1642^a.
 toxicity to fermentation, effect of phenol on, 3067^a.
 vapor pressure of, 2084^a.
 volatility of, 2001^a.
 in wine making, 795^a.

5-amino-4-nitro-2-phenyl-, 2689^a.

5 - benzalamino-2-phenyl-, 2689^a.

5-benzalamino-2-p-tolyl-, 2689^a.

4,5 - diacetamido-2-phenyl-, 2689^a.

4,5-diamino-2-phenyl-, 2689^a.

5 - (2,4 - dinitroanilino)-2-phenyl-, 2130¹.

—, 2-phenyl-5-(2,4,6 - trinitroanilino)-, 2130¹.

1,2,3 - Benzotriazole-5-carboxylic acid, 7-acetamido-, 1813^a.

—, 7-amino-, 1813^a.

—, 7-nitro-, 1813^a.

2,1,3 - Benzotriazole-4,5-diol, 6,7-dichloro-2-p-tolyl-, and diacetate, 2689^a.

2,1,3 - Benzotriazole - 4,5 - dione, 6,7-dichloro-2-(p-nitrophenyl)-, 2689^a.

—, 6,7-dichloro-2-p-tolyl-, 2689^a.

—, 2-phenyl-7-p-toluino-, 3904^a.

2,1,3-Benzotriazole - 4 - glyoxylic acid, 5-hydroxy-2-phenyl-, lactone, 2689^a.

2,1,3 - Benzotriazole-4-sulfonic acid, 7-amino-6-hydroxy-2-phenyl-, 3904^a.

—, 6,7-dihydro - 6,7 - diketo-2-phenyl-, potassium salt, 3904^a.

1,2,3 - Benzotriazol - 5 - ol, 6-chloro-4,7-dimethyl-1-phenyl-, and acetate, 2690^a.

—, 1-phenyl-4-phenylazo-, 3904^a.

2,1,3 - Benzotriazol-5-ol, 4,4'-benzalbis[2-phenyl-, and diacetate, 2689^a.

—, 4,4'-methylenebis[2-phenyl-, and diacetate, 2689^a.

—, 2 - phenyl-4-[2-phenyl-5-(2,1,3-benzotriazolyl)azo]-, 2689^a.

—, 4,6,7 - trichloro-2-(p-nitrophenyl)-, and acetate, 2689^a.

—, 4,6,7-trichloro-2-p-tolyl-, 2689^a.

1,2,3 - Benzotriazol - 5(4) - one, 6-chloro-4,7 - dimethyl - 4 - nitro - 1 - phenyl-, 2690^a.

—, 6 - chloro-4-hydroxy-4,7-dimethyl-1-phenyl-, 2690^a.

—, 4,6,6,7 - tetrachloro-4,5,6,7-tetrahydro - 4,7 - dimethyl-1-phenyl-, 2690^a.

2,1,3 - Benzotriazol - 4(7) - one, 6-chloro-5-hydroxy - 2 - (p - nitrophenyl)-7-phenylimino-, 2689^a.

—, 6 - chloro-5-hydroxy-7-phenylimino-2-p-tolyl-, 2689^a.

2,1,3 - Benzotriazol - 5(4) - one, 4,4,6,7,7-pentachloro - 6,7 - dihydro-2-(p-nitrophenyl)-, 2689^a.

—, 4,4,6,7,7 - pentachloro-6,7-dihydro-2-p-tolyl-, 2689^a.

1,2,3 - Benzotriazol - 4(3) - one, 3-benzalamino-, 2697^a.

—, 3-(p-bromophenyl)-, 1638^a.

—, 3-(2,4-dibromophenyl)-, 1638^a.

Benzotrichloride. See Toluene, α-trichloro-

Benzoxanthylum,

Benzoxanthylum compounds, 8,9,10,11-tetrahydro-8-(2-hydroxy-1-naphthylmethylene)- α -chloride, 3195^a.

Benzoxazine,

1,3,2-Benzoxazine-2,4(3H)-dione, 1269^a.

—, 6(7 and 8)-methyl-, and salts, 1269^a.

Benzoxazole,

—, **4-bromo-5-methoxy-1-methyl-**, 3363^a.

—, **5-methoxy-1-methyl-**, 3363^a.

—, **5-methoxy-1-methyl-4-nitro-**, 3364^a.

4-Benzoxazolecaronic acid, P 3371^a.

—, **6-chloro-**, P 3371^a.

—, **6-methyl-**, P 3371^a.

Benzoxazolinecaronic acid, keto-, pharmacol. action of, 776¹.

4-Benzoxazolinecaronic acid, **6-chloro-1-keto-**, P 2962¹, P 3105².

—, **1-keto-**, derivs., P 2961².

5-Benzoxazolol, **1-methyl-**, and benzoate, 3363^a.

1-Benzoxazolone, 1120⁷.

—, **4-arsinoso-**, P 2961².

—, **5-arsinoso-**, P 2961², P 3105².

—, **4-arsinoso-6-chloro-**, P 2961², P 3105².

—, **5-arsinoso-4-methyl-**, P 2961², P 3105².

1,3,4-Benzoxaz-4-one, **2-trichloromethyl-**, 1867¹.

2,4-Benzoxylide, *N*-butyl-, 2670^a.

—, **3,5'(and 3,6')-dinitro-**, 2670^a.

—, **3-nitro-**, 2670^a.

2,6-Benzoxylide, **3'(and 4')-bromo-3-nitro-**, 2670^a.

—, **3,3'-dinitro-**, 2670^a.

—, **3-nitro-**, 2670^a.

Benzoylation, of phenols, effect of constitution on velocity of, 573^a, 1975^a.

Benzoyl azide, explosions with, 3463^a.

—, *p*-amino-, 2697^a.

Benzoyl chloride, as catalyst for metaldehyde prepn., 54¹.

as catalyst in prepn. of SO₂Cl₂, 55².

nitration of, 2255¹.

prepn. of, 3043^a.

reaction with isatin salts, 1117^a.

—, **2-cyclohexyl-(?)**, 1108².

—, **3,5-dinitro-**, detection of org. compds. with, 37².

—, *m*(and *p*)-**fluorosulfonyl-**, 3604⁵.

—, **3-hydroxy-5-methoxy-**, methyl carbonate, 3356^a.

—, *o*-methoxy-, 3347¹.

—, **3-methoxy-2,6-dinitro-**, 2675^a.

—, **5-methoxy-2,4-dinitro-**, 2675^a.

—, **2,3-methylenedioxy-**, 588^a.

—, *p*-(α -methylisobutyl)-, 1804².

—, *o*-nitro-, reaction with CH₃N₃, 2897^a.

—, *o*(*m* and *p*)-nitro-, reaction with diazo-methane, 2125^a.

—, *p*-nitro-, reactions with alcs., velocities of, 3887^a.

—, *p*-phenyl-, 1455^a.

Benzoyl peroxide, as bleaching agent for linseed oil, 1363².

decompn. of, 1454^a.

hygroscopic tendency of, removal of, P 2538^a.

reaction with C₆H₆, 1454^a.

with chlorides and oxychlorides of P and Sb, 1454^a.

with chlorides of C, 1454^a.

with I, 572^a.

spectrum of, 2430^a.

Benzyl alcohol, acetate, velocity of hydrolysis of, 387^a.

compds. with hexavalent U, 2231¹.

crit. soln. temps. of hydrocarbons in, 644^a.

oxidation of, by nitro compds., 231^a.

soly. in liquid NH₃ and in liquid SO₂, 3047^a.

—, *p*-amino-, reaction with resorcinol, 3615^a.

—, α -(α -aminoamyl)-, deamination of, 908^a.

—, α -(α -aminobutyl)-, deamination of, 908^a.

—, α -(α -aminolobutyl)-, deamination of, 908^a.

—, α -(α -aminopropyl)-, deamination of, 908^a.

—, *o,o'*(and *p,p'*)-azoxybis-, 572^a, 573¹.

—, α -butyl-, Walden inversion of, 72^a.

—, **2,4-dichloro- α -methyl-**, 2673^a.

—, **3,4-dihydroxy-**. See *Protocatechuy alcohol*.

—, **3,4-dihydroxy- α -(methylamino-methyl)-**. See *Adrenaline*.

—, α,α -diisopropyl-, 892^a.

—, **2,4-dinitro-**, esters, 2457^a.

—, α -ethyl-, and acetate and benzoate, effect on muscles, 2938^a.

reactivity of OH-H atom in, 3887^a.

Walden inversion of, 72^a.

—, *o*-hydroxy-. See *Saligenin*.

—, *p*-hydroxy- α -(methylaminomethyl)-. See *Sympatol*.

—, α -isopropyl-, Walden inversion of, 72^a.

—, *o*(*m* and *p*)-methyl-, reaction with S, 3603^a.

—, α -methyl-, elec. cond. of AgNO₃ in, 202².

reactivity of OH-H atom in, 3887^a.

Walden inversion of, 72^a.

—, α -(α -methylaminoethyl)-. See *Ephedrine*.

—, α -propyl-, reactivity of OH-H atom in, 3887^a.

Walden inversion of, 72^a.

—, **3,4,5-trihydroxy-**, derivs., 2886^a.

—, **2,4,6-trimethoxy-**, 1121¹.

Benzylamine, absorption of ultra-violet light by, 1931^a.

ethylsulfuric acid salt, 53².

nitration of, 73^a.

prepn. of, 78^a, 895^a.

reaction with AcOH, 202².

reaction with *d*-glucose, 2665^a.

systems: formic acid-, butyric acid-, and succinic acid-, 1579^a.

systems with org. acids, 3189¹.

p-toluenesulfonate, 78^a.

—, *o*(*m* and *p*)-amino-*N,N*-dimethyl-, and derivs., 3614².

—, α -*ter*-amyl-, and salts, 3346^a, 3347¹.

—, *m*-bromo-, salts, 2669^a.

—, *p*-bromo-, and salts, 53^a.

(See also *Aberdalen reaction*; *Adrenalinemia*; *Alcoholemia*; *Anemia*; *Anoxemia*; *Azotemia*; *Bilirubinemia*; *Bleeding*; *Calcemia*; *Cholemia*; *Cholesterolmia*; *Circulation*; *Glucemia*; *Hemolysis*; *Immunity*; *Indicanemia*; *Lipemia*; *Methemoglobinemia*; *Oxalemia*; *Phosphatemia*; *Uremia*; *Uric acidemia*.)
 absorbent power of Prussian blue in, 2142⁴.
 absorption of CO_2 by, 765⁷.
 "acetone bodies" in, in pregnancy, 2731².
 "acetone body" content of, menstruation and, 2930⁴.
 acid-base equil. and alkali metal content of, effect of air pressure on, 126⁴.
 acid-base equil. of, 1485^{2,3}.
 in angiotomized dogs, 1142².
 in edema, 3677⁴.
 effect of acid and base ingestion on, 2304⁷.
 after hemorrhage, 2031².
 of mother and of child removed by Caesarian operation, 2299⁷.
 in pregnancy, effect of glucose on, 264⁴.
 regulation of, 1145².
 in relation to tissue, 3946⁸.
 acidity and gases of, in pneumonia, 2736⁹.
 acidity of, effect of coordination of dual function of hemoglobin on, 2926^{8,9}.
 pulmonary ventilation and, 765⁴.
 relation to vol. flow of blood, 3946⁷.
 adenectomy and, 264⁷, 765⁴, 2726⁷.
 adreneline content of, 2334⁴.
 adreneline content of, in angiotomy, 3669⁴.
 in adrenal insufficiency, 3677².
 adsorption of Rose Bengal in, 1144⁴.
 agglutinant, pectin as, 3715⁴.
 agglutinating system (third) in, 129⁴.
 albumoses of, esp. in catarrhal icterus, 452¹.
 alc. content of, after ingestion of alcoholic beverages, 2031⁴.
 in alc. intoxication, 1497².
 alky. of, in rarefied air, 3222⁴.
 alkali reserve of, 2310⁴.
 in epilepsy, 2505⁴.
 after injections of antidiphtheritic or antityphoidic serums, 1488⁹.
 of nursing infants and of children, effect of ultra-violet rays on, 2929⁹.
 in pregnancy, 1486⁴.
 in secretion disturbances of stomach, 3953⁴.
 aluminum in, 2908⁴.
 amino-acid content of, in pregnancy, 3942².
 amino-acid content of, Wassermann reaction and, 2152⁴.
 amino N of, in angiotomized dogs, reaction of organs to, 1142².
 ammoniacal salts in, 950⁷.
 ammonia content and formation in, 443⁹, 1990⁹.
 ammonia content of, 2312².
 ammonia content of, in disease, 769⁴.
 ammonia formation in, carbohydrate metabolism and, 3949⁴.
 ammonia of, origin and distribution in angiotomized animals, 1142⁴.
 ammonium salts in, 1839⁴.
 amylase of, effect of starch on, 2738⁸.
 anolytic property of, in endocrine insufficiency, 770⁴.
 anaphylaxis transmission by injection of substance extd. from, sensitized to horse serum, 2317¹.
 in anemia, distribution of water and cholesterol of, 3957⁴.
 physico-chem. consts. of, 3672¹.
 regeneration of, 1291⁴.
 anomalous, theory of isoagglutination and, 268².
 antagonism of O and CO_2 in, 1300⁴.
 anticoagulants, effect on repartition of reducing glucosic substances between blood plasma and corpuscles, 2311⁴.
 anticoagulating action of ZnSO_4 , 2933⁴.
 anticoagulating power of dyes and of arsenicals, 1281¹.
 in aphosphorosis, 3071¹.
 aspirochyl effect on, 2319⁴.
 autolysis of, fat formation from proteins in aseptic, 2923².
 bactericidal power of defibrinated, combined action of antigens and antibodies on, 604¹.
 bactericidal power of, effect of coagulation on, 2152⁹.
 basophilic material in, in benzene poisoning, 2515⁴.
 behavior towards maltose, 2278⁹.
 bile acids in, 1148⁴.
 bilirubin content of, 766⁴, 3671¹.
 bilirubin passage into, relation to bile secretion, 2308⁹.
 biochem. structure of, heredity and, 1824¹.
 of birds, fat and P content in relation to sex

- and its variation in reproduction cycle, 3983^a.
- bromide injected into, fate of, 2738^a.
- buffering power of, 3376^a.
- buffering power of, of *Maia squinado*, 612^a.
- buffer solns. of, H-ion concn. and, 8074^a.
- calcium and glucemia in diseases of thyroid with increase of basal metabolism, 3392^a.
- calcium and P content of, effect of parathyroid ext. on, 3233^a.
- calcium and P content of, in parathyroidectomy, effect of ultra-violet irradiation on, 610^a.
- calcium and K content of, 2503^a.
- calcium content and coagulation of, relation of parathyroid hormone to, 3084^a.
- calcium content of, 2305^a.
- in bone fractures during period of callus formation, 3671^a.
- in diabetes mellitus, 2728^a.
- effect of adrenaline on, 2737^a.
- effect of bone transplantation on, 2504^a.
- effect of insulin on, 2507^a, 3940^a.
- effect of Mg on, 3225^a.
- effect of ultra-violet rays on, 964^a.
- effect on excitability of vaso-dilator nerves, 1849^a.
- effect on tolerance to Mg, 1838^a.
- hypertension and, 2153^a.
- in jaundice, 2501^a, 3670^a.
- in puerperal eclampsia, 770^a.
- regulation by endocrine glands, 3955^a.
- after resection of mesenteric nerve, 957^a.
- of thyroparathyroidectomized dogs, effect of pregnancy and lactation on, 3951^a.
- calcium content of hens', egg production and, 1839^a.
- carbohydrate disappearance from, 2022^a.
- carbon dioxide-combining capacity of, effect of light on, 2299^a.
- in normal and spleenless animals under normal and reduced pressure, 1300^a.
- normally and in diabetes mellitus, 2502^a.
- carbon dioxide content of invertebrates, 3090^a.
- carbon dioxide equil. between alveolar air and arterial, during exercise, 3660^a.
- carbon dioxide equil. in arterial, 3379^a.
- carbon dioxide tension and H ion concn. of, after multiple pulmonary embolism, 1844^a.
- in carbon disulfide poisoning, 3232^a.
- carotid and femoral flow of, effect of alveolar CO₂ on, 2922^a.
- catalase and peroxidase content of, in epilepsy, 2504^a.
- catalase-anticatalase system in, in normal and pathol. conditions, 3636^a.
- catalase content of, in anemia, 2153^a.
- effect of diet on, 2018^a.
- effect of I and I preps., thyroidectomy and thyroid gland feeding on, 2327^a.
- effect of KI, I and iodated albumin on, 3044^a.
- in inhabitants of mountains, foot-hills and valleys in Middle Asia, 444^a.
- of mountaineers, 3633^a.
- catalase, lipase and amylase in, of nursing infants with digestive disturbances, 3080^a.
- catalase no. and index of beef, 1823^a.
- cation content of, under influence of light and of high altitude, 2279^a.
- charcoal—see *Charcoal*.
- in chloranil poisoning, 2326^a.
- chloride and N content of, in alkalosis, 605^a.
- chloride content of, during milking, 2308^a.
- chlorides, N, urea and NH₃ content of, 2911^a.
- chlorides of, in diff. conditions of gastric secretion, 2020^a.
- chlorine content of, effect of euphylin on, 1299^a.
- chlorine of, in gastric secretion disturbances, 956^a, 2924^a.
- chloroform soly. and distribution in, 3970^a.
- cholesterol and fat content of, on high mountains, 2303^a.
- cholesterol and lipid P of, after splenectomy, 3656^a.
- cholesterol and uric acid content of, effect of ingesting lipins and nucleins on, 005^a.
- cholesterol content of, in cancer, 3231^a.
- in diabetic gangrene, 955^a.
- effect of bile acids on, 1310^a.
- effect of climatic factors on, 3389^a.
- effect of irradiation of zone of suprarenals on, 3083^a.
- effect of liver extirpation on, 448^a.
- gastric acidity and, 3670^a.
- cholesterol excretion from, reticulo-endothelial systems and, 3656^a.
- cholesterol in, clinical significance of, 262^a.
- cholesterol, lecithin and fatty acids in, of new-born mice with inherited anaemia and their normal litter mates, 2025^a.
- choline content of, in menstruation, 3663^a.
- chromocytes of, bimol. layers of lipoids on, 1663^a.
- citrated, 1663^a.
- coagulability and Ca content of, effect of Röntgen rays on, 1672^a.
- coagulability of, CO₂ and bicarbonate content in relation to, 2480^a.
- coagulability of, Ra and, 1849^a.
- coagulant, P 2361^a.
- coagulation of, 770^a, 2002^a, 2482^a, 2909^a, 3048^a.
- in anaphylaxis, 3078^a.
- Ca and thrombin in relation to, 3223^a.
- in cancer, 2030^a.
- catalase and, 2735^a.
- complement in, 2308^a.
- in diseases of childhood, 2029^a.
- effect of content of CO₂ and bicarbonate on, 1830^a.
- effect of injecting foreign particles into blood stream on, 1670^a.
- effect of iron salts on, 2142^a.
- glucolysis and, 2305^a.
- inhibition by hirudin and novirudin, 1149^a.
- period of induction in, 2479^a.
- prevention by hirudin and leech exts. administered subcutaneously, 3972^a.
- rendered incoagulable by citrate or phosphate, effect of Mg salts on, 3915^a.
- theory of, 596^a.
- zoölogic specificity of cytozyme in, 1488^a.
- coagulation velocity of, app. for detg., 3642^a.
- effect of Na citrate on, 3965^a.
- after hemorrhage after splenectomy, 2315^a.
- in cocaine and *B. coli* fevers and aspirin antipyresis, 131^a.
- collection from adrenal gland, 2728^a.
- colloidal state of, of mother and newborn, 2924^a.
- colored artificial material from, 2362^a.

- complement-binding antibodies of, 266³.
 compn. of, 3944³.
 in cattle, effect of P-deficient rations on, 2492².
 effect of Alpine lamp treatment on, 265⁷.
 effect of hypophysis preps. on, 454¹.
 effect of insulin and of hypophyseal ext. on, 456¹.
 during perspiration, 2482⁷, 3917⁴.
 relation to that of lymph, 2021⁴.
 sex and, 1297².
 variations in, 2027⁷.
 content in Ca, Mg and K from ilikibiol. point of view, 2311⁷.
 cozymase in, 747², 2708⁴.
 in cretinism, hyperthyroidism and myxedema, 3670¹.
 cryoscopy of, effect of endocrine glands on, 2323³.
 crystals in, 1822².
 cutting off, effect on intermediary fluid exchange in sound and in diseased kidneys, 2920⁴.
 cyanized, 2141⁴.
 defibrination of, 1284³.
 density detn. of, 1133².
 density of, effect of respiratory gases on, 3945³.
 insulin and, 771³.
 in dermatitis, 2930⁴.
 in diabetes, growth of bacteria on, 266⁹.
 in diabetes insipidus, 271¹.
 of *Dixippus morosus*, tyrosinase content of, 1852¹.
 in dropsy (epidemic), 3956⁴.
 dye excretion from, effect of choline and histamine on, 2328⁴.
 dye excretion from, effect of spleen exts. on, 2328³.
 in edema, K and Ca contents of, 3952⁹.
 effect of alkaloids of *Ceanothus americanus* on, 1847⁷.
 effect of As and Fe on, 965⁸.
 effect of bilateral epinephrectomy on, 1670³.
 effect of circulatory block on venous, 1481⁴.
 effect of cod-liver oil in diet on, 3653⁹.
 effect of cold on, 3226³.
 effect of excessive water drinking on, 2482².
 effect of high altitudes on, 3668³.
 effect of immunization with fats on, 1305⁷.
 effect of injection of water on, 2301³.
 effect of parathyroid hormone administration on, 451⁴.
 effect of rarefied atms. on, 3677¹.
 effect of Na oleate and CaCl₂ on, 2737³.
 effect on alimentary hemoclasia, 271¹.
 on f₁ts, 1281⁴.
 on urea formation from NH₄HCO₃, 952¹.
 electrolyte distribution in, in renal insufficiency from ligation of both ureters, 2736¹.
 electrolytes of, effect of K oxalate on, 1129³.
 electrolytic equil. of, 2300³, 3941¹.
 of embryos, gas tensions of, 2140⁷.
 of embryos (hen), sugar, fat and non-protein N in 1839¹.
 enzyme content of, periodic activity of digestive app. and, 1295².
 enzyme of, fundamental unit of, 3632³.
 enzyme of human and horse, 1277³.
 enzymes of, 3944³.
 effect of As on, 2325⁴.
 in secondary syphilis, 1306³.
 in vitamin deficiency, 2722¹.
 in epilepsy, 259³, 267².
 in epilepsy, effect of ketosis on, 3080³.
 equilibrating with changing tensions of alveolar CO₂, 3917².
 in ethylene anesthesia, 3967².
 exchange with lymph, 263².
 fat content of, of children, 2931³.
 effect of hormones on, 1671³.
 after injection of pituitrin, antipyrine, acetosalicylic acid, pyramidone and quinine, 3084².
 fat injected into, distribution of, 1294³.
 fats and lipoids of, 1142⁴.
 fibrin of, after gastrointestinal tract obstruction, 1306⁴.
 fish, responses of closed glochidia to equivs. of Na, K and Ca salts in, 3394⁹.
 flow of, continuous elec. method of recording vol., 1282².
 detn. of quantity and rate of, 1132⁷.
 detn. with Et iodide, 431³, 2712¹.
 recording vol., 597².
 foreign particles in, effect on reticulo-endothelial system, 600¹.
 freezing-p. depression of, 953³.
 freezing-p. depression of fetal, maternal and placental, 3943⁴.
 gas and electrolyte equil. in, 2483⁹.
 gas content and alky. of, detn. in CO poisoning, 1493³.
 gas content of, in diseases of gastric secretion, 3956¹.
 gases of, in adrenal insufficiency, 3228³.
 effect of morphine and quinine on, and its relation to internal secretions, 3679⁹.
 in hunger and in vitamin-B starvation, 3654⁴.
 in relation to internal secretions on a diet deficient in vitamins A and B, 3935⁴.
 gastric secretory excitant in, 2299³.
 in gastritis induced by NaF, 3958⁷.
 glycolysis in, 447⁴, 2021¹.
 effect of insulin on, 3221¹, 3682⁴.
 in leucemia, 3957².
 normally and in diabetes, 2029³.
 normally and in leucemia, 2027¹.
 in tumor diagnosis, 2031¹.
 glycolysis velocity of, H-ion concn. and, 2023³.
 glucose content of, effect of phosphate on, 1490⁷.
 glucose disappearance and oxidations in, insulin and, 950³.
 glutathione content of, normally, in inanition and in B avitaminosis, 3657².
 glutathione in, and its utilization in milk secretion, 2497⁷.
 group detn. error elimination in, 1305⁴.
 groups of horses, adsorption of red corpuscles and, 3677³.
 guanidine in, in parathyreoprival tetany, 448².
 hematopoietic effects of intravenously injected nucleic acids, 3974².
 hemoglobin content of, 3077².
 hemoglobin content of children's, 749³.
 hemoglobin values of, expression for, 930¹.
 hemophilic, delayed clotting of, 769⁹.
 hemostatic, Na citrate as, 3234³.
 after hepatectomy, xanthorubin in, 1485⁹.
 in high blood pressure, pressor substance in, 1487³.

- of horse under physiol. and pathol. conditions, 1304⁴.
- humoral and electrocardiographic modifications in reactive dog after transfusion of venous pancreatic blood of donor rendered hyperinsulinemic, 2728³.
- hydration of, plasma proteins in relation to, 1138⁴.
- hydrogen-ion concn. of, cardiac reactions to drugs and, 776¹, 3977².
- during circulation, 421¹.
- during diphtheria anatoxin formation, 2028².
- effect of blood vol. changes on, 2927⁴.
- effect of changes on reaction of tissues, 273⁶.
- effect on adrenaline action on blood vessels, 2935⁴.
- effect on gas exchange and blood sugar, 429⁷.
- effect on lung ventilation, 1296⁹.
- in frogs, 3669⁸.
- in gastric affections, 2505¹.
- in glucolysis, 2023⁴.
- at high altitudes, 3665⁴.
- in insects, 1151⁴.
- after insulin injections, 441⁴.
- in pathology, 3078⁴.
- regulation of, 3664².
- temp. and, 1293⁹.
- hydrogen-ion concn. of horse, 3225⁴.
- immune, desensitizing substance in, 3672¹.
- in inanition, 259⁴.
- incoagulability of, from action of peptose on liver, 3079³.
- of Indians in health and in disease, 3391⁵.
- of infants with nutritional disturbances, effect of watery diet on, 259⁴.
- inorg. compn. of, after adrenalectomy, 1140⁷.
- inorg. salts and acid-base equil. of, in fever, 3082⁹.
- insulin-antagonistic substance in, 3084⁶.
- insulin content of pancreatic venous, after excitation of vagus, 1484⁴.
- after glucemia from injection of glucose, 1489².
- after injection of *d*-glucose or adrenalin, 1849⁵.
- insulin disappearance from, 1493³.
- insulin disappearance from, after intravenous injection, 1849⁹.
- insulin effect on, 3966⁴.
- insulin effect on cholesterol and fat of, in nephrosis, 2318².
- insulin in, after glucose administration, 3942⁷.
- insulin in, from vena pancreaticoduodenalis, 3070⁸.
- interferometer (Löwe-Zeiss) method in study of, 2144⁹.
- iodine content of, and its changes in menstruation and pregnancy, 3390².
- ion shift in narcosis and conditions of stimulation, 1496⁵.
- iron content of, on vitamin-C-deficient diet, 3657⁴.
- in jejunostomy, 273⁴.
- lactic acid and alkali reserves of, in cardiovascular disease, effect of exercise on, 2506².
- lactic acid and inorg. P of, of normals and diabetics after glucose with and without insulin, 1144⁶.
- lactic acid content of, 125⁴, 951³.
- in eclampsia, 1674⁴.
- effect of breathing O-enriched air during exercise on, 1293⁴.
- effect of fructose on, 1300⁴.
- after hemorrhage, 3390⁸.
- in hepatopathics, 3953⁷.
- idiomuscular swelling and, 2501⁴.
- in pregnancy and during childbirth, 2731¹.
- in toxicosis of pregnancy, 2731⁴.
- lactic acid formation from methylglyoxal in, 1680⁴.
- from monosaccharides by, 123³.
- from polysaccharides in, 922².
- in lead poisoning, 3963³.
- in leprosy, 3954³.
- leucocyte removal from, 268².
- light effect on, 2310⁹.
- lipase and diastase content of, as pancreatic functional tests, 1842⁷.
- lipase content of effect of quinine on, 3233².
- lipoids of, in anemia, 3956⁹.
- effect of adrenaline on, 3665⁷.
- effect of insulin on, 3904⁴.
- effect of pituitrin on, 2310².
- in menstruation, 2925², 3390⁴.
- of *Lithobius forficatus*, antitoxic action against venom of same species and against venom of *Cryptops anomalous*, 1500².
- maternal, physico-chem. relations with that of embryo, 3221⁷.
- in mercuric chloride poisoning, 132⁶.
- mercury-combining power of, detn. of urea retention by, 451³.
- methemoglobin in, spleen and, 2927⁶.
- methylguanidine in, after parathyroidectomy, 3080⁴.
- microchem. studies of, Li citrate as anticoagulant in, 2286⁴.
- mineral salt content of, in disease, 2026⁸.
- mucoids from, as antigens, 1673².
- neoglucose in, in diabetes, 1677⁴.
- neoglucose in, in diabetes, effect of insulin on, 1677⁹.
- nephrectomy and, 270⁴, 2030⁸, 3076².
- nitrite poisoning of, 2737³.
- nitrogen content of, 1826².
- nitrogen distribution in, of turtle, 3983¹.
- nitrogen, effect of spleen and reticulo-endothelial system on, 3225⁹.
- nitrogen of, as index of urogenic function, 2006⁸.
- nitrogenous constituents of, in hydrazine intoxication, 946⁴.
- nitrous gases and, theory of, 776⁴.
- non-protein N content of, of natives and Europeans in tropics, 902⁶.
- obesity reduction by control of chemistry of, 2920⁴.
- after operations, 3230⁷.
- ovarian hormone in, of normal and pregnant women, 1140⁷.
- oxygen consumption of, normally and in increased leucocyte counts, 2708⁸.
- oxygen content of, in pregnancy, 2734⁴.
- oxygen satn. of, effect of change of frequency and vol. of respiration on, 3223⁴.
- oxygen satn. of, in heart disease, effect of increased heart rate due to injection of atropine on, 1146¹.
- oxyhemocyanin from, effect of H-ion concn. on disso. curve of, 748⁷.

- oxyhemoglobin dissoen. of whole, in anemia, 2020³.
- pancreas hormone in, 126⁴.
- in paralysis agitans, Ca and P content of, 3081².
- in parathyreoprival tetany, 609².
- of parathyroidectomized rabbits, 3949⁷.
- after parathyroidectomy, H-ion concn. and CO₂ content of, 2728⁷.
- passage of substances to cerebrospinal fluid from, 3636¹.
- peptidase content of, in disease, 2733⁷.
- peptide N of, in arterial hypertension, 3670¹.
- in perfusion of surviving dog leg, effect on blood vessels of substances added to calf's, 459¹.
- peroxidase and catalase reactions of, 3632⁷.
- phenolase of, in dermatoses, 3958².
- phosphate content of, effect of dihydroxy-acetone on inorg., 3224⁸.
- with rachitic and non-rachitic diets, 2149¹.
- sodium lactate effect on, 3391¹.
- phosphate in, 3065⁴.
- phosphoric acid content of, blood sugar and, 1297⁷, 1298^{2, 4, 5}.
- phosphoric acid in, distribution of, 1297⁴.
- phosphorus and cholesterol content of, effect of turnips on, 2495⁶.
- phosphorus compds. of, biol. significance of acid-sol. org., 2137⁷.
- phosphorus content during work, 1668⁶.
- phosphorus content in diseases of childhood, 3672².
- phosphorus distribution in, 444⁸.
- phosphorus of, 2020⁹.
- phosphorus partition in, relation to glucolysis, 2282⁹.
- phosphorus proportions in, 2005⁶.
- as physicochem. system, 2925⁹, 3224⁷.
- putative principle in, 264⁴.
- polypeptides in, 3389⁸.
- polysaccharide-like substance in, 2275⁵.
- post-anesthetic hyper-uricemia of, 2154⁴.
- potassium, Na and Ca content after ingestion of CaCl₂, 2300⁷.
- preservation for analysis, 2710⁸.
- pressor substance in, in hypertension, 1300⁹.
- proteases of, 2928¹.
- protein and NaCl in, effect of I on, 2335².
- protein in ox, nutritive value of, 780⁹.
- in protein-rich diet, 948⁸.
- proteins in, in anemia, 3674⁹.
- effect of injection of antigenic and non-antigenic substances on, 2930¹.
- in malaria, 269⁸.
- in respiration disturbances, 451².
- proteins of domestic fowl, prepn. and pptn. reactions of, 3959⁹.
- protein sugar, 1823⁷.
- putrefaction of, origin of copratin in, 253⁸.
- racial-index to Ainu, Gilyak and Oroko in Karafuto, 254⁷.
- red blood corpuscles in circulating, 2923⁸.
- reducing power of, effect of taka-diastase and emulsin on, 3947⁹.
- reducing substances in toad, effect of insulin on rate of disappearance of, at diff. temps., 3958⁸.
- regeneration after bleeding, 1484¹, 1672⁴.
- regeneration in anemia, 2494⁸.

 immunization with protein X, 925¹.
 immunological principle in, responsible for the Wassermann and Sachs-Georgi reactions, 129^a.
 inorg. cations in, effect of acid intoxication and of adrenalectomy on, 445^a.
 iron (acid-sol.) in, 3942^a.
 iron content of, of animals, 2741⁹.
 isoelec. pt. of, 3390⁷.
 isoelec. pt. of, tar cancer and, 3676⁷.
 kula-azar test, 3677^a.
 Liesegang's rings in serological pptn., 3949^a.
 lipase of, in diagnosis, 956^a.
 effect of Br on, 136⁹.
 effect of Wiesbaden hot spring water on, 2280^a.
 in P poisoning, 2324^a.
 in pregnancy, labor and puerperium and its relation to toxicoses of pregnancy, 1146^a.
 lipoidieresis by liver from injections of horse, 3079^a.
 lipid antisera, prepn. of, 2025^a.
 lipid content of, 2316^a.
 lipid content of, of mother and child, 768^a.
 lipid equil. of, 2499¹.

- lipoids and globulin of, in Wassermann test, 2932^a.
- lipoids and proteins of, effect of age on, 1147^a.
- lipoids of, antigenic functions of, 767^a.
- lypolytic activity of, Sachs-Georgi reaction and, 2500^a.
- β -lysine of, relation to leucocytic bactericidal substances, 2028^a.
- for measles, P 301¹.
- medicinal, P 626^a.
- metallic salts therapy of, 1673^a.
- nickel action on, 2507¹.
- nitrogen content of, in kidney impermeability, 1146^a.
- "nitrogen formula" of, 2005^a.
- normal and pathol., 3671¹.
- osmotic pressure of, effect of albumin-globulin quotient on, 128^a.
- pepsin-inhibiting action of, 952^a.
- peptidase content of, in fever, 270^a.
- photooxidation of, with fluorescent dyes, 1997^a.
- physico-chem. properties of, effect of parental introduction of cascins, albumin and heterogeneous serum or blood corpuscles on, 1295¹.
- physico-chemistry of, 127^a, 3381^a.
- in pneumonia (lobar), concn. of electrolytes and non-electrolytes of, 127^a.
- potassium in maternal and placental, 2316^a.
- potential changes with quinhydrone electrode, 3664^a.
- precipitation reaction with antigen and antibody, optimal proportions in, 609^a.
- proteases and peptidases of, properties of, 415^a.
- proteases of, 127^a, 427^a, 428^a, 1304^a, 2001^a, 3632^a.
- protein and salt content of, in successive bleedings, 1486^a.
- protein in, 448^a.
- effect of diuretin on swelling of, 1313^a.
- effect of x-rays on, 3084^a.
- effect on coagulation of blood, 3078^a.
- films of, 255^a.
- fractioning of, 959^a.
- heat coagulation of, reversibility of, 1999¹.
- pptn. under influence of acids and salts, 2280^a.
- sp. refraction of, 1278¹.
- spreading of, 2584¹.
- ultra-filtration of, 1233^a.
- viscosity of, sp. increase in, 930^a.
- proteins and viscosity of, transitory alterations of, 604^a.
- protein therapy and, 2025^a.
- proteolysis of, treated with x-rays, 2282^a.
- proteoses of, 2308^a.
- quinine-resistant lipases in, after arsphenamine, 3962¹.
- reaction of isolated blood vessel preps. from sensitized animals with dilns. of homologous, 3952^a.
- reaction with alkaloids, 778^a.
- with glucose and fructose, 3629^a.
- with hexoses and hexosephosphoric acid ester, 2279^a.
- reducing power of, in cancer, 2732^a.
- refractive index of, 1834^a.
- refractive index of, effect of external influences on, 2307^a.
- rubidium effect on, 3903¹.
- salts and ions in, effect of adrenaline, pilocarpine, pituitrin and insulin on, 3089^a.
- sensitization of pigeons to dog, 607^a.
- snake venom effect on horse, 3685¹.
- sodium chloride and protein content of, in fish meal diet, 2493^a.
- sol. of CaCO_3 and of $\text{Ca}_3(\text{PO}_4)_2$ in, 921^a, 922¹.
- spectrum of, 3914^a.
- sulfate content of, 447^a.
- sulfur (non-protein) content of, 3224^a.
- surface tension of, 2708^a.
- effect of shellac on, 2708^a.
- after intestinal obstruction, 3392¹.
- in nephritis, 1146^a.
- syphilitic, pptn. with fractions of, 767^a.
- therapeutic, P 3711^a.
- therapeutic, prepn., purification and standardization of, 1166¹.
- tributyrin splitting by, effect of bile on, 2324^a.
- tryptase of, 2927^a.
- tuberculin and, 797^a.
- in tuberculosis diagnosis, 2729^a.
- in tuberculosis diagnosis, Goldenberg fixation test with active, 1145^a.
- in tuberculosis, inhibitive reaction of, 1301¹.
- physiochem. properties of, 955^a.
- refraction and colloid lability of, 2729^a.
- skin-reacting substance in, 1301¹.
- typhoid Vaccine effect on, 3672¹.
- ultra-filter for, 2144^a.
- urea and indican contents of, clinical value of detn. of, 1302^a, 3952^a.
- uterus enlargement by administering, from pregnant women, 763^a.
- vasoconstrictive substances in, 445^a.
- viscosity of, 2281^a.
- viscosity of, temp. and, 2499^a.
- xanthoprotic reaction of, and its value in diagnosis of renal insufficiency, 957^a.
- yield after successive bleedings, 2299^a.
- Blood sugar.** (See also *Blood, analysis; Glucemia; Hypoglycemia.*)
- in abnormal blood reactions, 429¹.
- activity and chem. structure of, 2933¹.
- adrenalectomy and, 2647, 1670^a.
- adrenaline effect on, after ligation of hepatic artery, 1669¹, 2317^a.
- adrenaline effect on, sympathetic nervous system and, 3681^a.
- age and, 3081^a.
- alkali effect on, 2326^a.
- ammonia effect on, 122^a.
- in anesthesia from barbituric acid derivs., 1489^a.
- arterial and venous, in normals and in diabetics, 3952^a.
- asphyxia effect on, in fish, 2021¹.
- atropine effect on, 1495¹.
- bacteria injections and, 2314¹.
- bile acids and, 2313¹.
- cabbage ext. effect on, 1847^a.
- in carbon monoxide poisoning, 1493^a.
- in carbon monoxide poisoning, effect of insulin on CO_2 content in, 1494¹.
- of cattle, variations in, 3666^a.
- cerebellum and, 956¹.
- cerebrospinal fluid sugar and, 2275^a.
- changes in rabbits, 2020^a.
- in chloranil poisoning, 2326^a.
- circulation of, 3228^a.
- complex carbohydrates, 3947^a.

- concn. during passage through kidney, 1669².
 content of, relation to sp. dynamic action and combustion of carbohydrates, 2307⁹.
 curve of alimentary hyperglucemia, 1297⁹.
 dextrose-N ratio of, following pancreatectomy, 764².
 in diabetes, 1307¹, 1845⁴, 2152¹.
 in diabetes mellitus, effect of synthalin on, 2318⁹.
 diet deficiency and, 947^{2,4}.
 diphtheria toxin and, 2152¹.
 distribution between plasma and red blood corpuscles, 445⁷, 2305⁴.
 distribution of reducing, 2021¹.
 effect of Ca and K on, 455⁴.
 effect of fatty acids on, 2327².
 effect of guanidine, agmatine and aminopentylenguanidine on, 2320⁷.
 effect of intravital injections of dyes on, 749⁴.
 effect of testicular and ovarian exts. on, 123².
 electrolytes and, 1838⁸.
 enzymes and, 919⁴.
 in epilepsy, effect of ketosis on, 3080⁸.
 examn., importance of, 450².
 exercise and, 3664².
 fasting, in non-diabetic patients, 608².
 fractionation of reducing substances in blood by, 2712⁴.
 glucose, 3065⁴.
 glucose content, variation of, 3089⁸.
 glucose effect on, 1296².
 glucose effect on, by ingestion and intravenous injection, 3963².
 glucosuria from disturbances of regulating mechanism of, 1145⁹.
 of hen embryos, 1839¹.
 histamine effect on, 3971⁹.
 of horse under physiol. and pathol. conditions, 1304⁷.
 hydrogenated imidazoles and, 3962².
 in hypertonia and in syphilis and normally, 2029⁴.
 hypertony and, 3676².
 hypoglycemia from insulin-like substances in sarcoma, 2154¹.
 in hypoglycemia in diabetes, 3080⁷.
 increase by injection of NaCl, NaF, Na₂SO₄, Na citrate and urea, 2142².
 of Indians in health and in disease, 3391⁴.
 in infections, effect of protein given intradermally on, 1840².
 of insects, 3090⁸.
 insulin effect on, 254⁴, 428², 771⁹, 772⁹, 950⁹, 1518¹, 2312², 2329⁴, 3075², 3087⁹, 3393¹, 3968⁴.
 antagonism by protein derivs., 1681².
 effect of parasympathetic poisons on, 777¹.
 in nephrosis, 2318².
 insulin-like activity on, of synthetic compds. in normal and diabetic organism, 772².
 liver amylase effect on, 954⁴.
 in mental disorders, 955⁴, 3081⁷.
 during morphine tolerance and withdrawal, 3977².
 non-fermentable fraction of, 1468⁴.
 non-glucose, 122⁹.
 non-glucose fraction, quantity under diff. conditions, 3664².
 non-reducing form of, 2027⁹.
 of normal and nondiabetic persons, 2026⁷.
 nutrition defects and, 3933².
 ovaries and, 442⁹.
 after pancreatectomy, 3669⁹.
 parasympathetic poisons and, 1310².
 phlorizin effect on, 1307¹, 1678¹.
 photoactive substances and, 454².
 physiology of, 121⁹.
 pituitary preps. and, 2933².
 pituitrin effect on, 254⁴.
 post-mortem detns., 603².
 potassium iodide effect on, 3969⁹.
 in pregnancy, at delivery and during puerperium, 267².
 proteinic, 1468⁴.
 in disease, 3080⁸.
 hydrolysis of, 3075¹.
 in pyruvaldehyde poisoning, 1681².
 ratio to sugar of cerebrospinal fluid normally and in diabetes, 2023².
 reaction of, in disease, 3675⁴.
 reducing, 2311².
 regulating mechanism for, relation to that for body temp., 2312².
 regulating mechanism, glucose as stimulator of, 2926¹.
 regulation of, 768².
 effect of body temp. on, 136².
 by protein derivs., 1681².
 under Röntgen irradiation, 3965².
 repeated curves in non-diabetic subjects, 3390¹.
 Röntgen rays and, 1672⁹.
 sea-water injections and, 3959².
 sodium lactate effect on, 3391¹.
 source of, muscle glycogen as, 3946².
 in status thymicolymphaticus, 1300⁹.
 sugar content of cerebrospinal fluid in relation to content of, 3078².
 synthalin effect on, 1489⁹, 3960⁷.
 thyroid feeding and, 3969⁹.
 in trypanosomiasis, 3955⁹.
 trypsin effect on, 3087².
 turnips and, 2495².
 ultra-violet irradiation of blood *in vitro* and, 2317².
 vagus effect on, 126⁷.
 vagus stimulation effect on, and its relation to insulin in muscles, 3666⁴.
 during work, 1668².
Blood vessels. (See also *Aorta*; *Vasodstrictors*.)
 acetylcholine action on, 777².
 acids and, 122⁹.
 adrenaline effect on, 457¹, 2330², 2333¹, 2935⁹.
 adrenaline effect on, effect of yohimbine on, 1850¹.
 antagonism of insulin and adrenaline in action on, 3232¹.
 arsenious and arsenic acid effect on, 275².
 barium salt action on, 2739⁴.
 bismuth effect on, 611².
 cardiovascular disease, effect of exercise on lactic acid of blood, on alkali reserves and on urinary acidity in, 2506².
 cinchona alkaloid effect on, 3233².
 cocaine effect on hepatic and femoral, 3680⁷.
 colloid absorption by, of pars anterior of human hypophysis, 3949¹.
 diet and peripheral, 3934⁷.
 dilator constituents of tissue exts., 2140².
 diseases of extremities, 1132².
 effect of bicarbonate and of CO₂ on, 3232².
 effect of Ca and K on, 2934⁷.
 effect of normal serums on isolated prepn. of, 3952⁹.

- effect of poisons during perfusion with constant or pulsating flow, 2336^a.
 effect of thebaine, its derivs. and related substances on, 3234^a.
 ephedrine effect on, 138^a, 2333^a, 3088^a.
 ergot alkaloid effect on, 1492^a.
 ergotamine and ergotinine effect on, 1492^a.
 fructose resorption into portal vein, 127^a.
 glucose resorption into portal vein, 126^a.
 histamine effect on coronary, 280^a.
 hydrastine action on, 3973^a.
 hypersensitiveness of isolated preps. of, from sensitized and injected animals, 3952^a.
 in inflammation, dependence of reaction on electrolytic content, 269^a.
 iodine effect on, 1847^a.
 lead salts and, 1313^a.
 ligation of hepatic artery and portal vein, effect of adrenaline on temp. of muscle before and after, 2507^a.
 ligation of inferior vena cava, effect on glucemia, 1140^a.
 ligation of portal vein and of hepatic neck, effect on glucemia, 1839^a.
 of liver, 1495^a.
 effect of mech. obstruction on outflow of lymph from thoracic duct, 3672^a.
 pharmacology of, 1496^a.
 phys. changes and changes induced by strophanthin and digitalis glucosides, 1148^a.
 meningeal barrier of, passage of Bi across, 2332^a.
 meningeal permeability to NaNO₃, effect of urotropine on, 2332^a.
 ozone effect on, 3233^a.
 of pancreas, effect of ligation, 956^a.
 in perfusion of surviving dog leg, effect of substances added to calf's blood on, 459^a.
 pituitary exts. and, 3971^a.
 sensitizing action of alkalies, 769^a.
 tonicity of, H-ion concn. and, 2140^a.
 ureto-venous anastomosis, 1489^a.
 vasculo-meningitic permeability of antibodies under influence of urotropine, 1844^a.
 vasoconstricting action of blood in infectious fevers, 1306^a.
 vasoconstrictive substances in blood serum, 445^a.
 vasodilator nerves, effect of Ca ion content of blood on excitability of, 1849^a.
 vasomotor reactions, pharmacology of, 3978^a.
 veratrine transport by, 1143^a.
 wound treatment by constricting peripheral, 772^a.

 effect of feeding bone meal on, 3936¹.
 fat from marine, P 508¹.
 fats, linolic acid content of, 4082^a.
 flour, P 3105^a.
 formation of, 3913^a.
 diet and, 1834^a.
 on diet contg. menhaden oil or menhaden fish meals, 1834^a.
 hexose-phosphoric esters and, 953^a, 3064^a.
 in rabbit, 1307^a.
 fracture of, Ca and P metabolism in, 958^a.
 fractures, blood Ca during period of callus formation, 3671^a.
 growth of, in childhood, vitamins and, 438¹.
 diet and, 2493^a.
 effect of thyroid on, 3943^a.
 growth of long, role of thyroid and parathyroid glands in, 3235^a.
 lithium and Sr in, 3667^a.
 mineral component of, 204^a.
 nutritional disturbances of, 2023^a.

- regeneration of tissue of, effect of avitaminosis on, 762¹.
 soly. in salt solns., 922¹.
 transplantation of, effect on Ca content of blood, 2504⁴.
 ultra-violet radiation of, color effect of, 3920⁹.
- Borates**, of anesthetic bases, P 3425³.
 deposits near Kramer, Calif., 1427¹.
 reaction with F, 2854³.
 review of mining and trade information, 1079⁷.
- Borax**, absorption of rays by, 4037⁷.
 compd. with Na₂CO₃, P 1168⁹.
 crystn. from brines, decreasing rate of, P 1526¹.
 dehydration of, 1940⁶, 3321³.
 for enamel frit smelting, control testing of, 2775¹.
 industry, 3713⁹.
 reaction with F, 2854³.
 recovery, 971⁸.
 removal from nitrate solns., P 478⁸.
 as standard in acidimetry, 3847⁶.
 in titration of weak bases, 215⁴.
 volatility of, 1728⁹.
- Bordeaux mixture**, lime for, 2955³.
 prepn. and using on rubber trees, 1897⁴.
- Bordet-Wassermann reaction**. See *Wassermann reaction*.
- Boric acid**, anomalous rotatory dispersion in ultra-violet of aq. solns. of tartaric acid contg., 1922¹.
 from borax, P 3717¹.
 as catalyst for esterification of borneol and of isoborneol, P 1128¹.
 in coffee, 3990⁴.
 compds. with salts of org. hydroxy acids, dissociation consts. of, 1070².
 decompg. insol. minerals with, P 3717².
 detn. in silicates, 3856⁹.
 effect on blood reaction in frogs, 3669⁸.
 effect on optical rotation of malic and tartaric acids, 2664³.
 properties of, 3325⁴.
 rotatory dispersion of aq. solns. of tartaric acid contg., 2095⁸.
 -sodium hydroxide mixts., H-ion concn. of, 2087⁷.
 sources of, 158⁷.
 as urinary antiseptic, 3235⁴.
 in volcano sublimations, 877¹.
- Borides**, mol. vol. study of, 3406⁷.
 prepn. of, 1413³.
- Borneol** (*2-hydroxycamphane*; *2-camphanol*).
 from cedar wood oil, 2555⁷.
 derivs., 387⁹, 388².
d-, and esters, configuration and phys. consts. of, 2081⁹, 2682⁴.
 dimethoxysuccinate, optical rotation of isomers, 1100⁹.
 esters, P 1128¹, P 1272², P 2478¹, P 3058⁸,⁹, P 3425⁹.
 esters of pyridinecarboxylic acids, P 593².
 in oil of lavender, 985².
 optical rotation of, and esters, 80⁴.
 photoactivation by Röntgen rays, 2723³.
 picrate, 379⁸.
 solvent for, P 292³.
 systems: *d*- and *l*-, *d*- and *l*-acid phthalates, and *d*-camphor-*d*-, 577⁴,⁵.
- β -Borneol- α -glucoheptoside**,* 2232².
 —, **pentaacetyl**-, 2252¹.
Borneoigluconic acid*, prepn. of, 3373⁴.
- Bornite**, in copper ore, 870⁹.
 feldspar-, 1949¹.
 oxidation of, 39⁴.
- Bornjosal**, 475¹.
 pharmacol. action of, 1080³.
- Bornylamine**, *d*-, sepn. from *d*-neobornylamine, 2264⁵.
 —, *N*-(**3,4-dinitrophenyl**)-, 405¹.
 —, *N*-(**1,6,8-trinitro-2-naphthyl**)-, 404¹.
- Bornyl chloride**. See *Camphane*, 2-chloro-.
 —, *p*-keto-. See *Epicamphor*, 5-chloro-.
- Bornyl diiodosalicylate**. See *Bornjosal*.
- 2-Bornylenecarboxamide**, 1809².
2-Bornylenecarboxylic acid, 1808⁹.
- Boroacetic anhydride**, as catalyst for reaction of org. acids with pinene and with nopinene, 2264³.
- Boroethane***, hydrolysis of, 1735⁸.
- Boromolybdic acid**, prepn. of, 2444¹.
- Boron**, absorption of H-rays by, 2601⁴.
 atom fragments of, detn. of mass of, 2219⁴.
 atomic decompn. by α -rays of Po, 3152⁴.
 atomic wt. of, 841¹, 1381⁸, 1907⁸.
 effect on growth of soy-bean plant, 4008³.
 effect on plants, 471⁸, 1475⁹.
 ionization potential of, 3824¹, 3827⁷.
 in nutrient media for orange trees, 2012⁷.
 plant requirements for, 3700⁸.
 prepn. of, 3563⁹.
 specific heat of, 3534³.
 spectrum of, 1407³, 1932², 3828⁶.
- Boron, analysis**, detn., 3579³.
- Boron alloys**, carbon-Cr-Co-Ni-W-, for metal-cutting tool, P 3597⁷.
 chromium-Fe-W-, P 2116⁴.
- Boron chloride**, (BCl₃), density of, 1907³.
 surface tension of, 3507⁶.
- Boron compounds**, ammino-, 541³, 868³, 1420⁹.
 in cacao and its products, 3990².
 calcium-, mining, P 2964⁷.
 classification of org., similar to tartar emetic, 2666³.
 constitution of, 1772⁸, 3573⁴.
 constitution of, theoretical electronic interpretation of, 3169².
 hydrides and derivs. thereof, 541².
 with hydrogen and with H and N, constitution of, 3325⁷.
 with hydrogen, constitution of, 3324⁹.
 iron borates, 3842¹.
 tungsten-, casting of, P 3343³.
- Boron hydrides**, 541².
 constitution of, 3169², 3573⁴.
 properties of B₂H₆, 3325⁷.
- Boron nitride**, crystal structure of, 1383⁶, 1572².
 prepn. and properties of crystd., 1383⁶.
 specific heat of, 3534³.
- Boron oxides**, B₂O, spectrum of, 3312⁴.
 B₂O₃, effect on chem. and heat-resisting glasses, 2175⁸.
- Boron sulfide**, prepn. of, 867⁹.
- Boroverdin**, as disinfectant for biliary passages, 800⁹.
- Bos taurus**, testicle of, amino acids of, 2303³.
- Botany**. See *Plants*.
- Botelho reaction**, antitryptic power of blood serum in cancer in relation to, 2153⁹.
 cancer diagnosis with, 3081¹.
- Botryococcaceae**, actual and fossil, 2015⁴.
- Bottles**. (See also *Wash bottles*.)
 capsules for, from cellulose, P 3461⁹, P 3462¹.

- manuf. of, app. for P 3113^o, P 3723^o.
 rubber compn. for closures or packing rings for, P 3490^o.
 strain and hot-water test for, 3721^o.
 washing solns. for, testing of, 1504^o.
Bottling apparatus, for atomic wt. detns., 3145^o.
Bouillon, glucemia from injection of, 1141^o.
 prepns., creatinine detn. in, 3088^o.
Bourghoul, food from, 2513^o.
Boydenite, carbon atom in, location of, 3872^o.
Boyer, biography, 2998^o.
Boykinia aconitifolia, hydrocyanic acid in, 1831^o.
Boyle, Robert, biography, 1570^o, 3288^o.
Boyle-Marlotte law. See *Laws*.
Boyle's law. See *Laws*.
Boyoud, Emile, obituary, 1934^o.
Bradite, explosions of, photographs of, 1886^o.
Bradycardia. See *Adams-Stokes disease*.
Brain. (See also *Cephalin*; *Encephalitis*; *Decerebration*; *Medulla oblongata*.)
 Abderhalden reaction with diff. centers of, 2031^o.
 absinth action on, cerebrospinal fluid and, 2330^o.
 antagonism to ventral nerve, analysis of effect of chemicals on phototaxis in *Allolobophora fortida* by, 1500^o.
 cerebellum, effect on blood sugar, 956^o.
 cerebral circulation, regulation by inhalation of O, 1849^o.
 cerebrospinal fluid, 2277^o.
 cerebrospinal fluid, acid (C₂₄H₄₀O₂) from, 547^o.
 cerebrospinal fluid, sugar residue of, 922^o.
 cholesterol content of, in rabies, 1676^o.
 cholesterol ester content of, 1999^o.
 compn. of, narcosis and, 2328^o.
 in diet, blood regeneration and, 2494^o.
 effect on coronary circulation, 3973^o.
 effect on eel serum hemolysis, 1494^o.
 elec. capacity of, under normal and pathol. conditions, 3631^o.
 enzyme content of, 2928^o.
 ethyl alc. content of, and its relation to intoxication, 1490^o.
 feeding, to planarian worms, 2510^o.
 freezing pt. of, 2323^o.
 gaseous metabolism of, 3978^o.
 glutathione content of, 9547^o.
 glycogen content of, 443^o.
 in infantile amaurotic idiocy, 2732^o.
 inflammation of, effect on protein content of cerebrospinal fluid, 272^o.
 metabolism of, 2021^o, 2726^o, 3076^o.
 mineral compn. of, 2915^o.
 oxygen consumption of, 3077^o.
 phosphorus ratios of, 750^o.
 physiol. and pathol. chemistry of, 2306^o.
 "Promonta" from, lipid activation with, 265^o.
 proteins of gray matter, changes in autolysis, 1484^o.
 removal of cerebral hemispheres, avitaminosis after, 2296^o.
 strychnine effect on cerebellar cortex, 1490^o.
 sulfatides of, 1484^o.
 sulfur and P content of, 3948^o.
 tissue, production of NH₃ and urea by, 1825^o.
 water absorption by tissue, anion and cation effects on, 2482^o.
 water content of, effect of insulin on, 2318^o.
Brain extracts, antitoxic effect in morphine poisoning, 3086^o.
 hydrogen-ion concn. of, 1823^o.
 immunity with, 266^o.
 lethal action of, 607^o.
 nitrogen partition in, 2306^o.
 pharmacol. action of, 3393^o.
Brakes. (See also *Friction materials*.)
 asbestos pulp for use in, P 3434^o.
 corrosion of, compns. for prevention of, P 3256^o.
 linings, P 807^o, P 307^o.
 alloy for, P 3886^o.
 compn. for treating, P 3432^o.
Braking systems, hydraulic automobile, non-corrosive liquid for, P 996^o.
Bran (*wheat bran unless otherwise stated*).
 analysis of, 3092^o.
 compn. of, 3987^o.
 diet, mineral metabolism on, 2295^o.
 laxative action of, 1489^o.
 moisture detn. in, 2341^o.
 rice, 2156^o.
 sepn. of, 1855^o.
Brandies, methanol content of, from grape marc, 3419^o.
 from wine, analysis of, 2354^o.
Brass. (See also *Copper alloys*; *Zinc alloys*.)
 aluminum addn. to, 1092^o.
 aluminum detection in, 2234^o.
 aluminum detn. in, 1433^o.
 analysis of, 2449^o, 3327^o.
 analysis of, methods of A. S. T. M. for, 1158^o.
 annealing, effect of, 3881^o.
 anodes of, 3104^o.
 beta-, crystal structure of, 3879^o.
 bright dipping of, 1617^o.
 cadmium-contg., 3593^o.
 cast, transition point in, 1439^o.
 coating with, by spraying, 1960^o.
 cold-rolled, behavior under tension and compression, 1954^o.
 coloring, P 3040^o.
 copper detn. in, 1607^o.
 copper substitution by Mn in alpha, 1055^o.
 corrosion by water, 3038^o.
 corrosion of, 1438^o, 1624^o.
 cracking of tubes of, in triple effects, pre-heaters and condensers, 558^o.
 crystal development in, after hot working, 3871^o.
 elec. furnace for, 3314^o.
 elec. furnace for melting, charging and discharging app. for, P 3885^o.
 elec. melting of, 21^o.
 elec. melting of, review on, 1596^o.
 electrolytic removal of excess, from steel, 1414^o.
 electroplating, 3163^o.
 electroplating of small parts with, 3103^o.
 electroplating with Au, P 2117^o.
 enameling, P 1338^o.
 explosion in shaft during filing, 2189^o.
 exudations on, 48^o.
 of fifteenth century, 1954^o.
 fluidity of, 2641^o.
 fluxes for, 3035^o.
 furnaces, 1242^o, 2246^o.
 gamma-, structure of, 48^o.
 gases in, 1953^o.
 hardened, effect of time and high temp. on, 3333^o.
 hardness and tensile strength of, 1614^o.
 hardness of, 2244^o.
 heat treatment and grain growth in, 3502^o.

- heat treatment, microstructure and hardness of 60:40, 1619^a.
- high sheet, and naval brass rods, specifications of A. S. T. M. for, 1158^a.
- hot shortness of, 1619^a.
- inter- vs. intra-cryst. fracture in systems of large crystals of, in relation to temp. and time as well as resulting recrystn., 3869^a.
- inverse segregation in, 1618^a.
- manganese effect on α - and β -, 1215^a.
- manuf. by direct process, 882^a, 3866¹.
- mass-wt. ratio of, 1035^a.
- melting and remelting, 2113^a.
- nickel effect on, 726^a.
- oxide films on, formation of, 48^a.
- penetration by Sn and solder, 1954^a.
- penetration of mild steel by, 1959¹.
- pickling, 3330^a.
- porosity in castings of, 2655^a.
- properties of, at elastic limit, 3593^a.

Brochantite, from Belgian Congo (Kipushi), 878^a.
 crystals, 2860^a.
Bromal (*tribromoacetaldehyde*), condensation with aromatic hydrocarbons and with phenolic ethers, 233^a.
Bromanil, phytochem. reduction of, 2013^a.
Bromates, detection of, 2629^a.
 detn. in presence of chlorates, 1777^a.
Bromide ion. (See also *Halide ions.*)
 detn. in mixts. contg. compds. of O and H, 1777^a.
 detn. of, 31^a.
 effect on tadpoles, 2280^a.
 electrode, electromotive force of, 2836^a.
 partition between water and EtOH, coeff. of, 3309^a.
 refractivity of, 1058^a.
Bromides. (See also *Halides.*)
 detection of, 2629^a, 2858^a.
 detn. of, 1777^a, 3848^a.
 in presence of cyanide, 31^a.
 in presence of iodide and chloride, 872^a.
 effect on basal metabolism, 3084^a.
 effect on nervous system, 453^a.
 fate of, injected into blood, 2738^a.
 imido-, of aliphatic acids, 1445^a, 2875^a.
 intoxication, 3974^a.
 reaction with permanganate, H-ion concn. in, 2413^a.
 sepn. and detn. of mixts. of iodides, chlorides and, 3174^a.
Bromination. (See also *Halogenation.*)
 of double bonds, velocity of, 1636^a.
 and intramol. alkylation of δ , ϵ -unsatd. keto bases, 1812^a.
 of org. compds., 394^a.
 speeding app. for, P 2402^a.
Bromine. (See also *Halogens.*)
 in animal organism in NaBr poisoning, distribution of, 777^a.
 atom, affinity for electron, 1753^a.
 atomic wt. of, 1382^a.
 atom, reactivity of, in substituted nitro-naphthalenes, 83^a.
 cathode rays from, 702^a.
 chem. const. of, 3504^a.
 dielec. const. and mol. wt. of vapor, 1020^a.
 dielec. const. of, 1218^a.
 diffusion into gelatin, Liesegang ring formation in, 1911^a.
 discovery of, 1381^a, 2203^a.
 dissocn. at high temps., 1399^a, 3800^a.

- dissoen. by collision, 10477.
 effect on lipase serum and org. exts., 136.
 elec. cond. of mixts. with ethers, 32987.
 excretion following CHBr_3 anesthesia, 3978.
 fluorescence of, 19341.
 industry, 37141.
 manuf. of, 13337, P 3108.
 from brine, P 8051.
 from Fe bromide, 40331.
 from liquor from carnallite-crude salt, 1825.
 in meteorites, 30342.
 in nutrient media for orange trees, 20127.
 oxidation of tervalent Cr in acid soln. with, in presence of Ag salts, 16051.
 photochem. action on maleic and fumaric diethyl esters, 1760.
 reaction with chloride ion in HCl , 1051.
 with cinnamic acid and with stilbene, 2227.
 with PhCH.CPhCN , effect of light on, 38982.
 with SiBr_4 , TiBr_4 , SnBr_4 , PBr_3 , AsBr_3 , SbBr_3 , SnCl_4 and CCl_4 , 3301.
 resources of U. S. in 1925, 1167.
 soln. of PBr_3 in, ionic mobilities of, 1580.
 as solvent in electrochemistry of non-aq. solns., 35207.
 spectrum of, 7022, 857, 10612, 22251, 2430, 24314, 26097, 2845, 31582.
 system: water-, 10153.
Bromine, analysis, detn., 215.
 detn. in org. substances, 2240, 3857.
 detn. in water, 1612.
Bromine chloride, formation of, 1051.
Bromine compounds, detn. in mixts. of compds. contg. O and H, 1777.
 effect on inflammability of H, 11804.
Bromine iodide. See *Iodine bromide*.
Bromine-iodine number. See *Iodine-bromine number*.
Bromine ion. See *Bromide ion*.
Bromine number, tertiary, of drying oils, 503.
Bromochlorophenol blue, 11115.
 spectral transmission curves for aq. solns. contg., 1773.
Bromocresol blue, spectral transmission curves of aq. solns. contg., 1773.
Bromocresol green, 11113.
 spectral transmission curves for aq. solns. contg., 1773.
Bromocresol purple, as indicator for cinchona alkaloids, 985.
 optical properties of, 22354.
Bromocyanogen. See *Cyanogen bromide*.
Bromoform (*tribromomethane*), activity of, 15812.
 anesthesia, Br excretion following, 3978.
 effect on body temp., 1678.
 effect on fermentation, 30672.
 Kerr effect of, time lag of, 35394.
 mixt. with CCl_4 and with SbBr_3 for mineralogical analysis, 1781.
 whooping cough treatment with, 770.
 —, nitro-. See *Bromopicrin*.
Bromomethyl blue, spectral transmission curves of aq. solns. contg., 1773.
Bromophenol blue, spectral transmission curves for aq. solns. contg., 1773.
Bromophenol red, 11114.
 spectral transmission curves for aq. solns. contg., 1773.
Bromopierin, reaction with cyclohexene in MeOH, 52.
Bromothymol blue, optical properties of, 22354.
Bromural, system: pyramidone-, 40207.
Bronchitis, respiration in, effect of exercise on, 18434.
 respiration in, effect of residence in O chamber on, 14881.
Bronchoconstriction, effect of potassium iodide on, 39773.
Bronnert, Emile, biography, 2795.
Bronze. (See also *Copper alloys*; *Gun metal*; *Tin alloys*.)
 aluminum, 7267, 30362, 35942.
 changes in, 2245.
 deoxidation in making, 882.
 in engineering, 2653.
 heat treatment of, 3332.
 Mn in, 1955.
 review on, 3882.
 transformations of, 560.
 viscosity at high temps., 2454.
 aluminum detn. in, 1433.
 analysis of, 2655.
 ancient Egyptian, 199.
 ancient Transvaal, 2653.
 bearing-metal, 3593.
 bearing metals of, analysis of, methods of A. S. T. M. for, 1158.
 book: Al, Powder and Al Paint, 3692.
 copper detn. in, 1618.
 corrosion by cellulose bleach liquor, 3456.
 exudations on, 48.
 fluxes for, 3035.
 hardness and tensile strength of, 1614.
 intermetallic compds. in, 3871.
 manganese, Pb detn. in, 3580.
 phosphor-, coating with, by spraying, 1960.
 phosphor, Hall effect in, temp. and, 2216.
 production of, 1793.
 for pulp and paper industry, selection and purchase of, 3870.
 silicon, deoxidation in making, 882.
 soly. of H in, 553.
 specifications of A. S. T. M. for various kinds and castings of, 1157.
 structure of, 1952.
 testing app. for, 3492.
 thermal expansion coeff. of, effect of plastic deformation on, 1431.
 tin, properties of, alteration by pressing and forging, 1091.
 trolley wire of, specifications of A. S. T. M. for, 1158.
Brookite, in granite, temp. range of formation for, 2241.
Broom, ext. of, spleno-contraction and polyglobulia by, 2034.
Broom corn. See *Sorghum*.
Broussonetia papyrifera, latex from, 2575.
Brown coal. See *Lignite*.
Brownian movement, coagulation under, nomenclature of, 2831.
 in gases, 1394.
 history of, 37867.
 lecture expt. on, 2203.
 light and, 3515.
 of particles at diff. pressures and in diff. gases, 1393.
 rotatory, on torsion balance, 1577.
 theory of, for systems with several diff. coexisting temps., 37867.

- Brown substitute.** See *Rubber substitutes*.
- Brucella**, *meliensis* and *B. abortus*, agglutination of, 1675⁹.
- Brucidine**, and derivs., 3366^{8,9}.
- , **dihydromethoxymethyl-***, and derivs., 3367^{1,2,3,4}.
- , **dioxymethoxymethyldihydro-***, and isomer and methiodide, 3367⁴.
- , **ethoxymethyldihydro-***, and methiodide, 3367⁵.
- , **nitromethoxymethyldihydro-***, 3367⁴.
- , **oxymethoxymethyldihydro-***, 3367².
- , **tetrahydromethoxymethyl-***, and derivs., 3367^{7,8,9}.
- Brucidone***, and semicarbazone, 3367⁴.
- Brucine**, allomucate and mucate, 1258⁹.
antagonism to strychnine, 2507⁸.
chloriodoacetate, 1963⁹.
compd. with fluoboric acid, 1070⁴.
cyanoruthenite, 3846⁵.
derivs., 3366⁸.
detection of, 2757⁹.
detn. in nux vomica and St. Ignacious bean, 2165⁹.
effect on muscle, 3965⁷.
hexosemonophosphate of, prepn. of, 3075⁸.
manuf. from nux vomica, 2168⁸.
1 phenylethanesulfonate, 2673⁹.
salt of bromochloropyruvic acid, 3600⁸.
salt of *S*-(*m*-carboxyphenyl)-*S*-methyl-*N*-(*p*-tolylsulfonyl)sulfilimine, 1253⁹.
salts of boro α -hydroxyisobutyric acid and of boro- α -hydroxy- α -methylbutyric acid, 3599^{1,2}.
salts of *dl*- α -sulfovaleric acid, 3600⁹.
specific heat of, 3291⁸.
spectrum of, 915⁴.
trichloroacetate, 3905⁹.
- Brucine**, **tetrahydro-**, and derivs., 3366⁸, 3367¹.
- Brucite**, infra-red absorption of, 2431⁸.
iron-, 1781⁹.
- Brushite**, from Austria, 41⁸.
- Bryonia dioica**, compn. of, 1327⁸.
- Bubbles**, air, in water, mobility of, 2595².
- Bubonic plague**, treatment by intravenous injections of colloidal I, 3976⁴.
- Buchu**, leaves, anatomy of, 2049⁷.
- Buck bean**, glucosides from leaves of, effect on gastric juice secretion, 453⁴.
- Buckram**, molded articles from scrap, P 3710⁸.
- Buckthorn**. See *Frangula*.
- Buckwheat**, decomn. in soil, food substances from, 1514⁷.
detection in flour, 288⁹.
- Budde effect**, in drying Cl, 3561⁸.
- Buds**, formation of fruit, fruit-spur compn. in relation to, 3217⁴.
stimulating action of warm baths on dormant, 115⁷.
- Buffer action**, 2279¹.
acidity and, 3149⁹.
with bases in soils, 977³.
of blood and body fluids, 3376⁷.
of blood of *Maia squinado*, 612⁴.
detn. in gastric juice, 1998⁷.
in electroplating, 860⁹.
in homogeneous and heterogeneous systems, 1396⁴.
in muscle and its effect on circulatory function, 3223⁴.
in soils, 3697¹, 4003⁴.
of soils and its relation to development of soil acidity from use of (NH₄)₂SO₄, 3245⁴.
of test meal, relation to gastric contents, 3947².
theory of, 687⁷.
of tissues, 2637, 765⁹.
of urine, 3920¹.
- Buffer capacity**, detn. of, 1580⁸.
- Buffer number**, in brewing, 150⁹.
- Buffer substances**, effect on soly. of uric acid, 595⁸.
in milk, 2744⁴.
in wort and beer, 2355², 4012².
- Buffer systems**, 2482⁹.
of blood, H-ion concn. and, 3074⁵.
citrate, 1586⁷.
effect on dye penetration into *Nitella* and *Valonia*, 1130⁸.
hydrogen-ion concn. of, detn. of, 1396⁹.
temp. and, 2485⁹.
at varying temps., 1580².
of hydrogen-ion concn. range between *pH* 2.2 and 6.0, 933⁴, 2004⁹.
iodine-acetone reaction in, 1583⁹.
reaction of physiol., H-ion concn. and, 1275¹.
reaction velocities in, compd. catalytic catenarities and, 2834⁴.
salt errors of indicators from standard alk., 871⁹.
in sunflower sap, 3650⁹.
in textile industry, 1552⁹.
in tissues as indicated by CO₂ capacity of body, 1822⁹.
titration of solus., 750⁸.
- Buffing**, of metals, compn. for, P 2540⁸.
- Bufo**. See *Toads*.
- Bufotalin**, effect on heart, 1314⁴.
- Bufotenine**, from toad liver, 3680⁹.
- Bufotoxin-W**, effect on heart, 1314⁴.
- Building materials.** (See also *Bricks*; *Paper board*; *Roofing*; *Sound-absorbent materials*; *Shingles*; *Stone*, artificial; *Tile*; *Wood substitutes*.)
asphalt mixt. for, P 2369⁴.
bituminous, P 647⁹.
blocks, P 1339⁹, P 1697³, P 2179¹.
blocks, etc., P 311⁴.
book: An Introduction to Building Science, 2985¹.
from clay, P 2545⁷.
coloration of, 2544⁸.
compn. board, P 2974².
compn. for shingles, etc., P 3442⁸.
compn. of, effect of humidity on, 2369¹.
electroplated shingles, etc., P 3317¹.
fatigue testing of, P 2965⁹.
fiber board, P 1877⁹.
fire-resistant, 4043⁹.
fire tests of, specifications of A. S. T. M. for, 1157⁹.
gypsum wall board, P 1697⁴.
hollow, of cement, P 638¹.
lime sludge for, P 2973⁸.
metallic, heat treatment of, 3334⁴.
from peat, P 311⁴.
plaster board, P 311¹.
plaster board from cornstalks, etc., P 1693⁴.
plaster board, gypsum product for, P 3115².
plastic, P 2174⁸.
rubber as, for chem. engineering, 1685⁷.
from sawmill waste, 2555⁷.
sheets, etc., P 311⁵.
shingles, compn. for, P 483⁹.
electroplating of, app. for, P 2617⁹.
from silica and asbestos fiber, P 311¹.
silica stones, P 998⁹.

- slabs, moldable compn. for, P 631⁴.
 from slag in form of bricks, slabs or tiles, P 728⁴.
 standard, 2777².
 stonewood, manuf. and use of, 1339².
 terra-caoutchouc block, P 836⁷.
 wall board, P 2778⁹, P 3442².
 wall board from wood waste, P 2546¹.
 wall boards, etc., P 186³.
Bulbocapnine, review, 4019⁷.
Bullets. See *Projectiles*.

- Butyrobetaine**, α -hydroxy- γ -trimethyl-, synthesis of, 1631^a.

- 1 - Butyronaphthone**, γ - trichloro - β - hydroxy-, 3614³.
- Butyrene** (*4-heptanone*), 4-anilinosemicarbazone, 689².
diethyl mercaptole and di-Et sulfone, 2884^{3,9}.
enolization of, 2679¹.
oxime, ZnCl₂ addn. compd., 3346⁷.
reaction with NOCl, 3888⁸.
- Butyronitrile**, reaction with H₂S, velocity of, 1454¹.
---, α -amino- α -ethyl-, and -HCl, 1795¹.
---, α -amino- α -methyl-, and HCl, 1795¹.
---, α -anisoyl- α , β -diphenyl-, 1651³.
---, γ - anisoyl - α - (p - nitrophenyl) - β -phenyl-, 1651³.
---, γ -benzyloxy-, 1630².
---, γ -chloro- α -hydroxy-, and esters, 1631⁹.
---, γ -dimethylamino-, 2270⁹.
---, β -hydroxy- γ -phthalimido- \dagger , and benzoate, 62³.
---, γ -phenyl-, reaction with H₂S, velocity of, 1454¹.
---, γ -1-piperidyl-. See *1-Piperidinebutyronitrile*.
- Butyrophenone**, and semicarbazone, 908⁶.
---, α -benzyl- α -phenyl-, and oxime, 1626⁹.
---, α , β -dibromo-, 3901⁶.
---, α , β -di-1-piperidyl-, 3905⁴.
---, α -ethyl- α -phenyl-, and oxime, 1626⁹.
---, 4-hydroxy-5-isopropyl-2-methyl-, and oxime, 1974⁶.
---, 4-hydroxy-3-propyl-, and semicarbazone, 1974⁷.
---, β -methoxy-, 3901⁶.
---, α -methyl- α -phenyl-, 1626⁹.
---, γ -1-piperidyl-, 2271¹.
---, γ -trichloro- β -hydroxy-3,4-dimethoxy-, 3614³.
---, γ - trichloro - β - hydroxy - p -methyl-, 3614².
- o*-Butyrotoluide, β -chloro-, 1979⁷.
p-Butyrotoluide, β -chloro-, 1979⁷.
Butyryl chloride, prepn. of, 3043³.
---, α , α -dichloro-, 2875⁹.
Buzzi, Tullio, obituary, 1727⁷.
- Cabbage**. (See also *Sauerkraut*.)
ash of, correction of anemia on milk diets with, 2017⁷.
calcium and P content of, 464⁹.
compn. of, 2944³.
effect on blood sugar, 1847³.
effect on skin sensitiveness to external irritants, 2323².
exts. of blue, as indicators, 2446⁴.
leaf cytoplasm, ether-sol. substances of, 2489³, 3648⁷.
proteins of, 1503³.
storage and transportation diseases of, due to suboxidation, 3685³.
therapeutic effect of, 2920⁷.
- Cables**, P 2438⁹, P 3405².
from alloys, P 729⁶.
annealing loaded, P 2870³.
coating with Pb and rubber, P 363².
gas films in high-tension, 3836⁶.
insulation for, P 292⁷.
insulation resistance of, kenotron study of, 22⁶.
lead sheaths of, corrosion due to stray currents, 3836⁴.
papers, acidity detn. in, 1319⁶.
rubber-covered, 3489^{4,3}.
rubber-insulated, specifications of A. S. T. M. for, 1158¹.
rubber-insulated, specifications of V. D. E. for, 2818^{4,5,6}.
sheathing for submarine, alloy for, P 222⁹.
Cacao, analysis of products, 285⁸.
boron compds. in, 3990².
fermentation of, 2341³.
fermenting beans, app. for, P 2515⁴.
milk protein detn. in products contg., 1500⁹.
nitrogen in by-products, plant-food value of, 1324⁹.
products, microscopy and valuation of, 3400³.
shell detn. in powd., 3990².
shells, detection of, 1156⁴, 3400³.
shells, mucilaginous cell content of, 3400².
valuation of, and its products, 285⁸.
- Cacao butter**, adulteration of, detecting, 1040⁶, 4080⁹.
calcium-contg. ash in, 1156⁷.
detn. of, 3704⁹.
fatty acids of, analysis of, 660⁹.
germ content of, 2051⁷.
- Cachexia**, ammonia content of blood in, 769⁹.
basal metabolism in, 3675⁹.
blood plasma in, colloidal stability of, 1302⁹.
of fetal organs, 2020³.
from fluorine salts, 1678³, 2331².
treatment for, 3662⁴.
- Cacodylic acid**, oxidation of, 875¹.
prepn. of, from Me₃As, 3043¹.
sodium salt, decompn. of, effect of microbes and of org. tissues on, 2283³.
sodium salt, testing, 797⁹.
- Cacodyl oxide**, oxidation of, 3800³.
- Cadaverine** (1,5 - pentanediamine), spectrum of, 206⁷.
---, *N*-phenethyl-, and salts, 566⁷.
---, *N* - (1,2,3,4 - tetrahydro - 2 - naphthyl)-, and salts, 566⁶.
- Cadavers**, aqueous humors in, H-ion concn. of, 1305¹.
arsenic content of ashes of, 109¹.
ash in As poisoning, 3920⁸.
by-products from of old or diseased animals, 663².
datura detection in, 33⁸.
detection of poisons and drugs in old, 1664³.
heart gas, app. for detg., 3920⁸.
putrefaction detn. in, 1827¹.
- Cadinene**, from cedar wood oil, 2555².
and compds. related to, 577⁴.
- Cadmium**, anodes of, periodic phenomenon at, 695⁹.
anodic behavior of, in EtOH solns. of NaCl, NH₄Cl and NH₄NO₃, 2417².
anomalous dispersion of, 2102².
cathodes, disintegration of, 1928⁴.
coating Al and Al alloys with, corrosion prevention by, 3883³.
coatings, corrosion of, 3340⁹.
coating with, and its soly. in acids and foods, 3340³.
colloidal, cataphoresis at small electrolyte concns., 1740⁷.
contact resistance of, 2216³.
crystal systems of, detn. of, 689⁹.
effect on Al, 218¹.
elec. resistance at low temps., 3810⁴.
elec. resistance of molten, 3014¹.
electrodeposited, for prevention of corrosion, 1765⁴.

- electrodeposits of, 38057.
 electrode potentials in dil. solns. with Cd-
 SO₄, CdCl₂, CdBr₂ or CdI₂, 2836^a.
 electrokinetic potential of, 1018¹.
 electroplatings on Al and duralumin, corrosion
 by sea water, 708¹.
 electroplating with, 535⁴, P 862⁹, 3315².
 equil. with SnCl₄ in fused state, 2834⁴.
 fluidity of, 2641⁴.
 heat of fusion and sp. heat at high temps.,
 2091⁷.
 malaria treatment with, 2934¹.
 pharmacol. action of, 1310⁴.
 pigments contg., 1190².
 pigments of, for rubber, 2573⁸.
 precipitation of Ni and Co by, 542¹.
 resonance radiation of, effect of magnetic
 field on polarization of, 3312².
 reviews, 1079⁷, 3586⁸.
 satn. limit in Ag, 1620⁸.
 secondary radiation and polarization of
 resonance radiation in, 3158⁹.
 soly. in brass, 3593⁸.
 spectrum of, 157⁸, 205⁹, 359⁸, 857⁹, 1062⁴,
 2428⁸, 2609⁷, 2844³, 3022², 3313¹, 3554³,
 3560⁴, 3828⁸, 3829⁹.
 spectrum of, fluorescence of, 2433⁸.
 surface tension of liquid, 3147², 3590¹.
 system: Sb-, 1618¹.
 system: Cd-PbCl₂-CdCl₂-, isotherm detn
 in, 1743².
 system: Mg-, 3528⁹.
 system: Sn-, 3802¹.
 ternary systems contg. Ag and, 1620⁹.
 thermal expansion coeff. of, effect of plastic
 deformation on, 1432².
 viscosity coeff. of, 2406⁹.
Cadmium, analysis, cupferron in, 3791³
 detection, 2858⁴, 3327⁸.
 detection in glass, 2772².
 detn., 1237⁴, 3575⁸, 3581⁸.
 detn. and sepn., 3849⁹.
 detn. and sepn. from Zn or Sn, 1071³.
 detn. in Mg Alloys, 1074⁴.
 detn. in tin, 3172⁸.
 sepn. from Ti, 3850⁹.
 sepn. from Zn, 3581⁷.
Cadmium, metallurgy of, P 1003⁴.
 electrolytic recovery in Tasmania, 707⁴
 refining, P 3885¹.
 review, 1080¹.
Cadmium alloys. (See also "system" under
 Cadmium.)
 aluminum-, 218¹.
 aluminum-Zn-, 47⁸.
 amalgams, elec. cond. of, 3037⁴.
 antimony-, magnetic susceptibility of, 2655⁴.
 antimony-Ag-, P 2116⁸.
 antimony-, surface tension of molten,
 3590².
 bismuth-, electrolysis of, 3809⁸.
 copper-Mg-, P 1443⁹.
 copper-Ni-Ag-, P 3180¹.
 copper-Zn-, constitution and phys. properties
 of, 3593⁸.
 elec. resistance of certain, 3014².
 gold-, magnetic susceptibility of, 3811⁷.
 lead-, P 3041², P 3886^{1,2}.
 lead-Bi-, electrolysis of, 3809⁸.
 lead-, elec. resistance of, 3777⁴.
 magnesium-, P 2658⁸, 3593⁸.
 magnesium-, dissolv. rate of, 3339¹.
 silicon-Ag-, 1083⁸.
 silver-, tarnish and phys. properties of,
 1956².
 tin-, elec. resistance of, 3777⁴.
 Ludwig-Soret phenomenon in, 560⁴.
 magnetic susceptibility of, 3811⁸.
 zinc-, 218⁹.
 zinc-, crystal growth in, 1089⁸.
Cadmium borofluoride, prepn. of, 214⁸.
Cadmium bromide, addn. compd. with
 thiocarbonyl, 67⁴.
 electrode potentials of Cd in dil. solns. of,
 2836⁸.
Cadmium carbonate, crystal structure of,
 679⁸.
Cadmium cells. See "standard Cd" under
 Cells, voltaic.
Cadmium chloride, electrode potentials of
 Cd in dil. solns. of, 2836⁸.
 equil. with Sn in fused state, 2834⁴.
 system: BeCl₂-, thermal analysis of, 1216⁸.
 system: Pb-Cd-PbCl₂-, isotherm detn. in,
 1743².
Cadmium compounds, with alkali halides,
 1772¹.
 ammino-, 1235⁴.
 ammino-, displacement reaction in, 1118².
 with biuret and Cu or Ni, 866⁹.
 with chlorates and perchlorates as detona-
 tors, 1184⁸.
 complex oxalates, 3322⁸.
 with cupferron, soly. of, 3791³.
 disulfite and diselenite complex, 3169^{1,2}.
 heterometallic Pt-contg., rearrangements in
 heterometallic, 1417².
 with pyridine, 2231⁹.
Cadmium halides, elec. cond. and transport
 nos. of, in fused acetamide, 3290⁹.
Cadmium hydroxide, effect on decompn of
 H₂O₂ and on its catalysis by Pb(OH)₂
 or Ag₂O, 2088⁸.
Cadmium iodide, elec. cond. in EtOH and
 acetone soln., effect of I on, 1913⁷.
 elec. cond. of, in acetonitrile, 2088¹.
 electrode potentials of Cd in dil. solns. of,
 2836⁸.
 ion emission from, 1927⁸.
Cadmium ion, activity of H ions and, in salt
 solns., 3149².
Cadmium mercury sulfide, in analysis, 1424³.
Cadmium ores, of Sardinia, Montepone, 3032⁸.
Cadmium oxalate, decompn. product of,
 prepn. of, 543².
 soly. and elec. cond. of, 3322².
Cadmium oxides, Cd₂O, 543².
 CdO, heat of reaction with Mg and Al,
 3572⁷.
Cadmium potassium chlorides, 3570⁸.
 formation of, affinity in, 1772¹.
Cadmium potassium cyanide, phase-rule
 study of, 1215⁸.
Cadmium potassium iodide, formation of,
 affinity in, 1772¹.
Cadmium salts, effect on yeast enzymes, 1465⁸.
 tuberculosis treatment with, 963⁹.
Cadmium selenide, crystal structure of,
 1210⁹.
Cadmium sodium chloride, formation of,
 affinity in, 1772¹.
Cadmium sulfate, dielec. consts. of, 608⁴.
 electrode potentials of Cd in dil. solns. of,
 2836⁸.
Cadmium sulfide, in analysis, 1424³.
 analysis and prepn. of, 1940⁷.

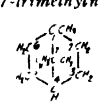

- colloidal, adsorption by ppts. of same material, 1388³.
 effect of light on ZnS-, 1595².
 induced pptn. of, 2825².
 mixt. with ZnS, prepn. and properties of, 1190².
 prepn., properties and uses of, 2762¹.
Cadmium telluride, crystal structure of, 842².
Cadmium thioselenides, 1190².
Cadmium triethylsulfonium sulfate, 2623¹.
Cadmopone. See "cadmium" under *Lithopone*.
Cæsium. See *Cesium*.
Caffeidine, vanadylmalonate, 2230⁸.
Caffeine (1, 3, 7 - trimethylxanthine). (See also *Coffee*; *Tea*.)
 antagonism to adrenaline, 2323².
 antagonism to novocaine, 3680².
 and citrate, effect on heart, 1150².
 in coffee exts., 1155⁹.
 compds. of, 2359².
 compd. with antipyrine and citric acid, analysis of, 1871^{1, 3}.
 decompn. by bacteria, 936¹.
 decompn. by soil organisms, 788⁶.
 detection of, 2757⁶.
 detn. in antipyrine compd. with caffeine and citric acid, 1871³.
 in coffee, 969⁹, 1156¹, 2747⁸.
 in tea, 969⁹, 1155⁹.
 diuretic action of, 1851⁸.
 diuretic action of, inhibition through mid brain narcosis, 3970².
 effect on acid base equil., 1149².
 on blood uric acid, 137².
 on body temp., 1678⁸.
 on capillaries, 3982⁴.
 on cellular respiration, 123³.
 on color of frog, 2318².
 on gaseous metabolism of the brain, 3978².

 pharmacol. action of, 962⁹.
 removal from coffee, P 466², P 2342³, 2747⁸, P 3401⁸.
 soly. of, 1395⁸.
 system: chloral hydrate-, soly. of, 1395².
 vasoconstricting effect of, 2336².
Cajaput oil, 775⁴, 1870⁷.
Calamine, cadmiferous, of Montepone, Sardinia, 3032².
Calamintha nepeta, oil of, 2165⁸.
Calcareous substances, in shells of oysters, compn. of, 3235⁸.
Calcein, hypo, in eclampsia, 1844².
 from parathyroid hormone, 1838⁸.
 radium effect on, 1849⁸.
Calcification. (See also *Bones*.)
 calcium salt deposition in areas of, 3230⁸.
 of cartilage (tracheal), 3662⁸.
 effect of summer- and winter-produced dry milk (irradiated and non-irradiated) on, 3071⁷.
 of kidney, effect of Ca injections on dystrophic, 3970⁸.
 metastatic, in organs after injections of parathyroid ext., 957⁸.
 in old age and in pathol. children, 3662⁸.
 of osteoid tissue, effect of parathyroid ext. on, 2732⁸.
 scleroderma with, 1487⁴.
Calcination. (See also *Kilns*; *Lime*.)
 of carbonates, P 2537⁴.
 for chlorine detn. in perchlorates, 2447¹.
 of limestone, effect of steam on, 2535⁴.
 of lithopone, P 2390².
Calcite. (See also *Aragonite*; *Calcium carbonate*.)
 classifying, 1080⁴.
 color change and luminescence in, submitted to Becquerel rays, 3561¹.
 crystal reflection from, refraction and dispersion of x-rays in, 2100².
 crystals, magnetic quality in, 2419¹.
 crystals, optical axis of, apparent resolution with Fedorow stage, 2420⁸.
 crystal structure of, effect of temp. on, 1907⁸.
 elec. cond. of, with high field strength, 3304⁸.
 as filler for pigments, 656⁴.
 fluorescence of, 1056⁸.
 of Hungary (Gömör), 1810².
 from hydrocalcite, 1911⁸.
 optical anomalies of, under pressure, 3583⁸.
 optical axis of, apparent resolution with Fedorow stage, 853⁸.
 in plutonic rocks and pegmatites, 42⁸.
 Röntgen ray absorption edge of Ca in, 206⁴.
 rose, 1948².
 spectrum of, 1410⁷.
Calcium. (See also *Alkaline earth metals*; *Calculi*.)
 absorption and fixation of, in body, 3662².
 absorption of, from intestine, 2333⁹.
 in relation to gastric acidity, 2026⁴.
 in rickets, 1831⁴.
 absorption of H by, 1735⁷.
 absorption of mouth-administered, 456⁸.
 in animal organism in pregnancy, 1839⁴.
 in animal tissue, 1141³.
 antagonism to apomorphine, 2938¹.
 antagonism to K, 2741¹.
 in blood, 2305⁷, 2503⁸.
 in bone fractures during period of callus formation, 3671⁹.
 in dermatitis, 2930⁸.
 in diabetes mellitus, 2728⁸.
 in diseases of thyroid with increase of basal metabolism, 3392⁸.
 in edema, 3952⁸.
 effect of adrenaline on, 2737⁷.
 effect of bone transplantation on, 2504⁴.
 effect of insulin on, 2507⁴, 3940⁷.
 effect of Mg on, 3225⁸.

- effect of Röntgen rays on, 1672⁹.
 effect of strychnine on, 1493⁷, 1497¹.
 effect on excitability of vaso-dilator nerves, 1849⁹.
 effect on tolerance to Mg, 1838⁶.
 of hens, egg production and, 1839⁹.
 hypertension and, 2153¹.
 of Indians in health and in disease, 3391⁵.
 after ingestion of CaCl₂, 2300⁷.
 in jaundice, 2501⁴, 3670⁹.
 in paralysis agitans, 3081².
 in parathyroidectomy, effect of ultra-violet irradiation on, 610².
 parathyroid hormone and, 3084⁹.
 P and, 2020⁹.
 in puerperal eclampsia, 770².
 ratio to K ions in narcosis, 1496⁶.
 regulation by endocrine glands, 3955⁴.
 after resection of mesenteric nerve, 957³.
 in tetany, 2028⁹.
 in tetany, effect of ultra-violet rays on, 964².
 of thyroparathyroidectomized dogs, effect of pregnancy and lactation on, 3951⁹.
 in blood and organs under influence of light and of high altitude, 2279⁹.
 in blood and urine, effect of parathyroid ext. on, 3233⁴.
 blood clotting and, 3223³.
 in blood plasma, detn. of concn. of, 1278⁷.
 menstruation and, 2931².
 -raising principle of bovine parathyroid glands, 2142⁹.
 in thyroparathyroidectomy, 3678⁴.
 in tuberculosis, 1301⁹.
 in blood serum, 425⁵, 1141⁴.
 in asthma, 3079⁶.

 Röntgen-ray absorption edges of, in calcite,
 gypsum and fluorite, 206^a.
 sensitivity of heart to, relation to its own
 content, 763^a.
 soaps, formation in feces in jaundice, effect of
 alkalis and alk. earths on, 2932^a.
 in soil deficient in superphosphate, effect of
 CaCO₃, CaCl₂, mineral phosphate and
 superphosphate on content of, 4007⁷.
 spectrum of, 163, 19^a, 359^a, 705^a, 858^a, 1060^a,
 2609^a, 3020^a, 3022^a, 3829^a.
 spectrum of, in O- and B-stars, 3020^a
 of spinach, utilization of, 3654^a.
 system: Al-Si-, 886^a.
 therapy with salicylic acid and, 4018⁷.
 in tissue fluids normally and in spasmophilia,
 3670^a.
 tuberculous treatment with, 610^a.
 in urine, 1141^a.
 in uterus, effect on activity, 1298^a.
 in wheat and flour, 1154^a.
- Calcium, analysis.** (See also *Lime*.)
 detection, 2233^a.
 detection in Mg alloys, 2234^a.
 detection in presence of Ba and Sr, 3030¹
 detn., 28^a, 3681^a, 717^a, 1072^a, 1076^a,
 1942^a, 2486^a, 2631^a, 3581^a, 3852^a.
 detn. in Al alloys, 1953^a, 2653¹.
 in blood, 2486^a, 2709^a, 2709^a, 3379^a.
 in glycerophosphate sirups, 155^a.
 in Pb alloys, 368^a.
 in Mg alloys, 1074^a.
 in organs, 2014^a.
 in silicate slags, 3849^a.
 in soils, 1513^a.
 in urine, 2709^a.
 in water, 547^a.
 detn. of Sr in presence of Ca, 1072^a.
 sepn. from Mg, 1072^a.
- Calcium acetate**, deposit on gas main, 3263⁷.
 fermentation (thermophilic) of, 2009^a.
- Calcium alloys.** (See also *Alkaline earth al-*
loys; and "system" under *Calcium*.)
 amalgams, elec. cond. of, 3037^a.
 bariun-¹³⁷Pb, as bearing metals, 3036^a.
 magnesium-, P 2656^a.
- Calcium aluminates.** (See also *Alkaline*
earth aluminates.)
 in aluminum-cement clinker, mineralogy of,
 1528^a.
 crystals, x-ray diffraction of, 2971⁷.
- Calcium aluminosilicates**, natural and ar-
 tificial, 3280^a.
- Calcium arsenate**, as insecticide, airplane
 dusting of, 793^a.
 as insecticide, for boll weevil, Na fluosilicate
 vs., 794^a.
 "cloud drift" vs. regular method of dust-
 ing, 794⁷.
 for hemlock spanworm, 3249^a.
 insecticides, P 2354¹.
 in insecticides, effect on foliage, 1515^a.
- manuf. of, P 305^a, P 630^a, P 993^a, P 1336^a,
 P 1873^a, P 2173^a.
- Calcium bromide**, as catalyst for metaldehyde
 prepn., 54^a.
 hydrolysis by steam, 1397^a.
 manuf. of, 1333⁷.
 official and sirup of, in French Pharm., 707¹.
- Calcium carbide**, compn. of com., 1934^a.
 crystal structure of, 1210^a.
 detn. in cyanamide, 2448¹.
 explosions from, 2709^a.
 feeding device for C₂H₂ generators, P 343^a.
 manuf. of, 2437^a.
 in elec. furnace, 21^a.
 elec. furnace for, 1596⁷.
 elec. furnace for, heat balance in, 2614^a.
 in elec. furnace in Europe, 2227⁷.
 plant at Langerbrugge, 3025^a.
 production of, early days of, 1763^a.
 reaction with N and S in KCNS, 366^a.
 sulfur and P removal from iron and steel
 with, 3178^a.
 system: CaO-, 159^a.
- Calcium carbonate.** (See also *Alkaline earth*
carbonates; *Aragonite*; *Calcite*; *Chalk*;
Whiting.)
 absorption of SO₂ by, app. for speeding,
 P 2402⁷.
 analysis of, 2234^a.
 cascin contg., effect on decompn. of Pb
 arsenate, 3416^a.
 as catalyst in Cl₂O decompn., 3530^a.
 as catalyst in formic acid decompn., 3530^a.
 colloidal, "after-coagulation" of, 2587^a.
 colloidal, effect of MgCO₃ on, 2830^a.
 colloidal MgCO₃, SrCO₃, BaCO₃ and, re-
 ciprocally protective effect of, 2587^a.
 crystal structure of, 679^a.
 crystals, x-ray diffraction of, 2971⁷.
 deposits of Longueil, 627^a.
 detn. in fluorspar, 720¹.
 detn. in nitrocellulose, 648^a.
 in diet, Ca and P content of chicks from
 hens with and without, 3389^a.
 dissoen. pressure of, 3301¹.
 dissoen. temp. of, 2971⁵.
 effect on carbonization of coal, 3121^a.
 on soil, 3414^a, 4007^a.
 on soil and on plant growth, 4007⁷.
 on soil reaction, 3413^a.
 on soil solns., 2952⁷.
 equil. with dissolved Ca and NH₄Cl, effect
 of adsorbents on, 3510^a.
 as fertilizer, 3700¹, 4007^a.
 filtration of, 2516^a.
 hexahydrate, decompn. of, 2212^a.
 hexahydrate, d. of, 679^a.
 hydrogen-ion concn. of solns. of CaCO₃
 and Ca(HCO₃)₂, 3630^a.
 hydrolysis by steam, 1397^a.
 in pearls, spectrum (Röntgen) of, 678^a.
 powder pellets of, hardness of, 3321^a.
 precipitated, P 3429^a.
 reaction with SiO₂ and with Mo oxide, ve-
 locity of, 3798^a.
 recrystn. of, effect of water on, 4041^a.
 refractive index of, reflection and, 3557^a.
 soly. of, 921^a.
 spectrum of, 360^a.
 system: CaO-CO₂, 351^a.
 thermal decompn. of Ca(HCO₃)₂, 3908^a.
- Calcium chloride.** (See also *Alkaline earth*
chlorides.)

- action on Cu, 2855¹.
 activity in solns. of, 1051⁹.
 antiinflammatory effect of, 3086⁵.
 of blood in gastroduodenal ulcer, 959⁷.
 from brines, P 2173⁶.
 as catalyzer for reaction between naphthols and NH_3 , 3803⁸.
 in cement (slag), 3259³.
 in cheese making, 1153³, 3986^{2,4}.
 concrete curing with, 2177⁹.
 deliquescent properties of, 519².
 diffusion of, 3523⁹.
 diffusion of Na_2CO_3 into, Liesegang ring formation in, 1911⁸.
 diuretic action of, 3085⁹.
 for dust prevention, specifications of A.S.T.M. for, 1157⁹.
 effect on acetylcholine action on blood vessels in perfusion of surviving dog leg with calf's blood, 459³.
 on acidity of juice of corn plant, 2491¹.
 on amoebocytes of marine invertebrates, 3982⁹.
 on anesthetic action of cocaine, stovaine and novocaine, 1845⁷.
 on bile duct, 954³.
 on equil. between EtOAc and its sapon. products, 1048⁶.
 on gall bladder, 3962³.
 on gastric secretion, 2935⁵.
 on heart, 1489⁹.
 on hydraulic cement, 3724¹.
 on irradiated, normal and partially parathyroidectomized animals, 610³.
 on leucocytes, 959³.
 on permeability of liver to dyes in shock conditions, 131⁷.
 on K, Na and Ca content of blood, 2300⁷.
 on Purkinje's fibers, 2811⁹.
 on road slab concrete, 4042⁹.
 on soil and on plant growth, 4007⁷.
 on storage of water by tissues, 3661³.
 on sucrose crystn., 337¹.
 on transverse strength of concrete, 1695⁶.
 on ventricular contraction, 3968⁸.
 elec. cond. of fused, 6⁴.
 elec. cond. of, in fused acetamide, 3298⁹.
 epilepsy treatment with, 2506⁸.
 excitability and contractibility of frog muscle as function of content of, in perfusing liquid, 3683⁵.
 flocculating power on clays, 2161¹.
 fusion of, anode effect in, 1934⁹.
 hydrolysis by steam, 1397⁴.
 mixts. with NaCl or KCl , min. toxicity to plants, 2491⁹.
 muscle contractility and, 2336⁴.
 permeability of gelatin to, 1393⁶, 1824⁶.
 pharmacol. action of Na oleate and, 2737⁴.
 reaction with $\text{H}_2\text{C}_2\text{O}_4$, 3302³.
 resources of U. S. in 1925, 1167⁸.
 sleep production by, 1498⁴.
 solns. in H_2O , vapor pressure and heat of diln. of, 1578⁷.
 system: BeCl_2 -, thermal analysis of, 1216⁵.
Calcium chromate, decompn. of, 2442⁹.
Calcium chromite, decompn. of, 2443¹.
Calcium compounds. (See also *Alkaline earth compounds.*)
 boron-, mining, P 2964⁷.
 complex oxalates, 3322⁹.
 org., 3901⁸.
 in shell of hen eggs, effect of feeding of cod-liver oil on deposition of, 761⁹.
Calcium cyanamide. (For indexing purposes the name "calcium cyanamide" is used not only for the compound CaCN_2 but also for the various commercial products, as "cyanamid," "lime-nitrogen" and "nitrolim," the chief constituent of which is CaCN_2 . See also Cyanamides.)
 agricultural value of, detn. of, 3248⁴.
 decompn. of, controlling, P 1164⁶.
 decompn. of, in soils, 1324⁶, 2522⁶.
 effect on nitrate content of soils, 2350⁸.
 effect on soil reaction, 4003⁹.
 as fertilizer, 1688³, 3700⁸.
 as fertilizer for sugar cane, 1164¹.
 fertilizer from, P 2164⁸.
 fertilizer top-dressing expts. with, 3248¹.
 heat of combustion and heat of formation of, 3814³.
 heat of combustion of, 2416².
 industry of the world, 3314⁶.
 industry, review on, 1412³.
 manuf. of, P 304⁸, P 1336¹, 2437³.
 reaction with Japanese acid earth, 2232⁶.
 as soil fumigant, 789⁷.
 spreading with soil, 3414².
 treatment of, P 2526⁴.
 urea, etc., from, P 996⁸.
Calcium cyanide, chlorine and CN detn. in, 2353².
 in control of field and mole rats, 2754⁷.
 crystal structure of, 3776⁴.
 decompn. of com., 471⁸.
 as fumigant for glasshouses, 1864³.
 fumigation of citrus with, 1864², 3251¹.
 fumigation of soil with, concn. of wireworms by baits before, 793⁷.
 housefly fumigation with, 3249⁸.
 as insecticide, airplane dusting of, 793³.
 for cranberry root worm on blueberries, 3249⁸.
 for greenhouses, 4010⁸.
 prepn. of, 713⁷.
 wireworm control with, 2755¹.
Calcium ferrates, heat of formation of, 1399⁸.
Calcium ferrocyanide, reaction with RbCl or CsBr , 1420¹, 1941¹.
 system: $\text{NaFe}(\text{CN})_6 \cdot \text{H}_2\text{O}$ -, 2592⁷.
Calcium fluoborate, dihydrate, 1235⁹.
 prepn. of, 214⁵.
Calcium fluoride, in cement industry, 3440⁸.
 detn. in fluorspar, 720¹.
 electron affinities in, 1752⁷.
 electron distribution in crystals of, 1223⁹.
 ionic equil. with HCl , 3009⁴.
 occurrence and uses of, 1167¹.
 recrystn. of, and of $\text{Al}_2\text{O}_3 \cdot \text{CaF}_2$, effect of water on, 4041⁹.
 Rontgen-ray reflection by powd. crystals of, 701¹.
 spectrum of, 2225⁴.
Calcium formate, decompn. by heat of soln. of, 3801³.
 fermentation (thermophilic) of, 2009⁹.
Calcium glucosephosphate, synthesis of, 57⁴.
Calcium glycerophosphates, analyses of, 2046¹.
 synthesis of, 57⁴.
 testing, 797⁹.
 water of crystn. content of, 2359⁴.
Calcium halides. (See also *Alkaline earth halides.*)

- ions emitted by, velocity of, 19277.
- Calcium hydride.** (See also *Alkaline earth hydrides.*)
lattice energy of, 1222⁴.
manuf. of, 1412⁴.
properties of, 1735⁸.
spectrum of, 1227⁹.
- Calcium hydroxide.** (See also "slaking" under *Lime.*)
absorption of Cl by, app. for speeding, P 2402⁸.
adding at 2nd satn. in sugar manuf., 3280⁸.
analysis of, 2234⁹.
as coagulating agent in water purification, 1506⁷.
crystals, prepn. and optical properties of, 1402³.
crystals, x-ray diffraction of, 2971⁷.
diffusion into gelatin, Liesegang ring formation in, 1911⁸.
effect on decompn. of Pb arsenate, 3416².
effect on org. matter in soil, 4002⁸.
for egg preserving, effect of NaCl on, 3990⁹.
Liesegang rings of, 3510⁷.
measuring app. for sugar defecation and satn., 3280⁷.
mixing app. for, P 1906³.
in soil, changes in, 4005⁸.
soln. of, 1330⁸.
- Calcium hypochlorite.** (See also *Bleaching powder.*)
compn. of com., and its behavior on heating, 4031⁵.
instability and explosiveness of, 1872⁴.
manuf. of solns. of, absorption app. for, P 1336².
- Calcium hypophosphite,** soly. in glycerol, 2356⁴.
- Calcium iodide.** (See also *Alkaline earth iodides.*)
cellulose dispergation in, 2187¹.
detection of, 1942⁶.
- Calcium ions,** activation of pancreatic juice by, in production of trypsin, 2909⁹.
activity coeff. of, 922¹.
adsorption by glass, 1909⁹.
antagonism to H ions on development of *Saprolegnia*, 3217⁸.
antagonism to Na ion, 1149⁵.
effect on adsorption of sulfate ion and oxalate ion by hydrous oxides of Cr, Al and Fe, 3785⁸.
- Calcium lactophosphate,** sirup of, 1520⁴.
sirup of iron lactophosphate and, 4021¹.
- Calcium molybdate,** specific heat of, 3814¹.
- Calcium nitrate,** analysis of, 2447⁵.
evapn. of solns. of, P 2763³.
as fertilizer for hops, 3248⁴.
fertilizer from, contg. Na nitrate, P 2164⁸.
granular, P 993^{1,2}.
manuf. of, P 630², 1935², P 3710³, 4032⁸.
system: H_2O —, 3302^{2,8}.
- Calcium nitride,** 3800⁸.
- Calcium oxalate.** (See also *Alkaline earth oxalates*)
detn. of, 3581¹.
fermentation (thermophilic) of, 2009⁹.
in grape vine stems, 1665².
ionic equil. with HCl, 3009⁵.
manuf. of, P 1660¹.
precipitation from $CaCl_2$ and $H_2C_2O_4$, 3302¹.
pyrolysis of, 2594⁴.
soly. and elec. cond. of, 3322¹.
- Calcium oxide.** See *Alkaline earth oxides; Lime.*
- Calcium perchlorate.** See *Alkaline earth perchlorates.*
- Calcium permanganate,** in analysis, 3852².
- Calcium phenoxides,** as insecticides, 978⁴.
- Calcium phosphates,** from basic slags, 2524⁴.
in blood serum, 1278⁹.
effect on acidity and exchangeable Ca content of soil deficient in the latter, 4007⁷.
in fertilizing expts., 1863⁴.
manuf. of, P 630³.
neutralizing value of acid, detn. of, 3987⁷.
reactions in making, app. for speeding, P 2402⁷.
reactions with ammonium citrate, 148¹.
soly. in citric acid, 2524³.
 $CaH_4(PO_4)_2$, decompn. by water, 3149⁹.
soly. of, 11¹.
 CaH_2PO_4 , effect on viscosity of acidulated flour-in-water suspensions, 2942⁸.
periodic pptn. of, 1394⁴.
 $Ca_3(PO_4)_2$, precipitation of, 187².
soly. in blood, 2021¹.
soly. of, 921^{8,9}.
- Calcium salts.** (See also *Alkaline earth salts; Calcium; Calcium ion.*)
absorption of, effect of saponin on, 922⁶.
antagonism to Mg salts, 281⁴.
base exchange of, 2410⁴.
in blood in disease, 2026⁹.
complex, of oxalic acid, 3349².
deposition in areas of calcification, 3230³.
effect on cocaine anesthesia, 3680⁴.
on electrolytic equil. of blood, 2300⁵.
on glucemia, 2333⁸.
on protoplasm of *Amoeba dubia*, 2941².
fish-blood equivs. of, effect on closed glomchidia, 3394⁹.
pharmacol. action of acetylsalicylic acid combined with, 2320².
in physiol. solns., ionization of, 506⁸.
soly. of, 921⁸.
- Calcium selenate.** See *Alkaline earth selenates.*
- Calcium selenide,** crystal structure of, 3498⁷.
- Calcium silicates,** from calcium sulfate, P 1604⁴.
hydration of, 3260⁸.
synthetic, as sources of agr. lime, 1162².
 $CaSiO_3$, solid solns. with Na_2SiO_3 , 354⁹.
system: CaS —, 2244¹.
 Ca_2SiO_4 , as fertilizer for sugar cane, 791².
- Calcium silicide,** crystal structure of, 2823⁸.
nitrogen fixation by, 28⁴.
properties of, 2113².
- Calcium sodium silicates,** x-ray diffraction measurements on, 346⁹.
- Calcium stannate,** manuf. of, P 305⁴.
- Calcium subsalts.** See *Alkaline earth subsalts.*
- Calcium sucrate,** purification of, P 1564⁷.
- Calcium sulfate.** (See also *Anhydrite; Gypsum; Plaster of Paris.*) 4043⁴.
crystn. of, 3297².
decompn. of, 2232⁷.
detn. in fluorspar, 720¹.
filtration of, 2516².
hydrates of, 1698⁴.
hydrates of, equil. of, 3801⁸.
insol. form of, reclaiming and decrease in crystn. of, 809⁷.
manganese-contg., effect of x-rays on thermoluminescence of, 1593¹.

- microscopical character of, 181¹.
 precipitated, 2408¹.
 precipitated, nature and size of particles of, 842⁹.
 reaction with BaO, 2620².
 with Na₂CO₃ and its relation to reclama-
 tion of black alkali lands, 1514².
 with water, 2623².
 set of dihydrate of, 2177¹.
 system: water-, 1047².
Calcium sulfide. (See also *Alkaline earth sulfides*.)
 crystal structure of, 3498⁷.
 manuf. of CaS₂, P 2173⁴.
 phosphors with Cu, spectrum of, 3158².

 on surface tension of liquids, 6^o.
 electrostriction in, 524^o.
 equil. between alveolar air and arterial blood during exercise, 3660^o.
 equil. between carbonate and bicarbonate ions in relation to partial pressure of, 2214^o.
 equil. with CO, 2546^o.
 with CO over Cu, 3326^o.
 with EtOH, alkyl carbonate and carbonate in aq. soln., 2091^o.
 expired, recording changes in, 597^o.
 as fermentation product, 980^o.
 fertilizers, 3100^o.
 as fire extinguisher, 4033^o.
 fire-fighting app., 3427^o.
 in foods, 2340^o.
 forest nutrition, 2042^o.
 formation of alkyl carbonic acids or their salts on dissolving, in aq. solns. of alca., 2091^o.
 formation of, by clams in low O tension, 966^o.
 from nitroacetic acid, reaction velocity const. for, 1580^o.
 by yeast enzymes, 3628^o.
 in gas, effect on corrosion of pipes, 2550^o.
 globulin compd. of, protein error of, 3915^o.
 in growth of bacteria, yeasts and molds, 2008^o.
 heat of adsorption of, by charcoal, 3535^o, 3814^o.
 by charcoal and by silica gel, 3535^o.
 pressure and, 1577^o.
 heat of disocn. of, 3547^o.
 heat of vaporization of, 692^o.
 heat transmission by radiation from, 3991^o.
 in hiccough, 3980^o.
 hydration of, 1913^o.
 indicators, 1892^o.
 inhalation of, effect on tissue reaction, 766^o.
 injections of, effect on respiration, 2730^o.
 ion, mobility in air, 2603^o.
 light scattering by, 1058^o.
 liquid, blasting cartridges for use with, P 2560^o, P 3464^o, P 4072^o.
 blasting with, P 497^o.
 viscosity above b. p., 3506^o.
 magnetic susceptibility of, 356^o.
 manuf. of, from C, P 994^o.
 in mercury interrupters, 3566^o.
 mixts. for closed systems contg. plants, app. for prepn. of, 3383^o.
 mol. heat of, 3151^o.
 mols., active section of, 2425^o.
 energy of vibration of, 3538^o.
 structure of, 15^o, 1220^o.
 nutrition of plants, 3936^o.
 orthobaric d. of, 3782^o.
 oxygen formation from, through protein chlorophyll solns., 3383^o.
 oxygen removal from, 1167^o.
 pharmacol. action of dry baths of, 2034^o.
 in photosynthesis, 2293^o.
 plant growth and, 2348^o.
 for plant growth promotion, P 473^o.
 in polluted waters in relation to death of fish, 1682^o.
 pressure of, in discharge tubes, 3155^o.
 purifying, P 2173^o.
 radiation from phys. and tech. standpoints, 1342^o.
 ratio to CO in combustion products of coal gas flames, 2782^o.
 ratio to CO in relation to fuel economy in blast-furnace operation, 2112^o.
 reaction: $2CO + CO_2 + C$, 1915^o.
 reaction: $3Fe + 2CO = Fe_3C + CO_2$, 3335^o.
 reaction velocity of Cu-Au alloys in, 2211^o.
 reaction velocity with carbonized fuels, 1340^o.
 reaction with sodium acetylides, 54^o, 55^o.
 recorders for, 2577^o.
 recorders for, flue gas control with, 641^o.
 recovery from flue gases, 3715^o.
 recovery in fermentation, 2045^o.

- refractive index of, effect of magnetic fields on, 527⁴, 1588².
 as refrigerant, 3403⁹.
 removal from water, 3038⁴.
 removal in NH_3 synthesis, 1332⁹.
 respiration of leaves, measuring with catharometer, 3383².
 respiration of, of normal and spleenless animals under normal and reduced pressure, 1300².
 respiratory quotient (CO_2)/ O_2 , effect of depth of breathing on, 3222⁴.
 scattering of x-rays by, 1730².
 in sea water, H-ion concn. and, 2039⁴.
 sepn. from gaseous mixts., P 304⁷, 616⁷.
 sepn. from lime-kiln or combustion gases, P 150⁵.
 significance for plant cell, 2490⁹.
 similarity to N_2O , 3016².
 snow for fire extinguishers, 2172⁴.
 soil, plant nutrition and, 2348⁶.
 in soils, production as measure of fertility, 3099⁴.
 in soils, production of, 1514¹.
 solid, P 4035².
 crystal parameter of, 2824².
 as refrigerant, 971².
 soly. of, in cyclohexanol, 1741⁴.
 effect of salts on, 680⁷.
 in metals and alloys, 553⁴.
 in petroleum and its transfer from oil to air, 1741⁶.
 in water and NaCl and CaCl_2 brines, 4051¹.
 solns. in MeOH and EtOH , 3526⁶.
 solns. in SnCl_4 , f. ps. of, 1578⁵.
 sorption of, expansion of charcoal on, 2827⁴.
 sound velocity in, with reference to temp. coeff. of mol. heat, 1399⁴.
 specific heat at crit. point, 1915⁷.
 spectrum of, 2433⁹.
 spectrum of, effect of gases on, 873⁵.
 supersatd. solns. of, effect of α -particles on, 530⁷.
 supplying to prevent oxidation of oil in transformers, app. for, P 2981⁴.
 system: CaCO_3 - CaO -, 351³.
 system: carbonic acid-water-, 3149⁴.
 system: CCl_4 -air-, 3301⁴.
 system: Fe - Fe carbide- CO -, 1743⁵.
 system: zinc vapor- CO -, 1048².
 tension in tissues, effect of O tension in inspired air on, 1670¹.
 thermal cond. of, 1050⁶, 1745⁶, 2206⁷.
 thermal diffusion with N_2O , 2408².
 tolerance in *Gambusia*, sex and, 1682⁶.
 transformer vault protection with, 783².
 transuision through placenta, 2140⁷.
 uses of, review on, 3289¹.
 vapor pressure of, 1387³, 2205⁹.
 vapor pressure of, over system: water- NH_3 - CO_2 - NH_4NO_3 , 1212².
 vasodilatation in nasal mucous membranes and nasal sinuses from, 3978⁴.
 viscosity of, 2825².
 in vulcanization, 511¹.
 in water, nomenclature for, 1506⁵.
Carbon dioxide-hemoglobin, effect of strychnine on content in blood, 1493⁷.
Carbon disulfide. (See also *Thiohydrazides*.)
 anti-knock effect of, 3452².
 burning near limit for propagation of flame, 2385⁴.
 conveyance by road, 325⁶.
 crystal structure of, 1572¹.
 density of, effect of solutes on, 3704⁶.
 detection of, 3578⁷.
 detn. in emulsions, 3578⁶.
 dielec. const. of, pressure and, 1920⁶.
 effect on biliary calculi, 768².
 on fermentation, 3067⁴.
 on germination of potatoes, 1137³.
 elec. double refraction after removal of elec. field in, time lag in disappearance of, 2602⁶.
 fires, extinguishing, 1187³.
 fumigation with, for bulb pests, 3250².
 heat of fusion of, 15¹, 1399⁴.
 heat of mixing with Me acetate or acetone, 2084⁶.
 as insecticide for soil of potted plants infected with Japanese beetle, 621³.
 iodine solns. in, hexat. I mols. in, 3298¹.
 Kerr effect of, time lag of, 3539⁴.
 light scattering by, 1058⁴.
 manuf. of, P 804⁹, P 3316⁴, P 3717⁸.
 manuf. of, from thiocyanate liquors, 4032¹.
 mixts. with acetone, surface tension of, relation to vapor pressure, 1042².
 orthobaric d. of, 3782¹.
 poisoning action on catalytic action of Pt group, 2448⁶.
 poisoning, blood changes in, 3232².
 purification of, P 2538².
 reaction with diazomethane, 1254¹.
 reagent for oil extd. by, 3474⁸.
 refraction and dispersion of gaseous, 203⁹.
 as refrigerant, 3403⁹.
 removal from gases, P 972⁴.
 sepn. from H_2S and free S, distn. app. for, P 3287⁸.
 soly. of SnI_4 in, 1578⁶.
 as solvent in Friedel Crafts reaction, 3196⁴.
 spectrum of, 1932².
 spectrum of phosphorescent flames of, 1225⁹.
 surface tension of, effect of gases on, 6⁶.
 systems with nitrobenzene and nitrophenols, 2414⁴.
 thiohydrazides of, 3301⁷.
 vapor pressure of, effect of intensive drying on, 1049⁶.
Carbon halides, mol. models for, 2602⁸.
Carbonic acid. (See also *Carbon dioxide*.)
 alkyl esters, P 104⁸, P 3204⁷.
 bis(5,6,7,8-tetrahydro-2-naphthyl) ester, 1983⁷.
 bis(4-vinyl-o-anisyl) ester, 3050².
 diethyl ester, electrolytic ionization of, 3528⁶.
 dihydrazide—see *Carbohydrazide*.
 disocn. consts. of, 2413³, 3149⁴.
 effect on soly. of uric acid in carbonates, 3632².
 esters, phys. consts. of, 1720², 3.
 monoethyl ester, decompn. velocity of, 2413³.
 monohydrazide—see *Carbasic acid*.
 reaction with H_2O_2 , 2118⁷.
 ultra-violet light effect on, 3649¹, 5.

 of powd. coal, 2375^o.
 pretreatment for, 1533^o.
 retort oven for, P 3124^o.
 in revolving retorts, 312^o, 2375^o.
 of shales, app. for, 646^o.
 of Utah coal, compn. of light oils from 813^o.

of lubricants, volatility and, 3266^o.
 lubricant testing by, 2792^o.
 Lurgi process, 641^o, 1534^o.
 nitrogen balance in, of coal, 2547^o.
 of North Carolina coal, 3728^o.
 oil fuel from, 2183^o.
 oil fuels and other products from, 1532^o.
 of ores, schist, coal, etc., app. for, P 830
 of peat, 641^o, 1698^o, 3447^o.
 of peat, etc., app. for, P 168^o.
 of peat, machine for, P 1002^o.
 Piron process for, of coal, 2375^o.
 of pulverized coal, 2370^o, P 2552^o.
 research in Great Britain, 2369^o.
 retort furnace for, P 344^o.
 retort system for, of coal, wood, peat, etc.,
 P 1343^o.
 review, 641^o, 1879^o.
 of saw-mill waste, P 4061^o.
 of seaweed, 2762^o.
 solvent recovery in, P 3693^o.
 swelling power of coal at diff. rates of, 1176^o.
 textile "acidizing" for, app. for, P 2990^o.
 of textiles, app. for, P 3135^o.
 textile wetting out in, P 826^o.
 thermal reactions in, 312^o.
 in vertical retorts, 2376^o.
 of wood, 4911^o, P 2557^o, 2980^o.
 of wood, etc., app. for, P 676^o.
 of wood, nomenclature of products of, 490^o.
 of wool, wetting-out agents for, 2801^o.

Carbon monoxide, absorption of, P 3431^o.
 absorption with ammoniacal cuprous chloride soln., 2446^o.
 action without hemoglobin, 2912^o.
 activated mols. of, in combustion, life-period of, 3463^o.
 adsorption by metallized SiO₂ gels, 845^o.
 adsorption on ZnO and ZnO-Cr₂O₃, 3804^o.
 after-burning in mixts. with O, 1885^o.
 breathing of, effect on metabolism, 2935^o.
 burning of H and, in gasoline engine, 1698^o.
 cancer from, 956^o.
 cementation of iron and steel with, 1622^o.
 chem. const. of, 3504^o.
 cobalt action on, equil. in, 3799^o.
 combustion of, 1185^o, 2799^o.
 combustion of, effect of steam on catalytic, 522^o.
 combustion temp. of, 3533^o.
 copper catalysts poisoned with, adsorption of H and C₂H₄ on, 3532^o.
 crit. const. of, 1036^o.
 decompn. by bacteria, 2488^o.
 decompn. (catalytic) of, 3530^o.
 decompn. in corona due to alternating elec. fields, 2436^o.
 decompn. of, catalytic influence of Fe ores on, 1243^o.
 detection and detn. of, 2630^o.
 detection, app. for, P 3772^o.
 detection in gas mixts., 1071^o.

- detection in mine air, app. for, 1033⁴.
 detn., 1774⁴, 2236², 3328², 3578², 3730⁴, 3857².
 detn. in air, 368¹, 3577⁴.
 in air contg. C_2H_4 , 3463⁴.
 in blood, 2144².
 in combustion products of coal gas flames, 2782².
 in flue gas, 2783², 3120¹, 3120², 4051².
 in flue gases, app. for, P 1177⁴, P 3002⁴.
 in flue gas, integrator for recorder for, 4051².
 in gases, 2549⁴.
 dielec. const. of, temp. and, 3782².
 diethyl acetal, 1795⁴.
 dissocn. and combustion of, 810⁴.
 effect on cholesterol distribution, 3972².
 on indophenoloxidase of yeast cells, 2279³.
 on metabolism of yeast, 1472².
 on yeast respiration, photochem. expts. on, 1472².
 electron collisions in, 1228³.
 electronic states and band spectrum structure of mols. of, 206¹.
 electrons, energy loss on collision with mols., 2099².
 equil. with CO_2 , 2546⁴.
 equil. with CO_2 over Cu, 3326⁴.
 explosions of mixts. of air and, flame movement in, 1356⁴.
 explosions with O, ionization in, 2560⁴.
 explosions with O or air, ultra-violet radiation from, 3130⁴.
 flames, O required for propagation of, 3464⁴.
 flames, spectrum of, 1878².
 fumigation gas contg., P 980².
 glucemia from, in splanchnectomy, 960².
 heat of adsorption by charcoal, 3535².
 heat of adsorption on Cu catalyst, 692¹, 2088⁴.
 heat of dissocn. of, 851².
 hydrogenation of, 1537², 2182², 2870⁴.
 ignition by an explosion wave, 823⁴.
 ignition of mixt. with O, factors influencing, 4071⁴.
 inflammation of mixts. with II and air in closed vessels, 1886².
 introducing into solns. through open pipes, dangers of, 1505⁴.
 manuf. of, plant for, 1691².
 mixts. with A, Ne and He, simultaneous ionization and excitation by foreign ions in, 2426⁴.
 mol. heat of, 3151¹.
 mols., active section of, 2425⁴.
 mols., energy of vibration of, 3538².
 oxidation (catalytic) of, with quartz glass, 601².
 photochem. sensitized reaction with H, 534¹.
 poisoning by, 3241⁴.
 in absence of hemoglobin, 2034⁷.
 effect of insulin on CO_2 content in arterial blood sugar level in, 1494¹.
 effect on oxytocic power of pituitary gland, 3663¹.
 effect on thyroid function, 3964⁴.
 in industry, 2515².
 revivification with lobelia and coramine, 1848².
 simultaneous detn. of blood sugar and gas content and alky. of blood during, 1493².
 through skin, 3085⁴.
 from underground explosives, 323¹.
 poisoning of bacteria in absence of hemoglobin, 2292⁴.
 poisoning of cell by, 3976².
 pressure of, in discharge tubes, 3155².
 pressure reactions involving, app. for, P 515⁴.
 in producer gas, fuel value of, 2782⁷.
 production statistics, 466⁴.
 purifying, P 466⁴.
 ratio to CO_2 in relation to fuel economy in blast-furnace operation, 2112⁷.
 reaction: $2CO = CO_2 + C$, 1915².
 reaction: $3Fe + 2CO = Fe_3C + CO_2$, 3335¹.
 reaction with C_2H_2 , 2467².
 with chlorinated benzene derivs., 1975⁴.
 with iron, 3873¹.
 with O in contact with fireclay, 1745⁴.
 with $PhMgBr$ in presence of $CrCl_3$, 3354⁴.
 with prosthetic groups of hemoglobin, 919².
 recorder for, 2577⁷.
 reduction and hydrogenation of, 642⁴, 1699², 2550^{2,4,7}.
 reduction of CuO with, 1582².
 reduction of org. compds. by C and, 2657⁴.
 reduction to CH_3O and $MeOH$, 3531².
 refractive index of, pressure and, 2217⁷.
 refractivity of, 2217².
 removal from gases, P 415², 4051², 4053⁴.
 respirator for, 1858².
 in ruthenium trichloride prepn., 1602².
 sepn. by fractional liquefaction, P 783⁷.
 soly. of, in cyclohexanol, 1741⁴.
 in metals and alloys, 553².
 temp. and, 680⁷.
 spectrum and explosion of O and, effect of water on, 1059².
 spectrum of, 1062⁴.
 excitation by electronic impacts, 3157².
 radiating potentials of band, 1063².
 structure of, distance C to O in, 529².
 system: Fe-Fe carbide- CO_2 , 1743⁴.
 system: zinc vapor- CO_2 , 1048⁷.
 thermal diffusion with N, 2408².
 toxicology of, 3975².
 treating gas contg., P 783².
 in "triolin" decompn. vapors, 61².
 uptake by red blood corpuscles, rate of, 1275⁷.
Carbon monoxide hemoglobin. See *Carbonylhemoglobin*.
Carbon oxides. (See also *Carbon dioxide*; *Carbon monoxide*.)
 reduction of, P 2274^{2,4}.
 solid, 810², P 3164².
 C_3O_2 , addn. compds. of, 735^{2,5,6}.
 properties of, 2251².
Carbon paper, P 322², P 823¹.
 paper for, P 1012².
 reinforced with textile fabric, P 322².
Carbons. See *Electrodes*.
Carbon suboxide. See *Carbon oxides*.
Carbon tetrabromide, activity of, 1581².
 as catalyst for metaldehyde prepn., 54⁴.
 mixt. with CCl_4 for mineralogical analysis, 1781⁴.
Carbon tetrachloride. (See also *Fire extinguishers*.)
 activity of, 1581².
 adsorption by glaucosil, 2052².
 adsorption by $Fe(OH)_3$ gel, 2585⁴.

- as anthelmintic in hookworm disease, 2322³.
 as catalyst for metaldehyde prepn., 54¹.
 as catalyst in prepn. of SO_2Cl_2 , 55³.
 cirrhosis from, 280¹.
 as denaturant for EtOH, 981³.
 density of, effect of solutes on, 3794¹.
 detn., 3422³.
 detn. in air, 3978³.
 dielec. const. of, pressure and, 1920⁴.
 dielec. const. of, temp. influence on, 1586³.
 dielec. orientational polarization of, 3808³.
 diffusion rate of, in various solvents, 3791³.
 dissociation at high temps., 3800⁷.
 distn. of, for dry cleaning, P 1019⁴.
 effect on body temp., 1678³.
 effect on inflammability of C_4H_4 -air mixts., 3521⁷.
 elec. moments of org. mols in, 3783¹.
 fumigant contg. dichloroethane and, 3416³.
 gasoline contg., for detonation prevention, P 3127¹.
 germination of barley seeds treated with, 3415⁴.
 hookworm control with chenopodium and, 775⁴.
 internal pressure and coeff. of expansion of, 348³.
 iodine soly. in, 3301³.
 iodine solns. in, hexat. I mols. in, 3298¹.
 liver damage by, effect of sugar, MgSO_4 , Na citrate and acid on, 135³.
 liver fluke treatment with, 3968³.
 mixts. with CHBr_3 , CH_2Br_2 , CBr_4 and SnBr_4 for mineralogical analysis, 1781⁴.
 mixts. with EtOAc or EtI, surface tension of, relation to vapor pressure, 1042².
 mol. vol. at abs. zero and d. of, 3490² 3.
 orthobaric d. of, 680³, 3782¹.
 phys. consts. of, 1039³.
 poisoning by, 610³, 3087¹.
 from bursting of fire extinguisher, 3089⁴.
 effect of work on, 3085³.
 reaction with Al, 3492⁷.
 with Bz_2O_2 , 1454⁷.
 with Br, 3301³.
 with C_6O_3 and with Ta_2O_5 , 2624³.
 with H_2S , 3301³.
 as refrigerant, 3403³.
 soly. of I and S in, 3520².
 soly. of SnI_4 in, 1578³.
 spectrum of, 1932³.
 surface tension of, effect of gases on, 6⁴.
 system: CO_2 -air-, 3301⁴.
 system: EtOH-, 3521³.
 system: SO_2 -, 850⁴.
 treatment of liver rot of sheep with, 775⁴.
 vapor pressure of, effect of intensive drying on, 1049³.
 viscosity above b. p., 2408³.
Carbon tetrafluoride, prepn. of, 1603¹.
Carbonyl chloride. See *Phosgene*.
 —, thio-. See *Thiophosgene*.
Carbonyl compounds, hydroxy-, 2256⁷.
 metal compds. of enol forms of, 1804³.
 reduction of unsatd., 1645³.
Carbonyl group, detn. in aldehydes and ketones, 2452¹.
 reduction of, 2886³.
 in wool, 178³.
Carbonylthiochromogen, prepn. in presence of pyridine, 595⁷.
Carbonylthioglobin, catalytic activity of, 3061⁴.
 spectrophotometry of, 1662³.
Carboxyla, mixed, 1068³ 4.
Carboxypyrotaric acid³, oxonium derivs. of, 3899³.
Carboraffin. (See also *Sugar manufacture*.)
 adsorption of inorg. ions by, in sugar filtration, 1561³.
 filtration consts. of, 682².
Carborundum. (See also *Silicon carbide*.)
 thermal expansion test for, 3112³.
Carbostyryl (2-quinolindol or 2(1)-quinolone).
 —, 3 - (o - anisylsulfonyl) - 8 - methoxy-, 1122⁴.
 —, 3 - (o - anisylsulfonyl) - 8 - methoxythio-, 1122⁴.
 —, 6,6'-arsenobis-, 2695³.
 —, 3 - (p - bromophenylsulfonyl) - 8 - methoxy-, 1122³.
 —, 3 - (p - chlorophenylsulfonyl) - 8 - methoxy-, 1122³.
 —, 3,4-dihydro-. See *Hydrocarbostyryl*.
 —, 4-hydroxy-1-methyl-3-phenyl-(?), and benzoate, 1987⁴.
 —, 8-methoxy-3-(p-phenetysulfonyl)-, 1122⁴.
 —, 8-methoxy-3-phenyl-, 377².
 —, 8 - methoxy - 3 - (phenylsulfonyl)-, 1121³.
 —, 8-methoxy-3-(phenylsulfonyl)thio-, 1122¹.
 —, 8-methoxy-3-p-tolylsulfonyl-, 1122³.
6-Carbostyrylarsonic acid. See 6-Quinaldine-arsonic acid, 2-hydroxy-.
Carboxylase, action of, kinetics of, 2001².
 in animal tissues, 3900³.
 in skin, 427⁷.
Carboxyl group, detn. of, 874³.
 detn. of, in peptides, 721⁴.
 effect on stability of camphene nucleus, 2264³.
Carboxylic acids. See *Acids*.
Carboxyl chlorides. See *Chlorides*, acid.
Carboys. See *Containers*.
Carbureting. See *Gas*, illuminating and fuel.
Carburization. See *Iron*, Metals; *Steel*.
Carcinoma (See also *Cancer*; *Neoplasms*, *Sarcoma*; *Tumors*.) 768³.
 alum effect on, 2034³.
 biochemistry of, 2030¹.
 catalase content of blood in, 2735³.
 cells, metabolism of, 1675¹.
 diagnosis by precipitin test, 2025⁴.
 diagnosis of gastric and intestinal, 1146⁷.
 diagnosis (serological) of, 127³.
 glucolysis of organs in, 267³.
 hydrogen ion concn. of, 2030⁴.
 lactic acid production by, 2930³.
 lipase action of mouse, 1129³.
 mineral salt content of blood in, 2020³ of pancreas, 3678¹.
 pancreas, insulin content of, 769⁷.
 potassium cyanide therapy of, 3962⁴.
 review, 1675³.
 tissue, lactic acid production by, 768³.
 treatment with O, 1681⁷.
 of uterus, ext. of, H exponent of, 2731⁴.
 from vitamin-A-deficient diet, 1836².
Cardamoms, compd. tincture of, color of, 155⁴.
Cardboard. See *Paperboard*.
Cardiazole³, as analeptic, 276³.
 detoxication in liver, 1497³.
 effect on heart, 2334⁴.

- effect on spinal cord of decapitated cats, 480^a.
 pharmacol. action of, 459^a, 1313^a, 3960^a.
Cardium edule, toxicity of NaCl for, 2740^b.
 Δ^2 -**Carene**, *l*-, in oil from rhizomes of "*Kaempferia galanga*," 798^a.
Carica papaya, latex of, effect on protein hydrosols, 3059^a.
Carmine, in tissues, distribution of, 1491^a.
Carminic acid, constitution of, and tetraacetate, 1127^{a,7}.
Carnallite, -potash contg. tachhydrite and kieserite, working of, 1525^b.
 from saline liquors of Ust-Berovsk, 2761¹.
 from sea water, 627^a.
Carnauba wax, decompn. of, 2074¹, 4082^a.
 detection and detn. in foods contg. fats, 3398¹.
 emulsions of, P 3138^a.
Carnitine, 3391^a, 3892^a.
 constitution of, 1631⁷.
Carnosine, 3391^a.
 effect on gastric secretion, 952⁷, 1310².
 in liver ext. (beef), 2727^a.
 properties and compds. of, 106¹.
 silver compd. of, in amniotic fluid, 125^a.
Carnotite, analysis of, 1421^a.
 radium, V and U from, 1409^a.
 δ -**Carol**, *l*-, 3192¹.
Carone, reactions of, 3192¹.
Caronic acid (3,3-dimethyl-1,2-cyclopropanedicarboxylic acid), *trans*-, diethyl ester, phys. consts. of, 1249⁷.
Carotin, adsorption by charcoals and inorg. salts, 3091⁷.
 in paprika, 2919^a.
Carotinoid, in Infusoria, alimentary origin of, 1500¹.
Carpet beetles, repellent properties of textile dyes, 1359¹.
Carpinus betulus, bark, compn. of, 600¹.
Carptroche brasiliensis. See *Sapucainha*.
Carrageen, detn. in jams and jellies, 2743^a.
Carrel-Dakin solution, alkali detn. in, 431^a.
 stability of, effect of amides on, 625^a.
Carrollite. See *Linnaeite*.
Carrots, juice of, dry matter and sugar in, 969¹.
 pectic materials in, 3214^a.
 proteins of, 1503⁷.
 therapeutic effect of, 2920⁷.
 vitamin content of sterilized, 3388^a.
Carthamus tinctorius. See *Safflower*.
Cartilage, changes in human tracheal, under physiol. and pathol. conditions, 3662⁷.
 cholerterol and N content of, at diff. ages, 2303^a.
Cartridges, blasting, P 1551^a, P 3746^a.
 blasting, for CO₂ or other liquefied or solidified gases, P 3464^a.
 for use with liquid CO₂, 2560^a.
 for use with liquid CO₂, etc., P 4072^a.
 casing alloys, P 177^a.
 nickel alloy for primers, P 1247^a.
Carvacrol (2-hydroxy-*p*-cymene), color reactions with aldehydes, 4018^a.
 detection in oils and drugs, 2757^a.
 detn. in oils, 297^a.
 infertilizing power of, against microorganisms, weakening action of colloidal state on, 3928¹.
 in oil of thyme, 984^a.
 —, δ (or δ) - (acetoxymercuri)-, 69^a.
 —, δ , δ -bis(acetoxymercuri)-, 69^a.
 —, δ , δ - bis(6-nitrocarvacrylazo)-, dye, 903^a.
 —, δ -hydroxy-. See *Thymolhydroquinol*.
Carvacrylamine (2-amino-*p*-cymene).
 —, 6-nitro-, and salts, 903^{a,4}.
Carvene. See *d*-Limonene.
Carvone (Δ^2 , δ) - 2 - *p* - menthadienone), as catalyst in prepn. of SO₂Cl₂, 55^a.
Carvoxime, system: *l*-carvoxime-*d*-, 14^a.
 δ -**Carylamine**, *d*-, 3192¹.
 δ -**Carylanthric acid**, methyl ester, 3192¹.
Caryophyllene, constitution of optically active isomers, 1108^a.
 dehydrogenation of, 236^a.
 in oil of lavender, 985^a.
 —, allyloxynitroso-, and tetrabromide, 237².
 —, α -propyleneglycoxynitroso-, 237².
Caryophyllus. See *Cloves*.
Cascara, bark from Kenya Colony, 1329^a.
Case-hardening. See *Iron*; *Steel*.
Casein. (See also *Adhesives*; *Caseinogen*; *Paracasein*.)
 acid and fat detn. in, 1609^a.
 adhesive action of, 990^a.
 adsorption of methylene blue by, 1735^a.
 arginine content of, 3633¹.
 as binding medium for pigments, 4078^a.
 biochem. study of, 1299¹.
 book: and Its Industrial Applications, 2053⁷.
 calcium carbonate-contg., effect on decompn. of Pb arsenate, 3416².
 cleavage product of, 256^a.
 coagulability of, effect of heating and of exchangeability of Ca, phosphate and other substances on, 423^{a,4,7}.
 coating wood, etc., with, P 806^a.
 colloidal, prepn. with salts, 1391⁷.
 combination with dyes, 1822^b.
 combustibility of, 950².
 compns., P 1337¹, P 4036¹.
 compns. with rubber, P 341^a.
 compds. with alkali, formation and ionization of, 109^a, 2910¹.
 conversion into ropy-plastic state and colloidal soln., 847^a.
 detn. in milk, 2339^a.
 diaminodecanedicarboxylic acid from, 2459^a.
 digestion, pepsin in, 2500^a.
 dissoln. of, 3514^a.
 effect of superheated water on, 100^a.
 effect on blood compn., 2027^a.
 elec. insulating compn., P 2539^a.
 filaments from, 201⁷.
 films of, 255^a.
 as food, effect of heat and oxidation on, 1834^a.
 fractions of, effect on metabolism, 2724^a.
 glucemia from injection of, 1141^a.
 hardened, 3426^a.
 horn substitute from, P 3432^b.
 from human milk, isoelec. point of, 1999^a.
 hydrolysis of, 3627^a, 3789¹.
 hydrolysis of, in acids, 751¹.
 industry, 3715^a.
 isoelec. pt. of, effect of Wiesbaden hot spring water on, 2280¹.
 -lime sprays, effect of order of mixing on formation of injurious compds. in, 794^a.
 lyophilic colloids from, elec. resistance of, 923⁷.
 in milk, effect of colloidal state on coagulation by rennet, 284^a.
 molding compn. of wood and, P 631^a.

- mol. wt. in phenol, 345⁷.
 nitrogen and C of, assimilation of, 1832².
 parenteral introduction of, effect on blood serum, 1295¹.
 phosphorized nucleus of, 1281².
 plastic compn. of latex and, P 307⁴.
 in plastic material manuf., 1335⁴, 2762⁴.
 phosphorus-contg. nucleic substance of, 2539⁴.
 photooxidation of, with fluorescent dyes, 1997³.
 precipitation of, 150².
 precipitation of, by org. acids, 1132³.
 prepn. and uses of, 1854¹.
 properties of, temp. and, 3375⁷.
 reaction with tannin, 1028³.
 refractive index of, 2284⁶.
 rennin effect on, 3375⁹.
 shaped articles of, P 1693⁴.
 sodium deriv., elec. cond. of solns. of, measurement of, 109¹.
 soly. in alkali, 925³.
 spectrum of, 3060⁶.
 spreading of, 2584⁷.
 swelling of, constitution of org. acids and the effect on, 518³.
 vegetable, extn. of, P 3433⁴.
 waste, utilization of, 971⁸.
 water-sol. product of, 3401³.
- Casain, chloro-***, 2905⁴.
- Casainates**, coating with, P 2540⁸.
- Casainogen**, carbon assimilation from, 1836⁵.
 diphosphorized, 2338⁸.
 equil. with Ca and its effect on secretion of Ca in milk, 441³.
 optical rotation and dispersion of, 2278⁶.
 phosphorus liberation from, 420⁸.
 phosphorus nucleus of, 2278⁸.
- Caseoglutins**, 3687⁷.
- Cashew, nuts**, 3930⁴.
 nuts, oil of shells of, P 3476⁸, P 3759⁹.
- Casings**, sausage, 321², P 3690⁴, P 4068⁴.
- Cassava (manioc)**, as feeding stuff, corn vs., 1504⁸.
- Cassia**, anthracene derivs. from, 1289³.
- Cassiopea**. See *Jellyfish*.
- Cassiopeium**. See *Luteium*.
- Cassiterite**, analysis of, 1778².
 of Island of Giglio, 548³.
 reduction and flotation of, P 3179⁷.
 reduction, etc., P 3179⁷.
 reduction of, 1613².
 tin detn. in, 36⁷.
 in titanite, 1948².
- Cassius, Andreas**, purple of Cassius and, 1035⁶.
- Cass treatment**, for rheumatism, 801³.
- Castanea**. See *Chestnut*.
- Castilleja elastica**, latex in, function of, 3068⁴.
- Casting process**. (See also *Cupolas*; *Molds* (I); *Sand*.) P 3342⁴.
 alloys for, effect of compn. on aptitude of, 561².
 app. for, P 3342^{2,3}.
 for aluminum or other molten metals under pressure, P 2869⁹.
 analysis in, effect of size of charge on, 46⁴.
 for bells, 3036⁸.
 for belt pulleys, etc., P 3040⁷.
 blast-furnace, P 371⁹.
 brass, 1242³.
 brass, furnaces for, 2246⁴.
 British, 2112⁹.
 centrifugal, P 729¹, P 2247³.
 app. for, P 2822⁷, P 3886⁴.
 for steel, 3867⁵.
 chemistry of, 883⁹.
 chromium-plated graphite chill for, P 2247³.
 for clay slip, effect of Na₂CO₃ and Na silicate on, 3722¹.
 core-oil specifications, 2640¹.
 correction with cupola temp. recorder, 2639⁴.
 cupola operation in, P 2115⁹, 370⁷.
 cupola, phys. structure of cast Fe in relation to, 1613⁷.
 for Diesel engine cylinders, etc., P 3040⁷.
 elec., 2615¹.
 elec. furnace in, 21⁷, 2614⁷.
 fluorite effect on, 2113³.
 foundry facings, transportation of, 1540⁸.
 gas content in steel during and after, 1244⁴.
 for glass, app. for, P 2176⁸.
 for gold-Pt alloys, 2434⁶.
 for gray iron, P 3342².
 for hollow articles from hot concretes, 1697¹.
 ingot, P 2869⁷, P 3040⁸.
 ingot, app. for, P 562².
 for ingot molds, app. for, P 3886⁴.
 for ingots while subject to inspection, P 49⁸.
 iron, 1243⁸.
 lab. in foundry, 882³.
 ladle nozzle, P 1003⁷.
 for lead or other metals in continuous lengths, P 729².
 for magnesium, 883¹, P 2456⁸.
 for malleable iron, P 3342¹.
 melting synthetic Fe in cupola, 558².
 patterns for, P 372².
 for pig iron, 2639⁴.
 pipe, 3589⁹.
 under pressure, app. for, P 3886⁴.
 properties important in, for metals, 3870⁷.
 review, 882³, 2113⁴.
 steel melting for, 46³.
 still, for metals, 1092⁹.
 for sulfur alloys, P 563².
 temp. for, 554⁹.
 tinned and untinned core irons in, 2640⁸.
- Castings**. (See also *Casting process*; *Molds* (I))
 alloy for, P 1625¹.
 alloy, in marine engineering, 1440⁶.
 of aluminum alloys, 1439².
 aluminum alloys for, properties of high-strength, 1439⁴.
 annealing, P 728⁷.
 annealing steel, 558².
 black malleable, pptn. of C in, 1093³.
 bronze, specifications of A.S.T.M. for, 1157⁸.
 chaplets, 2646⁸.
 chill, P 3886⁴.
 copper, 1083¹.
 copper, deoxidation in making, 882⁹.
 defective, analysis of, 2646⁸.
 die, metal for, P 888⁹.
 effect of gases on, 553⁷.
 finishing large, P 2870¹.
 gray iron, specifications of A.S.T.M. for, 2630⁸.
 hardness and tensile strength of, 1614⁹.
 heat- and acid-resisting, 2453³.
 heat-treating iron, P 220⁶.
 heat treatment of steel, malleable and gray iron, 3332².
 iron, P 562², 1243⁸.
 iron, with Cr alloy surface layer, P 2456⁸.

- malit-glycerite, 1787^a.
 malleable iron, P 2869^t.
 metallurgical treatment of, 1787^a.
 of pearlitic structure, P 220^a, 1002^t.
 of pig iron low in total C, 3866^a.
 pig iron, softening of, 1092^a.
 porosity in non-ferrous, 2655^a.
 radiographic testing of, practice of A. S. T. M. for, 1158^a.
 refractory, P 808^t.
 removing cores from, P 221^a.
 silicon detn. in, 873^a.
 testing iron, 3590^t.
 of volcanic stone, P 3726^a.
Cast iron. See *Iron*.
Castor beans, compn. of, 3382^a.
 pomace of, fertilizing rubber with, 2352^t.
Castor oil, carbon nutrition of *Penicillium glaucum* with, 3069^t.
 detection of, and detection of adulteration, 4083^a.
 detn. in mixts., 1198^a.
 effect on priming of saline waters, 3243^a.
 emulsions in solns. of gum arabic contg. KCl, elec. cond. of, 2590^a.
 lecithinase in, 2322^a.
 as lubricant, 1181^a.
 medicinal, P 1871^a.
 in oils and fats, 829^a.
 optical rotation of, in magnetic field, 3811^a.
 photoactivity of, 1277^a.
 recovery from press cake, P 335^t.
 solidifying, P 3434^a.
 sulfonated, 3758^a.
 sulfonating, P 3476^a.
Castration, effect on fatty acids of spleen, 1837^a.
 effect on gastric secretion, 124^a.
 on urinary C:N quotient, 445^a.
 on water content of thyroid, 2499^a.
Casuarina equiseti-folia, cellulose from, 492^a.
Catabolism. See *Metabolism*.
Catalase, action of, cytochrome content and, 3644^a.
 activity of hematin derivs., 3061^a.
 antagonism to peroxidase, 936^a.
 -anticatalase in blood and organs in normal and pathol. conditions, 3636^a.
 anticatalase action, 3636^a.
 bacterial, detn. of, 2915^a.
 in blood (beef), 1823^a.
 blood clotting and, 2735^a.
 blood, in anemia, 2153^a.
 effect of diet on, 2018^a.
 effect of I and I prepn., thyroidectomy and thyroid gland feeding on, 2327^a.
 effect of KI, I and iodated albumin on, 3944^a.
 in epilepsy, 2504^a.
 peroxidase and, 3632^t.
 of blood in inhabitants of mountains, foothills and valleys in Middle Asia, 444^a, 3633^a.
 in blood of nursing infants with digestive disturbances, 3080^t.
 in citrus fruits, 757^a.
 in corn, effect of respiration on, 2015^a.
 detn. in blood, 3640^a.
 detn. of, temp. correction in, 1996^a.
 effect of injection into the circulation on content of diff. tissues in, and in anti-catalase, 3973^a.
 effect on oxidation in animal tissues, 2279^a.
 of grapes, 941^a.
 from horse liver, 3377^a.
 iron effect on, chem. constitution and, 429^a.
 of lettuce, radish and spinach, effect of nutrient conditions on activity of, 2719^a.
 liver, effect of mineral waters on, 1468^a.
 protection against anticatalase by EtOH, 3915^a.
 reaction, differential diagnostic value and technic of, 3923^a.
 reaction in caraway seeds, germinating power and, 3068^a.
 seed vitality and, 2293^a, 3213^a, 3215^a.
 of tissues (normal and neoplastic), 2027^a.
Catalysis. (See also *Catalyzers* and the various catalyzed processes, as *Hydrogenation*.)
 of acetone condensation, 235^a.
 acid and salt effects in, 354^a, 691^t, 2088^a, 2416^a, 2591^a, 2834^a, 3150^t.
 by adsorbed substances, 2585^t.
 allelo-, in Infusoria cultures, 2035^a.
 of ammonia decompn., 3531^a.
 of anaerobic oxidation of sulphydryl compds. by Fe and Cu, 2594^a.
 antioxygen, 3529^a.
 app. for, P 3^a.
 auto-, of bromosuccinic acid decompn., velocity of, 3532^t.
 auto-, of decompn. of hyposulfurous acid, 1215^a.
 books: in Theory and Practice, 1924^a; Die Katalyse in der organischen Chemie, 2273^a; mit kolloiden Metallen, 2598^a; in Org. Chemistry, 3368^a; Contact, 3540^a.
 of carbon monoxide decompn., 1243^t, 3530^a.
 of carbon monoxide reduction to CH₃O and MeOH, 3531^a.
 catenary of, 2088^a.
 chem. constitution and, by Fe, 429^a.
 chem. constitution and catalytic activity, 2703^a.
 colloid particles and, 1390^t.
 of combustion, 522^a, 1745^a.
 compressing and circulating gases in, app. for, P 2578^a.
 contact, 1042^a, 2088^a, 2835^a, 3012^a.
 contact, review on, 3150^a.
 by copper ion in HCl evolution, 158^a.
 of cyclic unsatd. hydrocarbons, 2469^a.
 of decompn. of esters by Ni, 848^a.
 deformation of mols. in, 2834^a.
 of dehydration, 690^a.
 of dehydration of alkylvinyl carbinols, 564^a.
 of dehydrogenation, 900^a.
 of dehydrogenation, formation of condensed rings in, 901^a.
 in dehydrogenation of decalhydronaphthalene, kinetics of, 2592^a.
 effect on equil., 1048^a.
 of ethyl alc. decompn., 690^t, 848^a.
 of ethylene reactions, 3011^t.
 of ethyl ether manuf., P 917^a.
 by ferrous hydroxide in oxidizing carbohydrates, effect of NaOH on, 1744^t.
 in flowing gases and ammonia oxidation, 4030^a.
 in formaldehyde decompn., 3530^a.
 of formic acid decompn., 2089^a, 3530^a.
 of gas reactions in flow systems, kinetics of, 1744^a.
 of gas reactions under high pressure, app. for, P 2080^a.
 by heavy metals, autoxidizable system as example of, 1745^a.

 of thymol, P 1993³, P 2136⁷.
 for hydrogenation, etc., P 2965⁴.
 hydrogenation in presence of nonhydrogenating, 2470⁶, 3197⁴.
 hydroxyl ion as, in decompn. of nitrosotriacetoneamine, 2591⁵.
 inactivation of, 2088⁶.
 for indole synthesis, 1262⁴.
 iron, decompn. of NH₃ on, 2593⁴.
 isatin and derivs. as, for dehydrogenation of amino acids, 2126⁸.
 Japanese acid clay as a, 667, 802⁹, 1101⁹, 1642⁹, 3612⁴.
 for ketone manuf., P 917⁴, P 1128³.
 for maleic acid manuf., P 3057⁷.
 mercury as, in sulfonation of anthraquinone, 1050⁷, 2684⁴.
 mercury compds. as, for manuf. of vinyl esters, P 3204⁹.
 of metabolism, 927⁷.
 metal and metal mixts. as, 2448⁵.
 for metaldehyde prepn., 54³, P 593⁴.
 metallic, measuring abs. surface area of, 1584³.
 metallic, x-ray studies of, 2204³.
 metallized SiO₂ gels as, 3532¹.
 for methane manuf., P 104⁷.
 for methanol manuf., P 2501³, P 1993², P 2274³, P 2703⁶, 3804⁴.
 nickel, P 2116³.
 activity and temp. relationships, 3804⁴.
 hardening fats with, 1556¹.
 for hydrogenation of oils and fats, P 466⁹.
 for hydrogenation of squalene, 1111³.
 for reduction of aliphatic oximes, 2457⁷.
 nickel oxide as, for hydrogenation, 3360⁹.
 for nitration of org. compds., 3056¹.
 for nitrile manuf., P 1272⁷.
 of oxidation in plants, arsenate as, 2918⁹.
 oxidation, metallic ions as, 1215¹.
 for oxidation of anthracene, P 3058⁴.
 of aromatic hydrocarbons, P 3057⁹.
 of benzene derivs., P 3058³.
 of CII₄, 2457³, 2835².
 of methyluric acids, 899⁹.
 of petroleum, 1345⁷.
 paint driers as, 1716³.
 palladium as, for isomerization of pinene, 79⁹.
 for phenol manuf., P 2704².
 for phthalic acid prepn., 2469⁴.
 of plant respiration, phosphate ion as promoter, 2918⁹.
 platinum as, in oxidation of (CN)₂ to NO, 988⁶.
 platinum black as, for hydrogenation of unsatd. acids, 2458².
 platinum black as, for reduction of dimethylglyoxime, 2119⁹.
 platinum black-PtO as, for hydrogenation of di- and triphenylamine, 1799⁹.
 platinum black-PtO as, for reduction of aromatic nitro compds., 1799⁷.
 platinum group metals as, 521³.
 platinum oxide as a, in the reduction of gluconic, mannonic and galactonic acids, 3353⁹.
 for polymerization of C₂H₂, 3046⁹.
 for reaction between naphthols and NH₃, CaCl₂ as, 3803⁶.
 for reaction of chlorinated benzene derivs. and CO, 1975⁹.
 for reaction of epichlorohydrin with alcs. and with ethers, 223⁴.
 for rearrangement of alkylvinyl carbinols, 731³.
 for rearrangement of 3-methyl-1-butene, 3887².
 for reduction of AcH, 564⁴.
 of acetals, 3608¹.
 of alkyl esters, P 104⁵.
 of anthraquinone derivs., P 3370⁶.
 of C oxides, P 2906⁴.
 of nitro compds., P 3205¹.
 of org. compds., P 2703⁶.
 reversion of role of, 3303⁴.
 silica gel as a, for action of org. acids on PbEt₄, 1445⁴.
 sodium perborate action on cotton and linen cellulose in presence of, 4075⁶.
 sulfur-contaminated, regeneration of, P 3431².
 sulfuric acid as a, in the condensation of alcs. with ethylene oxide and derivs., 3889⁴.
 sulfuric acid as, in reaction of alcs. and epichlorohydrin, 567¹.
 for sulfuryl chloride prepn., 55⁴.
 surface of, and effect of promoters, 2593⁴.
 thoria, adsorption on, 690⁶.
 thoriated wire, activating, P 2080⁹.
 tungsten oxide as, for dehydration of resorcinol, 2130³.
 volatilized, recovery of, P 3718⁴.
 for water decompn., regeneration of, P 996¹.

- embryonal, effect of heterologous plasma on, 458¹.
 epidermal tadpole, permeability in AcOH, effect of gelose, HCl and serum on, 1499².
 epithelial, growth of, chem. nature of substances required for, 1128².
 exosmosis of water from, kinetics of, 2911⁵.
 function, nutrition and, 3658².
 gastric, site of action of histamine and HCl on, 1847².
 heavy metal ions and, 2709².
 hemolysis of, 2139³.
 hydrogen-ion concn. and, 2708¹.
 in inflammation, effect of cations on, 127².
 of kidney tubule, deposition of dyes, Fe and urea after their injection into its lumen, 765².

 dye penetration into *Nitella* and *Valonia*, in presence of acids, buffer mixts. and salts, 1130².
 dye penetration into *Nitella*, effect of salts on, 1131².
 dye penetration into vacuoles, effect of salts and acids on, 2488².
 dye penetrating, of *Valonia* from methylene blue solns., 3384².
 of flax fiber, compn. of wall of, 2988².
 fungi, concn. of juices in, 1660².
 growth and energy metabolism with and without chlorophyll, effect of I on, 2918².
 growth and permeability of century-old, 116¹.
 liquids in, concn. of, detn. of, 3210².
 membranes of, 1477².
 chem. nature of, 936².
 compn. of, 3932².
 origin and formation of, 2147².

- Nitella*, concn. of halogens in cell sap by, effect of light, temp., etc., on, 942^o.
osmic staining of, 2293¹.
osmosis in ivy, plasmolyzing agents for, 2720¹.
permeability of, 2720^o.
of *Phaseolus vulgaris* contg. tannin vacuoles, 3216^o.
phosphatides of, 1290⁷.
plasmolysis of, H-ion concn. and, 3068².
respiration of, 2293^o.
role of wall in, 938².
starch digestion by, 1666³.
sugar decompn. in, 2717⁴.
surface disturbance, effect on permeability of *Spirogyra* for acid dyes, 2720^o.
tannin, in fruit pulp of *Diospyros*, 3929⁷.
toxicity of tissue juices for tissue, 2016².
- Cells, voltaic.** (Under this heading all primary cells are indexed. For secondary cells, see Accumulators. See also Depolarizers, Electrodes; Polarization, electric.) 2227^o. (Patents.) 209⁷, 362¹, 839⁴, 861², 1415^o, 2438^o, 2850^o, 3028², 3317², 3566³, 3566^o, 3837¹, 2⁴.
absorbing and depolarizing material for, P 209^o.
with alk. electrolyte, P 1767².
concn., 2836^o.
const., variation with concn., 1586¹.
containers for, P 23³, P 209^o.
with depolarizer of solid oxidized C, P 3164^o.
diffusion in, retarding, P 535^o.
diffusive anode, 3026^o.
dry (Patents.) 23¹, 2104³, 862², 536², 861⁷, 1599¹, 1767², 1936^o, 2105⁷, 2438², 2617¹, 2851¹, 3028², 3164^o, 3317², 3837³.
dry, assembly of, P 1599¹, P 1936^o.
lining for, P 209^o.
molding bobbins for, P 3837⁴.
review on, 1413^o, 1598⁴.
dry Zn-C, manuf. of, 1766^o.
electrolyte for, P 3837².
electromotive force of, 1918⁴, 2215^o.
across a semi-permeable membrane, 1218¹.
Nernst heat theorem and, 1400⁴.
with transference, 3809².
electron theory of, 689^o, 2104^o, 3824^o.
for electron tubes, P 1208⁷.
with flexible coiled electrodes, P 708^o.
fuel, 3835^o.
gas concn., construction of, 3807^o.
gelatinous electrolyte for, P 362^o.
at high temps., 1747⁴.
history of, 2436^o.
for hydrogen electrode, 2836^o.
of Leclanché type, P 209^o, P 861⁴, P 2850^o.
with liquid electrolyte, P 3566^o.
with low electromotive force, 3536^o.
manganese dioxide, 693⁷.
photoelec., 2850^o, 3833², P 3838¹.
as colorimeter, 1034³.
effect of series resistance on current from, 3836⁷.
gas-filled, 2222^o, 2604^o.
for photo-colorimeter, 2821⁷.
review on, 3289¹.
successive ionization by collision in, 2604^o.
thermoregulator employing, P 2080^o.
radiation emission by, analysis at low pressures, 20⁴.
safety devices for, P 1231¹.
- selenium, elec. polarization in, 2416^o.
semi-permeable membrane for 2-fluid, P 1231².
separator for, P 3837⁴.
standard Cd, electrode equil. in, 852^o.
thalofide, for spectroscopy, 1759^o.
thermolec., P 210², P 2851¹, P 3144^o, P 3317⁷.
two-fluid "oxidation," 3026².
two-liquid, of const. intensity, P 1415^o.
- Cellulobacillus folla**, assocn. studies of, 935^o.
- Celluloid**, coloring compns. of, P 649^o.
composite sheets of glass and, P 3438⁷.
decorating, P 2985⁷, P 3256^o.
decorating and varnishing, P 3120^o.
decorating with "cellulose varnish," P 1355³.
effect of sunlight on green, 3559⁷.
enameling photographs on, P 3029⁷.
ester mixts. for manuf. of, P 1355⁷.
fillers for, P 991^o.
films, P 176², 343³, 3741¹.
fire hazard in manuf. of, automatic safety appliances against, 2558^o.
formation of sheets, slabs or molded articles of, P 321^o.
iridescent layers on, prepn. of, 2362³.
manuf. of, P 4069⁴.
manuf. of, by blowing process, 2063⁴.
molding, P 292^o.
molding and coloring, P 4036^o.
nitrocellulose for, 1008⁴.
review, 1355².
solvent recovery in manuf. of, P 3693².
variegated effects in, P 822¹.
waste, utilization of, 971^o, P 3129².
- Celluloid substitutes**, cutting sheets from blocks of "low-flammable," P 3129⁷.
- Cellulose.** (See also Cellobiose; Copper-ammonia cellulose; Hydrocellulose. Lignocellulose; Oxycellulose, Paper pulp, Rayon; Sulfite liquor; Threads, Viscose.) 2982³.
acetylation of, 174², 40614⁷.
acetylation of—see Cellulose acetates.
acetyl derivs.—see Cellulose acetates.
adsorption by, 1042^o.
adsorption of alkalis by, velocity of, 1736¹.
alc. from, 2381³, P 3252¹.
alkali, P 1355⁴, 1705^o, 3127⁴.
drying, P 2985^o.
esterification of, 1705⁴.
prepn. of, P 3128^o, 3457^o.
spectrum (Röntgen) of, 1929².
alkali process, recovery of expressed soda in, 4063^o.
alkali-sol., 319⁷.
alpha-, detn. of, 1706⁷.
fiber high in, P 2559⁴, P 4068^o.
manuf. of, P 1712^o.
paper pulp with high, 4063⁴.
pulp, P 3742^o.
amphoteric nature of, 2793^o.
bacteria decomp., 114¹.
from bagasse, P 2384⁴.
bleaching substances contg., P 649⁴.
bleach liquor, corrosion of bronze by, 3456⁹.
books: Chemistry of, 495⁴; Die Strohzeilstoffabrikation, 1009^o; Microbiology of, 2284⁷.
capsules or other hollow articles of, P 3461³.
P 3462¹, P 3742^o.
carbonizing, P 1010⁴.
chemistry of, 1850¹, 1707^o, 2794³.

- Champagne**. See *Wines*.
- Charcoal**. (See also *Carbon*.)
absorbent, pills contg. oils and, P 3105².
absorption of hydrocarbons by, 4045².
activation by mineral substances, 3508².
activation of wood, 3508².
active, P 1526⁷.
as adsorbent for gases, P 197².
adsorption of HCl, HNO₃ and H₂SO₄ in presence of Na salts by, 3147⁴.
adsorption of N by, 1042².
from peat, 641⁷, 3444⁴.
P oxidation and, 2361².
phys. properties and heat effect of wetting with liquids, 1736¹.
swelling of, 3508².
adsorption by, 1042², 3292⁷.
adsorption from soln. by, 3147².
adsorption of AcOH by, 7⁴.
of alcs. on, 351⁴.
of Blau's complex salts on, 1213².
of carotin by, 3091⁷.
of colloidal Fe₂O₃ by, 3509².
of complex compds. on, 682².
of dyes by, 351⁴.
of gases and vapors on, heat of, 3811².
of H and hydroxyl ions on, 1388⁴.
of iodine by, 254⁵.
of Hg vapor by, 81¹, 3292¹.
of viscous media by, 200².
of water vapor by, 1734³.
from apricot kernels for prepn. of activated C, 2053².
ash free, 810⁴.
boneblack, specifications of A. S. T. M. for, 143⁶.
for sugar manuf., 1202⁶.
treating, P 2764⁷.
burning heaps, 1348².
catalytic power of, 1914⁸.
decolorizing, effect on molasses, 2996⁴.
drying furnace for, P 838².
effect on urea formation from NH₄HCO₃, 952¹.
electrode of, elec. resistance at contact surface of electrolyte and, 694⁷.
electrodes, electrocapillarity of, 844².
expansion on sorption of CO₂, 2827⁴.
fermentation acceleration by, 2354¹.
filtration consts. of, 682².
fuel briquets of, P 314⁴.
heat of adsorption of CO₂ by, 3535⁴.
heat of adsorption of gases by, 3535⁴.
internal surface of, as detd. by adsorption of aliphatic alcs., 2208².
iodide recovery from adsorptive I-contg., P 160².
isoelec. pt. of, 1388⁴.
manuf. of, P 2557².
medicinal, 628².
medicinal, testing, 797².
oxidation at surfaces, 1040².
oxidation of, by H₂SO₄, 3598⁴.
peat, 3447⁴.
potassium iodide from I-contg., P 2763².
purification of adsorbent, 7².
for purifying and decolorizing liquids, P 805⁴.
reaction velocity with CO₂, 1340⁴.
from seaweed, 2762².
sorption of gas by, 1576².
treatment of wood, with water under pressure and at high temps., 2792².
- Charging apparatus**. (See also *Feeding devices*.)
for cellulose digesters, P 4068⁴, P 4069¹.

Cochlearia, preps., 1871¹.
Cochlospermum, dye from wood of, 4072^o.
Cockchafer. See *Melolontha vulgaris*.
Cockroach, aerobic and anaerobic metabolism of, 1682⁷.
 heart beat in, effect of temp. on, 1151³.
 metabolism of, 2337^o.
Cocoa. (See also *Cacao*; *Chocolat*.)
 boron compds. in, 3990².
 bottled beverages contg., 3399^o.
 cacao shells in, detection of, 1156⁴.
 compn. of, 3093⁴.
 fat detn. in, 141¹.
 fermentation in prepn. of, 3990².
 as protein source in diet, 436⁴.
 soly. of, increasing, P 3690².
Coconut. (See also *Copra*.)
 fiber, copra and other by-products from, app. for obtaining, P 508⁴.
 fiber, mineralizing, P 306³.
 preserving, P 616².
Coconut oil, color and fluorescence of Manila, 1890^o.
 detection of, 3398³.
 detection of, in butter, 284¹.
 detn. in mixts. with palm kernel oil, 1852^o.
 distn. of, 2568^o.
 extn. of, P 3279^o.
 in soap (milled), 335^o.
 splitting, effect of varying quantities of "contact" reagent in, 3758^o.
 treatment with adsorptive C, 4080¹.
 ultra-violet irradiation of, 137¹.
Cocoons, of *Samia cecropia*, dihydroxyphenyl-alanine in, 3684⁵.
 silkworm, compn. of internal atm. of, 1499⁷.
Cocos. See *Coconut*; *Palms*.
Codamine, constitution of, 1125⁴.
Codeline. (See also *Opium alkaloid*.)
 carbon suboxide addn. compd., 735⁴.
 constitution of, 2007^o.
 detection of, 1860⁴, 2358⁷, 2757⁴, 3102^o, 3423².
 detn. of, 2445⁴, 3576¹.
 diethylbarbituric acid-*p*-cresotic acid mixts., pharmacol. action of, 1497⁴.
 effect on red blood corpuscles, 132³.
 hydrochloride of, soly. in glycerol, 2356⁴.
 in opium smoke, 3965⁵.
 -phenacetin-acetylsalicylic acid mixts., pharmacol. action of, 1497⁴.
 spectrum of, 915⁴.
 toxicity of, 3234².
 trichloroacetate, 3905^o.
Codelmon, *dihydro-*, derivs., 2697^o, 2698¹.
 —, *dihydrohydroxy-*, effect on blood vessels, 3234⁴.
 toxicity of, 3234².
 —, *hydroxy-*, constitution of, 2698⁴.
 effect on blood vessels, 3234⁴.
Codeone, *dihydrohydroxy-*, phenylhydrazone, 2698⁴.
 —, *tetrahydrohydroxy-*, 2698⁸.
Codling moth, in apricots, 472⁷.
 insecticides for, 978^o, 3250⁴, 3415⁷, 3701^o.
 larva, hibernation in, breaking up of, 2939^o.
 spraying with Pb arsenate, 472^o.
Cod-liver oil, antirachitic action of, photo-activity and, 3654¹.
 antirachitic principle of, 3220³.
 antirachitic property of, and of irradiated cholesterol, 3220².
 color reaction of, 425².
 concentrate of, as antirachitic agent, 1138².
 in diet, effect on organism, 3653^o.
 effect in thyroparathyroidectomy, 965¹.
 effect on Ca assimilation in lactation, 948¹.
 on deposition of lime compds. in shell of hen eggs, 761⁴.
 on egg fertility, 3073⁴.
 on endocrine glands, 2148^o.
 on fecal alkyl., 1833^o.
 on growth of young of milk-fed rats, 1831².
 on photographic plate, 1480⁴.
 emulsions of, as feeding stuff, 3386^o.
 extg., P 1023⁷.
 ferrous iodide-, 3704¹.
 as food, 2725⁴.
 growth factor of, 3071².
 growth-promoting property of, 436⁷.
 hydrogenation of, 601^o.
 light action on, 120^o, 3386^o.
 light-treated, catalytic activity of, 2335¹.
 malt prepn. in dry form, 799^o.
 in nutrition, 438².
 nutritional value and standardization of, 2293⁷.
 ozone detection in, 2484^o.
 pharmaceutical prepn. of, P 988^o.
 photoactivation by Röntgen rays, 2723^o.
 photoactive, effect on blood sugar, 455¹.
 photoactivity of, 2284², 2484².
 pigments of, 2722⁷.
 pills contg. absorbent charcoal and, P 3105^o.
 review on, 1366¹.
 rickets prevention in premature infants with, 601⁴.
 rickets prevention with, 120^o.
 in rickets treatment, 119^o, 1832^o.
 sodium salts of higher unsatd. acids of, prepn. of, 1519^o.
 tuberculosis treatment with, 771⁴.
 ultra-violet irradiation of, 1177, 119^o, 137¹.
 vitamin A content of, 760^o, 947^o.
 effect of light on, 760^o.
 effect of ultra-violet light on, 3220⁷.
 vitamin activity of, effect of heat and oxidation on, 2722^o.
 vitamin A in, color tests for, 121¹.
 vitamin (antirachitic) of, 1293², 3934^o.
 vitamin (antirachitic) of, effect on organism of child, 438².
 vitamin D in, source of, 2722⁵.
 as vitamin E source, 2921⁴.
 vitamin potency of, 3938^o.
 vitamins A and D in, detection and detn. of, 3937^o, 3938².
 vitamins from, in pregnancy, 2288².
Coefficient of expansion, etc. See *Expansion*, etc.
Coenzymes. (See also *Vitamins*.)

Containers. (See also *Ampoules; Bags; Bottles; Cans; Cylinders; Flasks; Kiers; Vacuum containers.*)

accumulator, P 1693³, P 2228⁶.
moldable compn. for, P 480².

protecting Pb lining in wooden, P 3837⁹.

with acid-proof lining, P 4797⁷.

acidproof linings for metal, P 3288⁸.

acid, rubber linings for, 512².

for acids, P 804², 1031².

for acids, alkalies, etc., P 2536⁸.

ammonia cylinders, caps for, P 2173⁴

benzene, dangers of empty, 496⁹.

for blasting charges, P 3271¹.

carboys for dangerous materials, 1858⁸.

carboys, inspection and tests of, 1549⁹.

compr. for, P 307⁶.

concrete, durability of reinforced, effect of permeability of cements on, 2970⁸.

for cond. liquids, 1397¹

copper, fermentation in, 2056⁸.

corrosion by EtOH, prevention of, P 796⁸

corrosion of, electrolytic system for preventing, P 862⁸.

corrosion of iron, 2640⁹.

cover for, holding materials under pressure, P 3003².

for cyanide baths in electroplating, 1765⁶

for dangerous materials, 1858⁸.

dehydrating air in, absorbent for, P 782¹

for drugs, moisture content and, 298⁹

for elec. batteries, P 233¹, P 209⁹.

electrolytic, corrosion-resisting S mixt. for, P 631².

evapg. tank for residues of CaH₂ manuf. etc., P 515¹.

for explosive charges of firecrackers, P 3271¹.

fermentation, effect of nature and shape on degree of fermentation, 980⁸

filtering, P 676²

Frederking, 2402⁴.

for gases and oils or other volatile liquids, P 3771⁷

glass, breakage of, 1527⁸.

shaping edges of, P 3258².

testing of medicinal and ampoule, 2047⁹.

from glass tubing, P 198⁷.

of graphite and asphalt, P 1526⁸.

hot-water reservoir, P 2822⁴.

ionization in spherical, 1056⁹

for liquefied gases, etc., P 2202².

liquid discharge at definite temps., automatic control for, P 2202⁴.

loss of volatile liquids from, absorption app.

for preventing, P 198².

for malt, 206⁹.

for nitric acid, 1440⁸

oil, closure for, P 2822⁸

for oxygen and H₂, 2578⁸.

of paper pulp, molding around a core of ice, P 2559⁶.

papier mâché fire buckets, decay of, 4060².

petroleum, cleaning, P 491⁴.

for prep. liquid milk from powder, P 3240⁸.

pyroxylin, for explosives, P 2065⁷.

for radium soln., Pyrex as, 3820⁹.

for reactions under high pressure and temp., P 3493⁹.

reaction, for high pressures, device for introducing or discharging materials, P 3771⁷.

retting, P 1554¹.

rotary pulp screen in vibrating vat, P 1380⁸.

rubber-lined, P 674⁴, P 1378².

rubber linings for, 1374⁴.

sheet-iron, welding with water gas, 1379².

shipping, specifications of A.S.T.M. for, 1158¹.

silica, P 1877¹.

steel, for CaH₂, examn. of ruptured head of, 1084⁹

storage and reaction, 1033⁴.

sulfur chloride-resistant, 2076⁴.

for volatile liquids, P 344⁴.

welding of, 197²

wooden, in textile industry, 1553¹.

zinc lined, poisoning from buttermilk stored in, 3968⁹.

Contractometers, 3805⁹.

Convallamarin, effect on heart, 1314⁴.

Convallaria, pharmacol. action of, 3975⁸.

Conveyors, glass, heat losses in, 2365⁷.

Convoluta, antagonism of Ag and Sn to, 750¹.

antagonism of Ag to, activation by light, 750².

Convulsions, dyes causing, effect of asphyxia on action of, 138⁹.

during ether anesthesia, 3252⁸

insulin, 773².

picrotoxin, myographic studies of, 3978⁸

from strychnine, picrotoxin and physostigmine, effect of narcotics on, 3681².

sugar content of spinal fluid in, 272⁷.

Cooking, effect on nutritive value of foods, 259².

Coolidge tubes. (See also *Vacuum tubes.*) 2079⁷.

reflection of electrons from Mo target of, 3153⁸.

Cooling (See also *Refrigeration.*)

of absorption oil at gasoline plants, 1539².

of calcined fuller's earth, etc., P 1337².

of coal briquets, P 315⁴.

of coke, 3265⁹

with CO₂, P 316².

by dry process, 642¹, 1343², 1536² 5

of constituents of air or other gases, system for, P 783⁹.

effect on muscle, 2283²

of enamels, 4039⁹.

of fruits and vegetables for shipment, P 1157⁸

of iron and steel, detn. of time of, 370⁸.

oil for, P 1547².

of oils, etc., to deposit substances as discrete particles, P 3455².

of sheet glass, system for circulating gases for, P 3438⁸.

speed of, effect on structure of alloys, 3337¹.

under, in surface condensers, 3286⁴.

Cooling apparatus. (See also *Refrigeration.*)

P 1034⁸, P 3772².

for coke, P 1344⁴, P 3124⁵, P 3450⁸.

for electrolytic cells, P 2438⁸.

flow of water in, thermoregulator for, P 3772².

for hydrocarbons, P 491⁸.

for lime, cement, or other materials discharged from kilns, P 838⁹.

for metal bar., P 3597⁸.

for microtome sections, 1283³.

for milk, cream, oils, etc., P 3288⁷.

for milk, etc., P 143¹.

for petroleum vapors, etc., P 1005⁹.

producer or furnace with, P 1034⁷.

for rubber, P 3489⁸.

for water, P 1511¹.

for wood, etc., P 676⁴.

 hot rolled rods for wire drawing, specifications of A.S.T.M. for, 143.
 industrial, behavior and treatment of, 1082.
 industry, 3586.
 industry in Russia, 1951.
 internal friction of molten, 2581.
 internal pressure of, 677, 1729.
 inter- vs. intra-cryst. fracture in systems of large crystals of, in relation to temp. and time as well as resulting recrystn., 3869.
 -lead particles, P 2869.
 linear relation between temp. and deforming stress, 3871.
 at low temps., 516.
 in marine crustaceans and shell fish, 615.
 markets for, growth of, 724.
 in medicine and industrial pathology, 3682.
 melting p. of, relation to adiabatic coeff. of elasticity, 3779.
 microorganisms and, 2490.
 mixed crystals of Au and, transformation without recrystn. in, 1581.
 mixed-crystal systems: Au-, Pd-, and Pt-, lattice structure and elec. cond. of, 2204.
 mixing with Al, 1092.
 optical constns. of, detn. of, 1402.
 org. pptn. of, 3031.
 ornamenting, P 1248.
 oxidation of Fe in presence of, 550.
 oxide films on, formation of, 489.
 paramagnetism of, 1588.
 passivity of, 2836.
 penetration of mild steel by, 1959.
 phosphorized, properties of, 1440.
 phosphors of CaS or SrS with, spectra of, 3158.
 photoelec. threshold of, 2605.
 photomicrographs of, 553.
 pig iron contg., C characteristics of, 3872.
 poisoning, 2319.
 powders, effect of heat on solidity of compressed, 2407.
 precipitation from acid solns. of its salts with Zn, 2418.
 precipitation from sulfate solns., P 4034.
 preheaters of, in potash works, 2052.
 production in 1907-1923, 1427.
 properties of, 3711.
 radioactivity of, exposed to sunlight, 2841.
 radiography of, by immersion in homogeneous medium opaque to x-rays, 552.
 radium F pptn. on, 2841.
 reaction with H, 217.
 reaction with H₂S (liquid), 2855.
 recrystn. in, 1615, 2204, 3178.
 recrystn. of, temp. detn. at beginning of, 2641.
 resources of Calif. and Oregon in 1925, 1785.
 of Eastern States in 1925, 1079.
 of New Mexico and Texas in 1925, 1242.
 of South Dakota and Wyoming in 1924 and 1925, 1079.
 of U. S. in 1925, 2243.
 of Utah in 1925, 2452.
 reviews, 1079, 3586.
 rods or tubes of, P 729.
 rolling- and recrystn. texture of, 2640.
 Röntgen-ray isochromats of, 2099.
 Röntgen rays (soft) of, 2004.
 Röntgen tubes of, effect of temp. on anode of, 3550.
 ruby glass production with, 1874.
 scattered x-rays from, Compton lines in, 2606.
 scattering of cathode rays by foils of, 531.
 sepn. from glass melts, 2541.
 silica gels metallized by, adsorption of gases by, 845.
 silica gels treated with, catalysis of hydro- genation of C₂H₂ with, 3532.
 solid solns. in, diffusion of Zn in α -series of, 1397.
 soly. in Al, 3801.
 in basic Cu carbonate, 148.
 in Hg, 2416.
 soly. of H, N and of CO-CO₂ mixt. in, 553.
 specifications of A.S.T.M. for various kinds of, 1158.
 spectrum of, 19, 206, 359, 702, 704, 857, 1060, 1593, 1929, 2101, 2226, 2609, 2843, 2845, 3023, 3157, 3158, 3310, 3828.
 Stark effect for, 3157.
 static durability of, 1088.
 steel contg., corrosion of, 1960.
 strengthening during drawing and compression, 1433.
 structure of, 1952.
 sulfur effect on, 3594.
 surface tension of molten, 3202, 3507.
 system: Al-, 1040.
 system: Al-Mn-, 3337.
 system: Sb-Pb-, solid solns. in, pseudo-binary lines and, 849.
 system: Sb-Sn-, 2453.
 system: Fe-C-, 1743.
 system: Fe-S-, 3586, 3587.
 system: Mn-Zn-, 1215.
 system: Ag-, 3776.
 system: Ag-CuCl-AgCl-, 1744.
 system: Ag-Sn-, 3803.
 system: Sn-, 1954.

 tin-, P 2116⁸.
 for bells, 3039⁹.
 elec. resistance of, change with temp., 3869⁸.
 hardening of, 1788⁴.
 internal friction of fused, 558⁸, 2581⁸.
 magnetic susceptibility of, 2655⁴.
 tin-, Sn-Sb-, and Sn-Sb-Pb-, fluidity of, 2641^{4,8}.
 viscosity at high temps., 2454⁸.
 viscosity of, 1090⁹.
 welding, 3179⁸.
 wire cloth of, corrosion of, 1245⁷.
 zinc-, P 2217.
 Brinell hardness and e.m.f. of, 1619¹.
 changes of sp. heat, vol. and elec. cond. with temp. in, 1581³.
 color of, 1088⁸.
 electroplating with Au, P 2117
 phys. properties of, 3881⁸.
 tensile tests on crystals of, 3338⁸.
 β -transformation in, 3879⁸.
- Copper-ammonia-cellulose.** (See also *Schwetzer's reagent*)
 formation of, 320².
 mol. unit of, 3457⁸.
 for rayon, P 3461¹.
 viscosity of solns. of, 1707⁹
- Copper ammonium chloride**, dihydrate, crystal structure of, 3509⁸.
- Copper-ammonium ion**, stability of, 1397⁸.
- Copper ammonium sulfate**, solid solns. with NH₄ Fe sulfate, NH₄ Zn sulfate, NH₄ Ni sulfate, NH₄ Co sulfate and NH₄ Mn sulfate, soly. of, 3502⁹-3503².
- Copper arsenite**, dysentery treatment with, 962⁹.
- Copper bromides**, CuBr, elec. conduction in, 851⁹
 CuBr, elec. cond. of, 2594⁸.
 reaction with BrCN, 3170⁸.
 spectrum of, 2611⁹.
 CuBr₂, addn. compd. with thiocarbamide, 67¹
 reaction with HBr and with alk. bromides, 2238⁴
- Copper carbonate.** (See also *Burgundy precipitate*)
 as fungicide for barley smut, 3249⁸.
 as insecticide for weevils, 3702².
 soly. of Cu in basic, 148⁸.
 treating grain with, app. for, P 1688⁸.
- Copper chlorides**, CuCl, density of fused, 5⁹
 CuCl, elec. conduction in, 851⁹.
 as electrolyte, 2093⁸.
 recovery in Deacon Cl process, P 3718¹.
 reduction by H, heat of fusion, heat of formation and free energy of formation of, 1397⁸.
 spectrum of, 2611⁹.
 system: Cu-Ag-AgCl-, 1744³.
 CuCl₂, addn. compd. with *p,p'*-bis(dimethylamino)triphenylamine, 2670⁸.
 effect on protoplasm of *Ameba proteus*, 1130².
- Copper cobalt nitrate**, 1235⁷.
- Copper compounds**, amino-, 868¹, 2443⁸.
 amino-, adsorption on charcoal, 683¹.
 configuration of, 388⁹.
 as detonators, 1184⁴.
 displacement reaction in, 1418².
 mol. vol. of NH₃ in, 1037⁸.
 with arsenic, prepn. of, 1080⁷.
 with biuret, 866⁸.
 complex, of *o*-amino- and *o* hydroxyazo compds., 1456⁷.
 with cupferron, soly. of, 3791².
 disulfido and diselenito complex, 3169^{1,2}.

- from fluorides, P 991⁹.
 formation of complex, optical rotation in 2598¹.
 heterometallic Pt-contg., thermal rearrangements in, 1417².
 with hydroxy acids, 544⁹, 3168⁷.
 for marine piling, 810².
 pyridine, 2231⁹.
 recovery from pyrite cinder, P 3428³.
 stabilized by ethylenediamine, 3166⁸.
 tetrapyrrolineborofluoride, 1235⁴.
- Copper cuprimandate**, 3168⁸.
- Copper cyanide**, CuCN, as catalyst of autoxidation, 735⁸.
- Copper cyanoruthenite**, 3846⁸.
- Copper ferrocyanide**, adsorption on fibers from aq. suspensions of, 518².
 colloidal, antagonism of ions in neutralization of, 683².
 coagulation of, 1394⁴.
 viscosity and elec. cond. of, effect of aging on, 3514⁹.
- Copper fluoborate**, prepn. of, 2230³.
- Copper glance**. See *Chalcocite*.
- Copper halides**, as catalysts in formic acid manuf., P 104⁴.
 elec. conduction in, transition from electronic to ionic, 3810¹.
 spectrum of, 1931⁸.
- Copper hydride**, (CuH), electronic states and band spectrum structure of mols. of, 206¹.
 heat of formation of, 2835⁸.
- Copper hydroxides**, peptization in presence of sugars, 3514⁹.
- Copper iodide**, (CuI), elec. conduction in solid, 851⁹, 3809⁹.
 half no. oscillation terms, 1925⁸.
 solid solns. with AgI, 5².
 solid solns. with AgI, crystal structure of, 840¹.
 spectrum of, 2611⁹.
- Copper ions**, activity of H ions and, in salt solns., 3149².
 catalytic effect of, in HCl evolution, 158⁸.
 as catalysts in H₂O₂ decompos., 3532².
 as oxidation catalysts, 1215¹.
- Copper nitrates**, (Cu(NO₃)₂), absorption of mixts. of NH₃ and, in NH₄NO₃, 1397⁹.
 reaction with ethylenediamine, 2230³.
 system: Co(NO₃)₂-H₂O-, 1235⁷.
- Copper number**, 3858⁸.
 of cellulose, 2795².
 detn. of, 4064⁴.
- Copper ores**, of Africa (Natas mine), 3584⁹.
 of Albania, 1079⁴, 3032².
 of Arizona (Yapavai Co.), 41⁷.
 of Bionaz, 3175⁹.
 book: Leached Outcrops as Guides to, 1961².
 of British Columbia, Britannia mines, 3032².
 chalcocite, bornite and covellite in, 876⁹.
 concn. of, P 219⁴, 725⁷, P 2868⁴.
 concn. of, from Horne Mine, Rouyn, Que., 725⁷.
 concn. of Pb-Zn-, 725⁷, 3865².
 concn. of Zn-, 726¹.
 copper detn. in, 3587⁹.
 covellite and chalcocite in, 3583⁸.
 flotation of, P 2455², 2862⁹.
 effect of sol. salts in, 1427⁹.
 at Inspiration, Ariz., 3176⁹.
 plant for, 549⁷.
 NaCN in, 724⁹.
- flotation of Fe-, 881⁹, 1241⁹.
 flotation of Ni-contg., 3865⁹.
 flotation of Ag-, 3177¹.
 flotation of Zn-, modifying reagents for, 3034⁹.
 of French Congo (Niari), 879⁹.
 gold-, of western Quebec, 725².
 in porphyrin, relations to igneous intrusives, 1240².
 of Quebec (Abitibi Co.), 3320⁷.
 of Quebec (Desmeloizes and Trecesson townships), 3329⁸.
 of Quebec (western), 3329⁷.
 Rouyn, treatment of, 3865⁸.
 sulfide, bacterial influence on genesis of, 879².
 supergene enrichment of, below a lean pyritic zone, 1426⁹.
- Copper oxides**, Becquerel effect in, 2098¹.
 as catalyst for AcOH manuf., P 3368⁸.
 Cu₂O, in anti-fouling compns., 182².
 catalysis of hydroxylamine with, 1914⁸.
 in copper, 46⁹.
 detn. in sugar analysis, 1426¹.
 effect on electrolytic and refined Cu, 1082⁷, 1955².
 oxidation by MnO₂, 1419².
 CuO, atomic wt. of Cu and, 1036³.
 as catalyst for dehydrogenation of MeOH, 2219⁴.
 catalytic action on 2-chlorocamphane, 2265⁸.
 colloidal, coagulation of, 845⁹, 1394².
 colloidal, dispersion by electrolysis, 1390¹.
 colloidal, protective action of Rochelle salt on, 2587⁴.
 copper rectifier, theories of, 14².
 elec. charge of hydrated, reversal by salt solns., 1910¹.
 elec. cond. of mixts. with Sb, 2595².
 elec. cond. of mixts. with MnO₂, 693⁹.
 glass contg., light absorption by, 2768⁹.
 heat of reaction with Mg and Al, 3572⁷.
 oxidation of org. compds. by, 1795⁴.
 reaction with Zn or Fe, 3321¹.
 reduction by gaseous reducing agents, 1582².
 reduction of mixts. of ZnO and, 2855⁸.
 system: SO₂-H₂O-, 1069⁹.
- Copper potassium chloride**, dihydrate, crystal structure of, 3500⁹.
- Copper potassium sulfate**, solid solns. with Co K sulfate and with K Zn sulfate, soly. of, 3503².
- Copper rubidium chloride**, dihydrate, crystal structure of, 3500⁹.
- Copper salts**, adsorption by MnO₂, 2409⁷.
 of amino acids and polypeptides, 1965⁸.
 effect on photochem. oxidation of benzidine in presence of eosin, 1409⁹.
 infrared absorption of, in solns. and in glasses, 1758².
 pharmacol. action of cuprous and cupric, 3955⁹.
 reduction by glucose and uric acid, 2213².
- Copper sprays**. See *Sprays*.
- Copper sulfates**. (See also *Water, purification of*.)
 basic, 1069⁹, P 3716⁹.
 for fungicides, 471⁹.
 prepn. of, P 3461¹.
 poisoning from mixt. of alum, ZnSO₄ and, 3967⁹.
 Cu₂SO₄, catalysis of hydroxylamine decompos. with, 1914⁸.

- CuSO₄**, absorption of ultra-violet light by, 3557^a.
 activity of, 3808^a.
 Becquerel effect in, 2008¹.
 catalyst of HgSO₄ and, for phthalic acid prep., 2460^a.
 coagulation of MnO₂ sol by, in presence of EtOH and of sucrose, 1739^a.
 combating algae in rice fields with, 3101^a.
 crystals grown from aq. solns., effect of gelatin on size and distribution of, 3502¹.
 dehydration by acetic anhydride, 1040⁷.
 dehydration of, 3321³.
 dielec. consts. of, 6964.
 dissoln. velocity of, 3520³.
 effect on breeding of flies in feces of cattle, 2741².
 effect on diffusion velocity of ZnSO₄, 1741³.
 effect on flotation, 3034³.
 effect on viscose, 2383^a.
 elec. cond. of agar-contg. solns. of, 2087^a.
 as insecticide, airplane dusting of, 793^b.
 manuf. of, 3713^a.
 photoelec. effect in, effect of water of hydration on, 2095¹.
 potential of quinhydrone electrode in, 1586^a.
 reaction with [Zn 3 en]SO₄, 1418².
 salt temp. of solns. with (NH₄)₂SO₄, 3297⁷.
 sepn. from FeSO₄ by crystn., 2407^a.
 single crystals of, growth and soln. in presence of gelatin and dyes, 3508³.
 soly. in NH₄OH, (NH₄)₂CO₃ and NH₄HCO₃, 2210⁹.
 soln. of, motion-picture study of, 352^a.
 specifications for, 2109³.
 spectral transmission curves of aq. solns. contg., 1773^a.
 from sulfide ores, P 2537^a.
 system: H₂SO₄-H₂O, 2762³.
 water detn. in, 719².
- Copper sulfides**, compn. and behavior of pptd., 3942⁷.
 fertilizer contg., P 701³.
 Cu₂S, elec. conduction in, 1748².
 systems: FeS-, and Cu-Fe-FeS-, 3587^a.
 system: Ag₂S-PbS-, 3878¹.
 CuS, adsorption of ZnS by, 3502³.
 induced pptn. by, 2825¹.
- Copper thiocyanate**, mordanting of Ag images by, 1599^a.
- Copper thiosulfate**, complex, 2443^a.
- Copra**, app. for obtaining, P 508^a.
 meal in feeding expts., dried shrimps vs., 1504^a.
 oil extn. from, P 3279^a.
 sampling, inspection and analysis of, 1195^a.
- Copratin**, in putrefaction of blood, origin of, 253^a.
- Copratoporphyrin**, 3627^a.
 detection of, 1469^a.
 spectrochem. reactions of, 253^a.
- Coprohemin**, esterification of, 3060^a.
- Coproporphyrin**, absorption of rays by, 3633².
 detection of, 1469^a, 3065^a.
 detn. (spectral) of, 3209³.
 fluorescence of, 109⁷.
 synthesis of, and derivs., 103¹, 104¹.
 yeasts rich in, enzymes, coenzymes and bio-catalysts in, 1274^a.
- Coptis**, alkaloids of root, 2049^a.
japonica, alkaloids of, 2700^a.
- Ooptisine**, constitution of, 3622⁹.
 ----, **tetrahydro-**, 3622⁹.
- Coral**, spicules of, crystal structure of, 2141².
- Coramine**, effect on spinal cord of decapitated cats, 460^a.
 pharmacol. action of, 3960^a.
 revivification after CO poisoning by, 1848^a.
 tuberculosis treatment with, 2154^a.
- Corchorus**. See *Jute*.
- Cordierite**, in granite from Otztaler Alps, 43¹.
 pleochroic haloes in, 3820².
- Cordite**, chem. stability of, 1185¹.
 explosion in, factory, 4072¹.
 rolling of, machine for, P 1031^a.
- Coreductase**, 419².
 identity of comutase in yeast with, 1821¹.
 identity with cozymase, 1274³.
- Cores**. See *Molds* (I).
- Coriander oil**, 4014^a.
- Coriandrol**. See *Linalool*.
- Cork**, absorption by, errors in org. elementary analysis from, 1603^a.
 coating with metals, P 806^a.
 fabricated sheet, P 307².
 mineralizing, P 306^a.
 molding granulated, P 3110¹.
 prepn. of so-called oxide, 2605¹.
 sterilizing with gases, app. for, P 3288^{a,7}.
- Corkboard**, thermal cond. of plain and rubberized, 1319⁷.
- Corkplate**, thermal cond. of, 1319⁷.
- Cork substitutes**, P 307^a.
 sterilization of, app. for, P 344⁷.
- Corkwood**. See *Musanga smithii*.
- Corn** (*maize*). (See also *Grains*; *Silage*.)
 absorption in seeds, temp. and, 3648^a.
 ash of, correction of anemia on milk diets with, 2017⁷.
 by-products of, 3686⁷.
 carbohydrates and fat in, inheritance of, 2010⁷.
 chlorosis of, relation of Mn and Fe to lime induced, 1164².
 coöperation between N-fixing bacteria and, 943^a.
 diet of, regaining of body wt. on, 2725^a.
 diet of, Na deficiency in, 4387⁷.
 dihydrositosterol in, 758^a.
 dry stimulation of, 3382².
 effect of plant injury and root rot disease on phys. and chem. compn. of, 1830^a.
 as feeding stuff, cassava vs., 1504^a.
 fermentation of, BuOH and acetone from, 980^a.
 fertilizers for, (NH₄)₂SO₄ as, 790^a.
 flaked, compn. of, 1502^a.
 in flour as partial substitute for wheat, 288^a.
 flour, sweet-potato starch in, 141².
 germinating seed, effect of electromagnetic field on, 938⁷.
 mash, N for yeast in fermenting, 4011^a.
 metabolism of, climatic effects in, 3932^a.
 net-energy value of, for chickens, 3937⁷.
 plant juice, effect of Na₂CO₃ and of CaCl₂ on acidity of, 2491^a.
 preserving, P 971¹.
 protein content of, relation to sp. gr., 940^a.
 protein content of, variation in, 3649⁷.
 protein, nutritive value of, 945^a.
 removal of plant food in thinning, 792².
 respiration in, 2015^a.

- respiration of, age and, 1137³.
 rickets and, 2920¹.
 seedlings, N compds. in etiolated, 2294³.
 seedlings, nutrient soln. for, 3068³.
 smut, effect on sugar content of stalks, 2148².
 soil deficiencies for growth of, detn. of, 3700³.
 stalks, cellulose from, 1008², 4062³.
 insulating material, plaster board, etc.,
 from, P 1693⁴.
 maintenance of soil org. matter with,
 3244³.
 pulp from, P 3270³.
 starch—see *Starch*.
 sweet, factors detg. quality in, 2340¹.
 sweet, relation of season factors to quality
 in, 7587³.
 vitamin A content of endosperm of yellow,
 and of whole white corn, 1833¹.
 vitamin A formation in, effect of light and
 heat on, 1829¹.
 wax of, compn. of, 1963³.
Corn cobs, char from, as carburizing agent,
 3883³.
 fertilizers from, P 2526², 3.
 lignin from, 3056³.
Corn cockle. See *Agrostemma githago*.
Cornae. See *Eyes*.
Corn oil, 503³.
 dihydrositosterol in, 7584³.
 phytosterols in, 100³.
Corn starch. See *Starch*.
Corn sugar. See *d-Glucose*.
Cornuite, in kieselguhr from Neu-Ohe, 41¹.
Cornus sanguinea, bark, compn. of, 600¹.
Corona, alternating, space charge and current
 in, 1936².
 carbon monoxide decompn. in, due to
 alternating elec. fields, 2436¹.
 discharge, effect on petroleum, 1701³.
 effect, 1591⁴.
 space charge surrounding conductor in, at
 60 cycles, 22³.
Corpuscles. See *Blood corpuscles*; *Blood
 corpuscles, red*; *Electrons*; *Leucocytes*.
Corpus luteum, chemistry of, 952³.
 hormone content of, 1520³.
 hormone from, 2310³.
 lecithin from, fatty acids of, 2022⁷.
 lipoids of, 3390³.
 lipoids of, effect on susceptibility of uterus
 to poisons, 278².
 physiologically-active products from, P 2052¹.
 retrogression of, blood cholesterol in, 2925³.
Corpus luteum extract, effect on blood sugar
 content, 442³.
 hormone content of, 1280³.
 medicinal compn. contg., P 158⁴.
Correspondence principle, electron distribu-
 tion in crystals and, 3504².
Corresponding states, for entropy of elements,
 2215³.
 law of, 2582³.
Corrosion. (See also *Coating(s)*; *Paint*;
 Tarnishing.)
 of accumulators, compn. for prevention of,
 P 362⁴.
 by acids, 3038³.
 by acids of metals submerged therein, 1437³.
 by alc. and its mixts., prevention of, P 3886³.
 of alloys by alk. NaCl contg. H₂O₂, 1959³.
 by HNO₃, mixed acid and H₂SO₄, 3882⁷.
 by oxygenated NaCl, 1940¹.
 of alloys (light-metal), 2650⁴.
 alloys resistant to, 1440², 3591⁴.
 for mine-water pumps, 3039³.
 welding of, 2454⁴.
 of aluminum, 2650³.
 of aluminum alloys, 2454¹.
 of aluminum alloys by sea water, 3338².
 aluminum alloys resistant to, 3594⁴.
 of aluminum and its alloys in electrolytes,
 3594⁴.
 of aluminum and its alloys, prevention of,
 1438⁷, 3883¹.
 of aluminum and its alloys with Zn and Sn,
 2454².
 of aluminum, prevention by coating, P 3180⁴.
 by ammonium sulfate, 48³.
 atm., 1623³.
 boiler, 1437³, 1860², 3883³.
 app for supply preventives, P 1443⁴.
 in locomotives, 1507⁴.
 prevention of, 3694⁴.
 of boiler parts, 1092³.
 of boiler tubes, 1437³, 1900³, 2518³.
 of boiler tubes and sheets, 1507⁷.
 of brakes, compns. for prevention of, P
 3256⁴.
 of brass tubes, lining to prevent, P 3341¹.
 of bronze by cellulose bleach liquor, 3450³.
 castings resistant to, by sea water, require-
 ments of U. S. Navy for, 1440⁷.
 of cast Fe, 371³.
 cast Fe alloy resistant to, P 1961⁷.
 of coatings of Cd, Ni and Zn, 3340³.
 coatings preventing, surface condition and,
 503⁷.
 colloid chemistry and, 2453³.
 condensers or other app. with built in test
 pieces for examn to det., P 1094².
 of condensers, preventing by coating with
 synthetic resin, P 3137⁷.
 of condensers, tanks, etc., electrolytic sys-
 tem for preventing, P 862³.
 of condenser tubes and metals by water,
 prevention of, 3694⁴.
 of condenser tubes, etc., preventing, P 888⁷.
 of containers by EtOH, prevention of, P 796³.
 of copper by non-oxidizing acids, effect of (C
 on, 1435³.
 of copper pipes, 3882³.
 of copper steel, 1960².
 copper steel resistance to, 2866³.
 copper, test of gasoline, 2786³.
 by cresylic acid, 485³.
 detn in galvanized iron pipes, 657⁷.
 effect of boundary films on, 3038².
 effect on fatigue of metals, 1082³, 1432³.
 of elec. app., prevention of, 2401⁴.
 as electrochem. phenomenon, 1507³.
 electrochem. theory of, 1092¹, 3037³.
 electrolytic studies on, 1792³.
 in engines, causes of, 2381¹.
 of engines, S content of fuels and, 2789¹.
 -fatigue of metal as affected by chem. compn.,
 heat treatment and cold working, 3869⁷.
 -fatigue of non-ferrous metals, 2049⁷.
 ferroxyl indicator in research on, 2453³.
 finding and curing, 2649⁴.
 by flue gases, 812³.
 of galvanized sheet steel, 47³.
 of gas holders, 2180³.
 of gas holders and tanks, prevention of, 727⁴.
 in gas industry, 1342³, 3729³.
 in gas mains and meters, 2873³.
 in gas meters, 2373³.

- in gasoline plants, 817², 1543⁴.
 of gasometers, prevention of, P 2377².
 of gas pipes, 2550², 3263².
 prevention of, 1880².
 purification of gas in relation to, 2549².
 of glass—see *Glass*.
 of glass tank blocks by shelving, 164⁴.
 of glass tank blocks, theory of, 3721².
 by insulating oil-resin mixts., 317¹.
 intercryst., 2114².
 of iron, 1742⁷.
 by CaCl₂, prevention of, 558².
 by HCl, 1793².
 by steam, CO₂ and air at high temps., 366².
 iron alloys resistant to, 1623², P 3342².
 of iron and steel, 2649⁷.
 prevention by coating with Fe and Mn phosphates, P 3179².
 by H₂SO₄ and HNO₃, 3038¹.
 of iron and Zn, effect of temp. on H liberation from, 886¹.
 of iron pipes and tanks, 2649².
 iron resistant to, P 3342².
 at joints and crevices, 2114⁷.
 in laundry industry, 3883².
 of lead and Pb alloys contg. Cu and Sb by HNO₃, HCl and H₂SO₄, 3882².
 liquid fuels resistant to, P 3122¹.
 losses from, 1959².
 of magnesium, 3038².
 of magnesium alloys, 3338².
 of metals, 3179².
 by mist and fume, 3882².
 of non-ferrous metals and alloys, 1245⁷, 2649².
 of non-ferrous screen wire cloth, 1245⁷.
 in oil and gas wells, 1543².
 by orange juice (boiling), 3881².
 overvoltage and, 2453².
 paradox of, 3882².
 of petroleum app. by H₂S, 2378⁷.
 of petroleum app. in Gulf States, 1544².
 of petroleum distn. app., 3266¹.
 in petroleum distn., effect of NH₃ on, 2553⁷.
 in petroleum industry, 2183¹, 3451².
 of petroleum pipes, 1179².
 prevention of, 1544².
 by soil, prevention with bituminous coatings, 1543².
 in petroleum refining, 817², 1543².
 prevention of, 2789⁷.
 prevention with NH₃, 1544².
 of petroleum tanks, 1544².
 by galvanic action of H₂S, 1543².
 by S, 1544².
 of pipes, 1543².
 of pipes underground, 2650².
 prevention of, 371⁴, P 372², P 728⁷, P 2116⁷.
 2649⁴, 2866², P 3597².
 by cement, 3260².
 by Cr plating, 727⁴, 1414⁴.
 coatings for, P 888⁷, P 909², 1543², 1766², 1888², 3037⁷, P 3597².
 coating with Cu and Cu alloys for, P 3343⁷.
 by coating with hydrocarbon oils, P 2247².
 compn. for, P 1705².
 electrodeposited coatings for, 1765².
 with electrodeposited Ni, 3315².
 by electrodeposition, 3564².
 of ferrous metals, P 728².
 by galvanization, 3039².
 with paint in oil industry, 1543⁷.
 with paints, 1555¹, 2805².
 with paints and coatings, 3038².
 with rubber, 835².
 by treating water, 2751².
 of refractories, 2056¹, 2542².
 by slag, 2542².
 for steel furnaces, 2542².
 in refrigerating systems, prevention of, 1319².
 in refrigeration, 3403².
 resistance of stainless Fe and steel, 1956².
 of resistant steels, 2649².
 reviews, 1437², 3038⁴, 3882².

Crystalline, manuf. of, 285^a.
Crystal oil, wetting power and evapn. of, 2749^a.
Crystals. (See also *Goniometers; Isomorphism*.)
 adsorption at faces of, 3508^a, 3789^a.
 alkali halide, apparent external asymmetry of, 1211^a.
 alkali halide, colloidal Au in, 3513^a.
 alloy, tensile tests on, 3339^a.
 aluminum, distortion under compression, 3503^a.
 elongation of, 1385^a.
 orientation of, 3594^a.
 stretching of, 1730^a.
 technological properties of, 2651^a.
 tensile deformation at crystal boundaries, 1572^a.
 of ammonium sulfate, production of large, 2374^a.
 atoms in, effect of thermal agitation of, on x-ray spectra, 3828^a.
 electron distribution in, 1223^a.
 electronic structure of, 2423^a.
 symmetry of, 3498^a.
 of black C, gas C as first of series of, 1030^a.
 in bone marrow, blood, spleen and asthmatic sputum, 1822^a.
 books: Trachten der, 528^a; Le principe de symétrie et ses applications, 1924^a; The Nature, Origin and Interpretation of the Etch Figures on, 3306^a; The Natural History of, 3540^a.
 bismuth, Hall effect in, 2605^a.
 of boron nitride, prepn. and properties of, 1383^a.
 calcium hydroxide, prepn. and optical properties of, 1402^a.
 changes at surface of freshly disrupted, 843^a.
 in colloidal Au, 10^a.
 constituent forces in heteropolar, theory of, 1750^a.
 construction of, 3498^a.
 copper, production of large, 552^a.
 cubic, magnetic anisotropy of, 1401^a.
 cubic salt, joining with mica, 1211^a.
 elec. cond. in, 3522^a.
 elec. cond. in single, and in aggregates, 1746^a.
 electron distribution in, quantum theory and correspondence principle in relation to, 3504^a.
 expansion of, from abs. zero to m. p., 3497^a.
 in eye, 3078^a.
 of fatty acids, examn with x-rays, 1573^a.
 gelatin effect on growth of, motion-picture study of, 352^a.
 in glazes, growth of, 2969^a.
 grown from aq. solns., effect of gelatin on size and distribution of, 3502^a.
 growth of, app. for taking motion pictures of, 2821^a.
 in aq. solns., 3501^a.
 in Cd-Zn alloys, 1089^a.
 in diff. directions, 3501^a.
 getter for controlling, P 2106^a.
 rate of, 3778^a.
 theory of, 3501^a.
 as homogeneous polyhedrons, 679^a.
 in hydraulic cement, x-ray diffraction of, 2971^a.
 ice, reflection of at. H from, 3543^a.
 imperfections in, theory of, 3501^a.
 inner diffusion in, temp. of, 2083^a.
 inter- π intra-cryst. fracture in systems of large, of Al, Fe, Cu and brass in relation to temp. and time as well as resulting recrystn., 3869^a.
 ionic charges in chem. compds. having tetrahedral, 855^a.
 ionic, structure of, 1384^a.
 iron, 2203^a.
 lattice dynamics of melting, 1040^a.
 lattice energy and energy of dissoln. of electrons from electronic lattice of Ca, 1925^a.
 lattices, electron reflection from, 3504^a.
 light absorption in, excitation from, 1222^a.
 light absorption in, temp. and, 2225^a.
 linear force of growing, 1948^a.
 of long-chain compds., structural modifications of, 4^a.
 magnetic quality in, 2418^a.
 magnetic susceptibilities of, 1211^a.
 magnetism and, 1920^a.
 of metals, 15^a.
 detn. of systems of, 689^a.
 elec. resistance at temp. of liquid He, 1747^a.
 electron lattice theory of, 3543^a.
 flow liability of, 2205^a.
 growing large, 552^a.
 growth of, relation of temp. to m. p. in, 1731^a.
 plasticity, strengthening and recrystn. in, 1385^a.
 preventing excessive growth of, P 728^a.
 mixed—see *Solutions, solid*.
 from mixed solns., compn. of, 2407^a.
 as mosaics of elementary perfect structure, 1918^a.
 opposing influence of ions in, 1731^a.
 optical axial angle of, of adularia, yellow orthoclase and moonstone, effect of temp. on, 2580^a.
 optical axis of calcite, apparent resolution with Fedorow stage, 2420^a.
 orthotaxy and thermotaxy of, 2205^a.
 paramagnetism of, at low temps., 16^a.
 parameter detn. from optical properties of, 1922^a.
 parameters of, 2824^a.
 Peltier effect within metallic, 2417^a.
 piezo-elec., behavior at high frequency, 361^a.
 plate, thickness of, detn. of, 2420^a.
 of potassium chlorosulfacetate, 1729^a.
 properties of, 1383^a.
 properties of, optical method of studying, 2205^a.
 reaction between, theory of, 3798^a.
 reaction velocity in powdered, 3797^a.
 reflection from calcite, refraction and dispersion of x-rays in, 2100^a.
 reflection of electrons from, 2842^a.
 relation of surface to mass and vol., 2082^a.
 rock-salt, cleavage of, 3778^a.
 elec. cond. of, 3777^a.
 surface energy of, 3543^a.
 surface energy of, detn. of, 2205^a.
 Röntgen-ray examn. of, app. for, 3826^a.

- Röntgen-ray illumination of, 1760⁷.
 Röntgen-ray reflection by, 15⁴, 700⁹.
 Röntgen-ray study of, 2406⁸.
 quartz, piezo- and pyro-elec. effects in, 1747².
 sepn. by phys. means, 2643¹.
 single, of Al, thermal and elec. conds. of, 3534¹.
 Al wires of, Röntgen-ray diffraction by, 3552⁸.
 of Bi, optical const. of, 1748⁸, 3558⁸.
 of Bi, thermoelec. and electro-thermal properties of, 3013⁸.
 formation by pptn. of metals from gaseous compds., 1731⁷.
 of iron, 356⁸, 1788⁸, 2591⁸, 3778⁸.
 of iron, longitudinal magneto-resistance effect in, 204³.
 of iron, magnetic properties of, 1218³.
 of iron, transverse magneto-resistance effect in, 1748⁸.
 of metals, etch planes in, 3503³.
 of metals of cubic system, elec. and thermal conds. of, 3776⁸.
 of metals, orientation of, detn. of, 3826⁷.
 of metals, plastic deformation of, 2205⁸.
 of metals, prepn. of, 2651⁴, 3333⁷.
 of nickel, scattering of electrons by, 1927², 3017⁸.
 Röntgen-ray analysis of, 1572⁸.
 Röntgen-ray rotation photographs of, interpretation of, 346⁸.
 tensile strength of, increase by plastic deformation, 3503⁷.
 of zinc, plastic deformation of, 1084¹.
 of zinc, thermoelec. effect in, 1918².
 size of, method for predicting, 3501⁸.
 slip in, in rolling, 3552⁷.
 of sodium chloride and KCl from silicic acid gel, 1044⁸.
 soly. of, and its relation to crystal structure, 39⁸.
 static methods of studying, 3776⁷.
 strain in, 39⁸.
 strength and strengthening of, mol. theory of, 1385⁹.
 strength of, of rock salt, quartz and fluorspar, 3778⁸.
 structure theory of, 2606⁸.
 symmetry group of, 516⁹.
 twin metallic, formation of, 553², 1385⁷, 2204¹, 2824².
 twinning of cubic, 3776⁴.
 ultra-violet absorption of, 3827⁷.
Crystals, liquid. See *Liquid crystals*.
Crystal structure. (See also *Crystal form*; *Crystallography*; *Isodimorphism*; *Isomorphism*.)
 of acetyl- and nitrocellulose, 174⁸.
 of alkali metals, 2406⁸.
 of alumina (β form), 1210⁷.
 of aluminum and Cu, 3503⁴.
 of aluminum-Cu-Mn alloys, magnetism and, 3880⁸.

spectrum in active N, 20¹.
spectrum of, 21¹, 3159^o.
- Cyanogen bromide**, reaction with cinchonine and with quinine, 3055².
reaction with isoquinoline and with 2-methyl-1,2,3,4-tetrahydroisoquinoline, 2694⁴.
with pyridine, 2694¹.
with salts, 3170².
- Cyanogen chloride**, reaction with secondary organo-magnesium halides, 563⁷.
- Cyanogen compounds**. (See also *Nitrogen fixation*.)
of alkali-forming metals, P 3716².
fumigating with, P 3098².
industry, processes in, 3690^o.
poisoning by, effect of glucose on, 1492⁷.
removal from coal gas, P 201⁸.
- Cyanogen halides**, reaction with phenylhydrazine, 913².
- Cyanoheмоglobin**, detection in blood, 1469⁶.
- Cyanohermidin**, oxidation of hermidin to, 2012².
system: hermidin-, electrode potentials of, 748².
- Cyanohydrins**, manuf. of, P 3057².
reaction with aromatic aldehydes, 1984⁴.
- Cyanoplatinates**, dehydration and hydration of, 1772².
- Cyanosin**, effect on bacteria, 113².
Cyanuric acid, methylation of, 1633².
Cyanurine. See *s-Triazine*.
- Cybotaxis**, 2207¹, 3549⁷.
- Cyclamin**, 2004².
- Cyclamiretin**, and derivs., 2904², 7².
- Cyclanones**, prepn. and constitution of, 3016².
reaction with aromatic aldehydes, 570².
- Cyclic alcohols**. See *Alcohols*.
- Cyclic bases**. See *Bases*.
- Cyclic compounds**. (See also *Heterocyclic compounds*.)
bi-, and comparison with naphthalene, 2689².
bi-, morpholines, synthesis of, 412².
bi-, stereochemistry of, 1112⁷, 2890⁴, 2903².
cis-trans-isomerism of, 1805².
excretion in animal body, 2926⁴.
optical properties of, 3014².
poly-, and homocyclic unsatd. isomerides, 3187².
prepn. from halogenated open-chain derivs., 1100⁷.
r arrangements (catalytic) of, 1249², 3181⁷.
synthesis of, review, 3886².
- Cyclic hydrocarbons**. See *Hydrocarbons*.
- Cyclic ketones**. See *Ketones*.
- Cyclization**. See *Ring*.
- Cycloazibenzotriazones**, *p*-bromophenyl-, 1638².
—, 2,4-dibromophenyl-, 1638².
—, 2,4-dichlorophenyl-, 1638².
—, 2,4,6-trichlorophenyl-, 1638².
- Cyclobutane**, 1,3-bis(*m*-nitrophenylmercapto)-, 3191².
—, 1,3-di-*p*-anisyl-3-benzoyl-4-(α -iminobenzyl)- \dagger , and phenylhydrazones, 397², 2.
—, 1,3-di-*p*-anisyl-3,4-dibenzoyl-, *cis*- and *trans*-, and derivs., 397², 2.
—, 1,3-dibenzoyl-, 1645².
—, 1,3-dibromo-1-methyl-, 1250⁴.
—, (iodomethyl)-, 1799².
—, methylene-, heat action on, in presence of Al₂O₃, 570⁷, 1249².
—, propyl-, 2463².
- Cyclobutanacetamide**, 1799².
Cyclobutanacetic acid, 1799².
Cyclobutanecarbinol, catalytic dehydration of, 571².
heat action on, in presence of Al₂O₃, 3181⁷.
Cyclobutanecarboxylic acid, ethyl ester, phys. consts. of, 1249².
—, 1-cyano-, ethyl ester, phys. consts. of, 1249⁷.
—, 3-(formylmethyl)-2,2-dimethyl-, and semicarbazone, 2679².
- 1,1-Cyclobutanedicarboxylic acid**, diethyl ester, phys. consts. of, 1249².
- 1,2-Cyclobutanedicarboxylic acid**, 3,4-dimethyl-, *cis*- and *trans*- and di-Et ester, 3603².
- 1,3-Cyclobutanedicarboxylic acid**, 2,4-diphenyl-. See *Truxillic acid*.
- 1,2-Cyclobutanedicarboxylic anhydride**, 3,4-dimethyl-, 3603².
- 1,1,2,2-Cyclobutanetetra-carboxylic acid**, 3,4-dimethyl-, tetraethyl ester, 3603².
- Cyclobutanol**, catalytic dehydration of, 571², 2.
heat action on, in presence of Al₂O₃, 3181⁷.
—, 1-methyl-, catalytic dehydration of, 571².
heat action on, in presence of Al₂O₃, 3181⁷.
- γ -Cyclogeranolones*, 738¹.
 Δ^2 -Cycloheptadecanone. See *Civetone*.
Cycloheptanaphthene,

- 7(8)-Cycloheptanaphthenone**, 1,2,3,9,10,10a-hexahydro-, and derivs., 2684².
- Cycloheptane**, 1,2-epoxy-, reaction with Grignard reagents, 1448².
- Cycloheptanacetic acid**, α ,1-dibromo-, 3187².
 Δ^1 , α -Cycloheptanacetic acid, 3187².
 Δ^1 -Cycloheptanacetic acid, 3187².
- Cycloheptene oxide***, reaction with Grignard reagents, 1448².
- Cyclohexadienone**. See *Benzenone*.
- Cyclohexane** (hexamethylene), catalytic dehydrogenation of, 2592².
derivs., phys. properties of, 3780².
detn. in gasoline, 645².
equil. with C₆H₆ and H, 2213⁷.
formation from C₆H₆ and H, Ni catalysts for 3804².
hydrogenating, catalysis of, P 2556².
phys. consts. of, 1039².
Röntgen-ray diffraction in, 2207¹, 3827¹.
spectrum of, 1407².
spontaneous ignition temp. of, effect of anti-knock compds. on, 323².
superheating of, and derivs., 2463².
system: MeOH-, 1916².
- Cyclohexane**, 1,1-bis(ethylmercapto)- \dagger , 2884².
—, 1,1-bis(ethylsulfonyl)- \dagger , 2884².
—, bromo-, reaction with arylhydrazines, 2672².
—, 1-bromo-3,5-dimethyl-, 230².
—, 1-bromo-2-methoxy-. See *Anisole*.
—, 2-bromohexahydro-.
—, 1-bromo-2-propoxy-, 571².

- , chloro-, phys. properties of, 3780⁶.
 —, 2-chloro-1,1-bis(ethylmercapto)-†, 2885¹.
 —, 2-chloro-1,1-bis(ethylsulfonyl)-†, 2885¹.
 —, 1-chloro-3,5-dimethyl-, 230⁶.
 —, 1-chloro-1-nitroso-, 2873¹.
 —, dimethyl-, detn. in gasolines, 645⁶.
 —, *m*-dimethyl-, soly. in liquid NH₃ and in liquid SO₂, 3047⁴.
 —, 1,1-dimethyl-3-methylene-, 737⁶.
 —, 1,1-dimethyl-3-methylene-2-phenyl-, 738¹.
 —, 1,1-dimethyl-3-methylene-2-propyl-, 738¹.
 —, 1,2-epoxy-, constitution of, 572².
 reactions of, 571⁷.
 reaction with alkali and NH₃ halides, 2668¹.
 —, ethoxy-. See *Phenetole*, hexahydro-.
 —, 2-ethyl-1,1-dimethyl-3-methylene-, 738¹.
 —, hexabromo-, crystal structure and mol. symmetry of, 517².
 —, hexachloro-, crystal structure and mol. symmetry of, 517².
 —, 2-isopropyl-1,1-dimethyl-3-methylene-, 738¹.
 —, isopropylmethyl-. See *Menthane*.
 —, methoxy-. See *Anisole*, hexahydro-.
 —, methyl-, detn. in gasolines, 645⁶.
 inflammability of, 1186⁶, 2190⁶.
 phys. properties of, 1039², 3780⁶.
 spontaneous ignition temp. of, effect of anti-knock compds. on, 323⁹.
 spontaneous ignition temp. of, effect of aromatic amines and pyridine on, 324³.
 —, 1,1,2,2-tetramethyl-3-methylene-, 738¹.
 —, 1,1,2,3-trimethyl-3-methylene-, 738¹.
Cyclohexanecetaldehyde, α,α -diphenyl-. See *Acetaldehyde*, cyclohexyldiphenyl-.
Cyclohexanecetamide, α,α -dichloro-*N*-ethyl-, 2876¹.
 N-ethyl-, 2876¹.
 Δ^1,α -Cyclohexanecetamide, α -ethyl-, 3187².
 Δ^1,α -Cyclohexanecetanilide, 3186⁸.
Cyclohexanecetic acid, 2-carboxy-, *cis*- and *trans*-, 1112⁹.
 cis-, prepn. of, 901⁶.
 imide, hydrolysis velocity of *trans*-, 2877⁷.
 trans-, dimethyl ester, anhydride, and imide, 587¹.
 —, 1-carboxy-2-methyl-, and cyclic anhydride†, 1113⁹.
 —, α -cyano-1-(2-hydroxy- Δ^1 -cyclohexenyl)-, lactone†, 1103³.
 —, α -cyano-3-keto-1-methyl-, and derivs., 1103³.
 —, α,α -dichloro-, 2876¹.
 —, α -ethyl-1-hydroxy-, and silver salt, 3187¹.
 —, 2-(phenylcarbamylmethyl)-, *trans*-, 1112⁹.
 Δ^1,α -Cyclohexanecetic acid, alkali action on, and Na salt, 1037^{1,3}.
 bromine addn., velocity of, 1630⁹.
 —, α -ethyl-, 3187¹.
Cyclohexanecetimidyl chloride, α,α -dichloro-*N*-ethyl-, 2876¹.
 Δ^1,α -Cyclohexaneceto-*p*-toluide, α -ethyl-, 3187².
Cyclohexanecetyl chloride, 1-hydroxy-, 3186⁹.
 Δ^1,α -Cyclohexanecetyl chloride, α -ethyl-, 3187².
Cyclohexanecarboxamide, 1-anilino-, 2882⁹.
 —, 1-chloro-, 2875⁶.
 —, 1-chloro-*N*-ethyl-, 2875⁶.
 —, *N*-ethyl-, 2875⁶.
 —, 1-*N*-nitrosoanilino-, 2882⁹.
 —, 2-phenyl-(?), 1108².
Cyclohexanecarboxylic acid, mixed anhydride with β -benzoylacrylic acid, 2259².
 —, 1-anilino-, 2882⁹.
 —, 1-carbamyl-, and methyl ester, 229^{6,8}.
 —, *o*-(carboxymethyl)amino-†, and derivs., 245^{3,4,5}.
 esters, 1971⁵.
 —, *o*-(carboxymethyl)nitrosoamino-†, 245⁹.
 —, 1-chloro-, 2875⁶.
 —, 1-(1-cyanocyclohexyl)-, 1643².
 —, 5,5-dibromo-4-keto-2,2,3-trimethyl-, methyl ester, 1259¹.
 —, 4,6-diketo-2,2,3-trimethyl-, derivs., 1259^{2,5}.
 —, 2-(α -hydroxyisopropyl)-, lactone, 590⁶.
 —, 4-keto-2,2,3-trimethyl-, 1259¹.
 —, 2-phenyl-(?), 1108².
Cyclohexanecarboxyl chloride, 1-chloro-, 2875⁶.
 —, 2-phenyl-(?), 1108².
1,2-Cyclohexanediacetanilide, *cis*- and *trans*-, 1112⁹.
1,2-Cyclohexanediactic acid, *cis*- and *trans*-, and diethyl esters, 1112⁹.
1,1-Cyclohexanediacetimide, hydrolysis of, velocity of, 1968¹.
1,2-Cyclohexanediamine, di-HCl, 590⁶.
1,2-Cyclohexanedicarbamic acid, diethyl ester, 590⁶.
1,2-Cyclohexanedicarbinol, 590⁶.
 —, $\alpha,\alpha,\alpha',\alpha'$ -tetramethyl-, 590⁶.
1,2-Cyclohexanedicarboximide, *trans*-, hydrolysis of, 2877⁷.
1,1-Cyclohexanedicarboxylic acid, and derivs., 229⁶.
1,2-Cyclohexanedicarboxylic acid, degradation of, 590⁶.
 dihydrazide, 590⁶.
1,2-Cyclohexanediol, stereoisomers, and dibenzoates, 572².
1,3-Cyclohexanedione, 2-[(2-amino-6-keto-4,4-dimethyl- Δ^1 -cyclohexenyl)methylene] 5,5-dimethyl-, 2872⁶.
 —, 5-benzyl-, 228⁶.
 —, dimethyl-, compds. with aromatic aldehydes, 2253¹.
 —, 5,5-dimethyl-, aluminum and Be salts of, 394².
 reactions of, 2872⁴, 3202⁷.
 —, 2,2'-ethylidenebis[4,4-dimethyl-, 3203⁹.
 —, 2,2', 2'', 2'''-isophthalaltetakis[4,4-dimethyl-, 3203⁷.
 —, 2,2'-methylenebis[5,5'-dimethyl-, reactions of, 3202⁹.
Cyclohexanehexol. See *Inositol*.
Cyclohexanemalonamic acid, 3-keto-1-methyl-, 1103⁷.
Cyclohexanemalonic acid, 2-carboxy-, and triethyl ester, 586⁹.
Cyclohexanenitrile, 1-amino-, 1643².
 —, 1,1'-azobis-, 1643².
 —, 1,1'-hydrazobis-, 1643¹.

- Cyclohexanepropionic acid, 2 - keto - β - phenyl-**, and esters, 231⁴.
- Cyclohexane series**, as anti-detonators, 4056⁶.
cis-trans-isomerism in, 572², 1806³.
 detection in hydrocarbon oils, 816².
 surface tension of pelargonic and myristic acids in, 3004³.
- Cyclohexanol (hexalin)**, catalytic action of Japanese acid clay on, 1101¹.
 derivs., P 2704².
 esterification and phys. consts. of, 374².
 formate, spectrum of, 1407⁸.
 freezing point of electrolytes in, 519⁷.
 hydrogenation of, 2467¹.
 ketone detn. in, 547⁴.
 phys. properties of, 3780⁶.
 soly. of gases in, 1741⁴.
 as solvent for textiles, 825¹.
 spectrum of, 1407⁸.
 vapor pressure of, 1216².
- Cyclohexanol, 4-(β -aminoethyl)-**, and salts, 1805⁶.
 —, **2-bromo-**, acetate, 571⁸.
 —, **sec-butylidenenebils**-, P 2273³.
 —, **2-chloro-**, esters, 571⁸.
 —, **2-cyclohexyl-**, *cis*- and *trans*-, and esters, 375^{4,6}.
 —, **2-(cyclohexylmethyl)-**, 1121¹.
 and carbanilate, 408⁸, 409¹.
 —, **2(and 3)-diethylamino-**, *trans*-, and esters, 1977⁴.
 —, **1,3-dimethyl-**, hydrogen phthalate, 230⁸.
 —, **2,4-dimethyl-**, esterification and phys. consts. of, 374².
 —, **3(and 4)-dimethylamino-**, *cis*- and *trans*-, esters, 1977⁴.
 —, **2-(dimethylaminomethyl)-**, isomers and derivs., 1970^{2,4,6}.
 —, **2-ethyl-**, esterification and phys. consts. of, 374².
 —, **4-(β -hydroxy- α,α -dimethylbenzyl)-**, P 2273³.
 —, **4-(4-hydroxy- α,α -3-trimethylbenzyl)-2-methyl-**, P 2273³.
 —, **2-isopropyl-**, *cis*- and *trans*-, 2252³.
 —, **4-isopropyl-**, *cis*- and *trans*-, 2881⁹.
 —, **4,4'-isopropylidenenebils**-, P 2273³.
 —, **4,4' - isopropylidenenebils[2 - methyl-**, P 2273³.
 —, **methyl-**, catalytic action of Japanese acid clay on, 1102¹.
 detn. in tetralin, 3581⁹.
 ketone detn. in, 547⁴.
 as solvent for SO₂, 3052⁷.
 —, **2(3 and 4)-methyl-**, adsorption by charcoal, 200².
 esterification and phys. consts. of, 374².
 isomers, and derivs., 374^{2,6,7,8,9}, 375^{1,4}.
 spectra of, 1407⁸.
- β -Cyclohexanol- α -glucoheptoside***, 2252⁷.
 —, **pentaacetyl-***, 2252¹.
- Cyclohexanone**, alkyl derivs., 570⁶.
 4-anilinosemicarbazone, 68⁹.
 as catalyst in prepn. of SO₂Cl₂, 55⁷.
 diethyl mercaptale and di-Et sulfone, 2884⁹.
 reaction with benzaldehyde, 230⁶.
 reaction with NaNH₂, 2464⁷.
 reduction of, 2667⁹.
 as solvent for SO₂, 3052⁷.
 spectrum of, 1407⁸.
 vapor pressure of, 1216².
 —, **2 - β - anisal - 6 - (2 - β - anisalcyclohexylidene)-**, 231⁴.
 —, **2-benzal-**, 230⁶.
 —, **2-benzal-6-(2-benzalcyclohexylidene)-**, 231⁴.
 —, **7-benzal-2-ethyl-2-methyl-**, 2465¹.
 —, **2-benzal-6-(α -hydroxybenzyl)-**, 231⁴.
 —, **2,6-bis(α -hydroxybenzyl)-**, 231⁴.
 —, **2-chloro-**, diethyl mercaptale and di-Et sulfone, 2885¹.
 —, **2-chloro-3,5-dimethyl-**, 230⁷.
 —, **2- Δ^1 -cyclohexenyl-**, and semicarbazone, 1103¹.
 —, **2- Δ^1 -cyclohexenyl-2-methyl-**, and semicarbazone, 1103¹.

- Δ^1 , α -Cyclopentaneacetic acid, α -ethyl-, and ethyl ester, 3187⁴.
- Δ^1 , α -Cyclopentaneacetoneitrile, α -ethyl-, 3187⁴.
- Cyclopentaneacetyl chloride, 1-hydroxy-, isomers, 3186¹.
- Δ^1 , α -Cyclopentaneacetyl chloride, α -ethyl-, 3187⁴.
- Cyclopentane-carboxamide, 1-*o*(*m* and *p*)-bromoanilino-, 1635⁴.
- , 1-*o*(*m* and *p*)-chloroanilino-, 1635¹.
- , 1-*p*-methoxyanilino-, 1635¹.
- , 1-*m*(and *p*)-nitroanilino-, 1635⁴.
- , 1-*o*(and *m*)-toluino-, 1635^{4,5}.
- Cyclopentane-carboxylic acid, 1-*o*(*m* and *p*)-bromoanilino-, 1635⁴.
- , 1-*o*(*m* and *p*)-chloroanilino-, 1635¹.
- , 1-(3,5-diiodo-*p*-anisylazo)-2-keto-, ethyl ester, 90¹.
- , 2-keto-, ethyl ester, 375¹.
- , 2-keto-1-methyl-, ethyl ester, 375⁴.
- , 2-keto-1-(*p*-nitrophenylazo)-, ethyl ester, 90⁴.
- , 2-keto-1-phenylazo-, ethyl ester, 90⁴.
- , 2-keto-1-(3,4,5-triodophenylazo)-, ethyl ester, 90⁴.
- , 1-*p*-methoxyanilino-, 1635¹.
- , *m*(and *p*)-nitroanilino-, 1635⁴.
- , 1-*o*(and *m*)-toluino-, 1635^{4,5}.
- 1,1-Cyclopentanediacetamide, hydrolysis of, velocity of, 1968¹.
- 1,3-Cyclopentanedicarboxanilide, 4,4,5-trimethyl-, 1259⁴.
- 1,2-Cyclopentanedicarboxylic acid, 2,3,3,4-tetramethyl-, 401³.
- 1,3-Cyclopentanedicarboxylic acid, 1-hydroxy-4,4,5-trimethyl-, and acetate, 1259⁴.
- , 1,3,2-trimethyl-. See *Camphoric acid*.
- , 4,4,5-trimethyl-, 1259⁴.

1,3-Cyclopentenedicarboxylic anhydride, 2, 3,4,4-tetramethyl-, 402¹.

Cyclopentaneethanol, β -dimethylamino-, and salts, 59⁴.

Δ^1 - α -Cyclopentanemalonic acid, and diethyl ester, 227⁹.

Cyclopentanenitrile, 1-*o*(*m* and *p*)-bromoanilino-, 1635⁸.

—, 1-*o*(*m* and *p*)-chloroanilino-, 1635⁷.

—, 1-[3,4(and 3,5)-dimethoxyanilino]-, 1635⁷.

—, 1-hydroxy-, condensation with aniline derivs., 1635⁸.

—, 1-*m*-methoxyanilino-, 1635⁸.

—, 1-*m*(and *p*)-nitroanilino-, 1635⁸.

—, 1-*o*(and *m*)-toluino-, 1635⁸.

Cyclopentanepropionic acid, α -cyano-2-keto- β , β -dimethyl-, ethyl ester, 1103³.

—, 2-keto- β , β -dimethyl-, 1103³.

—, β , β , β -trimethyl-, 1103³.

Cyclopentanol, 2-cyclopentyl-(?), 900⁴.

—, 2-(2-cyclopentylcyclopentyl)-(?), 900⁴.

—, 1,2-dimethyl-, *cis*- and *trans*-, 375⁷.

Cyclopentanone, alkyl derivs., 570⁶.

—, in lignite distn. products, 167².

—, reduction of, 2667⁹.

—, 2-cyclopentylidene-, semicarbazones, 1103³.

—, 2,2-dimethyl-, 1635⁴.

—, 2,5-dimethyl-, and oxime, 570⁷.

—, 2-ethyl-2- Δ^1 -cyclopentenyl-, and semicarbazone, 1103³.

—, 2-ethyl-2-isopropenyl-, and semicarbazone, 1103³.

—, 2-ethyl-2-isopropenyl-5-methyl-, and semicarbazone, 1103³.

—, 2-isopropyl-, reduction of, 2667⁹.

—, 2-isopropylidene-, and semicarbazone, 1103³.

—, 2-methyl-, 375⁷.

—, alkylation of, 1635⁴.

—, 2-methyl-, reduction of, 900⁴.

—, 2,2,5,5-tetramethyl-, 1635⁴.

Cyclopentaquinoxaline,

[2,3- η]

[3,2- α]

Cyclopenta[2,3- η]quinoxaline, 3-(*N*-methylanilino)-1-phenyl-, 1106⁸.

Cyclopenta[3,2- α]quinoxaline, 3,9-dihydro-2,3-diphenyl-, 85¹.

Cyclopentene, 1,2-dimethyl-, 375⁷.

Δ^1 -Cyclopentenacetamide, α -ethyl-, 3187⁴.

Δ^1 -Cyclopentenacetanilide, 3186⁷.

Δ^1 -Cyclopentenacetic acid, α -ethyl-, 3187⁴.

Δ^2 -Cyclopentenacetic acid, α -allyl-, 901⁸.

—, α -butyl-, 901⁸.

—, α -ethyl-, 901⁸.

—, α -isopropyl-, 901⁸.

—, α -propyl-, 901⁸.

Δ^1 -Cyclopentenacetyl chloride, α -ethyl-, 3187⁴.

Δ^1 -Cyclopentenecarboxylic acid, ethyl ester, and its addn. compd. with CNCH₃COOEt, hydrolysis of, 2877⁷.

Δ^1 -1,3-Cyclopentenedicarboxanilide, 4,5,5-trimethyl-, 1259⁸.

Δ^1 -1,3-Cyclopentenedicarboxylic acid, 4,5,5-trimethyl-, isomers, 1259⁸.

Δ^1 -1,3-Cyclopentenedione, 4-benzyl-2,5-diphenyl-(?), 1804⁶.

Δ^1 -Cyclopentenemalonic acid, α -methyl-, and diethyl ester, 228¹.

Δ^1 -Cyclopentenemalonic acid, α -allyl-, 901⁸.

—, α -butyl-, 901⁸.

—, α -ethyl-, 901⁸.

—, α -isopropyl-, 901⁸.

—, α -propyl-, 901⁸.

Δ^2 -Cyclopentenetriceic acid. See Chaulmoogric acid.

Δ^1 -Cyclopentenoundecylic acid. See Hydno-carpic acid.

Δ^2 -Cyclopentenone, 3-*p*-anisyl-5-methyl-4-(3,4-methylenedioxyphenyl)-, 576⁸.

—, 3-hydroxy-2,5-diisocamyl-, 399¹.

—, 2-isopropyl-5-methyl-, See Pulegone.

—, 5-methyl-3,4-bis(3,4-methylenedioxyphenyl)-, and tetrabromide, 576⁸.

—, 5-methyl-4-(3,4-methylenedioxyphenyl)-3-phenyl-, 576⁸.

Δ^1 -Cyclopentenone, 2-anisal-3-*p*-anisyl-5-methyl-4-(3,4-methylenedioxyphenyl)- 576⁸.

—, 2-benzal-5-methyl-4-(3,4-methylenedioxyphenyl)-3-phenyl-, 576⁸.

—, 2-methyl-3,4-bis(3,4-methylenedioxyphenyl)-, 576⁸.

—, 2-methyl-3,4-bis(3,4-methylenedioxyphenyl)-5-piperonylidene-, 576⁸.

Cyclopropane, ring, cleavage of, by Br, 3046⁶.

—, 1,2-dibenzoyl-, 1645⁴.

—, methyl-, heat action on, in presence of Al₂O₃, 570⁷, 1250¹.

Cyclopropanecarbinol, catalytic dehydration of, 570⁷, 571¹.

—, heat action on, in presence of Al₂O₃, 3181¹.

—, α , α -dimethyl-, 2666⁸.

—, α -ethyl- α -methyl-, and homologs, 2666⁸.

—, α -methyl-, catalytic dehydration of, 571¹.

—, heat action on, in presence of Al₂O₃, 3181¹.

Cyclopropanecarboxamide, 1,3-dicyano-2-ethyl-3-methyl-, 2877⁷.

Cyclopropanecarboxylic acid, 2-bromo-(?), 3046⁶.

1,2-Cyclopropanedicarboximide, 1,2-dicyano-3-ethyl-3-methyl-, 2877⁷.

1,1-Cyclopropanedicarboxylic acid, diethyl ester, phys. consts. of, 1249⁶.

—, 2-(α , α -dimethylpropionyl)-3-phenyl-, dimethyl ester, 894¹.

1,2-Cyclopropanedicarboxylic acid, diethyl ester, phys. consts. of, 1249⁶.

—, 3,3-dimethyl-. See Caronic acid.

—, 1-hydroxy-3-phenyl-, and dimethyl ester, 901⁸.

—, 3-phenyl-, bromination of, and esters, 901⁸.

1,1,2,2-Cyclopropanetetracarboxylic acid, tetraethyl ester, phys. consts. of, 1249⁶.

Cyclopropene, ring, effect of Ph group on the formation of, 901⁸.

Δ^1 -1,3-Cyclopropanedicarboxylic acid, 3-methyl-, diethyl ester, phys. consts. of, 1249⁶.

Cyclo-rubber. See Rubber, synthetic.

Cydonia maulei, hydrocyanic acid in, 1831¹.

Cylinder oils. See Lubricants.

Cylinders. (See also Containers.)

—, locomotive, specifications of A. S. T. M. for, 2630².

- Cymarin**, bradycardia from injection of, 776⁹.
effect on heart, 3965⁹.
reduction of, 3902⁹.
- Cymene** (*p*-isopropyltoluene), derivs., 903⁹.
oxidation of, by O₂, 65⁹.
prepn. and reactions of, 738⁹.
solv. in liquid NH₃ and in liquid SO₂, 3047⁴.
system: SO₂, 738⁹, 1449².
from terpenes, 906⁷.
as thinner for paints, varnishes and lacquers, 2194¹.
- , **3-amino-**. See *Carvacrylamine*.
—, **3,3'-ethylenedioxybis-**, 739⁹.
—, **hexahydro-**. See *Menthane*.
—, **2-hydroxy-**. See *Carvacrol*.
—, **3-hydroxy-**. See *Thymol*.
—, **3,3'-methylenedioxybis-**, 739⁹.
—, **3,3'-trimethylenedioxybis-**, 739⁹.
- 2,6-p-Cymenediamine**, bromination of, 903⁹.
—, **3-bromo-**, and mono-HCl, 903⁹.
—, **N,N'-diacetyl-3-bromo-**, 903⁹.
—, **N,N'-diacetyl-3,5-dibromo-**, 903⁹.
—, **N,N'-dibenzoyl-3-bromo-**, 903⁹.
—, **N,N'-dibenzoyl-3,5-dibromo-**, 903⁹.
—, **3,5-dibromo-**, di-HBr, 903⁹.
- 2,5-p-Cymenediol**. See *Thymohydroquinol*.
2,5-p-Cymenedione. See *Thymoquinone*.
- 3-p-Cymenesulfonic acid**, 6-chloro-, esters, 2890⁷.
- 3-p-Cymenol**. See *Thymol*.
- Cynara scolymus**. See *Artichokes*.
- Cyperus tuberosus**, compn. of bulbs, 1205².
- Cypridina**, light emission by luciferin and luciferase of, 3208⁹.
light emission by, spectra energy distribution in, 920⁷.
luminescence of, quanta of light produced and mols. of O utilized during, 3208⁹.
- Cyrtolite**, tantalum detn. in, 3172⁹.
- Cystic acid**, detn. of, 3064¹.
l- and *dl*-, and diphenacyl esters, 3185^{1,2}.
- Cysteine** (*β*-mercaptoalanine), cultivation of an aerobic bacilli with, in media, 598⁹.
detn. in tissues and biol. fluids, 3212¹.
effect on intestines, 279⁹.
in eggs, changes during incubation, 2309⁹.
l-, decompn. by bacteria, production of S-contg. gas in, 934⁹.
in milk, 1152⁹.
in plants, 2012⁴.
in protein mol., 1468⁹.
system: cystine-, effect of heat and H-ion concn. on, 2706⁹.
—, **benzyl-**, *l*- and *dl*-, 3185².
- Cystine** (*β*,*β*'-dithiobisalanine), combustibility of, 950⁹.
in culture of diphtheria bacillus, 3924¹.
cyanamide effect on, 1311⁹.
decompn. of free and combined, 3916².
derivs. of, effect on blood sugar, 2933⁷.
detn. of, 1826⁹, 2710².
detn. of, in tissues and biol. fluids, 3212¹.
diet contg. excess of, effect on kidney, 436⁹.
effect on endogenous metabolism of molting hens, 3387⁴.
in eggs, changes during incubation, 2309⁹.
in hair and other epidermal tissues, 3063⁹.
lability of S atom in, 57⁹.
l- and *dl*-, diethyl esters, di-HCl, 3185².
l-, peptidase elution by, 1467⁷.
l-, reduction by *B. coli*, 598⁹.
in liver, 1995⁹.
in peptones for bacteriol. use, 598⁹.
pharmacol. action of, 279⁹.
poisoning of kidney by, 3087⁴.
poisoning of liver by, 3087⁴.
system: cystine-, effect of heat and H-ion concn. on, 2706⁹.
in wool, relation to total S, 3466⁹.
- Cystine, bis(2-naphthylsulfonyl)-**, *l*- and *dl*-, 3185².
—, **N,N'-bis(phenylcarbamyl)-**, 3185².
—, **N,N'-dialanyl-**, growth-promoting action of, 3071³.
lability of S atom in, 57⁹.
—, **dibenzoyl-**, *l*- and *dl*-, 3185².
—, **diglycyl-**, growth-promoting action of, 3071³.
—, **tetracarboethoxy-**, *l*- and *dl*-, 3185².
- Cystinuria**, metabolism in, 2930⁹.
in tuberculosis, 2030⁴.
- Cytisine**, excretion in milk, 3086².
- Cytochrome**, 3915⁹.
in tissue (normal and cancerous), 1842⁹.
in yeast cells, 2009¹, 3643⁹.
of yeast, respiratory power and, 3911⁴.
- Cytology**. See *Cells*; *Cells, animal*; *Cells, plant*.
- Cytolysis**. See *Cells, animal*.
- Cytoplasm**. See *Protoplasm*.
- Cytosine** (*4-amino-2(1H)-pyrimidinone*), detn. of, 2914⁴.
disoccn. const. of, 97⁴.
nucleotide, from tea leaves, 1664⁷.
transformation to uracil by yeast ext., 3914².
—, **5-methyl-**, transformation to thymine by yeast ext., 3914².
- Cytozyme**. See *Thrombokinas*.
- Dairy industry**, waste, bacteria in, 1160⁷.
wastes, filters for, 967⁸.
- Dairy products**. (See also *Butter*; *Cheese*; etc.)
book. Lab. Expts. in Dairy Chemistry, 2037⁷.
effect on hemoglobin formation, 1291⁹.
food values of, 1683⁹.
hydrogen-ion concn. of, detn. of, 1917⁹.
manuf. of, app. of Ni for, 1793⁷.
purifying, P 3993².
wast., treatment of, 145⁹.
yeasts in, 614¹, 2744⁹.
- Dairy utensils**, disinfectants for, 3985⁸.
hypochlorites as sterilizing agent for, 3925⁸.
- Dakin-Carrel solution**. See *Carrel-Dakin solution*.
- Dalbergia sissoo**. See *Sissoo*.
- Dalea alopecuroides**. See "Wood's" under *Clover*.
- Dales**, biography, 2998⁹.
- Dalton, John**, biography, 840⁹.
- Dalton's law**. See *Laws*.
- Dammar**, coagulation of, effect of hydrolysis of sols and pptg. electrolytes on, 107⁹.
coniferyl reaction of, 183⁹.
viscosity in presence of electrolytes, 684⁴.
- Damp-proofing**. (See also *Waterproofing*.)
primer for use with asphalt in, specifications of A. S. T. M. for, 143⁹.
tar coating for, specifications of A. S. T. M. for, 1158¹.
- Danalite**, constitution of, 40⁴.
- Dandruff**, remedy, analysis of, 4024¹.
- Daniella**, paper manuf. from, 1712⁹.
- Danthonia**, germination of, effect of H₂SO₄ on, 3701¹.

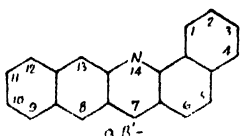

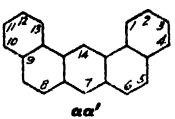

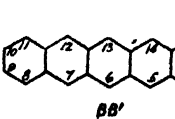

- Daphnia**, heart movements of, under influence of endocrine substances, 1314⁷.
magna, colloids of, adsorption of salts by, 2714⁴.
 hydrogen-ion concn. range in, 1499⁸.
pulex, rate of killing at higher temps., 3983⁴.
- Darapskite**, 3713⁶.
- Dari**, as feeding-stuff, 142³.
- Dark adaptation**, kinetics of, 2941⁸.
- Darlingtonia californica**, biochemistry of, 2916⁸.
- Darnel**. See *Lolium remotum*.
- Date palm**. See *Palm*.
- Datura**, detection in decompd. viscera, 33³.
 differentiation of species of, 4021⁴.
metel, scopalamine content in leaves of, 2757⁹.
 recognition of various species of, 3424⁷.
stramonium, alkaloid content of leaves, nocturnal increase in, 2957⁹.
stramonium, hereditary variations in, effect of R_a rays on, 3933¹.
 structure of seeds and leaves of, 4022².
- Daturic acid**, 660⁹.
 in oil of ergot, 1891⁴.
- Daucus carota**. See *Carrot*.
- Dauricine**, 2700⁷.

 into gelatin, Liesegang ring formation in, 1911².
 in gravitational fields, 844⁴.
 of hydrogen through metals, 1212², 3290².
 inner, in crystals, temp. of, 2083¹.
 inter-, of electrolytes, theory of, 3809².
 ion, non-oscillatory abnormal low-voltage arcs with reversed elec. fields caused by, 2421¹.
 of ions across dried collodion membrane, 2837⁴.
 of light—see *Light*.
 in metal oxide gels, 2586².
 between metals in solid state, temp. coeff. of, 3006⁴.

- of milk in gelose gel, 1501⁴.
mol., 2611⁴.
in ore deposits, 1783⁹.
of ovalbumin in aq. media, 422¹.
of oxygen, effect on rate of combustion of solid C, 3779⁸.
oxygen electrode for, 1746⁷.
of oxygen through Ag, 1211⁹.
of particles in liquids, 3510⁸.
potentials, effect of junction solns. on, 1919⁴.
potentials of HCl-gelatin systems, 3517¹.
potentials, temp. and, 3792¹.
products of bacterial cells as influenced by various electrolytes, 3924⁹.
pumps, action of, 2596⁹.
rate of, solvent and, 3791⁹.
reaction, in oxidation of metallic Fe, 2639¹.
in ring formation in beet roots, 353⁸.
of salt vapors in Bunsen flame, 3304⁹.
of silver chromate in gelatin, 847².
of silver nitrate into gelatin contg. $K_2Cr_2O_7$, 1395¹.
of sodium silicate across semipermeable membranes, 2209⁹.
of solids, 5⁹.
in solid solns., law of, 2083⁹.
in solns., 1579².
surface improvement of metals by, 2407⁷.
theory of, 520⁶, 680⁸.
thermal—see *Heat*.
in tungstate solns., optical absorption and, 3522¹.
velocity of, accompanied by pptn., 2588¹.
velocity of, effect of $CuSO_4$ and $ZnSO_4$ on, of each other, 1741².
velocity of, relation to concn. of diffusing substance, 1740⁹.
of water into lecithin-collodion membranes, 3063⁷.
in wood (impregnated) of water-sol. materials, 4043⁹.
of zinc in α -series of solid solns. in Cu, 1397⁹.
- Difluorophosphoric acid**, 3501².
Di-*n*-fluorylamine, 3052⁹.
1,2'-Difluorylamine, 2-amino-(?), 3362¹.
2,3'-Difluorylamine, 2'-amino-(?), 3362¹.
Digallic acid. (See also *Tannic acids*.)
as mordant, 824⁸, 3747⁶.
Digesters. (See also *Cellulose*; *Paper pulp*.)
837⁴.
cleaning high-pressure, P 3003².
Digestibility, of cellulose-contg. foods, detn. with paunch bacteria, 1480².
coeffs. for diff. types of individuals, 946⁴.
relation to net energy value, 1684⁹.
Digestion. (See also *Cellulose*; *Enzymes*; *Proteins*; etc.)
auto-, 596².
fibrin substitute in, 1285¹.
gastric, 3947¹.
gastric, in children, 3667⁹.
gastric, under influence of fats, 2023¹.
hemoclasia of, sedimentation rate in, 3676⁴.
of milk (human), HCl of gastric secretion in, 3078⁹.
physiology of, 262⁸, 951⁹, 3389⁶.
physiology of, in Australian roach, 139⁸.
of plant cells ("intact"), 3944⁷.
- Digestive juices**, saccharin effect on, 275¹.
Digestive tract, of bee, enzymes in, 3630⁹.
diseases of, glucemia in, 1488⁴.
enzymes of chicken, 108⁶.
hydrogen-ion concn. of, rickets and, 3072⁴.
obstruction in, effect on blood fibrin, 1306⁸.
obstruction in, effect on N excretion, 1306⁷.
pancreatic secretin in, distribution of, 3917⁸.
passage of toxins, anatoxins and antitoxins through wall of, 3957².
peptone hemorrhage of, effect of atropine on, 2936².
in scurvy, 2501⁸.
stimulus conduction in, 2336².
- Digiclarin**, effect on water content of heart, 275⁹.
Digifolin, effect on heart, 3965⁶.
Digitalein, effect on heart, 3965⁶.
Digitalin, effect on aorta, 3964⁸.
effect on blood vessels of liver, 1148⁶.
effect on heart, 1314⁴.
effect on intestine, 1496².
oleandrin and, 299⁴.
- Digitalis**, action of, Ca and, 773⁸.
active principle content of various species, 1870².
assay of, 301², 986⁴, 1166⁴, 1331², 2049², 2532⁹, 2959⁷, 2960⁹, 3978⁸, 3979¹, 4024⁴, 4026⁹.
assay of, effect of anesthesia on, 986⁴, 4026⁹.
bradycardia from injection of, 776⁹.
in Canada, 1331².
cultivation in China, 3705².
effect on capillaries, 3982⁴.
on growth of seedlings, 2960⁸.
on heart, 778⁷, 1148⁶, 1314⁴, 1489⁶, 3965⁶.
on nerves of intestine, 1850⁹.
on resistance of guinea pigs to poisoning by diphtheria toxin, 3980⁷.
effect on heart of mixts. of atrophanthine and, 460⁴.
emetic doses in pigeons as index of therapeutic dose in man, 1489⁴.
infusion, effect of acids on, 2358⁶.
lanata, saponins and tannins of, distribution of, 1830⁸.
leaves, prepn. of exts. for subsequent evaluation, 800⁷.
lutea vs. *purpurea*, 1166².
pharmacol. action of, 3273⁸, 3975², 3980⁸.
pharmacol. action of, effect of polarized light on, 3089⁹.
pharmacol. action of preps. of, effect of EtOH on, 275⁴.
pharmacopeial standards of, work of labs. and, 3394⁴.
potency of samples grown in Brit. Columbia, 4024⁴.
purpurea, oil of seeds of, 4019⁸.
radiation effect on, 1165⁹.
review, 2046².
tincture of, effect of polarized light on, 2360².
tincture, potency of, 961⁴.
- Digitamin**, effect on heart, 3965⁶.
Digitoxin, -cholesterol, antirachitic activation with ultra-violet rays, 1480⁶.
evapn. of, 2411⁷.
hemolysis by, 2740¹.
hemolysis by, effect of non-irradiated and irradiated cholesterol on, 960⁸.
hydrolysis of, 299².
pentose of, 589⁶.
properties, detection and detn. of, 3706⁷.
spectrum of, 915².
- Digitoxigenin**, effect on heart, 275⁹.
Digitoxin, effect on blood vessels of liver, 1148⁶.
effect on heart, 1148⁶, 3965⁶.
pharmacol. action of, effect of atropine on, 3681¹.

occupational skin, in rubber industry, 512¹.

from uranium, 2320⁹.

Disinfectants. (See also *Antiseptics*; *Dipping fluids*; *Formaldehyde*; *Fumigants*; *Fungicides*; *Insecticides*; *Lysol*; *Quinoseol*; *Sprays*; *Surgical dressings*; etc.) (*Patents*.) 158⁸, 2534⁸, 2962⁸, 3105⁸, 3426⁸, 3431⁴, 3711¹.

uridine derivs. as, P 593⁸, 3055⁸.

action of, 935⁴.

action of, surface tension and, 2290⁸.

alc. soaps as, 3278⁸.

for American foulbrood of bees, Cl as, 3249⁷.

chem. and physicochem., 3925⁴.

chloramine-contg., P 476⁸.

chloramine-T as, 113⁴.

chlorinated, standardization of, 474⁸.

coal-tar, 475⁷.

comparative value of, 3707⁸.

cresol soap from coconut oil, 1330⁸.

cresol soaps of Yugoslavia, 3103⁸.

for dairy utensils, 3925⁸, 3985⁸.

dental, P 2052⁴.

dye mixt., P 801⁹.

emulsions, P 632⁴.

eucalyptus-oil-contg., P 1332⁸.

fertilizers, P 295⁴.

for gelatin, 2715⁴.

halogenated pyridine compds. as, P 3370⁸.

iodopyridine compds., P 1332⁸.

from low-temp. tar, 3706⁸.

mercury compds. as, P 2274⁸.

mercury-contg., P 3416⁸.

paraformaldehyde as, 1286⁷.

prepn. with peralcol, 1319⁸.

quinoline derivs. as, 3055⁸.

for rubber, 2398⁷.

for rubber tree stripe canker, 1897⁸.

for seeds, P 1164⁸, P 2354².

Caporite as, 3101⁸.

chlorinated hydrocarbons as, 3415⁸.

effect on germination, 3249².

Hg compds. for, P 149².

for seeds (pea), 3415⁸.

sol., hydrohexalin in manuf. of, 1367⁴.

tech. progress in, 4019⁸.

testing, 983⁴.

Ufinol, 2357².

for urine, 1870⁸.

Disinfection. (See also *Fumigation*; *Sterilization*.)

against anthrax, 3763⁹.

of biliary passages, 800⁸.

with bleaching powder and chloramine-T, 3213².

of cattle cars, etc., P 2949⁸.

chem. constitution and, 2069⁴.

chlorine, of dairies, 1683⁷.

control of, optimal media and, 934⁸.

of hair and bristles, chloramines in, 2488⁸.

of hides, P 4091⁸.

of houses, furs and clothes, 1873⁸.

of intestines against *B. coli*, 2734¹.

of seeds with CaOCl_2 , 115⁹.

theory of, 846⁸.

of water pipes, 1507⁴, 3097².

Disinomenol*, 1654⁷.

Disintegration, app. for, P 1726⁸.

Dismutase, reaction with methylethylacetaldehyde, 426⁸.

Disparit, as disinfectant for urine, 1870⁸.

Disperse systems. (See also *Colloids*; *Particles*; *Solutions*.)

atm., 3786⁸, 3.

industrial application of inorg., 1318⁸, 1685⁸.

interfacial forces in, 845².

in water, P 1693².

Dispersibility, of rubber, "crystn." of expansion and, 199⁸.

Dispersion, analysis by, 2486⁸.

cathode, 2604⁸.

degree of, covering power and, 2566⁷.

detr. in dye solns., 3513⁴.

in dyeing, etc., agents for, P 2388⁸.

by emulsifying agents, detr. of, 3513⁸.

of fillers for rubber, etc., app. for, P 1726⁸.

of metals for mol. mixts., 678⁹.

of sulfur, etc., P 2054¹.

in water, P 291⁸.

Dispersion (of rays). (See also *Rays*, *Röntgen*.)

by alkali and H halides, 532².

anomalous, of α -rays, 1055².

anomalous, of silicates, 2102².

anomalous, of Ti, 2430⁷.

anomalous, of Ti and Cd, 2102².

in cells of renal tubule after injection into its lumen, 765^a.

for cellulose acetate, P 1016⁹, P 2563^a, P 2565^a, P 3133¹, P 3273⁷.

from *Centrolobium*, 3272¹.

as chemoscopes, 2481^a.

chlorinated violanthrone, P 3750⁹.

chromium, P 1888^a, P 2009⁹, P 2564^a.

from citraconic acid, 3194^a.

from *Cochlospermum* wood, 4072^a.

color of, relation to chem. constitution, 1985^a.

color theory of, 3194¹.

condensation in manuf. of, elimination of, 1551^a.

constitution of, 897¹.

convulsant, effect of asphyxia on action and entrance into nervous system of, 138^a.

copper- or Cr-contg., wool, P 1189^a.

cotton, identification on fiber, 3272¹.

cotton, on rayon, 2800².

cotton, violet-blue or blue, P 2563^a.

crayons, etc., contg., P 3110⁷.

- o*-cresotaniide derivs., 2800⁸.
 cyanine, 3201⁴.
 decompn. of, by sunlight, 3194¹.
 desensitizing—see *Photography*.
 detection in foods, 1852⁴.
 detn. of yellow OB and of yellow AB, 283¹.
 detoxication of injected, peritoneum as dialyzer in, 133².
 dibenzanthrone, vat. cotton, blue, P 329⁸, P 2564⁸.
 dibenzanthrone, vat. cotton, blue and red-violet, P 4076⁷.
 dibenzanthrone, vat. cotton, violet to greenish blue, P 2564⁸.
 dibenzopyrenequinone, F 50⁸.
 dibenzopyrenequinone derivs., cotton, yellow, P 101⁶.
 diffusion in solns. of, 1579⁸.
 diffusion into gelatin and agar gels, capillarity and, 3291¹.
N-dihydrodianthraquinoneazine, P 3468⁸.
 Direct Deep Black E, manuf. of, 824⁴.
 disazo, P 826³.
 disazo, blue, P 329⁸.
 disazo, cotton, brown, P 3751³.
 disazo, from benzidine and its derivs., 2800⁷.
 disazo, wool or cotton, brown, P 1360⁷.
 disazo, wool or cotton, orange, P 2804⁸.
 disazo, wool, reddish brown, P 3133³.
 disazo, yellow, P 328⁷.
 dispersion in solns. of, detn. of, 3513⁴.
 dispersol, for acetate silk, 177⁷, 1014⁷.
 distribution in mixts. of H₂O and Et₂O, 423¹.
 effect of certain amino derivs. of acridine and some related compds. on, 4072⁸.
 effect of intravital injections on blood sugar, 749⁴.
 effect on bacteria, 113³.
 on body temp., constitution and, 1679⁴.
 on glucolysis of yeast, 1473².
 on growth and soln. of single CuSO₄ crystals, 3508³.
 on *Paramecium caudatum*, 1151⁷.
 on photographic development, 3310⁷.
 on toxins, 461².
 on virus fixation by nervous system, 1488⁸.
 elec. charge in solns. of, detn. of, 3513⁴, 3517⁴.
 emulsions, P 329⁷, P 1017⁴.
 eriochrome, 1551⁸.
 excretion from blood, effect of choline and histamine on, 2328⁴.
 excretion from blood, effect of spleen exts. on, 2328⁸.
 excretion of, 2298⁸.
 exit from *Nitella* cells at diff. H-ion concn., values, 942⁸.
 extinction coeff. curves of solns. of, spectro-densograph for, 3002¹.
 fastness of, chem. constitution and, 824⁸.
 fastness of, on woolen and worsted fabrics, 3746⁸, 7, 8, 9.
 fastness of, standardization of, 2192¹.
 fastness of, standardization of testing methods for, 177⁷.
 fastness of, tests of, 1014¹.
 fastness on cellulose materials, 1014¹.
 fastness to washing, detn. of, 2800⁸.
 fast-to-light, for paper, 2188³.
 fastusol, on viscose and cuprammonium silk, 4072⁸.
 films on water, movements of, 1909⁷.
 filter for manuf. of, P 1380⁸.
 fixation of basic, by parchmentized paper, 2062¹.
 flavanthrone, cotton, P 1017⁸.
 fluorescein, as stains esp. for soil prepn., 1287¹.
 fluorescence in colloid solvents, polarization of, 533⁸.
 fluorescence in, extinction of, 3551¹.
 fluorescence of, 2226⁸.
 fluorescence of, time of decay of, 705⁸, 3022⁷, 3023⁴.
 fluorescent, effect on colloidal state of plasma, 2318⁸, 3635⁸.
 fluorescent, modification of colloidal state of plasma by, physiol. effect of, 2024⁷.
 fluorescent, photochem. researches on, 1409⁸.
 fluorescent, photoxidation with, 1937³.
 for food, 139⁸.
 food, green, 1500⁸.
 formaldehyde-aminoanthraquinone condensation products, P 329⁸.
 for furs in America, 497⁸.
 green, P 826³.
 groups of, 3271⁸.
 hair, P 2989⁸.
 hydrogen-ion concn. and, 1013⁸.
 hydron, blue, 4072⁷.
 hydropseudothiocyanic acid, cotton, yellow, 3465².
 from imidazolidicarboxylic acid, 3198⁸.
 from 1,4 - imidazopyridin-2(3)-one, constitution of, 1263⁹.
 indanthrene, 1013⁸.
 indanthrene blue RS, 2066².
 indanthrene, reserves colored with vat dyes under, 2066⁷.
 indigo, over-reduction of, 2987⁴.
 indigosol, application of, 1014³.
 indigosols, 4073⁸.
 from indolinium salts and PhNHNH₂, constitution of, 407⁴.
 induline, 743⁸.
 industry in America, 177⁸.
 industry in 1926, 2800¹.
 industry in U. S. in past decade, 497⁴.
 industry, relation of university to, 497⁴.
 international situation, 824⁸.
 isodibenzanthrone, P 655³, P 2804⁷, P 4076⁸.
 isodibenzanthrone, cotton, P 2804⁸.
 isodibenzanthrone, cotton, reddish blue, P 2989⁸.
 isodibenzanthrone, cotton, violet, P 3750⁸.
 isodibenzanthrone, vat. bluish violet, P 4076⁸.
 from itaconic acid, 3194⁷.
 lead oxide action on, 2800⁸.
 for leather, P 194¹, 1027⁸.
 leuco, P 3467⁸.
 leuco, vat, P 3467⁷.
 magnetic susceptibility of, 1921⁴.
 manuf. of, 1013⁸.
 maurelle, 1013⁸.
 mols., properties in soln., 685⁸.
 mordants for basic, identity of digallic acid with tannin as, 824⁸.
 names of, 498⁸.
 naphthalene, vat. cotton, red or reddish brown, P 3184¹.
 naphthazine, P 2564⁸.
 Naphthol AS, 1357⁸, 2987⁴.
 Naphthol AS discharges, 3748⁸.
 Naphthol AS, fastness to light, 2801¹.
 Naphthol AS, fastness to rubbing and washing, 3747⁴.

- Naphthol AS Red, 2066¹.
 naphthotriazole derivs. in chemistry of, 2269¹.
 natural, sources of, 326⁴.
 negative intensification by fixation of, 24⁴.
 Neolan, wool and silk, 3747⁹.
 new, for 1925, 1357⁷.
 nitrogen-contg., vat, blue to gray, P 1016⁹.
 optical anisotropy of selectively absorbing, 3539¹.
 oxazine, spectra of, 745¹.
 oxazinesulfonic acids as, 3624⁸.
 oxazine, synthesis of, 743⁹.
 oxidation of, 2467¹.
 oxidation under influence of light, 4073⁸.
 Palatine, wool, 3748².
 panchromatizer, photographic sensitizing action of, 2852⁷.
 for paper, 1709⁸.
 particles, distribution in cellulose, 1551⁸.
 pastes, P 1017⁴.
 penetration into living cell, effect of H-ion concn., light, etc., on, 1663⁸.
 penetration into *Nitella* and *Valonia* in presence of acids, buffer mixts. and salts, 1130⁹.
 permeability of alveoli of lungs to, 132⁸.
 permeability of liver to, in shock conditions, 131⁸.
 permeability of *Spirogyra* for acid, 2720⁸.
 perylene, P 825⁴.
 pharmacol. action of, 460⁹, 962¹.
 from phenylpyridinedicarboxylic acid, 382⁸.
 phosphorescence of, polarization of, 21².
 photochem. reactions of, 2103².
 photo-sensitiveness of, 1416².
 plant of Industria Piemontese dei Colori di Anilina, 3131¹.
 polylazo, P 501⁸.
 polyazo, cotton-wool, bluish black, P 2563⁴.
 prepn. from vat, sol. in cold or warm H₂O, P 825⁹.
 primuline, cotton affinity of, 3195⁸.
 prussiate black for printing, 2386⁹.
 pyrone, P 500⁸.
 quinone, P 1553⁴.
 reactions of starches with I and, 338⁹.
 reactions with HNO₃, 2627².
 reaction with piperidine, 95⁴.
 reaction with proteins, 1822⁸, 3914⁸.
 removal from cotton yarn waste with dyeing machine, 2102¹.
 removal with CH₃O-hyposulfite, 2561⁷.
 research in, 497⁴.
 reviews, 326², 824⁴, 1887⁷, 3271⁷, 3465⁸.
 rhodamine, P 1360⁴.
 rhodamine B, effect of Me and Et groups on, 497⁷.
 in rubber exposed to sunlight, 510⁸.
 rubber industry and, 497².
 for rubber latex, 2999⁸.
 Sanguis Draconis, 4020⁸.
 satd. solns. of, 2167⁴.
 sensitization of photographic plates by, reversal by red and infra-red rays, 1755².
 sepn. from mixts., P 1017⁴.
 shoe, poisoning by, 3981⁸.
 silk, P 2388¹.
 Sirius, cotton-wool and cotton-silk, 3747⁹.
 soap, P 501⁷.
 solubilities of, 3918².
 solns. of, P 1320⁷, P 2989⁴.
 solns. of basic, prepn. of, 1283⁸.
 solvents for, P 292², P 3096⁸.
 spectroscopy of, 1187⁷.
 spectrum of, 204⁸.
 spectrum of phosphorescent, 3161⁸.
 spreading on surface of water, 1734².
 staining by, adsorption and, 3640⁴.
 staining with basic, 1283¹.
 standardization of, 1282⁸, 2143⁸.
 stripping, 2561³.
 stripping from cellulosic yarns, threads, fabrics, films, etc., P 3470¹.
 subsidiary, in methylene blue, 3918².
 sulfoyanine, 2561⁷.
 sulfonated, pharmacol. action of, effect of theophylline on, 2334⁸.
 sulfonic, P 3468⁸.
 sulfur, 326⁸, 652⁴, P 654⁹, P 825⁸, 2386⁸.
 sulfur, bath for, 3272².
 sulfur black and indocarbon, 1357⁸.
 sulfur blacks, 326⁹.
 sulfur black, stabilizing, P 2388².
 sulfur, cotton, brown, P 654⁷.
 sulfur, forming in presence of Cu compds., P 329⁷.
 sulfur, manuf. of, 3271⁹.
 sulfur, naphthol, black, P 3468⁸.
 sulfur, oxidation by steaming and smothering, 3271⁹.
 sulfur, testing, 652⁸.
 sulfur, treatment with NaHSO₄ of shades obtained with, 2067².
 sulfur, vat, wool, P 3133⁷.
 sulfur, violet-black, P 179⁴.
 sulfur, white and colored resists under, 2987².
 surface ornamentation with, P 330².
 synthetic, 824⁴.
 tanning agents in relation to vegetable, 4090¹.
 tetrachloroindigo, P 1360⁸.
 tetrakisazo, cotton, orange to brown, P 179⁴, P 826⁹.
 tetraphenylethane, 2893⁸.
 textile, repellent properties to moths and carpet beetles, 1359¹.
 therapeutic, 983⁷.
 therapeutic properties of, chem. structure and, 1120¹.
 thiazine, as stains, 1283⁸.
 thiazole derivs. of 1,4-naphthoquinone, P 3750⁷.
 thioindigoid, P 1360⁴, P 1553⁸.
 thioindigoid, blue, P 3467⁸.
 thioindigoid, sym. and unsym., vat, cotton, P 1018⁸.
 thioindigoid, vat, cotton, violet to brown, P 3750⁴.
 thioindigo, vat, green, P 1714⁸.
 thioindigo, vat, violet, P 2564².
 thionaphthene, P 3468⁷.
 of 2-thionaphthene - 2 - indolindigo series, vat, wool, violet, P 2504⁸.
 toxicity to limnoria and terebrine borers, 810².
 triarylmethane, P 1361¹.
 triarylmethane, blue-violet, P 2387⁹.
 triarylmethane, violet, P 2387⁹.
 triarylmethane, wool and cotton, blue-violet, P 1189⁹.
 triarylmethane, wool, violet, P 1017⁸.
 triazole derivs. in chemistry of, 2269¹.
 triphenylmethane, constitution of, 1644⁴.
 triphenylmethane, wool, greenish blue, P 1361¹.
 trisazo, P 654⁸.
 trisazo, cotton, orange to brown, P 179⁴, P 826⁴.
 trisazo, green, P 3467⁹.

- trisazo, leather, brown, P 1360⁴.
 trisazo, orange to brown, P 1017⁹.
 in *Valonia* vacuole penetrating from methylene blue solns., 3384⁷.
 vat, P 328^{7,8}, P 825^{4,7}, P 1017^{1,4}, P 1361¹, P 3132², P 3133⁴.
 vat, conversion into sol. derivs., P 1360⁸.
 vat, cotton, P 825⁴, P 1553⁴, P 2192⁷.
 vat, cotton and wool, blue, P 2070⁴.
 vat, cotton, blue, P 2805¹.
 vat, cotton, bluish red, P 501¹.
 vat, cotton or wool, yellow to red to brown, P 654⁹.
 vat, cotton, violet or violet-red, P 2804⁹.
 vat, cotton, yellow, P 329¹.
 vat, cotton, yellow to brown, P 3467⁵.
 vat, derivs. of, P 3273⁴.
 vat, development in America, 824⁵.
 vat, electrolytic reduction of, 3465¹.
 vat, in pastes, P 501¹.
 vat, manuf. in America, 497².
 vat, reducing agent for, Fe(OH)₃ as, 497².
 vat, stable derivs. of, P 3273⁷, P 3468².
 vat, testing for strength, 2386⁷.
 vat, H₂O-sol. compds. from, P 654⁴.
 viscosity and hydration of, 11¹.
 wastes, purification in Holland, 1160⁴.
 wastes, treatment of, 1160⁴, P 3751⁴.
 wool, P 745⁵, P 1273¹.
 in woolen and worsted industries, 497⁷.
 wool, green, P 330¹.
 wool, greenish yellow to brown-red, P 2387⁷.
 wool, red to brown, P 3134¹.
 wool, review, 1358¹.
 work of Bureau of Standards, 497⁵.
 world's trade in, indigo and, 497⁶.
 for yarn, 2562⁴.
 zinc and Mg compds. of, P 655¹.
Dynamics. (See also *Kinetics*.)
 book: Chem., of Life Phenomena, 3377⁷.
 lattice, of melting, 1040¹.
Dynamite, explosions of, photographs of, 1886⁴.
 low density, P 824¹.
 manuf. of, glycol dinitrate in, 2385⁷.
 packing in freight cars, P 2065⁷.
Dynamos, ozone formation in turbogenerators, 209¹.
Dysentery. (See also *Bacillus*.)
 amebal, treatment with emetine, yatren and stovarsol, 3681⁴.
 cupric arsenite treatment of, 962⁹.
 toxin, resorcinolcarboxylic acid effect on, 2328¹.
 treatment with yatren or emetine, 3087⁷.
 yatren treatment of, 134⁹, 2738⁷.
Dysmenorrhea, treatment with veramon, 2032⁹.
Dyspepsia, blood of infants with, effect of watery diet on, 259⁹.
 blood of nursing infants with, catalase, lipase and amylase content of, 3080⁹.
 cholesterol content of serum in infantile, 3677⁵.
 in infancy, 2298¹.
Dyspnea, blood serum proteins and viscosity in, 604⁴.
 diuretic action in, 454⁴.
Dysprosium, atomic wt. of, 3495⁴.
 spectrum (Röntgen) of, 857⁹.
Dysprosium alloys, aluminum-, thermal emission of, 701⁷.
Dysprosium chloride, analysis of, 3495⁴.
Dys trophy, acidosis in, 2920⁷.
 pituitrin sensitivity in, 269⁹.
Earth, age of, based on Pb:U ratio, 3821⁷.
 book: Was lehrt uns die Radioaktivität über die Geschichte der Erde? 534⁹.
 compn. of, 43⁷, 2862², 3864⁵.
 compn. of crust, mol. no. and, 1907¹.
 crust of, thickness of, 1056².
 elec. charge of, maintenance of, 2423⁹, 2602².
 heat of, radioactivity and, 2600^{7,8,9}.
 interior of, 548⁹.
 surface structure, 3016⁶.
 thermal history of, 881³, 3033⁹, 3331¹, 3810⁹.
Earthenware. See *Ceramic ware*.
Earthworms, body fluids of, regulation of vol. and concn. in, 2940⁹.
 effect of essence of *Chenopodium* on, 2742¹.
Earwig, insecticides for, 4010⁷.
Easton's sirup, changes during storage, 156³.
Ebonite. See "hard" under *Rubber*.
Ebony. See *Wood*.
Ebullioscope, 2821⁵.
Ebullioscopy. See *Boiling point*.
Ecgonine, infra-red absorption by, 90¹.
 prepn. of, 298⁴.
Echidna aculeata multi-aculeata, milk of, 2035¹.
Echinochrome, 2337².
Echinococcosis, 2024⁶.
Echinoderms, parthenogenesis of, by hypertonic solns., 1152².
Echinus esculentus, histone from testes of, 253⁹.
Eckelt, I. L. Carl, obituary, 2080⁹.
Eckstein's base, 2808⁴.
Eclampsia, calcium-ion concn. of blood in, 770¹.
 calcium lactate treatment of, 3662⁴.
 hypocalcemia, hyperphosphatemia and acidosis in, 1844².
 lactic acid content of blood and cerebrospinal fluid in, 1674⁶.
 lactic acid content of blood in, 2731⁹.
 uric acid content of blood in, 2735⁶.
Ecolite, in earth's crust, 1056².
Economics, science and, 677⁴.
Ectoplasm, of bacteria, 935¹.
Eczema, arsenic findings in, 3082¹.
 blood serum in, H-ion concn. of, 134².
 lotion for, P 626⁹.
 therapy with silicic acid clays, 2154⁹.
Edema, acid-base equil. in, 3677⁴.
 alk. reserve of blood after injections of antidiphtheritic or antityphoidic serums, 1488⁹.
 blood-plasma protein concn. and, 1138⁶.
 blood plasma proteins in, detg. physico-chem. changes in, 1302⁹.
 bronchiolar, treatment by breathing dry air, 2302⁹.
 of cartilage (tracheal), 3662⁴.
 effect of diuretin on swelling of serum protein, 1313⁶.
 effect on adrenal glands, 762⁴.
 fluid, electrolyte distribution between serum and, 2484¹.
 insulin, 2502⁹.
 insulin effect on, 2318⁶.
 liquid of, mineral exchanges with muscle, 3209³.
 liquid of, ratio of albumin to globulin and alexin content in, 2030⁷.
 pathogenesis of, 449⁹.
 by perfusions with saline solns., 3670⁹.

- silkworm, amino N in, 3684^a.
- staining and permeability of, of marine animals, 3395^a.
- starfish, activation by acids, 2940^a.
- starfish, nuclear and cytoplasmic H-ion concn. of, detn. of, 2941^a.
- sterility of hen, vitamins and, 3073^a.
- storage of, 2513^a.
- of *Strongylocentrotus lividus*, effect of ions on, 3395^a.
- trout, lipase actions of, 3207^a.
- of *Volva brasiliana*, dialyzing membranes from, 3685^a.
- of yellow fever mosquito, enzymes and hatching of, 1500^a.
- Egg white.** See "egg" under *Albumin*.
- Egg yolk**, benzoic acid detn. in, 781^a, 3985^a.
- coagulation by pancreatic diastase, 2480^a.
- in fat-liquoring leather, function of, 2573^a.
- glycerol-preserved, analysis of, 1856^a.
- growth-stimulating substance in incubated, 2299^a.

- plasmalogen content of, 2001².
 polypeptides from, 2476⁴.
 silkworm, 2740⁹.
 ultra-violet irradiated, in rickets, 3387¹.
 vitamin content of, effect of rations on, 1832².
 white, production by ration low in lipochrome pigments, 949⁹.
- Ehrlich**, biography, 2404⁴.
- Ehrlich reaction**. See *Diazo reaction*.
- 1,19-Eicosadiene**, 2117³.
- 1,20-Eicosanedicarboxylic acid**, diethyl ester, 3182³.
 and diethyl ester, Röntgen-ray examn. of, 390⁹, 391¹.
- Eicosoic acid**. See *Arachidic acid*.
- Einstein's law**. See *Laws*.
- Eka-caesium**. See "of atomic no. 87" under *Elements*.
- Eka-iodine**. See "of atomic no. 85" under *Elements*.
- Eka-manganeses**. See *Masurium*; *Rhenium*.
- Elaidic acid**, detn. in presence of oleic acid, 2993⁹.
 phenyl ester, superheating of, 2126³.
 prepn. of, 2662³.
 structure of, 3601⁴.
- Elaeombrachs**, unsaponifiable matter in oil of, 1111⁴, 1112¹.
- Elasticity**, 3293³.
 adiabatic coeff. of, relation to abs. m. ps. of several metals 3779⁹.
 of colloids, 3518².
 crystallite orientation in metals as related to, 1386⁹.
 detn. in varnishes, methods of A.S.T.M. for, 1158³.
 law of, 1903⁴.
 of liquids, criterion for, 3779⁹.
 of mercurisulfosalicylates, 3783⁹.
 of metals and alloys, 1088⁹.
 of Rochelle salt, temp. variation of, 3498¹.
 of slate, methods of A.S.T.M. for testing, 1158⁹.
 of soap solns., 352⁹.
 of starch paste, 2830⁹.
 of steel, effect of electrolytic H on, 3336⁹.
 thermodynamic theory of, 1898⁹.
- Elaetin**, hydrolysis of, 927⁹, 3911⁹.
 reactions of, 926⁹.
 stain, prepn. of Weigert's, 2002⁹.
 structure of, 1213⁹.
 trypsin effect on, 1369¹.
- Elder**, anthocyanin from *Sambucus nigra*, 1652³.
 bark of *Sambucus nigra*, compn. of, 600¹.
- Elecampane**, levulosan detection in, 2147¹.
- Electrical apparatus**. (See also *Electron tubes*; *Vacuum tubes*.)
 flameproof, for coal mines, 324⁴.
 gas removal from glass and metal parts of, P 862⁹.
 magnetic slot wedges for, P 3567².
 protection against corrosive and explosive agents, 2401⁴.
 protective systems for liquid-insulated, P 3693⁹.
 temp.-indicating device for, P 676¹.
 thermoregulator for, P 3286⁹.
 for uniting metals and porcelain, etc., P 808⁹.
- Electrical double layer**, Helmholtz, thickness of, 3538³.
- Electrical industry**, gutta-percha in, 1374¹.
 reviews, 22⁹, 535¹.
- Electrical properties**, of colloids, detn. of, 351⁴.
- Electric arc**. (See also *Electrodes*; *Lamps*; *Nitrogen fixation*; *Rectifiers*; *Welding*.) 3027⁴.
 carbon, effect of radiation with, on metalolism, 3916⁹.
 carbon, excitation collisions in, 1222⁹.
 carbon, structure and stability in relation to ultra-violet output, 3830³.
 clouds dispersed from, cond. of, 1927¹.
 current transference at cathode of, theory of, 1753².
 curves, dependence on abs. temp. of anode, 205⁹.
 dissocn. of H and N by Hg atoms excited in an, 1762⁹.
 in hydrogen, 206¹.
 in iodine, 3156⁹.
 low-voltage, for C spectrum, 704⁹.
 mercury (cooled), 3831⁴.
 mercury, theory of, 3017².
 mercury vapor, photochem. action on CH₂(O) soln. recovered from olive oil, 2612².
 non-oscillatory abnormal low-voltage, with reversed elec. fields caused by ion diffusion, 2421⁴.
 Poulsen generator in longitudinal field, 208⁴.
 shield for magnetic blowout devices, P 1066⁹.
 treating gases with, P 2106⁴.
- Electric battery**. See *Accumulators*; *Cells*, *voltaic*.
- Electric brushes**, carbon-contg., P 1415⁴.
 compn. for, P 2617⁹, P 3838².
- Electric charge**, of agglutinated bacteria, 1474⁹.
 in amoebocytes of marine invertebrates, 3982⁷.
 of anisotropic fluids, 1734¹.
 changing elementary, 3155⁴.
 of colloidal particles, ions, electrons and sub-electrons, continuity of, 2842².
 of colloids, 3516⁴, 3517⁴.
 effect of increasing electrolytes on, 2086⁹.
 modifying the sign of, 3787².
 sensitization and, 683⁹.
 detn. in colloidal particles by use of Donnan membrane equil. theory, 1214².
 in dyes, etc., 3517⁹.
 in dye solns., 3513⁹.
 distribution of mols., effect on absorption spectrum in solns., 1932⁴.
 of earth, maintenance of, 2423⁹, 2602².
 effect on surface tension, 6⁹.
 of electrons, detn. from measurements of Shot effect in aperiodic circuits, 1057².
 of electrons, detn. of, 3818⁴.
 of fog particles, measurement of, 1221¹.
 in glass and silica from streaming of water, 1747³.
 on glass floats in very dry liquids, 1217⁴.
 of gold hydrosol particles, origin of, 10⁹.
 of hydrated Mn oxides, effect of neutral salts and concn. of H ions liberated, 695⁴.
 ionic, in chem. compds. having tetrahedral crystal structure, 855².
 on particles in atmosphere, origin of, 3787¹.
 of particles in gases, 3786².
 on particles in water, origin of, 2595⁴.
 ratio to mass for natural H-rays and at. fragments from Al, 2601⁴.
 reversal by H ions and by OH ions in org. acids and amines and in hydrated silica and CuO by salt solns., 1910¹.

- on rubber in C_6H_6 , 846^o, 2086^o.
 space, in alternating corona, 1936^o.
 in electrolytes, 1919^o.
 striated distribution of, 701⁴.
 surrounding conductor in corona at 60 cycles, 22^o.
 surface, adsorption and, 3147^o.
 theory (undulatory) of, 3541⁴.
- Electric circuits**, thermoregulators for, P 1034^o, P 2203¹, P 2403⁷.
- Electric coherence**, heat of adsorption and, 2828⁴.
- Electric coils**, P 2105^o.
 indurating, P 3432^o.
- Electric condensers**, with asbestos dielectric, P 2105^o.
 with dielec. films of cellulose esters without plasticizers, P 3165^o.
 electrodes for, P 862^o, P 3020¹.
 ionized air, dielec. loss and dielec. const. of, 3824^o.
- Electric conductivity**. See *Conductivity, electric*.
- Electric conductors**. See *Conductors, electric*.
- Electric contacts**, coating with graphite, P 1337^o.
 silver alloy for, P 49^o.
- Electric current**. (See also *Rectification; Rectifiers*.)
 bio-, 1822^o.
 circuit breakers, P 1232^o.
 controllers for labs., 2228^o.
 effecting reactions with, P 2438⁷.
 electrolysis by alternating, 514⁴.
 high-frequency oscillating, Poulson arc generator for, 208⁴.
 mercury interrupter using CO_2 , 3566².
 movement of, magnitude of, 2221^o.
 physico-chem. action of interrupted, in relation to therapeutic effects, 961^o.
 radiation from passage through gases, 18^o, 3546³.
 space-charge, between coaxial cylinders in presence of a gas, 2843^o.
 space, in alternating corona, 1936^o.
 supply for elec. furnaces, P 3316^o.
 therapeutic application of high-frequency, electrode for, P 3317^o.
 therapy with direct, 3233^o.
 transference at cathode of arc, theory of, 1753^o.
- Electric discharge**. (See also *Corona; Electron tubes; Nitrogen fixation*.)
 ammonia formation from elements by silent, in Siemens tubes, 1691⁴.
 anomalous glow, and its relation to pseudo high vacuum, 1591⁴.
 app. for, P 199^o, P 345³, P 676^o.
 arc, 3547^o.
 in argon, 2221³, 3553^o.
 auto-electronic, 701⁴.
 cathode dark space, theory of, 1928⁷.
 chem. action in, 1185^o.
 collectors in, theory of, 205⁷.
 current passage in, 3545¹.
 decompn. of HBr by silent, 852^o.
 decompn. of NaO in silent, 2613¹.
 density of, 1220¹.
 discontinuous, 1591⁴.
 effect on elements in air, 1050^o.
 electrodeless, 2220¹.
 with damped and undamped waves, 2226⁴.
 in stationary waves, 3824⁴.
- formaldehyde formation from water gas in, 3834⁷.
 in gases, 1057³, 2604⁷.
 in gases, analysis of, 2598^o.
 ion theory and, 1501⁴.
 stability of, 1057^o.
 study with exploring electrode, 2424^o.
 in gases and accompanying radiation, 700⁷.
 glow, effect of shape of cathode on, 15⁴.
 effects produced by radiating cathode with ultra-violet light, 2098^o.
 gradient in positive column of, 2221^o, 2842^o.
 sparking potentials of, 2220².
 heat of condensation of electrons and positive ions on Mo in, 3545^o.
 high-frequency glow, 2098^o.
 high-frequency oscillatory, in rarefied gas, 15^o.
 in hydrogen, 15^o.
 hydrogen activation in, 1221⁷.
 in hydrogen as source of continuous spectrum in ultra-violet, 2432⁷.
 hydrogen (high-pressure), 3831^o.
 hydrogen, spectrum of, 3311⁴.
 hydrogen tube, no. of radiating atoms in, 2220^o.
 lag in, 3544⁷.
 lan.ps, P 345^o.
 lamps for photographic recording of sound variations, P 1208^o.
 luminescence of Cs in electrodeless, 2098^o.
 luminous, in gases at low pressures, 15^o.
 in H, potential of, 3017⁷.
 through rare gases, 1057^o.
 in mercury, duration of afterglow of, 1762^o.
 in mercury vapor, production of continuous spectra with electrodeless, 3157⁷.
 ozone formation by, 2228¹.
 in potassium vapor, 857^o.
 in rarefied gas, 1223¹.
 reaction velocity in silent, 1221^o.
 silent, effect on olefins, 3344^o.
 striations in, 701⁴.
 three-point gap, 3544^o.
 tubes, P 211^o, P 839⁷, P 3772^o.
 electrode for, P 863¹.
 excitation from electron collision in, 2126^o.
 luminous, P 1035¹.
 pressure in, 3155^o.
 pure-metal electrodes in, 1057^o.
 sparking potentials of, 1221⁴, 1405^o.
 use of getters in, P 2080⁴.
 vacuum app. for, P 199^o.
- Electric double layer**, effect of neutral salts on elec. charges of hydrated Mn oxides in relation to, 695^o.
 relation to ions and charged particles, 2588^o.
 stabilizing, 1390⁴.
- Electric field**. (See also *Stark effect*.)
 adsorption and diffusion in, 200^o, 2005², 3509^o.
 alternating, decompn. of CO in corona from, 2436¹.
 colloid-ion migration in, detn. of rate of, 2588^o.
 deflection of flame in, 356^o.
 deflection of mol. rays of elec. dipolar mols. in inhomogeneous, 3824⁴.
 dipole orientation in, quantum. theory of, 203^o.
 effect on adsorption, 3292^o.
 on crystn. of piperine and salol, 2207^o.

 operating app. for, P 3316¹.
 for steel manuf., 1763¹.
 supplying app. for, P 862¹.
 for gas purifiers, P 2617¹, P 3028¹.
 gold-Au₂O₃, potential of, 2216¹.
 gold-Au₂O₃, potential of, 3536¹.
 gold, polarization capacity in H₂SO₄, 2847¹.

- holder for elec. furnaces, P 3567².
hydrogen, 1⁴, 3536².
 cell for, 2836².
 poisoning of, 3537².
 prepn. of pure H for, 1585².
 restoring "poisoned," 3807².
 in sapon. study, 1052².
hydrogen and Cl, e. m. f. in HCl and NaCl, 2412².
for hydrogen-ion concn. and elec. cond. detns., 2856².
for hydrogen-ion concn. detn. in blood, 2487².
hydrogen-ion, for body fluid contg. CO₂, 1117.
hydroquinhydrone, H-ion concn. detn. with, 2710¹.
hydroquinone, in detn. of H-ion concn. in saps, 3217².
iron, potential of, 1051⁴.
manganese dioxide, 693².
manganese dioxide and soot for, P 3317².
for measurement of power factor and dielec. const. of sheet insulating materials, 208².
mercurous sulfate, for testing storage batteries, 3836¹.
mercury, 3537².
mercury dropping, 203².
metal-coated C, P 1937¹.
micro-, 837².
micro-, for H-ion concn. detn., 3642².
Miguet, 1596².
non-polarizable, 3807².
oxygen, diffusion, 1740².
oxygen overvoltage on, 3537².
oxygen, potentials of, effect of pressure on, 203².
platinum, in cond. measurements, 525².
 for detn. of cond. of electrolytes, 3800¹.
 polarization capacity in H₂SO₄, 2847².
 polarization of, heterogeneous catalysis and, 691².
 polarized Pt, in neutralization reactions, 2234².
 potential between Hg and HgCl, effect of HCl on, 3806².
 potential of Ti, 3807².
 potentials, abs. values of, 1400².
 potentials of Al and Al amalgams, 2417².
 potentials of Be, Mg, Ca, Sr and Ba, 3806².
 potentials of dil. solns. of electrolytes, 2836².
 potentials of hermidin-cyanohermidin, 748².
 potentials of, in deposition of Ni, 1935².
 precipitator, app. for removing dust from, P 2222².
 for protecting boilers, etc., P 3165².
 quinhydrone, 1⁴, 112¹, 1917², 3014².
 of Büllmann, 1217².
 detn. of H-ion concn. of blood with, 596².
 in electrometric titrations, 1422².
 H-ion concn. detn. with, 2445², 3030².
 potential in CuSO₄, 1586².
 potential referred to H electrode, 1586².
 in solns. with low buffer capacity, 1586².
 table of H-ion concn. values corresponding to measurements with, 1217².
 quinhydrone micro-, 3920².
 for rectifiers and electrolytic condensers, P 3029¹.
 reference, for potentiometric titrations, 1380².
 in resonance potential detn., 3547².
 reversible, thermodynamic theory of, 3535².
 rinsing, in electrolytic prepn. of H, 3314².
 secondary magnet canal rays on, 2223².
 self-baking, for elec. furnaces, P 5367², P 1415², P 3028¹, P 3165².
 self-burning continuous, P 2105².
 silver, reversible to K ion, 1400².
 spark potential, exponential equation for prepn. of, 3537².
 for starting voltaic arc with ultra-violet rays, P 23².
 surface phenomena, theory of, 2220².
 tantalum, electron emission from cold, 1927².
 for therapeutic application of high-frequency currents and ultra-violet rays, P 3317².
 two- and 3-, systems in H, 3545².
 for ultra-violet ray arc lamps, P 536².
 for welding, P 222², P 563², P 1443², P 2450², P 3041², P 3344².
 for welding, coating for, P 222².
 welding, combining hard and soft metals for, P 221¹.
 for welding, etc., W-contg. metal for, P 2455².
Electrodialysis. See *Dialysis*.
Electrodynamics, book: Quelques idées sur, 3837¹.
 generalization of, 2602².
Electrokinetic phenomena, 350².

 soly. of salts in, effect of other salts on, 3790^o.
 soly. of semi-solutes in, effect of temp. on, 3296^o.
 solns., d. and n of, 3008^o.
 solns. of NaCl, NH_4Cl and NH_4NO_3 , anodic behavior of Cd in, 2417^o.
 specific vol. and crit. isotherms of, 2408^o.
 spontaneous ignition temp. of, effect of anti-knock compds. on, 323^o.
 spontaneous ignition temp. of, effect of aromatic amines and pyridine on, 324^o.
 surface e.m.f. of, 2418^o.
 surface tension of, 3507^o.
 surface tension of, effect of gases on, 6^o.
 surface tension of mixts. with water, 1909^o.
 synthesis of, 731^o.
 system: $C_6H_6-H_2O$ -, 1744^o.
 system: CCl_4 -, 3521^o.
 system: $MeOH$ -, vapor pressure of, 1215^o.
 systems with paraffins, effect of salts on miscibility temp. of, 849^o.
 temp. for initial combustion of, 1697^o.
 tincture prepn. with, of various strengths, 154^o.
 treating with gases, app. for, P 1208^o.
 vapors from aq., compn. of, 149^o.
 from vinasses, P 2974^o.
 viscosity above b. p., 2408^o.
 water detn. in, 3328^o.
 water detn. in mixts. of C_6H_6 and, 3857^o.
 from water gas, equil. in formation of, 2783^o.
 wetting power and evapn. of, 2749^o.
 in wines (customs), 3418^o.
- Ethylamine**, catalyzers for production of, P 2965^o.
 photochem. decompn. of, 3831^o.
 photosensitized decompn. by excited Hg atoms, 858^o.
 reaction with $AcOH$, 202^o.
 surface tension of aq. solns. of, 3147^o.
 systems: formic acid-, butyric acid-, and succinic acid-, 1579^o.
 —, β -chloro-*N,N*-dimethyl-, picrate, 2660^o.
 —, β , β -diphenyl-, and salts, 52^o.
 —, *N*-diphenylmethylene-, and methiodide, 3901^o.
 —, β -phenyl- See *Phenethylamine*.
 —, β -triphenyl-, and salts, 2670^o, 2671^o.
Ethyl bromide. See *Ethane, bromo-*.
Ethyl carbonate. See "diethyl ester" under *Carbonic acid*.
Ethyl chloride. See *Ethane, chloro-*.
Ethylene, absorbents for purification of, re-vivifying, P 995^o.
 adsorption by charcoal, heat of, 3535^o.
 adsorption by metallized SiO_2 gels, 845^o.
 adsorption on Cu catalyst poisoned with CO , 3532^o.
 adsorption on thoria catalyst, 690^o.
 anesthesia, 2320^o.
 anoxemia factor in, 274^o.
 blood changes under, 3967^o.
 coagulating time in, 1851^o.
 for anesthesia, examn. of, 1520^o.
 as anesthetic, 3967^o, 3981^o.
 catalytic reactions of, 3011^o.
 circulation in liquefaction of gases, 1207^o.
 from coke-oven gas, 313^o.
 in coke-oven gas, $EtOH$ recovery from, 1343^o, 4054^o.
 condensation under influence of excited Hg atoms, 3831^o.
 container of steel for, examn. of ruptured head of, 1084^o.
 crit. consts. of, 1036^o.
 decompn. by heat, 849^o.
 decompn. of, catalyst for, 1583^o.
 density detn. of, 3004^o.
 density of, and its use as a comparison gas, 670^o.
 diaryl derivs., 2893^o.
 effect of silent discharge on, 3344^o.
 effect on circulation, 3980^o.
 on compn. and color of fruits, 3688^o.
 on enzymes of pineapples, 2016^o.
 ethyl alc. from, from petroleum cracking, 2788^o.
 flame in H_2O , 3445^o.
 flames, radiation from luminous, 812^o.
 gases rich in, P 1700^o, P 3733^o.
 hydrogenation of, catalysis by SiO_2 gels contg. Pt, Pd or Cu, 3012^o.
 hydrogenation of, Ni catalyst for, 3804^o.
 ignition points in O, 961^o.
 inflammability limits of mixts. with air, 1884^o.
 manuf. of, P 917^o.
 mixts. with A, free energy and fugacity in, 3535^o.
 photosensitized decompn. by excited Hg atoms, 858^o.
 purification of, 2446^o.
 purifying, revivifying C from, P 1336^o.
 reaction with HNO_3 , 2658^o.
 with NO , catalysis of, 3254^o.
 with starch, 3046^o.

- ripening fruits with, 2044^a, 3385^a.
 sepn. from coke-oven or illuminating gases, P 1505^a.
 sepn. from gases formed in cracking hydrocarbons, P 1546^a.
 soly. in cyclohexanol, 1741^a.
 spectrum of, 2433^a, 3159^a.

 crystn. of rubber on, dispersibility and, 199⁴.
 of crystals from abs. zero to m. p., 3497⁹.
 detn. at high temps., 3497⁹.
 detn. of, app. for, 343⁸.
 gas, nomogram for plotting, 2408².
 ideal, of gases, 2582⁷.
 internal pressure and, 348⁷, 677⁷, 1728².
 of liquids, compressibility and, 1733⁴.
 of liquids, heat of vaporization and, 1745⁹.
 measurement of—see also *Dilatometer*.
 measurement of, in solids, app. for, 3770⁴.
 at zero abs., 3813².
Expectorants, action of, 3978⁴.
Explosibility, of chlorinated lime and Ca hypochlorite, 1872⁸.
 of coal dust, 2560⁸.
 of flue gas from gas appliances, 2056⁸.
 of methane and natural gas, 1885⁴.
Explosions. (See also *Detonation*; *Flames*.)
 of acetylene generator, 2799⁸.
 in air liquefaction, 2762⁹.
 of ammonium salts, temps. for, 3745⁴.
 with benzazide, 3463⁹.
 of benzene vapor, 1357⁸.
 of bitumen fumes, 3463⁴, 3746².
 of blasting explosives, products of, 3463⁴, 3464⁴.
 in brass shaft during filing, 2189⁷.
 during "bulling" with gelignite, 4070⁴.
 of carbon monoxide, 1185⁷.
 of carbon monoxide and O, effect of water on, 1059⁸.
 of carbon monoxide with O or air, ultra-violet radiation from, 3130².
 of chocolate candies, sugar as source of anaerobes causing, 2201¹.
 in closing down a coke-oven battery, prevention of, 2058¹.
 of coal dust and fire-damp, 322⁸.
 coal-dust and fire-damp, lab. for study of, 3463⁸.
 coal-dust, in mines, 2986⁸.
 prevention of, P 3130⁸.
 tests in initial period of, 177⁴.
 in cordite factory, 4072¹.
 of cyanogen mixts., 1550⁹.
 of dust, 1012⁷.
 preventing, P 652².
 safety codes for prevention of, 1550⁷, 1884².
 of dust from water-gas tar residuum, 2064⁴.
 of firedamp, combating, 1013¹.
 of firedamp, prevention with flameproof elec app., 324⁴.
 gas and dust, 1549⁷.
 gaseous, 1185⁴, 1542², 1549⁹.
 initial stages of, 2064⁴.
 ionization in, 2560².
 vessel for, 1356⁹.
 of gas holder at Posen, 642⁸.
 of gasoline, 2064².
 of gasoline ignited by cigaret, 2799⁴.
 of gasoline on tank barge "Two Sisters," 1012⁹.
 of heating gases, preventing, 651⁴.
 ignition of gases by, 823⁴.
 of lead bromate, 3270⁷, 3324⁷.
 in lignite storage, prevention of, 812⁷.
 of mercury and NH₃ vapor, 1012².
 in mines, cartridges for preventing or quenching, P 1357⁴.
 in mines, prevention of, P 3746⁸.
 from oil vapor, 4072¹.
 oxy-hydrogen, in electrode boiler steam plants, 2189⁹.
 at Pacific wharf West Ham (England), 2986⁴.
 photographs of, 1886⁸.
 in power factory at Hasloch, 3464¹.
 rate of, photographic measurement of, 823⁷.
 reactions in, 650⁷.
 regions of N₂O-Et₂O-O and of N₂O-Et₂O air, 1215⁷.
 of sodium dinitrophenate at Hicks and Partners' works, 323⁸.
 of sulfur dust, prevention of, 1357⁴.
 testing app., 652¹.
 theory of, 2986⁷.
 wave formation in, effect of pressure on, 1549⁷.
 wave in gaseous mixts., 3130⁷.
 waves, striated photographic records of, 3271².
 of wires (electrical), 1222⁸.
Explosives. (See also *Cordite*; *Detonation*, *Detonators*; *Nitrocellulose*; *Nitroglycerin*, *Nitrostarch*; *Picric acid*; *Projectile*, *Pyrotechnic compositions*; *Toluene*, *Tri-nitro*; and "mixed" under *Acids*.)
 1013⁸.
 accidents with, 1549⁷.
 from aliphatic hydrocarbon oxide, P 3130⁸.
 amatol removal from, 325².
 ammonium nitrate, P 1013⁸, P 1551¹.
 ammonium salts, 3745⁴.
 book: History of the, Industry in America, 3464⁷.
 brisant, P 1887⁴.
 burning out filled projectiles, 324⁸.
 cartridges, P 3746⁴.
 for coal mining, P 2386⁴, 3462⁹.
 coal-mining, lab. for study of, 3463⁴.
 coating of crystals with synthetic resins, P 652².
 colloidal powders, laws of combustion of, 2386¹.
 combustion of powders, temp. and, 2799⁷.
 consts. of, calcn. of, 3745⁷.
 container for blasting, P 3271⁴.
 contg. nitrated glucoside of polyhydric alc., P 2386⁸.
 contg. triazo compds. and nitrates, P 1551².
 decompn. of, theory of, 1185².
 detonation propagation across air-gap between 2 cartridges of, 1550⁸.

- detonation wave from solid, 2559^o.
 diinitrophenol as, 3270^o.
 explosion of blasting, gaseous products of, 3464².
 filling bombs, shells, etc., with, app. for, P 2799^o.
 in firecrackers, casing for, P 3271^o.
 flashless cannon, P 2190^o.
 in France during war, 3745^o.
 gases from detonating permissible, effect of coal dust on, 651².
 (German powder before and during the war, 3463².
 globular grains, P 2190^o.
 high, P 325^o.
 hydrocyanic acid as, 490^o.
 hydrogen peroxide, 4070^o.
 inflammation of, pressure and, 1356^o.
 initiating, 1184².
 of liquid air and blast-furnace dust, P 3130^o.
 liquid-air, blasting with, 4071².
 liquid-O, absorbent for, P 325^o.
 liquid-O, in strip coal mining, 1185².
 low-freezing, 3231².
 manuf. in Italy, 2986².
 military high, properties of, 3745².
 military, safety of, 651².
 in mines, rept. of Safety in Mines Research Board on, 3271².
 misfires of, 651².
 nitrocellulose, P 2560^o, P 3464².
 nitroglycerin, 322².
 chem. stability of, 1185².
 elimination by du Pont, 1887².
 testing stability of, 2064².
 nitroglycerin-nitrocellulose, P 325^o.
 plastic, P 1013^o.
 poisonous gases from underground, 3231².
 propellant, P 325^o, P 2190^o.
 protecting elec. app. against, 2401².
 pyroxylin container for, P 2065².
 removing volatile substances from smokeless, P 144².
 rept. of Chief Inspector of Victoria for 1926, 4070².
 of Dept. of Mines (Canada) for 1926, 2089².
 of H. M. Inspectors (55th), 2799².
 review, 2385².
 safety, P 1013^o.
 sand test of, 3270^o.
 sensitiveness of, 1548².
 smokeless powder, P 2190^o.
 moisture detn. in, 3462².
 stability of, app. for testing, 323².
 stability tests of, 1013², 4070².
 stability of nitrocellulose, detn. of, 1013².
 storing com., 650².
 storing gases, porous mass for, P 1693².
 testing, labs. for, 1551².
 tetryl-contg., 3803².
 transportation of, 1357², 1540², 3462².
 trinitrophenylbutylnitramine, P 325^o.
 work of Marcelin Berthelot, 2986².
- Extinctionmeter**, 2402².
Extinction coefficients, measuring, radio micrometers for, 1223².
Extraction. (See also *Oils*; *Sugar manufacture*; etc.)
 of camomile blossoms, etc., P 2749^o.
 of liquids from liquids, P 973².
 by solvents, 1190².
- Extraction apparatus**. (See also *Sugar manufacture*.) 837², 1033², P 1381², 1725², 2401², 3491², 3760².
 dialyzer, 1327².
 for drugs, 1725².
 for fats, 1196², P 2569², P 2822², P 2995².
 for fats, etc., P 2569².
 for fats, resins, waxes, etc., P 2822².
 for fish-liver oil, P 1024².
 for oils, P 335², P 344², 1196².
 for oils, etc., P 2961².
 for oils, fats, etc., P 2995².
 for oils from blubber, etc., P 3138².
 shaking-, detn. of oxalic acid in urine with, 2486².
 for tanning materials, 1028².
 for viscous substances from fibrous materials, P 2570².
- Extracts**. (See also *Flavoring materials*; *Fluid-extracts*; *Organ extracts*; *Tanning materials*; as well as *Pancreatic extract*; etc.)
 absorption of water by dry, 156².
 manuf. by percolation, 2167².
 solvent and preservative for, P 2170².
- Exudates**, anoxybiotic activity of leucocytes in, 2727².
 lactic acid in, 1128².
 leucocytes, metabolism of, 1675².
 physico-chem. properties of, 953².
 sedimentation velocity of corpuscles in, 2142².
- Exudation**, pituitrin effect on, 1497².
Exudative diathesis, blood fat in, 2931².
- Eyes**. (See also *Intraocular pressure*.)
 absorption of medicinal solns. across cornea, effect of osmotic pressure on, 3959².
 aqueous humor of, 1147².
 biochemistry of, 1994².
 in cadavers, H-ion concn. of, 1305².
 compn. of, 2727².
 iron detection in, 265².
 lactic acid content of, 446², 3665².
 osmotic pressure of, 2140².
 review, 2908².
 urea in, 108².
 care in using a metallographic microscope, practice of A.S.T.M. for, 1158².

 hydroxy, synthesis of higher, 3348⁸.
 insecticidal action of, and of their Me ester, and Na and NH₄ salts, 4009².
 in intestine, effect on absorption and excretion of Ca and P, 1843¹.
 iodine absorption by, in org. solvents, 2903⁸.
 iso-unsatd., formation during hydrogenation of fatty oils, 1365⁸.
 jelly-forming power of Na soaps with cresol and, 3007⁸.
 of lecithin from corpus luteum, 2022⁷.
 of liver oil from Kokonohoshi-Ginzame, 1195⁴.
 of liver oils of shark and ray, 1719⁷.
 manuf. of, P 1023⁸, P 3138⁸.
 manuf. of, by oxidizing oils, P 1546⁸.
 oxidation of, by enzymes from germinating fatty seeds, 3931⁷.
 oxidation of, effect of glutathione on, 2706⁷.
 oxidized, 4081⁸.
 oxidized, detn. in oxidized and sulfonated oils, 1556⁷.
 of peanut oil, 2661⁷.
 of point-headed pin-fish, 829⁸.
 polymerization and oxidation of unsatd., 2809⁸.
 polymorphism of, 1445⁸, 2082⁸, 2873¹.
 reactions with soaps, 335¹.
 in rubber (raw), 195⁸.
 salts (anhydrous) of lower, P 3906⁸.
 salts of, surface c. m. f. of, 2418².
 sepn. of, 1963⁴.
 sepn. of liquid and solid, 2662⁴.
 of soap flakes, relation of drying to, 1891⁸.
 sol. salts of, soaps and fluorides from, P 508⁸.
 of sperm whale oil, 4079⁸.
 of spleen after castration and their quantitative variations in aseptic autolysis, 1837⁴.
 spreading of, 2584⁸.
 structural modifications of, 5¹.
 sugar formation in microorganisms at expense of, 3218⁸.
 sulfo-aromatic, P 3760².
 sulfo derivs., guanidine and urea derivs. of, 62⁸.
 sulfonating, P 3476⁸, P 4084².
 in tissues, distribution of, 2021⁸.
 toxicities to insects, constitution and, 2163².
 of whale oils, 1360¹.
 of whale oils, compn. of, 1719⁴.
 of Yamato-torpedo liver oil, 1022⁸.
- Fatty infiltration**, of thrombi, 1305⁸.
- Fatty oils**. See *Oils*.
- Favus**, treatment with samboline, 610⁸.
- Fayalite**, optical properties of, compn. and, 3583⁸.
- Fearon's reaction**, 1833⁸.
- Feathers**, cholesterol content of, 2910⁸.
 cystine content of, 3063⁸.
 dyeing, P 3751⁸.
 medicinal products from, P 626⁸.
 pigments, relation of porphyrinuria to formation of, 768⁸.
 regeneration of, thymus and thyroid in, 3090⁸.
- Feces**, alkaline, diet for, 1833⁸.
 analysis of, reagents for, 2380⁸.
 in anemia of troops in Bombay, 3956⁸.
 arsenic excretion from arsenobenzene in renal insufficiencies, 2318⁸.
 bismuth detn. in, 3920⁸.
 blood detection in, 110⁸, 930⁴, 2004⁸, 3918⁸.
 breeding of flies in cattle, larvicides for preventing, 2741⁸.

- calcium soaps in, formation in jaundice, effect of alkalis and alk. earths on, 2932².
calcium soap soln. in, effect of bile salts on, 2710².
fat content of, in sprew, 272².
hydrogen-ion concn. of, 2017².
hydrogen-ion concn. of, detn. of, 1917².
lead and Bi content of, 752².
lead detn. in, 933², 2710².
lead excretion in, 776².
lipoid excretion in, bile and, 1295².
nickel detn. in, 874².
in sprue, 452².
staining for neutral fat and split fat, 2913².
streptococci of, 113².
urobilin of, 1485².
vitamin A content of, of breast-fed and artificially fed infant, 1831².
zinc excretion in, 2022².

effect of mineral, on soil reaction, 3414².
effect on adsorption of plant nutrients, 2916¹.
on CO₂ concn. of air close to plants, 2523⁷.
on fruiting activities of cotton, 789⁶.
on germination of cotton, 3246⁷.
on germination of white beans, 3248⁵.
on H-ion concn. of soils, 294⁶.
on keeping quality of apples, 789⁶.
on nitrate content of soils, 790⁶.
on nutritive and vitamin values of millet and wheat, 4008⁴.
on potash content of soil and crop, 1511⁹.
on soil structure, 2350⁴.
on soy bean compn., 3246⁸.
on starch production in potato leaves, 3215¹.
on strength of straw of cereals, 3100⁶.
on vegetative and reproductive capacities of seeds, 3699⁴.
for eucalyptus trees, 3699⁹.
expts. at New Jersey Agr. Expt. Sta., 1862
fermentation of, app. for, P 3493⁹.
from fish, P 1516³, 2163⁴, P 3105⁵.
fixation by soil, 3510⁶.
grain, expts., 4008⁴.
green manure, analyses of, 470⁹.
decompn. in Peradeniya, 470⁹.
expts. with, 148⁴.
N availability in, 978¹.
vetch and clover for, 2955².
gypsum as, 2163⁴, 2754⁷.
hop, expts., 3248⁹.
incomplete, effect on development of rye and on utilization of fertilizing constituents of soil, 2954⁴.
industry, economics of, 2351⁹.
industry, evolution of, 3698⁷.
inorg., 2752⁴.
iodine in, 2954⁴, 3247⁷.
effect on I content of foods, 1687⁴, 338⁹.
in relation to goiter, 2153⁹.
iron phosphate as, for regions with Fe starvation, 3246⁷.
from Italian "Stassfurt" salts, 1784⁷.
in Java in 1926, 3414⁴.
for kale, 4007².
leather scrap as, 1515⁸, 1862⁸.
from leucite of Italy, 1167⁴.
magnesium phosphate, for oats and barley, 3100².
manganese as, 1163⁸.
manganese deficiency in, 1514⁸.
for mangels and turnips, 3413⁷.
manuf. of, review on, 1857⁴.
manure, 3247⁷, 3701⁵.
action of N content of hot fermented, 2954⁷.
decompn. of, 3413⁹.
effect of addn. of CaCO₃ on, 4007⁴.
effect of H₂O₂ on, 1515⁴.
effect on crop yields and on soil supply of N and humus, 2753⁹.
fermentation of, 1688¹.
nitrification of N in, 1163⁷.
N recovery with, 1163⁴.
storage of, 2753⁹.
for sugar beets, 3248⁹.
Mitscherlich consts. for, 2348².
molasses as, 3414⁷.
from molasses waste, P 2520⁴.
mowrah meal as, 1719⁹.
mucks, peats, etc., as,

- for mulberry, 789^a.
 nitrate detn. in, 2350^a.
 nitrogen availability of, detn. of, 2349^a.
 nitrogen detection and detn. in, 1324^a.
 nitrogen detn. in, 1324^a, 2350^a, 3697^a.
 nitrogen in, plant-food value of H₂O-insol. org., 1324^a.
 nitrogenous, P 794^a, P 1326^a.
 factors influencing efficiency of diff. forms of, 4005^a.
 for grape, 471^b, 789^a.
 for grass land, effect on proportion of grasses and clovers, 3101^a.
 for rice, 790^a.
 value of nitrate N and ammonia N in, 148^a.
 from org. refuse, P 472^a.
 from packing-house waste, P 295^a.
 pasture, expts., 3247^a, 3248^a.
 peat, increasing N content of, 790^a.
 perennial plant nutrition in soil receiving given, control of, 1290^a.
 phosphate, contg. CaCN₂, P 794^a.
 phosphatic, P 149^a, P 295^a, P 976^a, 1325^a, 1863^a, P 1865^a, P 3101^a, P 3702^a, P 4011^a.
 phosphoric acid as, 3699^a.
 phosphoric acid detn. in, 2350^a.
 phosphorite and CaCO₃, 3700^a.
 phosphorites, utilization of H₃PO₄ of, 791^a.
 physiol. reactions of, 2163^a.
 potash, 791^a, P 979^a.
 effect on bacteria of soil, 3247^a.
 effect on carrying quality of tomatoes, 3699^a.
 effect on soil acidity, 2346^a.
 from greensand, 2954^a.
 from leucite, 989^a.
 power and heat economics in manuf. of, 1333^a.
 potash detn. in, 2348^a.
 potassium iodide as, 2954^a.
 potassium iodide, for sugar beets, 2352^a.
 potassium nitrate as, 2523^a.
 potassium phosphate, manuf. of, 1863^a.
 potato, expts., 3101^a, 3246^a, 3928^a.
 production and utilization of, 790^a.
 rape, expts., 471^b.
 for reclaimed peat soils, 3099^a.
 reversion of nitrates in soil under diff. cultural conditions, 4004^a.
 review, 2524^a.
 for rice, NaCl in, 1515^a.
 for rubber, 294^a, 2352^a, 2524^a.
 for *Salvia sclarea*, 154^a.
 sampler, 2348^a.
 from sewage activated sludge, 619^a.
 sewage irrigation, 1511^a.
 sewage sludge as, 145^a, 792^a, 3414^a.
 silicates in, relation to other elements in plant nutrition, 4007^a.
 sodium chloride as, 471^b.
 soil acidity and, 3099^a.
 soil and, 789^a.
 soil heterogeneity and, 1514^a.
 soil org. matter and, 3244^a.
 soil requirements of nitrogenous and potassic, detn. of, 469^a.
 soil requirements, zeolitic silicates and, 3099^a.
 South African deposits, 3585^a.
 straw, 2350^a.
 sugar-beet, expts., 1515^a, 2753^a.
 for sugar beets, application in drills, 3248^a.
 for sugar cane, 1893^a.
 sugar-cane, expts., 190^a, 2163^a, 2352^a, 2523^a, 2524^a, 3413^a.
 for sugar cane, molasses and Mn as, 1163^a.
 sugar cane pathology and, 3414^a.
 from sulfite liquor, P 3743^a.
 sulfur and gypsum as, 1162^a.
 sulfuric acid spray as, 2520^a.
 for tea, shot-hole borer control and, 4010^a.
 in Texas, 2162^a.
 for tobacco, effect on nicotine and ash content of leaf, 2043^a.
 tobacco, expts., 3701^a.
 for tobacco, guano as, 3710^a.
 for tomatoes, NaCl as, 1325^a.
 for tomatoes, stripe disease control with, 2754^a.
 treatment of die-back disease of orange trees with, 3249^a.
 turnip, expts., 1863^a.
 urea- and Ca(NO₃)₂ contg., P 472^a.
 urea contg., P 295^a.
 urea in, injury to plants by, 4007^a.
 use of, principles of, 2351^a.
 multiple dr. b. ial methods, 2348^a.
 from vegetable materials, P 3101^a.
 wheat, expts., 1863^a.
 wheat, expts. at Canterbury Agr. College, 1863^a.
 world production and consumption in 1924 and 1925, 1321^a.
 yeast for, P 2514^a.
Ferulaldehyde, potassium and Na derivs., 2475^a.
Ferulic acid (4 hydroxy-3-methoxycinnamic acid), esters, 1257^a.
 —, 5-chloro- α -cyano-, and ethyl ester, 906^a.
Ferulophenone, *p*-acetyl-. See *Chalcone*, 4'-acetyl 4 hydroxy-3-methoxy-.
Ferulyl chloride, acetate, 1257^a.
Fetus See *Embryos*.
Fever. (See also *Malaria*, *Typhoid fever*.)
 blood and plasma changes in cocaine and *B. coli*, effect of aspirin antipyresis on, 131^a.
 blood fat in, 2931^a.
 blood in, acid base equil. and inorg. salts of, 3082^a.
 effect on bile secretion, 1677^a.
 intermediate water balance in, 267^a.
 ketosis in acute, 959^a.
 metal fume, 1859^a, 2515^a.
 milk, in cows, glucemia and, 129^a.
 mouse recurring, treatment with "Albert" B. C., 2935^a.
 peptinase content in, 270^a, 2733^a.
 of peripheric origin, carbohydrates in, 2030^a.
 puerperal, treatment with rivanol, 610^a.
 spotted - see *Meningitis*; *Typhus*.
 substances causing, after intravenous injection, 2335^a.
 undulant, treatment with mercurochrome-220, 3968^a.
 vasoconstricting action of blood in infectious, 1306^a.
Fiber board. See *Paperboard*.
Fibers. (See also *Cotton*; *Crude fiber*; *Dyeing*; *Flax*; *Hemp*; *Jute*; *Paper*; *Paper pulp*; *Retting*; *Textiles*; *Wool*; etc.)
 absorption of moisture by textile, effect of humidity on, 2802^a.
 adsorption from aq. suspensions on, 518^a.

- amosite asbestos, treating for spinning, P 1189¹.

 natural gasoline in, 1541^a.
 oil as, 167^a.
 by oxidizing oils, P 1546^a.
 by oxidizing oils, etc., P 3123^a.
 from petroleum hydrogenation, 2378^a.
 from Piron coal distn. process, 2375^a.
 properties of, 2183^a.
 rating in order of detonation, app. and method for, 2790^a.
 relation of liquid, to motors, 3727^a.
 for removing C deposits from engine cylinders, P 3454^a.
 requirements for engine starting, 2779^a.
 research on, 1541^a.
 soly. tests of, P 815^a.
 starting ability of, 1541^a.
 S detn. and differentiation in, 1346^a.
 testing of, 2379^a.
 volatility and freedom from knock in, 2790^a.
 Wadolenc, 2370^a.
 lignite as, 1001^a.
 liquid, P 314^a, P 1002^a, P 2977^a, P 2977^a, P 3265^a, P 3732^a.
 liquid, by carbonization, 1532^a, 2183^a.
 from coal, 2546^a, 3249^a.
 for France, 2974^a, 3727^a.
 from peat, 3444^a.
 prep. for combustion by emulsification, compression and sudden expansion, P 488^a.
 production and utilization of, review on, 1532^a.
 production of, 638^a.
 from waste, 2183^a.
 world's future supply of, 1532^a.
 from low-temp. carbonization of lignites and coal waste, 3447^a.
 low-temp. carbonization of mineral, 639^a.
 manuf. of volatile, microorganisms in, 2755^a.
 in metallurgy, 1951^a.
 mixing air in spaced jets with gaseous, P 3265^a.
 mixing app. for liquid, P 3003^a.
 mixing liquid, with air for combustion, P 2181^a.
 mixt., P 815^a.
 mixt. of tar pitch and fuel oil, P 3732^a.
 molasses as, 3283^a.
 nitrogen detn. in, 3115^a.
 oil-burning furnaces, thermoregulator for, P 3145^a.
 oil-burning systems for potteries, 1874^a.
 oil, combustion calcs. of, 2971^a.
 oil for furnaces, properties of, 2791^a.
 oil for furnaces, specifications for, 2791^a.
 oil, review for 1926, 3734^a.
 from oil shales, 483^a.
 oxidation of, electromotive force from, 3835^a.
 paraffin, solidification of paraffin in, 2380^a.
 from petroleum refining acid sludge, P 1546^a.
 petroleum refining residual, burning at refineries, 1540^a.
 from petroleum residuum, P 1182^a, 3125^a.
 powd. and atomized, firing of, P 3733^a.
 powd. or atomized, furnace for, P 315^a.
 powd., regulating supply to boiler furnaces, P 1177^a.
 prepn. and treatment of, 1878^a.
 refractometry of, 3262^a.
 from refuse, 1861^a.
 relativities of, 1340^a.
 resources of America, 4045^a.
 reviews on, 810^a, 4045^a.
 self-ignition by adiabatic compression, 646^a.
 smokeless, 2375^a.
 smokeless, conversion of coal into, 2375^a.
 smokeless pulverized, in boiler firing, 639^a.
 smokeless solid, 639^a.
 from soy-bean oil, 2371^a, 2372^a.
 for sugar manuf. in Java in 1925 and 1926, 3477^a, 3478^a.
 from sulfite liquor, P 822^a.
 sulfur detn. in, 316^a, 2546^a, 3734^a.
 sulfur effect on liquid, 2179^a.
 supplementary, in sugar factories, 1892^a.
 synthesis from CO and H, 638^a.
 synthetic, 2785^a.
 manuf. of, 1857^a.
 review for 1926, 3734^a.
 from tan liquor, P 2058^a.
 tar (low-temp.) as, 3120^a.
 technology of, 810^a, 1174^a, 3262^a.
 terpene-contg. liquid, 3444^a.
 transportation of liquid, 1549^a.
 utilization in iron and steel plant, 551^a.
 utilization of, British research on, 2369^a.
 vaporizer and gasifier, P 1881^a.
 volatile matter in solid, detn. of, 1840^a.
 water detn. in solid, 811^a.
 water removal from liquid, app. for, P 8126^a.
 woods (Mauritius) as, 3727^a.
Fukugetin, constitution of, 2269^a.
Fukugi, coloring matter of, 2269^a.

- Fuligo varians**, plasmodium of, proteins of, 2705^a.
- Fuller's earth** (*floridin*). (See also *Japanese acid clay*.)
 action of acids and alkalis on, 1691^a.
 adsorbent, P 2363^r.
 bleaching oils with, 2811^a.
 as catalyst for manuf. of bornyl esters, P 1272^a.
 cooling of calcined, P 1337^a.
 drying furnace for, P 838^r.
 elutriation app. for, P 344^r.
 fat recovery from waste with, 663^a.
 industry, 3714^a.
 in lubricant treatment, 2792¹.
 in petroleum industry, 2554^a.
 polymerization by, 1735^r.
 resources of U. S. in 1926, 3714^a.
 revivifying, P 631^a, 4033^r.
 furnace for, P 2363^r.
 used in treating hydrocarbon oil, P 3740^a.
- Fulmarus glacialis**, stomach oil of, 2017^a.
- Fulminic acid**, mercury salt—see *Mercury fulminate*.
 reactions of, 1114^r.
- Fulvenes**, review, 580^a.
- Fumaramic acid**, α -propionylamino-(?), 60^a.
- Fumaramide**, cryoscopic studies of, 1398^r.
- Fumaranilic acid**, phenyl ester, 2893^a.
- Fumaria officinalis**, ext., 4018^a.
- Fumaric acid**, aryl esters, heat action on, 2893^a, 1^a.
 derivs. of, syncrystn. of, 1398^r.
 diethyl ester, photochem. action of Br on, 1760^a.
 hydrogenation of, catalysis by Pd supported catalysts, 2089^a.
 hydrogen-ion concn. of solns. of, 1580^a.
 malic acid conversion to, 3527^r.
 metabolic relationships with succinic and malic acids, 3225^a.
 microchem. differentiation from maleic acid, 875^a.
 in mushrooms, 2490¹.
 second disocn. const. of, 2211^a.
 soly. in liquid NH₃ and in liquid SO₂, 3047^r.
 stereoisomerism of, viscosity and, 2583¹.
 ---, dihydroxy-(?), 569¹.
 ---, α -propionylamino-(?), derivs., 60^a.
- Fumes**. (See also *Clouds*; *Flue gases*; *Fogs*; *Respirators*; and "elec." under *Precipitation*.)
 corrosion by, 3882^a.
 electrochem., 3025^a.
 electroplating, removal of, 1414^a.
 filter for, P 1380^r.
 formation of, law of, 3302¹.
 losses in metallurgy of Pb and Cu, 2637^a.
 removal from acid pickling or other app., air-blasting system for, P 3002^a.
 sepg. solid particles from smelter, app. for, P 1570¹.
 stability of, effect of turbulent air motion and of humidity on, 2342^r.
 sulfur dioxide recovery from metallurgical, 1612^a.
 in varnish industry, control of, 658^a.
 from varnish kettles, etc., destroying, P 660^a.
 washing app. for, P 2822^a.
- Fungicidal**. (See also *Disinfectants*.) P 632^a, P 3711^a.
 calcium cyanide as glasshouse, 1864^a.
 soil, 789^r.
p-dichlorobenzene as, 2956^a.
 for sugar cane, 3249¹.
- Fumigation**. (See also *Disinfection*.)
 of air, app. for, P 786^r.
 app. for, P 2956^a.
 with carbon disulfide for bulb pests, 3250^a.
 carbon monoxide-contg. gas for, P 980^a.
 with chloropicrin, 2044^a.
 of citrus trees, 1864^a.
 of citrus trees with Ca(CN)₂ dust, 3251¹.
 with cyanogen compds., P 3098^a.
 of foods with HCN, 3243^a.
 of fruit trees with HCN, 1863^a.
 of grain with HCN, P 623¹.
 of green houses with C₁₀H₈, 702^r.
 with highly poisonous substances, P 620^a.
 housefly, with Ca(CN)₂, 3249^a.
 with hydrocyanic acid, P 294¹, P 795^a, 978^r.
 app. for, P 1161^a, P 3696^a.
 warning with eye irritating substances, 2160^a.
 hydrocyanic acid for, generating app. for, P 3696^a.
 insect revival after, 3249^a.
 nicotine for, P 980^a.
 of soil with Ca(CN)₂, concn. of wireworms by baits before, 793^r.
 of woods, foods, etc., to destroy insects, app. for, P 3288^a.
- Fundulus**, egg cells, H-ion concn. of, 2509^a.
- Fungi**. (See also *Aspergillus*; *Mildew*; *Molds* (II); *Microorganisms*; *Mushrooms*; *Oidium*; *Ophiobolus graminis*; *Rhizopus*; *Verticillium*.)
 cellulose decompn. by, 821^a, 4062^a.
 chitin of, 939^r.
 concn. of cellular juices in, 1666^a.
 culture media for lower, H-ion concn. of, 1665^a.
 cultures of, law of min. in, 3213^a.
 effect on plants, 2043^a.
 fat- and wax-splitting, 3924^a.
 fat in, 3913^a.
 in fertilizer composts, 977¹.
 growth of, effect of quantity of food factors on, 3381¹.
 hymenomycetous, enzymes of, 943^a, 3070^a.
 nitrate assimilation by, 598^a, 2146^a.
 oxidation of ferrous malate by, 927^a.
 in paper pulp, 2384¹.
 respiration of, effect of water content and of light on, 3932^r.
 in sewers, 2345^a.
 skin, fat metabolism of, 3923^a.
 stimulation by poisons, Arndt-Schulz law and, 2289^a.
 of sug. cane in Lahaina, 2395^a.
 of sugar cane, treatment of, 791^a.
 of tea, 2046^a, 3990^a.
 in thrush, effect of surface-active substances on growth of, in respect to water-sol vitamins, 3653^a.
 wood-destroying, 1137^r.
- Fungicides**. (See also *Bordeaux mixture*; *Insecticides*; *Sprays*.) P 295^r, P 980^a, P 1326^a, 2043^a, P 3101^a, P 3251^a, P 3417^a, P 3702^a, P 4011^a.
 analysis and testing of, 148^a.
 analysis of, 2352^a, 4009^a.
 arsenical, P 795¹, P 1326^a.
 for barley smut, 3249^a.
 Canadian, 622¹.
 colloidal S in, 2955^r.

contg. org. Hg compds., P 3416.
copper, 2211.
copper carbonate, 148.
copper carbonate, app. for treating grain with, P 1688.
copper detn. in presence of Fe, As and Hg, 622.
for corticium-disease of potatoes, 472.
2-furaldehyde, CH_3O , butyraldehyde, BzH , propionaldehyde and AcH as, 1864.
insecticide-, 3101.
loss prevention by, 3701.
mercury compds., effect on seed germination, 2955.
mercury compds. for, P 1164.
mercury-contg., P 473.
for mildewed seed, P 623.
patent literature of, 3415.
poisoning with, detection by dissection, 931.
polysulfide, P 1517.
selenium and Te compds. as, 2044.
for smut, 1325.
for stinking-smut of wheat, 4008.
for sugar cane, 7914, 3701.
sulfur, P 2354.

Funnels, P 514.

Buchner, filtration with, 357.
measuring and dispensing, P 1570.
with valved outlet, P 3144.

Fural. See 2-Furaldehyde.

2-Furaldehyde (*furfural*; *furole*), color reactions of, and derivs., 3185.

condensation with dimethylbarbituric acid, 3185.

as embalming fluid, 3920.

β -ethyl- β -(*p*-nitrophenyl)hydrazone, 1251.

as fermentation product, 980.

as fungicide, 1864.

maleic and succinic acid production by anodic oxidation of, P 2430.

manuf. and uses of, 406.

manuf. from oat hulls, 1648.

in oil of lavender, 985.

oxidation of, 3053.

oxime, catalytic action of reduced Cu on, 75.

α - and β -oximes, 3618.

resins—see *Resinous products*.

semicarbazone, reaction with PhNHNH_2 , 68.

solvent properties of, and derivs., 1889.

spectrum of, 86, 2432.

in vinegar and its detection, 2743.

2-Furaldehyde, hydroxymethyl-, excretion of, 3912.

—, (hydroxymethyl)-, condensation with dimethylbarbituric acid, 3185.

—, 5-(hydroxymethyl)-, 582, 1458.

—, 5-(methoxymethyl)-, and derivs., 3182, 3183.

—, methyl-, condensation with dimethylbarbituric acid, 3185.

Furan (*furfuran*),

$\text{O}:\text{CH}:\text{CH}:\text{CH}:\text{CH}$

1 2 3 4 5

derivs., alkali action on, 1116.

detection of, 2897.

Friedel-Crafts reaction with, 911.

from sugars, 3912.

manuf. of, P 2907.

prepn. of, 3903.

ring, stability of, 3362.

spectrum of, 86, 2432.

—, (acetoxymethyl)-, 2686.

 analysis of readily-volatile, 716^a.
 analysis of, test paper for, P 722^a.
 analysis of, volumeter for, 513^a.
 blast-furnace—see *Gas, illuminating and*
fuel.
 of blood in pneumonia, 2736^a.
 books: *Flame and Combustion*, 2038^a; *Gas*
and Gases, 2598^a; *Factors Affecting the*
Distribution of, in the Animal Body,
 3377^a.
 Boyle's and Charles' laws of, lecture expt.
 for, 2404^a.
 carbon dioxide removal from, 616^a.
 carbon monoxide detection mixts. of,
 1071^a.

- catalytic reactions under high pressure, app. for, P 2080⁹.
 charging liquids with, app. for, P 839⁸.
 chem. const. of monat., 2092².
 circulating app. for, 1379⁸.
 circulation in tunnel kilns, P 3771⁸.
 cleaning, collecting or sepg., app. for, P 3002⁹.
 in coke oven, travel of, 814⁹, 2977².
 collectors, app. for holding const. pressure in, 3001⁷.
 combustion, SO₂ removal from, by glass and ceramic wares, 2170².
 compressed, handling of, 1569⁸.
 compressed, transportation of, 1540⁸.
 compressing and circulating app. for, P 2578⁹.
 compressor for, 1207⁴.
 condensation of mixt. of, to form an ideal soln., 1579¹.
 contact with liquids, app. for, P 1380⁸.
 for cooling and annealing sheet glass, system for circulating, P 3438⁹.
 corrosion by, steels resisting, 2245⁴.
 Dalton's law, failure of, 2408².
 degeneration of, paramagnetism and, 1925².
 density detn.—see *Density*.
 depolarization in, detn. of, 2847².
 detection and detn. of various, in air, app. for, P 2070⁹.
 detn. of, app. for, P 2578⁹.
 detn. of, in blood, 3210⁸.
 detn. of, in liquids, P 3328⁹.
 from detonating permissible explosives, effect of coal dust on, 651².
 diamagnetic susceptibilities of, 1908⁹.
 dielec. const. of diat. dipolar, according to "wave" mechanics, 2418⁸.
 dielec. const. of diat. dipole, effect of magnetic field on, 1211⁸.
 dielec. const. of dipolar, quantum mechanics and, 2418⁸.
 dielec. const. of sym. polyat. dipole, on new quantum mechanics, 526⁹.
 dielec. const. of, dependence on temp., 3782⁹.
 dielec. properties of ionized, 2427⁴.
 diffusion through Cu, prevention of, P 3405⁸.
 diffusion through membranes, app. for measuring, 837².
 dispersion of ultra-violet light in, 1758⁹.
 double refraction in paramagnetic, 2597⁹.
 drying, P 3405⁸, P 3693¹, P 3995⁸.
 drying and liquefying, P 3095⁷.
 drying, material for, P 2517².
 effect on castings, 553⁷.
 on concn. and activity of vapor in equil. with condensed phase, 1387⁴.
 on phenomena attendant on Zeeman effect in magnetic fields, 358⁸.
 on polarization of resonance radiation of Hg vapor, 2102⁹.
 on sensitized fluorescence, 533⁴.
 on velocity-distribution of photoelectrons from Pt, Al and Pd, 2098⁷.
 elec. discharge in, 1057², 2604⁷.
 and accompanying radiation, 700⁷.
 analysis of, 2598⁹.
 high-frequency oscillatory, 15⁴.
 ion theory and, 1591².
 stability of, 1057².
 vacuum spectroscopy and, 1933².
 electricity carriers (smallest) in, 3155².
 elec. pptn. processes—see *Precipitation*.
 electrification by friction between solids and, 1050⁹.
 electrolytic production of highly compressed, 3564⁸.
 electronic laws, 2581⁷.
 electrons and, 2220¹.
 energy losses of electrons passing through, 2221¹.
 entropy of perfect, 2594⁸.
 equil. in non-ideal, whose isometrics are linear, 2591².
 equil. pressures in mixts., 2213⁹.
 exhaust, from Diesel engine, 484⁸.
 expansion curves plotted by nomogram, 2408².
 explosive limits of mixts. of, 850¹.
 filter for—see *Filters*.
 flow of—see *Flow*.
 flue—see *Flue gases*.
 forces between unlike mols. of, detn. of, 3290⁸.
 generators for—see *Generators*.
 heat abstraction after compression, app. for, P 344⁸.
 heater for, P 2579².
 heating, P 3995⁸.
 heat of adsorption of, pressure and, 1577¹.
 ideal, Bose-Einstein statistical treatment of, paradox of mixts. from, 2083⁷.
 ideal expansion of, 2582².
 ideal, pressure, vol. and temp. chart for, 3779⁸.
 ignition by an explosion wave, 823⁴.
 ignition point at diff. pressures, 2064⁹.
 inert—see *Helium group*.
 ionization of—see *Ionization, gaseous*.
 ions of—see *Ions, gaseous*.
 junctions with liquids, app. for intermittent observation of, 112².
 kiln exit, analysis of, 1173¹.
 of lavas of Mt. Pelée of 1902, 2213².
 light scattering by, 1058⁴.
 liquefaction of—see *Liquefaction*.
 liquefied, containers for, P 2202⁹.
 Kerr effect in, 2418⁷.
 pressure within containers, detn. of, 1685⁸.
 valve for, P 3⁴.
 luminescence of solidified, at liquid-He temp., 3024⁸.
 luminous discharge in, at low pressures, 15⁹.
 magnetic susceptibilities of, 356⁸.
 magnetic susceptibilities of, at low pressures, 1921¹.
 magnetic susceptibility of, Glaser's phenomenon of, 15⁹.
 mean free paths in, whose mols. are attracting rigid elastic spheres, 2083⁹.
 measurement of large vols. of, 3729⁷.
 measuring app. for—see *Measuring apparatus*.
 mine—see *Mines*.
 mixing app. for—see *Mixing apparatus*.
 mixing, pressure effect on, 2408².
 mixts., viscosity, heat cond. and diffusion in, 1574⁸.
 mol. heats of, calcn. of, 3150⁹.
 mol. spectra in, 3310⁹.
 mols., elec. double refraction, polarity and optical anisotropy of, 2419².
 nitrogen pentoxide decompn. in presence of foreign, 2212².
 occluded, in triodes, 2616⁷.
 occlusion by Fe and steel, 555¹.

- occlusion by metals and alloys in liquid and solid states, 553^a.
- oil sepn. from, app. for, P 1570¹.
- particles in, movement and elec. charge of, 3786^{a,4}.
- permeability of molding sands to, 3035^a.
- permeability of refractory brick in metallurgical furnaces to, 3113¹.
- phase boundary forces at interface of liquids and, 201².
- phase integral for imperfect, 2408^a.
- poison—see *Poison gases*.
- polyat. dipole, with symmetrical mol., wave mechanics of dielec. consts. and Stark effect for, 2840^a.
- precipitation of particles from—see *Precipitation*.
- preheater for, P 3^a.
- pressure of mixts. of, 2083^a.
- pressure-reducing valve, 1379^a.
- pressure regulator, P 2202¹.
- protection of enclosed spaces from noxious, 3692^a.
- pumps for—see *Pumps*.
- purification of, P 291^a, P 466^a, P 617^a, P 972^{a,3}, P 1320^a, P 2343^a, P 2517¹, P 2946⁷.
- with active C, P 460^a.
- for NH₃ synthesis, etc., P 3427^a.
- app. for, P 198^a, 1379^a.
- by centrifugal action, app. for, P 344^a.
- colloids for, P 2965¹.
- under high pressure, app. for, P 2080².
- by ionization, 1591^a.
- from metallurgical furnaces, 882^a.
- radiation action on mixts. of, 1054³.
- radiation emitted by, bombarded by slow electrons, 1223¹.
- radiation from passage of electricity through, 18^a, 3546².
- radioactivity of, from Karapiti blowhole, 2097^a.
- rare—see *Helium group*.
- reactions in, elec. furnace for processes involving, P 210⁷.
- in flow systems, kinetics of catalysis in, 1744^a.
- under high pressure, P 303^a.
- kinetics of homogeneous, 2833⁷.
- at low pressures, theories of unimol., 3149^a.
- poisoning of catalyzers for, 3304¹.
- radiation and collision in, 3313^a.
- velocity of, 520^a, 1047^a.
- recovering volatile substances from, P 783^a, 3446².
- recovery of gasoline or other vapors from, P 1505^a.
- refractive index of, detn. at higher temps., 1587^a.
- refractive index of, pressure and, 2217⁷.
- removal from glass and metal parts of elec. devices, P 862⁷.
- removal from liquids, P 466^a.
- removal from melted glass or quartz, P 4040^a.
- removal from refrigerating-system condensers, app. for, P 2822¹.
- research on, 1381^a.
- Röntgen rays scattered by ideal, azimuthal distribution of, 1730¹.
- rotation energy of diat., 3541².
- sampling, 3327^a.
- sampling app. for, flowing through pipes, P 3493^a.
- sampling app. for, in furnaces or flues, P 676^a.
- scrubber, 2821^a.
- sealing fluids for, 4051¹.
- separation of—see *Separation; Precipitation*.
- separators for—see *Separators*.
- soly. in molten steel, 551^a.
- soly. of, temp. and, 680^a.
- solns., f. ps. of, 1578^a.
- sorption by charcoal, 1576^a.
- specific heat of, app. for detg., P 107^a.
- specific heat of, detn. of, 3534^a.
- specific heat of, thermodynamics of, 2215^a.
- state of excitation of, detn. of, 1054^a.
- in steel during and after casting, 1244^a.
- in steel plants, regulation and measurement of, 197^a.
- sterilizing cork disks, etc., with, app. for, P 3288^{a,7}.
- storage tank for, P 3771⁷.
- storing explosive, porous mass for, P 1693⁷.
- supersatg. liquids with, app. for, P 198^a.
- susceptibility of, and diamagnetism of flame-gases, 1053¹.
- tables for reduction of vols. to 0° and 760 mm., 3779^a.
- temp. change on expansion, 355^a.
- temp. measurement in, 1050^{a,4}, 1505^a, 2580^{7,8}.
- theory of, 3779².
- thermal cond. of, 2206^a.
- thermal properties of, 1575¹, 1909¹.
- toxic—see *Poison gases*.
- treating EtOH, liquid air, O or N with, app. for, P 1208².
- treating liquids with, app. for, P 3144^a, P 3493^a.
- treating liquids with, in presence of active C, P 2749⁷.
- treating with elec. arcs, P 2106^a.
- treating with ultra-violet rays, app. for, P 515^a.
- valves—see *Valves*.
- viscosity of—see *Viscosity*.
- volcanic—see *Volcanoes*.
- war—see *Poison gases*.
- washing app. for—see *Scrubbers; Washing apparatus*.
- washing of, 2516^a.
- water detn. in, app. for, 3769^a.
- withdrawal from storage batteries, app. for, 861^a.
- Gas exchange.** See *Respiration*.

- , **6-β-lactosido-β-***, and derivs., 1101^a.
- , **6-methyl-***, from monomethyltrihexosan, 393^a.
- , **3-methylthio-***, and tetraacetate, 1634^a.
- , **monoacetonetriacetyl-***, 64^a.
- , **pentabenzoyl-***, α- and β-, 3184^a.
- , **tetraacetyl-***, esters of hydroxycarboxylic acids, 1106^a.
- , **1,2,3,4-tetraacetyl-β-***, 1101^a.
- , migration of acyl group in, 2880^a.
- , syntheses with, 900^a.
- , **1,2,3,6(?)tetraacetyl-β-***, 1101^a.
- , prepn. of, 2880^a.
- , **1,2,3,4-tetraacetyl-6-toluenesulfo-β-***, 1101^a.
- , **1,2,3,6(?)tetraacetyl-4(?)toluenesulfo-β-***, 1101^a.
- , **tetramethyl-***, mutarotation, 3181^a.
- , oxidation with H₂O₂, 2252^a.
- , **3-thio-***, 1634^a.
- , **4(?)toluenesulfonyl-***, 2880^a.
- , **trimethyl-***, 226^a.
- , **2,3,6-trimethyl-***, cellulose constitution and, 173^a.
- 1,5-Glucose**, **4-p-toluenesulfonyl-1,2-isopropylidene-***, 64^a.
- Glucose anhydride***, effect on diabetic depauperized dogs, 1849^a.
- Glucosephosphoric acid**. (See also *Hexosephosphoric acids*.)
- , calcium salt —see *Calcium glucosephosphate*.
- , esters of, effect on fermentation of glucose, 3633^a.
- , **diacetone-***, Ba salt, 924^a.
- β-Glucosidase**, adsorption by kaolin, 3371^a.
- Glucoside**, **5-chlorosalicyl-***, 926^a.
- , **β-methyl-***, in *Dipsacus arvensis*, 937^a.
- , prepn. from β-methylcellobioside, 392^a.
- , **γ-methyl-**, enzyme action on, 747^a.
- , **methyltetramethyl-***, 63^a.
- , **2,3,5,6-tetramethylmethyl-***, α and β-isomers of, 3891^a.
- , **trimethylmethyl-***, 634^a, 622^a.
- , **2,3,6-trimethyl-β-methyl-***, 4-potassium salt, 225^a.
- , **2,5,6-trimethylmethyl-***, α and β-isomers of, 3891^a.
- 1,5-Glucoside**, **3(and 6)-p-toluenesulfonyltriacetyl-β-methyl-***, 64^a.
- , **triacetyl-6-benzoyl-β-methyl-***, 63^a.
- Glucosides**. (See also *Salidoside*, and other specific glucosides.)
- , of *Adonis vernalis*, extn. of, 4019^a.
- , anthraquinone, purgative action of, 274^a.
- , carbon nutrition of *Penicillium glaucum* with, 3069^a.
- , of *Caulophyllum thalictroides*, 4025^a.
- , chlorinated, biochem. synthesis of, 926^a.
- , decompn. and synthesis of, with enzymes, 415^a.
- , detection in plants, 1830^a.
- , in differentiation of members of the *Salmonella* group of food-poisoning bacilli, 3927^a.
- , in drugs (crude), 3253^a.
- , in drugs, varying character of, 1868^a.
- , effect on gastric juice secretion, 453^a.
- , of *Fatsia japonica*, 3631^a.
- , hydrocyanic acid, in *Lotus jolyi*, 758^a.
- , hydrolyzable by emulsin, 937^a.
- , hydrolyzable by rhamnodiastase, 937^a, 1831^a.
- , of jute seeds, 3647^a.
- , pharmacology of the cardiac, 3902^a.
- , in pigment of Isabella grapes, 3929^a.
- , in plants of Western Canada, 1280^a.
- , of quercetin, position of the sugar nucleus in, 1267^a.
- , from root of *Peucedanum decursivum*, 1817^a.
- , spectrography of, 915^a.
- , of squill, prepn. of, P 2962^a.
- , synthesis of, 1106^a, 3602^a.
- , of *Tinospora rumphii*, 4020^a.
- , of *Urginea burkei*, pharmacol. action of, 1497^a.
- , vanillin, on beech bark, 1200^a.
- 1,5-Glucosido-5-2,6-fructose***, 392^a.
- 6-Glucosidogalactose***, and osazone, 1634^a, 1635^a.
- 4-Glucosidomannose***, derivs. of, 357^a.
- , **heptaacetyl-bromo-***, 357^a.
- , **heptaacetylchloro-***, 357^a.
- , **heptaacetylfluoro-***, 357^a.
- , **heptaacetylido-***, 357^a.
- , **hexaacetylfluoro-***, 357^a.
- , **octaacetyl-***, 357^a.
- Glucosido-1-pyridinium toluene-β-sulfonate**, α-(and β)-**tetraacetyl-***, 64^a.
- Glucosido-6-pyridinium toluene-β-sulfonate**, **triacetyl-β-methyl-***, 63^a.
- Glucosimine***, reaction with HNO₂, 1969^a.
- Glucosone**, pharmacol. action of, 2302^a.
- Glucose-sucrase**. See *Invertase*.
- Glucosuria**, in acromegaly, 2930^a.
- , adrenaline, 2316^a.
- , alkali effect on, 960^a.
- , antigluco-suric substance preformed in body, 3941^a.
- , avian, 607^a.
- , benign, from disturbances in blood sugar regulating mechanism, 1145^a.
- , from ethyl ether, body temp. and, 137^a.
- , gastric analysis in, 3952^a.
- , after gooseberry-wine ingestion, 1486^a.
- , from insulin, 267^a.
- , nature of sugar in urine in, 2029^a.
- , phlorhizin, effect of ergotamine on, 965^a.
- , phlorhizin, effect of Na β-hydroxybutyrate on, 3089^a.
- , phlorhizin, effect of sympathico- and vagotropic substances on, 454^a.
- , phlorhizin effect on, 458^a.
- , of pregnancy, 2305^a.
- , in thyroid disease, 129^a.
- Glucuronic acid**, in animal organism, origin of, 122^a.
- , detn. of, 2487^a.
- , fate in animal organism, 2000^a.
- , formation in rabbits, 1481^a.
- , prepn. of, 3373^a.
- , in urine after splenectomy, 2020^a.
- , **diphenylacetyl-***, formation in animal body, 947^a.
- Glue**. (See also *Adhesives*.)
- , adhesive action of, 845^a, 990^a.
- , adhesive power of, tests for, 669^a, 3761^a.

- bone, 193².
 book: La fabrication des colles, 2075⁶.
 buying and use of, 1712⁴.

 automatic beat, radiation with soft Ra rays and, 3388^a.
 beat, "automatines" and, 3059^a.
 H-ion concn. and, 1490^a, 3860^a.
 regulation by liver, 1299^a.
 thiocyanates and, 6117^a.
 beat in cockroach, effect of temp. on, 1151^a.
 bismuth effect on, 611^a.
 blood sugar in, effect of insulin on, 2020^a.
 cardiazole effect on, 459^a, 2334^a.
 cardiovascular disease, effect of exercise on
 lactic acid of blood, on alkali reserves
 and on urinary acidity in, 2506^a.
 conductivity and excitability of, effect of
 bile and of bile salts on, 3971^a.
 cumulative effect of remedies of digitalis
 group, 3965^a.
 of *Daphnia*, movements under influence of
 endocrine substances, 1314^a.
 decompensation and compensation of, effect
 of breathing dry air on, 2302^a.
 digitalis effect on, 1148^a.
 digitalis effect on, Ca and, 773^a.
 digitoxigenin action on, 275^a.
 disease, diuresis by dehydrocholic acid in,
 772^a.
 effect of O inhalation in, 261^a.
 respiration in, effect of exercise on,
 3671^a.
 disintegration in inanition, 3224^a.
 dynamic actions of drugs, 778^a.
 ectopic beat produced by anesthetics, 3958^a.
 effect of acetanilide, caffeine and its citrate
 on, 1150^a.
 effect of atropine and of hyoscyamine on,
 1492^a.
 effect of CaCl₂ and of KCl on ventricular
 contraction, 3968^a.
 effect of cholesterol and sitosterol series on,
 1312^a.
 effect of ethers of amino alcs. of ephedrine
 group on, 2333^a.
 effect of increased rate due to injection of
 atropine on O satn. of blood in heart
 disease, 1146^a.
 effect of motion or excitement on, in relation
 to adrenal secretion, 1671^a.
 effect of natural and of synthetic camphor on,
 1846^a.
 effect of Po or Ra rays on, 3375^a.
 effect of strophanthine and digitalis mixts. on,
 460^a.
 effect of sympathetic and vagus on, 3962^a.
 effect of vagus or sympathetic stimulation of,
 on Ca or K content of perfusing soln.,
 3086^a.
 elec. cond. of tortoise ventricle, 2509^a.
 electrocardiogram in normal, in thyroid-
 treated, and in thyroidectomized animals,
 effect of pilocarpine on, 276^a.
 energy output of, regulation of, 1669^a.
 ephedrine effect on, 138^a, 2333^a, 2739^a.
 ether anesthesia effect on, 1491^a, 1848^a.
 excitability of, effect of NaCl on, 2333^a.
 failure, bicarbonate and chloride in blood
 serum in, 1302^a.
 failure, blood Ca and K in, 2503^a.
 formaldehyde effect on, 2508^a.
 functional test of, detn. of circulation as,
 1133^a.
 gas in cadaver, app. for detg., 3920^a.
 glycogen content of, effect of insulin on, 274^a.
 heat liberated by heating, 2927^a.
 histamine effect on, 280^a.
 hormone of, 1143^a, 1293^a, 3669^a.
 hormones, radiation and, 1824^a.
 humoral regulation of, 1668^a.
 indole and skatole effect on, 3977^a.
 insufficiency, tinctura strophanthi in, 1307^a.
 insulin effect on, 3393^a.
 insulin effect on, normally and in diabetes,
 2326^a.
 insulin effect on respiration of isolated,
 1308^a.
 iodine effect on, 1847^a, 2933^a.
 irradiation of, substances produced by,
 3628^a.
 lesions in diabetic patients, use of substance
 A of insulin in treatment of, 3975^a.
 in *Limulus* embryos, contractions of, 2741^a.
 lipid deposition in walls of aorta in infants,
 2310^a.
 α-lobeline effect on, 2937^a.
 mech. efficiency of, 2927^a.
 metabolic gradient of non-rhythmic strips
 from diff. levels of turtle, 612^a.
 minute vol. of, effect of change of frequency
 and vol. of respiration on, 3223^a.
 morphine effect on, normally and in mor-
 phine addiction, 2324^a.
 muscle, elec. field surrounding, 2151^a.
 energy changes in, 125^a.
 lactacidogen-H₂PO₄ metabolism of, 952^a.
 narcosis of, modifying, 460^a.
 nerve action of, humoral transfer of, 1143^a.
 norhomoeophedrine effect on isolated, of
 frog and of snail compared with that of
 native ephedrine and of β-tetrahydro-
 naphthylamine, 3973^a.
 output of dog, 1851^a.
 output of, effect of anemia, hemorrhage and
 anoxemia on, 2497^a.
 oxygen utilization of muscles of, 3669^a.
 parathyroid ext. effect on, 764^a.
 pharmacology of, 1489^a.
 pharmacology of, H-ion concn. of blood and,
 776^a.
 photosensitive substances and, 3961^a.
 physiology of, 261^a, 1481^a.
 physiology of surviving mammalian, 2487^a.
 pituitary ext. effect on, 2331^a.
 pituitrin effect on, effect of Ca and K ions
 on, 1846^a.
 pituitrin effect on, ionic equil. and, 2331^a.
 poisoned, caffeine and, 1314^a.
 poisons, action of, 460^a.
 differentiation of effects of, 1148^a.
 effect on intestine, 1496^a.
 from plants, 2758^a.
 polonium irradiation effect on, after K
 deprivation, 278^a.
 protein in beef, nutritive value of, 948^a.
 quinidine effect on, 2332^a, 2739^a.
 quinidine effect on conducting system of,
 2318^a.
 radioactive atoms in, of cold-blooded animal,
 2313^a.
 reaction to drugs, effect of C₂ of blood on,
 3977^a.
 reactivation of, arrested by deprivation of
 K by irradiation with β-rays of Ra,
 2314^a.
 remedies, 274^a.
 resistance to diphtheria toxin, increase by
 caffeine, 3682^a.
 rubidium effect on, 961^a.

 illuminating, P 4060².
 as internal-combustion fuels, P 2377⁴.
 from jet, 3863³.
 from lignite, 1533⁴, 2373⁴.
 from methane or gas contg. CH₄, P 2978².
 from petroleum sands, etc., P 318⁴.
 from plankton, 2058⁴.
 purity of, testing of, 4058⁴.
 refining, P 318¹, P 491⁴, P 1348⁴, P 1703⁴, P 2185⁴, P 2382¹, 7, P 2980⁴, P 3268¹.
 refining cracked, P 3455².
 refining, with liquid SO₂, P 3126⁴.
 sulfur removal from, reactivating agents for, P 1703⁴.
 surface tension of, effect of fatty acids on, 3004⁴.
 "sweetening," P 2186⁴.
 synthesis of, 1532⁴, 5.
 synthesis of, effect on petroleum industry, 1537⁴.
 treating with heated air, app. for, P 491⁴.
 ultra-violet treatment of, P 1007⁴.
Hydrocarbons (See also *Olefins*; *Paraffins*; *Petroleum*; *Petroleum refining*.)
 absorbing vapors of, P 1007⁴.
 absorption and distn. of, app. for, P 2186⁴.
 absorption app. for, P 647².
 absorption from casing head gas, app. for, P 318⁴.
 acetylene, reaction with NCl₃, 848².
 alkylation of aromatic, P 917⁴, P 3370⁴.
 allene, reaction with IIBr, 3042¹.
 aromatic, from olefins, P 3369⁴.
 aromatic, in petroleum, 1344⁴.
 autoxidation of, 1914⁴.
 autoxidation of cyclic, 3451⁴.
 benzene, electrochem. oxidation of, 572¹.
 boiling p. of, relation to that of azeotropic mixts., 2790².
 from carbon monoxide, 642⁴.
 chlorinated, effect on limits of inflammability of methane-air mixts., 1550⁴.
 chlorination of, P 172⁴, P 1660⁴.
 chloro aromatic, electrochem. oxidation of, 3181¹.
 chloro-, substitution in unsatd., 3902⁴.
 from coal-distn. gases, P 2978¹.
 coking petroleum, distn. app. for, P 1704⁴.
 colored, 586⁴, 3616⁴.
 combustion in air, controlling, P 2186⁴.
 combustion of, 1538².
 condensation of aromatic, with bromal and with chloral, 233⁴.
 condenser for, P 172⁴, P 1704⁴, P 2382⁴.
 condensing, washing or other treatment of, app. for, P 2186⁴.
 condition equation for, 2825⁴.
 conversion of heavy into lighter, P 3740⁴, P 4060⁴.
 cooling app. for, P 491⁴.
 from copal, 1889⁴.
 cracking, P 317⁴, P 318⁴, P 1006⁴, P 3267⁴, P 3455¹, P 3740⁴.
 app. for, P 1348⁴, P 3267⁴.
 catalyst for, P 241⁴.
 gas treatment in, P 1546⁴.
 crit. soln. temps. in benzyl alc., 644⁴.
 cyclic, catalytic transformation of, 570².
 cyclic, manuf. of, P 1272⁴, P 2478⁴.
 cyclic unsatd., catalysis of, 2469⁴.
 decompn. by heat, P 2382².
 dehydrogenation of polynuclear, 900².
 dephlegmators for, P 1704⁴.
 detn. in gases, 2975⁴.
 in gasoline, 489⁴, 645⁴, 645⁴, 1538⁴.
 in gasoline and kerosene, 489⁴.
 in illuminating gas, 2446⁴.
 in petroleum, 1178⁴, 1179⁴.
 in petroleum and tar fractions, 2787⁴.
 in rubber, gutta-percha, etc., 1901².
 detn. of aromatic, in gasoline, 1348⁴.
 detn. of unsatd., 1703¹.
 dielec. consts. of mixts. of, 852⁴.
 distn. of, P 1704⁴, P 2792⁴, P 3124¹.
 elec. cond. in solid and liquid state, 3523⁴.
 energy of C—H bond in, 3814⁴.
 equil. in mixts. with vapors, 644².
 explosions of, 1185⁴.
 fatty acids from, P 2196⁴.
 fuels from, for explosion and internal-combustion engines, manuf. of, 2779⁴.
 in gas from low-temp. carbonization of coal, 1534⁴.
 in gasoline, 2786⁴.
 halo-, reactivity of, 1649⁴, 2117⁴.

- reduction of, P 2136^a.
 surface e.m.f. of, 2418¹.
 heating and gasifying heavy, app. for, P 1007^a.
 Hungarian, 2861^a.
 hydrogenating and cracking, P 318^a.
 hydrogenating, catalysis of, 2556¹.
 hydrogenating under high pressure, P 315^a.
 from hydrogenation of coal, tars, oils, etc., P 2793^a, P 3122¹.
 hydroxyl derivs., relation between d. and constitution of, 3782².
 ignition temp. of, 2079^a.
 inflammability of, effect of alkyl halides on, 1186^a.
 isomerization of, 1807².
 from lignite coke, 1880^a.
 of lignite tar oils, decolorization and decolorization of, 1880^a.
 liquid, by hydrogenating solid fuels, P 1002².
 manuf. of, P 1002^a, P 2382^a, P 2703^a.
 manuf. of aromatic, P 1660^a, P 3908^a.
 manuf. of aromatic, from olefins, P 3626^a.
 manuf. of, as fuel for internal-combustion engines, P 592¹.
 manuf. of higher, from CH₄, P 3907^a.
 manuf. of light, P 3908^a.
 from methane, P 3123¹, P 3368^a.
 methylated, oxidation with elec. current, P 2438^a.
 miscibility of aliphatic satd., 1395².
 from mistletoe, 600^a.
 mixts. with alc., crit. dissoln. temps. of, 3297^a.
 in natural gas, phys. properties of, 2782³.
 oxidation of aromatic, 1452^a, P 3057^a.
 oxidation of, catalysis of, P 1007^a.
 in petroleum, solvents for, 2785².
 physico-chem. identification of, 645².
 polymerization of unsatd., 2788^a.
 prepn. of, P 1006¹, 2657^a.
 purification of, P 1007¹, P 3454³, P 4060^a.
 purification of cracked, P 3740^a.
 purifying, from destructive distn., P 3123^a.
 purifying vapors of, P 1007².
 Raoult's law for mixts. of, deviations from, 1583^a.
 reaction of aromatic, with carbazide and with HN₃, 2693^a.
 recovery from bituminous sands, 42².
 refining light, P 819^a.
 removal of aromatic, from gasoline, 1179^a.
 in residue after purification of benzine, 3736^a.
 resinous products from cracked, distillates, P 2186^a.
 from rubber (*Hevea*), 4096^a.
 rubber, reactions of, 3486^a.
 self-ignition by adiabatic compression, 646^a.
 solidification of liquid, app. for continuous, P 2980^a.
 solns. of, P 1320^a.
 solvent for, P 202^a.
 for solvents in dry cleaning, etc., P 3405¹.
 spectrum of, 1932^a.
 sulfonation of aromatic, 1450^a.
 synthesis from water gas, 2378^a.
 synthesis of, 1699^a, 3728^a.
 synthesis of petroleum, 1537^a.
 synthesis of, review on, 3289¹.
 systems: SO₂-aromatic, 738², 1449².
 from tar, P 316¹.
 unsatd. and aromatic, reaction with H₂SO₄, 2554^a.
 unsatd., catalytic prepn. of, 1444^a.
 unsatd. content of, detn. of, 645².
 unsatn. of, detn. of, 2554^a.
 vol. law of, 2824^a.
 from water gas, equil. in formation of, 2783^a.
Hydrocarbostyryl (3,4-dihydro - 2 (1)-quinolone), 1979¹.
 —, (6 and 7)-chloro-, 1979¹ ^a.
 —, 6(and 8) - chloro-4-methyl-, 1979^a.
 —, 6,8-dichloro-, 1979¹.
 —, 6,8-dichloro-4-methyl-, 1979^a.
 —, 1,4(4,6 and 4,8)-dimethyl-, 1979^a ^a.
 —, 1-ethyl-, 1979^a.
 —, 5(6,7 and 8) - hydroxy-, 1979^a ^a.
 —, 1(4,5,6,7 and 8)-methyl-, 1979^a ^a.
 —, 1-phenyl-, 1970^a.
 —, 3-phenyl-4-phenylimino-, and -HCl, 1986^a, 1987^a.
Hydrocarpic acid, in Sapucainha oil, 2168^a.
Hydrocele fluid, hydrogen-ion concn. of, 767^a.
Hydrocellobial, copper compd. of, 2598^a.
Hydrocellulose, chemistry of, 2704^a.
 for paper and rayon industries, 2795^a.
Hydrocephalus, cerebrospinal fluid in, II-ion concn. of, 2151^a.
Hydrochloric acid. (See also *Hydrogen halides*; *Hyperchlorhydria*.)
 absorption and hydrolytic action of, in toluene on cotton, 4076¹.
 absorption of, 1523^a.
 absorptive power of cellulose for, 1707¹.
 achlorhydria treatment with, 2936^a.
 action on CoCl₂ solns., 1395¹.
 action on wool, 3749^a.
 activity coeffs. of, 847^a.
 in aq. solns. with BaCl₂ and LaCl₃, 3008^a.
 in water-alc. mixts., 1046^a.
 activity in solns. of, 1051^a.
 adsorption of, by activated charcoal from aq. solns. in presence of nonelectrolytes, 3509^a.
 by charcoal in presence of Na salts, 3147^a.
 by hide, swelling and, 2572^a.
 by parchment paper, electroosmosis and, 518¹.
 alkalosis treatment with, 605¹.
 aluminum dissoln. in, 2420^a.
 effect of heat treatment on, 2420^a.
 rate of, 558^a.
 anti-inflammatory effect of, 3086^a.
 book, 1692^a.
 by-product, 1691^a.
 as catalyst in formation and sapon. of Et acetate, 3529^a.
 in manuf. of amines and nitriles, P 1272¹.
 for metaldehyde prepn., 54¹.
 catalytic power of, 3526¹.
 chem. const. for, 693¹, 2582^a.
 compn. of const. b. p., 685^a.
 concn. of, P 3715^a.
 concns. of com., variations in, 2169^a.
 corrosion of Fe by, 1793^a.
 corrosion of Pb and Pb alloys contg. Cu and Sb by, 3882^a.
 crit. consts. of, 1036^a.
 cross-section curve of, toward slow electrons, 1058¹.
 decompn. potential of, 1917^a.
 detection of, 1664^a.
 detn. in cotton, 2192^a.
 in gastric juice, 2280^a.
 in organs, 2914^a.
 dielec. const., ionization potential and moment of inertia of, 1921^a.
 dielec. const. of, 696^a.

- effect of magnetic field on, 700^a.
temp. and, 3782^a.
diffusion into gelatin, Liesegang ring formation in, 1911^a.
diffusion of, theory of, 680^a.
dissoen. at high temps., 3800^a.
effect on acid-base equil. in health and in nephritis, 3971^a.
on diseases of gastrointestinal tract, 2730^a.
on electrode potential between Hg and HgCl, 3806^a.
on permeability of epidermal cells of tadpole in AcOH, 1499^a.
on phototaxis in *Allolobophora foetida*, 1500^a.
on skin sensitiveness to external irritants, 2323^a.
on vegetable-tanned leather, 3484^a.
elec. cond. and mol. wt. of, in dry and moist nitrobenzene, 3523^a.
elec. cond. in PrOH, 2087^a.
elec. cond. of mixts. with H₃PO₄, 353^a.
elec. endosmosis through a S₂ membrane, 3792^a.
in elec. field, behavior of, 2590^a.
electromotive force of H and Cl electrodes in, 2412^a.
gaseous ions in, mobilities of, theory of, 3153^a.
in gastric juice, 2303^a.
in gastric juice, concn. of, 262^a.
of gastric secretion in digestion of human milk, 3078^a.
heat capacity and sp. heat of solns. of, 3814^a.
heat of neutralization of systems with Na methoxide, NH₃ or aniline, 2835^a.
heat of reaction between, and ignition product of Na₂CO₃ and Fe₂O₃, 1524^a.
heat of vaporization of, 692^a.
hydrogen-ion activity of, 3796^a.
hydrogen-ion concn. of, effect of colloidal Al₂O₃ on, 2279^a.
hydrolysis of cellulose with, phys. chemistry of, 2981^a.
industry, processes in, 3690^a.
internal friction of gaseous, and of its mixts. with H, 1731^a.
ionic equil. with CaC₂O₄ and CaF₂, 3009^a.
ionization in collisions between electrons and atoms in, 2599^a.
ionization of gaseous, 1591^a, 2842^a.
light scattering by, 1058^a.
manuf. of, P 304^a, P 1335^a, P 2173^a, P 3427^a.
manuf. of, review on, 1871^a.
mixts. with NaOH or KOH, phys. properties of, 3701^a.
mol. scattering of light by, 3793^a.
mols., active section of, 2425^a.
oxidation-reduction potentials of HgCl and HgCl₂ in solns. of, 3807^a.
partition between water and C₆H₆, 2088^a.
photochem. formation of, kinetics of, 2434^a.
photosynthesis of, catalytic action of walls of reaction vessel in, 207^a.
picking Fe with, 1957^a.
poisoning by, effect of work on, 3085^a.
potential in partition equil., 694^a.
prepn. from salt and H₂SO₄, catalytic effect of Cu ion in, 158^a.
purification of, P 804^a.
reaction between Br and chloride ion in, 1051^a.
reaction velocity of KMnO₄ and, effect of BaSO₄ suspensions on, 3502^a.
reaction with active N, 2093^a.
with AmOAc at interface of two immiscible liquids, 72^a.
with methanol, 1625^a.
with nopinene, 1806^a.
with propene, 2657^a.
with AgNO₃, ionic equil. in, 3302^a.
with NaOH and with Na₂CO₃, 2234^a.
with sugars, 3891^a.
with tungsten compds., 544^a.
recovery from mixts. with lignin, dextrin, etc., P 2763^a.
refractivity of, in aq. solns., 3539^a.
secretion of gastric mucosa, 1295^a.
sepn. from HBr and HI, 1607^a.
soly. of ferrous materials in, effect of N on, 544^a.
soly. of PbSO₄ in aq., and in its mixts. with H₂SO₄ and (NH₄)₂SO₄, 2589^a.
soly. of Fe alloys in, CH₂O and, 848^a.
space charge in, 1919^a.
spectrum of, 1759^a, 2224^a, 2844^a.
in stomach contents in regurgitation of duodenal fluid, 2733^a.
in stomach contents, variation in upper and lower parts of stomach, 3226^a.
sucrose inversion by, 12^a, 1580^a.
synthesis of, 2413^a.
synthesis, reaction velocity of, 3527^a.
systems: AlCl₃-H₂O-, and KCl-H₂O-, 2414^a.
system. Na acetate-NaCl-NaOH-, H ion activity in, 1130^a.
systems with gelatin, diffusion potentials of, 3517^a.
tissue acidosis from, 766^a.
titration curve of, effect of hydrophilic colloids on, 3575^a.
Hydrochoerus capibara, oil of, 2810^a.
Hydrocinnamaldehyde, germicidal value of, 2530^a.
—, β - (α - bromophenacyl) - α, α - dimethyl-, 3044^a.

- flames, O required for propagation of, 3464⁵.
 flames, spectrum of, 1878⁹.
 formation during fermentation by butyric acid bacteria, 3913².
 formation in water electrolysis, 1585⁸.
 fusion line of, 1387⁰.
 generation from Zn and H₂SO₄, 1071⁷.
 Glaser effect in, 357¹.
 glow in, at high pressure, 3024⁵.
 heat of adsorption by reduced Cu, 2088⁴.
 heat of adsorption on heat-treated Cu catalysts, 3535⁴.
 helium formation from, radiation arising from, 3152⁹.
 in hydrides, vol. occupied by, 3289⁸.
 hydrolytic adsorption on Pt sponge, 841⁸.
 ignition by an explosion wave, 823⁴.
 inflammability of, 1186⁴.
 inflammability of mixts. with air, effect of EtBr on, 323⁴.
 effect of H₂Se on, 3130¹.
 effect of Me₂Se, Me₂Te, SnMe₄ and PbMe₄ on limits of, 4071^{2,3}.
 limits of, 1884⁴.
 inflammation of mixts. with CO and air in closed vessels, 1886⁸.
 internal friction of mixts. of HCl and, 1731².
 ionic mobilities in mixts. of NH₃ and, 1222².
 ionization and luminosity produced by stationary elec. oscillations in, 3824⁴.
 ionization by collisions of 2nd kind in mixts. of, with rare gases, 2427².
 ionization by electron impacts in, 2603⁸.
 ionization in, 3017⁷.
 ionization in collisions between electrons and atoms in, 2599⁴.
 ionization in upper atm., 1406⁴.
 ionization potential and spectrum of, 3310⁶.
 ionization potentials of, 2422⁸.
 ionization potentials on metals, 17¹.
 ionization process in, 3823⁸.
 ion mobilities in mixts. of Et₂O and, 1221⁸.
 ions in discharge in, positive-ray analysis of, 3153⁹.
 iridium pptn. from soln. by, under pressure, 3323¹.
 liberation by corrosion of Fe and Zn, effect of temp. on, 886¹.
 by liquefaction of water gas, etc., heat-interchange system for recovery of, P 160⁸.
 liquefactor and circulation, 1207³.
 liquid, orthobaric d. of, 680².
 luminous discharge in, potential of, 3017⁷.
 magnetic moment of at., 526⁹, 2424².
 magnetic susceptibility of, 356^{9,3}, 1224³.
 manif. of, P 160⁹, 627⁹, P 994⁹, P 995¹, P 1169³, P 2106⁴, P 1336⁶, P 2977⁹, P 3108⁸, P 3717⁶.
 manif. of, by electrolysis, app. for, P 211⁴, P 362⁹, P 862³, P 1231⁹, P 1598⁷, P 2439⁶, P 3317¹.
 by electrolysis, effect of pressure in, 2615⁹.
 by electrolysis, electrode for, P 862³.
 by electrolysis, pressure boosters for, 2849⁶.
 by electrolysis, "rinsing" electrodes for, 3314⁴.
 from water gas, P 4035⁴.
 mass-wt. ratio of, 1035⁹.
 from methane, P 3368⁸.
 methane formation from amorphous C and, free energy of, 2213⁷.
 methane formation from C and, equil. consts. for, 522⁹.
 mixts. with C₂H₂, mobilities of ions in, 3504⁹.
 mixt. with N for NH₃ synthesis, P 4034².
 mol.-ion, 1925¹.
 mol.-ion, undulatory theory of mechanics and, 525⁹.
 mol. vol. at abs. zero, 3496³.
 mols., active section of, 2425⁶.
 cross-sections of, 528⁹.
 cross-sections toward slow electrons, 2425².
 quantum theory of excited, with half quantum nos., 3307⁸.
 sp. heat of, 3304².
 valency and structure of, 2422⁷.
 wave mechanics and, 2839⁹.
 moment of inertia of, 1930⁸.
 in o-nitrobenzaldehyde derivs. sensitive to light, 533³.
 -nitrogen bond, infra-red absorption by, 1224⁸.
 overvoltage, 695⁵, 2836¹, 3004¹.
 overvoltage, relation to surface tension and concn. of soln., 3537⁹.
 oxidizing bacteria, 2485¹.
 ozone reactivity in presence of, 1047⁹.
 particles, charge of slow, 2219⁹.
 particles from Al, 2601⁸.
 particles from Al, detn. of ratio charge/mass for, 2601⁴.
 particles from paraffin, scintillation counting of, 3308⁸.
 particles, making visible the tracks of, 2219⁹.
 particles, method for observing, 2601⁸.
 permeability of Fe and Pt to, 3290⁹.
 permeability of Ni to, 2825².
 from platinum hydrosol by action of Hg, 3512⁸.
 polarization of luminescent atoms of, parallel to fading canal-ray light, 532¹.
 positive rays of, Doppler effect in, 3554¹.
 effect of weak magnetic fields on polarization of light from, 3822⁸.
 light emitted by, polarization of, 3556⁷.
 mol. spectrum of, Doppler effect and intensities of lines in, 2420⁴.
 polarization of, 3556⁸.
 scattered absorption on passage through H, 1590⁸.
 scattering of, 2099⁷.
 prepn. in lab., electrolytic cell for, 2849⁴.
 pressure of, in discharge tubes, 3155⁹.
 in producer gas, fuel value of, 2782⁷.
 production statistics, 466⁴.
 purifying, P 466⁸, P 3109¹.
 purifying, for NH₃ synthesis, P 1168⁴.
 purifying, for NH₃ synthesis, etc., P 3427⁷.
 radiation from passage of electricity through, 18¹, 3546⁴.
 rays, absorption and range of, 1404⁵.
 absorption of, detn. of, 2601⁴.
 from Al, 2097⁸.
 audibility of, 1404⁵.
 ionization by, 3308⁸.
 magnetic deflection of, 1755¹.
 measuring, 3544³.
 photographic effect of, 2612⁹.
 reaction (photo- and radiochem.) with Cl, 21¹.
 reaction (photochem. sensitized) with CO, 534¹.
 reactions: CH₄ = C + 2H₂ and CH₄ + 3Fe = Fe₃C + 2H₂, 3334⁷.

- reaction with active N, 209³.
 with Cl, 2413³.
 with Cl, actinic absorption of Cl with respect to, 1504³.
 with Cl, activating radiation for, 3831².
 with Cl and O, 3527⁴.
 with Cl in light, 2434³.
 with Cl in light, catalytic action of walls of reaction vessel in, 2077¹.
 with Cl, light sensitivity of, lecture expt. on, 2203³.
 with Cl, residual effect of actinic absorption of Cl with respect to, 1595².
 with Cu, 217³.
 with halogens, effect of water on, 12³, 2624².
 with FeS in presence of steam, 2624².
 with N, electronic activation of, 3548³.
 with O, catalysis by Au, 3804⁴.
 with O, catalysis with metallic Ag in, 691³.
 with O, catalyzers for, 522⁴.
 with O over Ag catalyst, 1744³.
 with O under influence of Hg arc, 3831².
 with pyrites, 1243².
 with Na azide, 870³.
 with SnO₂ or Fe₂O₃, 1428¹.
 with Sn salts at high temps. and pressures, 3845³.
 reduction of chlorides by, 1307⁵.
 reduction of iron ores with, 1242².
 reflection of at., from ice crystals, 3543³.
 secondary β -rays of, ranges of, 698⁴.
 sepn. from other gases by liquefaction, P 783⁷, P 1320⁸, P 3404⁹.
 sepn. from water gas or other mixts., P 1526⁹.
 soly. and diffusion in metals, 3290⁹.
 soly. of, in cyclohexanol, 1741³.
 effect of salts on, 686⁷.
 in metals and alloys, temp. and, 553³.
 temp. and, 680⁷.
 specific heat of, 1930³.
 half quanta and, 2600¹.
 quantum theory of, 692⁷.
 spectrum of, 207², 359^{2,4}, 360^{2,5}, 530³, 532⁴, 704^{4,5}, 705⁴, 858³, 1061⁴, 1062⁵, 1226⁹, 1759³, 1760³, 2101⁴, 2429⁴, 2845², 2846^{3,5}, 3159⁴, 3542^{4,5}, 3555⁷, 3557¹, 3559⁷, 3829³.
 spectrum of, in stars, 204⁵.
 spectrum of, no. of dispersing electrons for, 2226³.
 Stark effect in, 1059³, 1235², 2839³.
 intensity dissymmetry of, 1750^{1,2}.
 kinematics of, 1406³.
 structure and kinetic phenomenon of, 2422³.
 system: C₂H₂Br-air-, 3301⁴.
 system: Fe-Fe carbide-CH₄-, 1743³.
 system: metal-C-, carbide formation in, 3011³.
 thermal cond. of, 1050³, 2206⁷, 2825³.
 transmutation into He, 357², 1728³, 2422⁴.
 triatomic, 2081².
 two- and 3-electrode systems in, 3545¹.
 vapor pressure of liquid, 1399¹.
 in welding, 1960³.
 Zeeman effect of, 3542³.
Hydrogen, analysis. (See also "combination" under *Analysis*.)
 detn., 1070³.
 detn. by combustion, 27³.
 detn. in air contg. C₂H₄, 3463⁴.
 in air or O, P 722⁴.
 in flue gas, 3120¹.
 in mine damp, 3578³.
 in N, 1072¹.
 in org. material, elec. furnace for, 720³.
 in steam, 873⁷.
Hydrogen arsenide. See *Arsine*.
Hydrogenase, 3913¹.
Hydrogenation. (See also *Reduction*.)
 of acetylene, catalyzers of metallized SiO₂ gels for, 3532¹.
 of acetylene derivs., 2267³.
 of acetylene glycols, 2459³.
 of anthraquinone and its derivs., P 745⁴.
 of aromatic acids and their salts, 235³, 3008³.

 water quality and, 973⁸, 3096⁴.
3-Indyl sulfone[†], and silver deriv., 1459¹.
Inertia, chem., of rare gases, 3290¹.
Infant feeding. See *Diet*; *Metabolism*; *Nutrition*.
Infantile paralysis. See *Poliomyelitis*.
Infections. (See also *Diseases*.)
 chemotherapy of bacterial, 2937².
 insulin treatment of, 3982².
 paratyphoid-enteritidis, microbe virulence and host susceptibility on, 3938⁹.
 spleen as protective organ in, 1840⁸.
 temp. and, 3953⁸.
Inflammability. (See also *Explosions*; *Ignition*.)
 of alkyl halides, 1186⁸.
 of coal dusts, detn. of, 1884⁸.
 of combustible mixts., limits of, 1884⁸.
 of ethyl alc., Et₂O, methylcyclohexane and their mixts., 2190⁴.
 of hydrogen, 1186⁸.
 of hydrogen-air mixts., effect of EtBr on, 323⁸.
 effect of H₂Se on, 3130¹.
 effect of Me₂Se, Me₂Te, SnMe₄ and PbMe₄ on limits of, 4071¹.
 limits of, effect of pressure on, 3463⁸.
 of liquid fuels, 3444⁷.
 of methane-air mixts., effect of CO₂ and CCl₄ on, 3521⁷.
 of methane-air mixts., effect of chlorinated hydrocarbons on limits of, 1550⁸.
Inflammable substances. See *Combustibles*; *Solvents*.
Inflammation. (See also *Ignition*.)
 antiinflammatory effect of drugs, 3086⁸.
 blood vessels in, dependence of reaction on electrolytic content, 269⁸.
 cellular reactions of, cations in, 127⁸.
 hydrogen-ion concn. and, 1842⁸, 2501⁴.
 of meninges and brain, effect on protein content of cerebrospinal fluid, 272⁷.
 pain, removal by alkalization of tissues, 1847¹.
 phys. chemistry of, 2930⁸.
 in vaso-paralysis with phenol, course of acute and chronic, 769¹.
Infrabar, temp. effect on, 8280⁸.
Infra-red light. See *Light, infra-red*.
Infundibulum, pituitrin, diuresis inhibition by, 1681⁸.
Infusoria, culture of, H-ion concn. and, 3090⁷.
 cultures of, viability and occurrence of allelo-catalysis in, 2035⁸.
 effect of metallic Ag on, 3684⁷.
foetingeriideae, reserves in, 1499⁸.
 imitations of, 3372¹.
 reproduction rate of, effect of vol. of culture medium and cell proximity on, 2939⁹.
Infusorial earth. See *Kieselguhr*.
Ins dulcis, cellulose from, 492⁸.
Ingots. See *Molds (I)*; *Steril*.
Inheritance. See *Heredity*.
Ink, P 4079⁸.
 acidity detn. in writing, 657⁸.
 in ancient Egypt, 1209⁸.
 arsenic in printing, 2156⁸, 2747⁸.
 black waterproof drawing, specifications of U. S. Gov. for, 3275⁸.
 for book bindings, P 333⁴.
 book: *Manuf.*, 659⁴.
 color effects with dichroic, P 2194⁸.
 "drying" of printing, 845⁸.
 "drying" of printing, detn. of, 1362⁸.
 emulsified, P 1555⁸.
 grinding app. for printer's, P 3137⁴.
 lignone deriv. condensation products for, P 826⁷.
 mixing machinery, 3472⁸.
 naphthylene dioxide derivs. as, P 2479⁸.
 printing, P 3095⁸.
 removal from paper, 3456⁸, P 3744¹.
 ribbons, P 3110⁴.
 in tissues, distribution of, 1491⁸.
 water-color, P 333⁴.
 writing, P 3137⁸.
 writing with fresh, peculiarities of, 1588⁸.
 yellow, for marking rubber tensile strips, 830¹.
Inorganic chemistry, books: 2624⁸; A Text-book of, 545⁸, 870⁸, 3326⁸. General, 870⁸; A Comprehensive Treatise on, 1024⁸; Gmelin's Handbuch der, 1941⁴, 2233³, 2624⁸; The Properties of Inorg. Substances, 1041⁴; Smith's, 1941⁴; Die anorganischen Grenzgebiete der Biologie, 2002⁸; Cours de, 2625¹; A Junior, 2625¹; Inorg. Chem. Synonyms and Other Useful Chem. Data, 2838⁸; Friend's Textbook of, 2856⁸; Handbuch der, 2856⁸.
 for home economics classes, 26⁸.
Inorganic compounds, additive vols. in, law of, 3289⁸.
 complex, theory of Werner concerning, 2095¹.
 constitution of, detn. by spectrochem. methods, 1932⁸.
 hardness of, 3497².
 heteropoly, crystallography of, 712⁸.
Inorganic salts. See *Salts*.
Inosine, effect on body temp., 1678⁹.
 optical rotation of, 100⁴.
Inosinic acid*, in muscular contraction, 2706⁸.
 optical rotation of, 100⁴.

- amines and N-heterocyclic compds. as, for
Aphis rumicis, 4008⁹.
 analyses of, 622¹.
 analysis and testing of, 148⁹.
 analysis of, 2352⁹, 2353⁹, 4009⁹.
 for *Anuraphis persicae-niger*, *p*-dichloro-
 benzene as, 3250⁹.
 application of, 3248⁹.
 arsenical, P 795¹, P 1326⁴.
 detn. on apple leaves, 1864⁴.
 fruit tree injury with, 2955⁴.
 for boll weevil, 2525⁴.
 for boll weevil, Na fluosilicate vs. Ca arsenate
 as, 794⁴.
 bromo- or chloronaphthalene as, P 3416⁹.
 calcium arsenate, P 2354¹.
 calcium arsenate in, effect on foliage, 1515⁹.
 calcium cyanide as, for greenhouses, 4010⁹.
 calcium phenoxides as, 978⁴.
 for cattle lice, NaF as, 794⁴.
 "cleaning up" habit of insects and, 793⁹.
 for codling moth, 978⁹, 3250⁴, 3415⁷.
 for coffee parasite, 2044⁹.
 constitution of, 2163⁴.
 contact, 4008⁹.
 contg. bromo- or chloronaphthalene, P
 3416⁹.
 contg. ground "cube" root, P 1517¹.
 copper detn. in, in presence of Fe, As and
 Hg, 622¹.
 for cranberry root worm on blueberries,
 Ca(CN)₂ as, 3240⁹.
 from *Derris*, P 622⁹.
p-dichlorobenzene as, 1164⁴.
 dipyrldyls and other org. compds. as contact,
 472⁹.
 dusting, "cloud drift" vs. regular method
 of, 794⁷.
 dusting of As, by airplane, poisoning of
 animals by, 793⁹.
 for earwig, 4010⁷.
 emulsions, P 632⁹.
 fatty acids and their Me esters and Na and
 NH₄ salts as, 4009⁹.
 for flies, Ca(CN)₂ as, 3249⁹.
 in floriculture, 2043⁹.
 fluorides and fluosilicates as, 793⁹.
 fluorides as, 2043⁹.
 fly salt, 3415⁷.
 fungicide-, 3101⁹.
 for gipsy moth, Pb arsenate as, 3250⁷.
 for grape leafhopper and oriental fruit moth,
 3250⁹.
 for grasshoppers, Na fluosilicate as, 794⁴.
 halogenated naphthalene as, P 622⁹.
 for hemlock spanworm, Ca arsenate as,
 3249⁹.
 for internal therapy of plants, 4010⁹.
 lead arsenate action on roots, effect of soil
 microorganisms on paraffin used as coating
 to decrease, 2043⁷.
 loss prevention by, 3701⁴.
 lubricants as, 2955⁹.
 for *Macroductylus subspinosus*, 3250⁹.
 for *Melittia satyriniformis*, 3250⁹.
 mercury-contg., P 473¹, P 3416⁹.
 for *Merodon equestris*, *M. strigatus* and
Rhizoglyphus hyacinthi, 3250⁹.
 mixt. of CCl₄, paraffin oil and C₁₀H₈ as,
 P 795¹.
 for moths, P 158⁹.
 from *Narum oleander*, 2754⁴.
 nicotine as, 2524⁹, 2754⁹, 2957⁹.
 for oriental fruit moth, 3250⁴ A.
 patent literature of, 3415⁹.
 petroleum emulsions as, 3249⁹.
 petroleum emulsions as, for aphids, 3701⁷.
 petroleum, for citrus trees, 4009⁹.
 petroleum, review for 1926, 3724⁹.
 polysulfide, P 1517¹.
 pulverulent, P 980¹.
 removal from fruit, P 1857⁹.
 reviews, 792⁹, 2524⁹.
 for roaches and waterbugs, P 3110⁹.
 for soil of potted plants infested with Japanese
 beetle, 621⁹.
 solignum, crude oil, kerosene and gasoline
 as, 2754⁴.
 spreading properties of, improving, P 149⁹.
 for sugar beet nematodes, P 979⁹.
 for sugar cane, 2074⁹.
 for sugar cane borer, 979⁹.
 from sulfonated fatty oil, P 473¹.
 sulfur compn. for prep., P 795⁹.
 tar-distillate, 3415⁹.
 for tea shot-hole borer, fertilizing and, 4010⁹.
 thallium as, 792⁴.
 tobacco dust as, 2525⁴.
 tobacco dust, increasing nicotine evolution
 from, 3250¹.
 vaporizing app. for, P 344¹.
 for weevils, 3702⁹.
 for white louse, 2526¹.
Insectifuges, for foods, P 1318⁷.
Insect lime, P 1865⁹.
Insects, arsenic detn. in tissues, app. for, 2004¹.
 blood sugar of, 3090⁹.
 "cleaning up" habit of, insect control and,
 793⁴.
 colors in, 2217⁹.
 glutathione distribution in, detn. of, 1499⁹.
 losses from, and their prevention, 3701⁹.
 metamorphosis of, 2039⁹.
 penetration of contact oil spray into breathing
 system of, 3416⁴.
 pleochroitic fat fibers on needles used in
 piercing, 923¹.
 proofing cellulosic and other materials
 against, P 656¹.
 repelling compn. for trees and plants, P 295⁹.
 respiration of, arsenicals and, 770⁹.
 revival after fumigation, 3249⁹.
 sensitivity to moisture, temp., light and
 odors, 3235⁹.
 skin skeleton of, 2337⁹, 3394⁴.
 winter hardiness of, water-binding capacity
 of colloids as factor in, 2236⁹.
Instruments, precision, machines for making,
 2202⁹.
Insulation, elec., glass for, P 2946⁹.
 elec., resistance of cables, kenotron study of,
 22⁹.
 thermal, of ceramic kilns, 1875¹.
Insulators, P 3995⁹.
 from corstalks, etc., P 1693⁴.
 elec.—see also *Dielectrics*; *Porcelain*; *Var-*
nish.
 elec., 3995⁹, (*Patents*.) 144⁹ A, 292⁹, 306⁴,
 617⁹, 2158⁹, 2517⁹, 2946⁹ A, 3241⁴,
 3432⁹, 3693⁹, 3726⁴.
 for accumulators, P 861⁴.
 bituminous compn. for, P 3455⁹.
 bituminous, explosion of fumes from, 3463⁴.
 breakdown voltage of, testing app. for,
 1⁴.
 cable, P 292⁷.
 of 'carbolic, 1692⁴.
 casein compn. for, P 2539⁴.

- from cellulose fiber, P 3743⁴.
 ceramic, P 2543⁴, P 3723⁴.
 ceramic material for, P 2543⁴.
 condensation products from CH_3O and
 urea for manuf. of, P 479⁴.
 for conductors, P 2852⁴.
 dielec. breakdown due to gas films, 3836⁷.
 dielec. loss and dielec. consts. of, de-
 pendence on frequency, 3824⁴.
 dielec. puncture under oil, 3836⁴.
 drying oil for, P 1003⁴.
 effect of high-voltage cathode rays on,
 1056⁴.
 elec. breakdown of, 860⁴.
 furfural resins as material for, 659⁴.
 glass for, P 3091⁴, P 2542⁷.
 Glyptal and Mycalex, 1858¹.
 gutta-percha, 1897⁷.
 impact testing of, 1158⁴.
 impregnated paper for, P 1505⁷.
 liquid, P 1705¹.
 machinable compn., P 4036⁴.
 materials for, comm. rept. on, 1319⁴.
 of mica, 860⁴, P 1336⁴.
 molded, 3241⁴, P 3404², P 3465².
 oil-resin mixts., corrosion of metals by,
 317¹.
 oils, P 2793⁷, 3125⁴.
 oils, regeneration of, 2792¹.
 paper, P 467⁴, P 3096⁴, P 4070¹.
 paper, confg. phenol resins, P 2385⁴.
 paper, mech. properties of, 2946⁴.
 porcelain, absorption test of, 2541⁴.
 porcelain, cement for, P 3439⁴.
 porous clay, P 2947¹.
 pottery for, P 2543⁴.
 power factor and dielec. const. of sheet,
 electrode effects in measurement of,
 208⁴.
 Pyrex glass and porcelain, temp. in sun-
 light, 162⁷.
 from reaction product of rubber and
 HNO_3 , P 341⁴.
 from resinous compns., P 2390⁷.
 rubber as, 1567⁴, 3767⁴.
 rubber compns. for, P 2576², P 3141⁷.
 rubber for, 2818⁴.
 rubber, on cable, specifications of
 V. D. E. for, 2818⁴.
 rubber, on wire, P 512⁴.
 rubber, on wire, cable, and tape, speci-
 fications of A. S. T. M. for, 1158⁴.
 for spark plugs, etc., P 3096⁴.
 submarine, esp. of rubber, 1372⁴.
 surface tension of liquid, in elec. field,
 3404⁴.
 tester, 466⁴.
 testing, methods of A. S. T. M. for,
 1158⁴.
 tests of, 3404⁴.
 textile, coating with rubber, P 512⁴.
 uniting glass and metal parts of, P 108⁷.
 varnish—see *Varnish*.
 voltage distribution over, 3404⁴.
 waxes, resins and bitumens, effect of
 moisture on elec. properties of, 1158⁴.
 of wood and silicic acid, P 1169⁴.
 thermal, P 292⁴, P 467⁴, P 617⁷, P 1321¹,
 2038⁷, P 2517⁴, 3403⁴, P 3404⁴, P
 3726⁴, P 899⁴.

 effect of ligation of blood vessels on, 956².
 seasonal variation in quantity of, 1132¹.
 pancreatotomy treatment with, 1831², 2506².
 in pancreatic venous blood after excitation of vagus, 1481².
 after glucemia from injection of glucose, 1480².
 after injection of *d*-glucose or adrenaline, 1849^{2,7}.
 peroral preps. of, clinical tests of, 132².
 prepn. contg., P 3425².
 prepn. of, 2481², 3252².
 preps., titration of, 475².
 protection against enzymes by saponin, 2327².
 purification and properties of, 3065².
 quant. and optimum effects of, 2312².
 reciprocal effects of thyroid and, 1309².
 resistance, fermentative mechanism in, 3084².
 respiration in poisoning by, effect of low exterior temp. on, 274².
 review, 749².
 secretion of, stimulation by glucose, 3076², 3041², 3042².
 sensibility of hypophysectomized dogs to action of, 3073².
 shock, 764².
 skin regeneration with, 1847⁴.
 specificity of, 3373².
 standardization of, use of albino rat in, 2518¹.
 substance A of, 3681², 3682¹.
 substance A of, use in diabetic patients with cardiac lesions, 3975¹.
 sulfur compds. of, 1131².
 in surgery, 2507².
 susceptibility to, effect of pancreatotomy and of subsequent thyroidectomy on, 2499².
 syndrome, 958².
 therapy in diseases other than diabetes, 2738⁷.
 in tissue normally and in cancer, 268⁴.
 in treatment of malnourished children, 119².
 in treatment of nondiabetic conditions of infancy and childhood, 3982².
 treatment of undernutrition in nondiabetic subjects, 3976².
 ultra-violet light effect on, 1662⁷.
Insulinemia, humoral and electrocardiographic modifications in reactive dog after transfusion of venous pancreatic blood of donor rendered hyperinsulinemic, 2728².
 physiologic, 1484².
Insulinoids, 2909².
 in malignant tumors, 2732², 3954².
Intarvin, as fat substitute for diabetics, 1479¹.
 in infant feeding, 2723¹.
Interfaces, displacement of equil. at, 2834².
 electrification at, 350^{2,2}.
 mol. orientation at, 677².
 phenomena on, between 2 faces, 2596².
 phys. phenomena at, 350².
 reactions at, 3798².
 of systems including electrolytes, equil. at, 1048².
 types of, 350².
Interfacial activity, of capillary active substance at boundary of 2 phases, 3509².
Interfacial forces, in dispersed systems, 845².
Interfacial tension. (See also *Surface tension*.)
 bacterial growth and, 3921².
 of drops, effect of plastic films on, 3292¹.
 effect on oil drop division, 2139².
 between immiscible liquids, 3147².
 of mixts. of iso-AmOH and H₂O, 2207².
 between oil and water, 1391^{2,2}, 3763².
Interferometer, liquid, 1749².
Interferometry, studying the course of reactions by, 2413².
Intermediates, acid sulfuric acid ester compds. of aromatic hydroxyalkyl ethers, P 4077².
 o-aminohydrocinnamates as dye, P 916².
 o-(4-amino-3-nitrobenzoyl)benzoic acid and derivs. as dye, P 746².
 aminotriarylmethanes, P 3133⁴.
 aralkylamines and derivs. as, P 987².
 aryldes of 3-hydroxy-2-naphthoic acid as dye, P 740².
 for azo dyes, P 826², P 2192², P 3468².
 benzanthrone derivs. as dye, P 745².
 from cyanuric halide and amino compds., P 2193¹.
 diaminobenzanthrone, P 2563².
 industry in U. S. in past decade, 497⁴.
 manuf. at Cengio, 497².
 manuf. of, 2561¹.
 patentability of, 782⁷.
 pyrazolone, P 2563².
International Bureau of Physical-Chemical Standards, methods and app. of, 1038².
Interaction, 1041², 2085¹.
Intestinal contents. (See also *Duodenal contents*.)
 hydrogen-ion concn. of, and its effect on absorption of fats, 126².
 regurgitation into stomach during fractional withdrawal, 124⁴.
Intestinal extract, effect on vagus substance, 1143².
Intestinal juice, enzymic actions of, 2277².
 secretion of, effect of histamine on, 1846².
Intestinal obstruction, chloride content of tissues after, 3392².
 death from, 2024².

- sodium chloride effect on, 2730⁸.
 surface tension of blood after, 3392¹.
 viscosity of blood after, 3391⁹.
Intestines. (See also *Colon; Digestive tract; Duodenum; Intoxication.*)
 absorption of antigenic protein by, cutaneous hypersensitivity from, 449⁴.
 of antigenic protein by infants, 449⁵.
 of bile pigment from, 765⁴.
 of calcium from, 2333⁹.
 of mixt. of glucose and galactose from, 950⁸.
 of sugar by, effect of saponin on, 449³.
 adrenaline effect on, 3974⁴.
 ameba of, effect of yatren on, 2935¹.
 antirachitic vitamin effect on P, Ca and H-ion concn. of, 3387³.
 atropine action on, 134³.
 bacteria of, effect of diets of starch, dextrin, sucrose, maltose or lactose on, 1478⁴.
 identification of pathogenic, 3645⁴.
 regulation by bile, 3662⁹.
 return from paracolon mutable to colon, 1136¹.
 carcinoma of, tests for, 1146⁷.
 chloride effect on, 2730⁸.
 contractions, effect of ephedrine on, 3977⁷.
 cysteine effect on, 279⁸.
 diffusion of carbonate ions in small, effect of EtOH on, 602⁷.
 diseases of, duodenal juice secretion in, 2736¹.
 disinfection against *B. coli*, 2734¹.
 effect of alcs. and aldehydes on, 454⁸.
 enzymes of, in parathyroidectomized dogs, 1823⁹.
 enzymes of, in scurvy, 1834¹.
 erepsin, dipeptide cleavage by, 747⁷.
 fat absorption in, effect of H-ion concn. of intestinal contents on, 126².
 fat digestion in, relation between amino acids and bile acids in, 2309⁶.
 fatty acids of, effect on absorption and excretion of Ca and P, 1843¹.
 fermentation in, effect on uric acid excretion, 129¹.
 gas bacillus cultures and, 2713⁹.
 glycogen and, in angiotomized dogs, 1142⁷.
 glycogen formation and, 2310⁷.
 heart poisons and, 1496³.
 of hematozoa, crystn. of hemoglobin in, 2275⁸.
 lactic acid bacteria growth in, compn. for promoting, P 2533⁹.
 lipases of, synthetic action of, 2485⁸.
 lobeline effect on, 2334⁹.
 loops of Thiry-Vella fistula dogs, glucose and salt solns. recovered from, 3945¹.
 magnesium sulfate effect on small, 2934¹.
 morphine effect on, 1498⁹.
 motility in beriberi and scurvy, 2501⁷.
 mucous membranes of small, nervous chemoreceptors in, 2313⁹.
 muscles of, effect of pituitary exts. on, 138⁸.
 nerves of, effect of digitalis and of strophanthin on, 1850⁸.
 effect of nicotine on, 1850⁸.
 effect of yohimbine on, 1850⁸.
 ozone effect on, 3086⁸.
 peptidases of, specificity of, 2910⁸.
 perfusion of, enzymic activity of Ringer soln. after, 3222¹.
 peristaltic activity of, effect of hypophysis substance on, 1486¹.
 pituitary ext. effect on, 1498⁷.
 putrefaction products of, behavior in body, 2028⁴.
 small, relation to gastric secretion, 2303⁷.
 tonus and motility of, effect of psyche on, 2313⁹.
 tonus and rhythmic movements of, effect of barbituric acid, of benzyl derivs. and of H-ion concn. of fluids on, 461⁴.
 urea-splitting bacterium in human, 3924⁷.
 vegetative nervous system poisons and, 1845⁹.
 yeast in, of *Galleria melonella*, 1288⁸.
Intoxicants, pharmacol. action of, 962⁷.
Intoxication. (See also *Acidosis; Poisoning; Toxemia.*)
 acid, effect on inorg. cations in blood serum, 445⁴.
 alimentary, insulin treatment of, 3982³.
 meat (chronic), 3678⁷.
 in pregnancy, blood serum lipase in relation to, 1146³.
 protein, 2495⁹.
Intraocular pressure, lowering, drug for, 610⁷.
Inulin, 3144⁸.
 avitaminosis B and, 3074³.
 combustibility of, 949⁹.
 detection of, 1077⁴.
 fermentation by streptococcus-pneumococcus group, 2288⁴.
 fructose from, P 1027^{1,2,3}.
 and hexaacetate, 2881⁴.
 hydrolysis of, P 1026³.
 manuf. of, P 1026³.
 triacetate, cryoscopy of, 2881⁴.
Invar, constitution of, 558⁷.
Invention, as link in scientific and economic progress, 3288⁹.
Inversion. See *Optical rotation; Sucrose; Walden inversion.*
Invertase, activity of, detn. of, 3923⁷.
 adsorption of, 1464⁹.
 affinities of gluco- and fructo-sucrase, 1819⁷.
 in black mustard, 1666³.
 in chicken gizzard and crop, 108⁸.
 compds. with inactivating substances, 100³.
 deficiency in parathyroidectomized dogs, 1823⁷.
 detn. of, 1473⁴.
 hydrolysis constn. of sucrose and raffinose, 1892⁴.
 hydrolysis of sucrose by, 919^{3,4}, 3376³.
 in pitcher liquor of Sarraceniacae, 2917².
 in potassium-starved plants, 1487⁷.
 regeneration of, from certain carriers, 2705³.
 specificity of, 2278¹.
 in sugar factory waste-waters, 3480¹.
Invertin. See *Invertase.*
Invert sugar. See *Sugar, invert.*
Iodate ion, reaction with iodide ion and with sulfite ion, 1742⁹.
Iodates, detn. of, 3639⁹.
 detn. of, in presence of iodides, nitrates, nitrites and chlorides, 3577¹.
Iodic acid, detection and sepn. of, 2413¹.
 oxidation of oxalic acid by, 366⁹, 390⁷.
 oxidizing action of, 1215¹.
Iodide ion, effect on tadpoles, 2280⁷.
 equil. with Fe ions, 2414⁸.
 mobility of, 1397⁴.
 reaction with iodate ion, 1742⁹.
 with persulfate ion, catalysis of, 2593⁸.
 with persulfate ion, neutral salt effect in, 3622⁹.

- transference of electrons from, to Fe ions, 2415¹.
- Iodides.** (See also *Halides.*)
- analysis of, 3710¹.
- crystals from solns. of Na₂SO₄ and, compn. of, 3326¹.

 specifications of A.S.T.M. for, 1157⁹
 $\text{FeO}(\text{OH})$, colloidal, coagulation of, 846⁷
 $\text{Fe}(\text{OH})_2$, crystal structure of, 3146⁷
 oxidation with air, effect of alkali on,
 1744⁷.
 as reducing agent for vat dyes, 497⁹.
- $\text{Fe}(\text{OH})_3$, adsorption of acids, alkali and
 salts by, 2827⁸.
 adsorption of arsenious acid by, 2584⁷.
 catalysis of decompn. of H_2O_2 by, in-
 activation of, 2088⁶.
 catalysts with MgO and with ZnO for
 manuf. of McOH , P 250¹.
 characterization by magnetic properties,
 520⁶.
 colloidal, adsorption by ppts. of same
 material, 1388⁹.
 colloidal, adsorption of ions from mixts.
 of electrolytes by, 1736⁹.
 colloidal, adsorption of vapors by, 2585⁹.
 colloidal, coagulation by electrolytes with
 multivalent ions, 2 zones of instability
 in, 1577⁷.
 colloidal, coagulation of dispersoid, effect
 of alcs. on, 3516⁹.
 colloidal dialyzed, prepn. of, 1521⁶.
 colloidal, flocculation by org. anions,
 685¹.
 colloidal, pptn. rate on addn. of electro-
 lytes, 684¹.
- colloidal, viscosity and elec. cond. of,
 effect of aging on, 3514⁹.
 magnetic behavior of, effect of H_2O_2 on,
 2597⁸.
 vapor pressure of, 722⁹.
- Iron iodide** (FeI_2), cod-liver oil contg., 3704¹.
 reaction with I, effect of alternating colors
 on, 2104¹.
 sirup of, 4021¹, 4025⁴.
- Iron ions**, as catalysts in H_2O_2 decompn.,
 3532².
 equil. with iodide ions, 2114¹.
 magnetic moment of, 1921⁴.
 as oxidation catalysts, 1215¹.
 transference of electrons from iodide ions to,
 2415⁶.
- Iron lactophosphate**, sirup of calcium lacto-
 phosphate and, 4021¹.
- Iron manganicyanide**, 1769⁹.
- Iron nitrates**, $\text{Fe}(\text{NO}_3)_3$, magnetic rotation of
 solus. of, 2223³.
 $\text{Fe}(\text{NO}_3)_3$, system: $\text{Al}(\text{NO}_3)_3\text{-H}_2\text{O}$ -, 3150².
- Iron nitroprussiate**, 1769⁹.
- Iron nitrosulfides**, constitution and spectra
 of, 1108⁷ *.
- Iron ores**. (See also *Hematite*; *Iron, metal-*
lurgy of; *Pyrite*.)
 beneficiation of, 883⁹.
 for blast-furnace operation in Italy, 4054⁸.
 briquetting concentrates, P 3039⁹.
 of British Columbia and Yukon, 1239².
 as catalysts in decompn. of CO , 1243⁷.
 of Clifton formation in Birmingham dist.,
 Ala., 879⁴.
 constitution of brown, lake and pea, 3801^{3,4}.
 copper-, selective flotation of, 881⁶, 1241⁹.
 detn. of Fe and Fe oxides in, 1424⁴.
 flotation of, P 2455², P 3039⁹.
 flotation of, effect of $\text{Na}_2\text{Cr}_2\text{O}_7$ in, 3034⁷.
 flotation of sulfide, 3177⁷.
 of India, Chhota Udepur State, 1240⁷.
 from India (Mysore State), 879⁴.
 of Iron Mt. and Pilot Knob, 1784².
 of Italy, 3585¹.
 lime skarn, genesis of, 548⁸.
 in Mambulao, P. I., 1948⁸.
 manganiferous, 3032⁹.
 dressing of, 1950⁹.
 of Lake Superior region, reserves of, 1612⁹.
 of Minnesota in relation to iron and steel
 industry, 1612⁹.
 sepn. of, 1950⁷.
 utilization of, 1429⁸.
 mineralogical nature of Sieglund spathic, rela-
 tion to behavior on roasting, 3588¹.
 minerals in Alabama low-grade red, libera-
 tion after grinding, 550⁹.
 minerals of oolites of France, 3033⁸.
 of Norberg, 3861².
 production and resources in England, France
 and Germany, 2637⁹.
 purple, evaluation of, 883¹.
 resources of U. S. in 1925, 1079⁹.
 of Salzgiitter Range, concn. tests on, 1427⁸.
 sedimentary deposits, genesis of, 1239¹.
 sinter for blast-furnace burdens, 1613⁹.
 sintering app. for treating slimy, P 3884⁹.
 sintering with coal from producer ashes, 1341⁸.
 sinters, magnetite crystals in, 3860³.
 vanadium content of titaniferous, of S.
 Australia, 216⁹.
 vanadium recovery from titaniferous, 1613⁹.
 zinc, concn. of, 725⁷.

- Iron oxalate**, hydrated vs. anhyd., 2359¹.
soly. and elec. cond. of, 3322².
- Iron oxides**, active, optimum dosage for influencing metabolism, 3969⁹.
Bequerel effect in, 2098¹.
as catalysts for NH_3 synthesis, effect of O on, 691².
in catalytic oxidation of NH_3 , 13¹.
as catalysts in decompn. of CO , 1243⁷.
coating of, structure of, 1729⁴.
colloidal, heat of reaction with hydroxides, 4002⁸.
colloidal, radiothorium-contg. and Ra-contg., emanating power of, 2586⁴.
colloidal, with small pores, P 2965¹.
colloid prepn. from silicic acid hydrosol and ignited, 3006².
coloring properties in ceramic ware, effect of ZnO on, 1875⁸.
from copperas, P 3717⁴.
crystal structure of, hysteresis measurements for study of, 853².
detn. in iron ore, 1424⁴.
effect on avitaminosis, 2018⁴.
effect on silica inversion, 1876¹.
formation of, 1743².
heat of reaction with Mg and Al, 3572².
manuf. of, P 3107⁴.
in open-hearth slags, 3332².
purifying scale, P 2538⁸.
in soil, dynamics of, 4004².
specifications of A.S.T.M. for, 1157⁹.
 FeO , detn. in rocks, 716².
silica melts of, immiscibility of, 1240².
system: MgO-SiO_2 , 1241¹.
 Fe_2O_3 , calcination of, 2837⁹.
magnetizability of roasted products of magnetite in relation to content of, 3865¹.
positive ionization from, 856².
system: Fe -, temps. of magnetic transformations in, 1218².
 Fe_2O_3 , adsorption of sulfate ion and oxalate ion by, effect of H-ion concn. on, 3785⁴.
adsorption on fibers from aq. suspensions of, 518².
causticization and decompn. of Na_2CO_3 by, 1524².
characterization by magnetic properties, 526².
colloidal, adsorption by charcoal, 3509².
colloidal and semi-colloidal, effect on gelatin solns., 2588⁴.
colloidal, double refraction of, 10².
colloidal, effect of gelatin on, 684¹.
colloidal, effect on gelatin soln. in water, 3515².
colloidal, electrochem. equivs. of, 3516².
colloidal, in soils, soil moisture for plants and, 2753¹.
colloidal, lability in, 2410⁷.
colloidal, particle size detn. in, 2829⁴.
colloidal, Röntgen studies of, 3549¹.
colloidal, viscosity of, effect of H-ion concn. on, 10⁴.
colloid ions of, rate of migration in elec. field, detn. of, 2588².
crystals, x-ray diffraction of, 2971².
detn. in fluorspar, 720¹.
detn. in lime, 1530².
effect on carbonization of coal, 3121².
effect on quartz conversion in silica brick manuf., 1171².
effect on urinary C:N quotient, 457¹.
feeding active, effect on metabolism, 3655².
in gas mains and meters, 2373².
hydrated, reaction with HCN , 2085⁴.
hydrates of, constitution of, 3801¹.
Liesegang rings in, of silicified rhyolite tuffs, 880².
magnetic, 1921².
magnetic characteristics of, 696².
manuf. of, P 305⁷, P 1336², P 2363².
precipitation by electrolytes, effect of "ageing" on, 683².
reactions with CaO or MgO , 3323⁷.
reaction with H_2 , 1428¹.
reduction by C_2H_4 , 3011².
sepn. of Au from, 717⁷.
system: arsenic acid- H_2O -, 3528².
system: $\text{FeCl}_3\text{-FeOCl}$ -, 3572².
thermal decompn. of Na_2CO_3 in presence of, 2535¹.
thermal properties of, 3533².
- Iron oxychloride**, system: $\text{Fe}_2\text{Cl}_6\text{-Fe}_2\text{O}_3$ -, 3572².
- Iron phosphate**, changes during storage, 156².
coating iron and steel with, to prevent corrosion, P 3179².
as fertilizer for regions with Fe-starvation, 3246².
solid solns. of water and O in, 2832².
- Iron potassium silicate**, 3843².
- Iron potassium sulfate**, solid solns. with potassium zinc sulfate, soly. of, 3502².
- Iron preparations**, analysis of, 155⁴, 1165², 2529².
effect on Fe excretion in bile, 128².
pills, 1521², 1690².
for subcutaneous use, assay of, 153².
- Iron pyrites**. See *Pyrite*.
- Iron salts**, adsorption by MnO_2 , 2409⁷.
catalytic oxidation with, 1914².
detn. of ferric, 1604².
effect on coagulation of blood, 2142².
effect on photochem. oxidation of benzidine in presence of eosin, 1409².
energies of reaction of, 2102².
ferrous malate, biochem. oxidation of, 927¹.
hematin and, effect on leather and fabric, 3484².
infra-red absorption of, in solns. and in glasses, 1758².
leaching solns. of, regenerating, P 995².
light effect on ferrous-ferric: iodine-iodide equil., 1933².
magnetic susceptibility of, 1921².
oxidizing, P 160².
pharmacol. action of double and complex, 3959².
reaction with I, 2443².
vitamin requirements of bacteria and, 2009².
- Iron selenide**, crystal structure of, 2100⁷.
- Iron silicates**, book: Über die Natur und Bildungswiese der marinen, insbesondere der chamositischen Substanzen, 2243⁴.
- Iron silicides**, phase diagram, 2643⁷.
- Iron sucrate**, diffusion in solns. of, 1579².
manuf. of, 2532¹.
- Iron sulfates**, dielec. consts. of, 696⁴.
removal from salt crystals, P 994².
 FeSO_4 , acidity of solns. of, detn. of, 715².
catalysis of hydroxylamine with, 1914².
dried, 1521².
heptahydrate, crystal structure of, 1384⁴.

Isobenzophenoxazine,

5- γ -Isobenzophenoxazine, 5-(acetyl-
imino)-9-diethylamino-, -HCl, 744¹.

—, 9-diethylamino-5-imino-, 744¹.

—, 9-diethylamino-5-phenylimino-,
-HCl, 744¹.

—, 9-dimethylamino-5-imino-, -HCl,
743⁹.

9- γ -Isobenzophenoxazine, 5-acetamido-9-
methylimino-, methochloride, 743⁹.

—, 5-anilino-9-methylimino-, metho-
chloride, 743⁹.

—, 9-(ethylimino)-, ethochloride, 744¹.

—, 9-methylimino-, methochloride, 743⁹.

10- α -Isobenzophenoxazine, 5-acetamido-
10-(ethylimino)-, ethochloride, 744¹.

—, 5-acetamido-10-methylimino-,
methochloride, 743⁹.

—, 10-(ethylimino)-, ethochloride, 744¹.

—, 10-methylimino-, methochloride, 743⁹.

5- γ -Isobenzophenoxazin-5-one, 9-diethyl-
amino-, 744¹.

—, 9-dimethylamino-, 743⁹.

Isoborneol (4-camphanol).

camphor from, P 249⁸.

esters, P 1128¹, 2890^{8,9}, P 3058^{8,9}.

l-, and esters, configuration and phys. consts.
of, 2681⁸, 2682^{1,8}.

manuf. of, P 3058⁷.

optical rotation of, and esters, 80⁴.

Isoborneolcarboxamide*, 401⁸.

Isoborneolcarboxylic acid*, and derivs.,
401^{8,9}.

Isoborneolcarboxylonitrile*, 401⁸.

Isobornyl bromide*, 2890⁸.

Isobutane. See *Propane*, 2-methyl-.

Isobutyl alcohol, adsorption by Fe(OH)₃ gel,
2585⁸.

conductance and reaction velocity measure-
ments in, 520⁷.

dielec. const. and absorption of, 14³.

reaction with PhN₂Cl, velocity of, 572⁸.

spontaneous ignition temp. of, effect of anti-
knock compds. on, 323⁹.

Isobutylamine, infra-red absorption by, 2659⁹.
salts, cond. in acetate, 1397².

—, *N,N*-dimethyl-, and picrate, 2660⁷.

—, β -(ethoxymethyl)- α -methyl-, 3347³.

Isobutyl carbonate, phys. consts. of, 1729².

Isobutyl chloride. See *Propane*, 1-chloro-2-
methyl-.

Isobutylene. See *Propene*, 2-methyl-.

Isobutyl hydrogen sulfate. See *Isobutyl*-
sulfuric acid.

Isobutyl nitrite, hydrogenation by oxide
catalysts, 3530⁹.

Isobutylsulfuric acid, and salts, 53².

Isobutyraldehyde, acetal formation with,
3883⁹.

Isobutyramide, α -benzamido-*N*-methyl-,
1813⁸.

—, α -bromo-*N*-ethyl-, 1446¹.

—, α -chloro-*N*-ethyl-, 1446².

—, *N,N*-diethyl- α -hydroxy- β,β' -
diphenyl-, 2888⁸.

—, *N*-ethyl-, 1446¹.

—, *N*-triphenylmethylimino-†, 1455⁸.

Isobutyranilide, α -hydroxy-, acetate, 3611⁷.

Isobutyric acid, esters, 1117^{2,3,8}.

ethyl ester, as catalyst in prepn. of SO₂Cl₂,
55⁷.

methyl ester, mol. vol. at abs. zero, 3496³.

methyl ester, orthobaric d. of, 3782¹.

and sodium salt, effect on fermentation,
3066⁹.

solns., d. and n_D of, 3008¹.

triphenylmethylhydrazide, 145⁸.

—, α -(α -bromoisocaproylamino)-, 1966¹.

—, β,β' -dihydroxy-(?), salts, 896⁷.

—, β,β' -diphenyl-, *p*-tolyl ester, 1117⁷.

—, α -hydroxy-, boron compd., resolution
of, and salts, 3598⁸, 3599¹.

ethyl ester, P 3057⁸.

and sodium salt, effect on fermentation,
3066⁹.

Isobutyrimidyl chloride, α -chloro-*N*-ethyl-,
1440².

—, α -chloro-*N*-phenyl-, 2875⁸.

Isobutyronitrile, α -(ethylamino)-, -HCl,
1795³.

—, α -(*p*-hydroxyanilino)-, 1449⁸.

acetate, 1794³.

—, α -methylamino-, and -HCl, 1795².

Isobutyrophenone, semicarbazone, 229⁸.

—, 5-chloro- α ,2-dihydroxy-, and derivs.,
1117².

—, 5-chloro-2-hydroxy-, 1117².

—, α -hydroxy-, and derivs., 3611⁷.

—, α -hydroxy-2,5-dimethyl-, and derivs.,
3611^{7,8}.

—, 2-hydroxy-3,5-dimethyl-, and acce-
tate, 1117⁸.

—, 4-hydroxy-5-isopropyl-2-methyl-,
and oxime, 1974⁸.

—, 2-hydroxy-3-methyl-, and acetate,
1117⁸.

—, 2-hydroxy-5-methyl-, derivs., 1117⁸.

—, 4-hydroxy-3-methyl-, 1117⁸.

Isobutyryl chloride, prepn. of, 3043⁸.

—, α -hydroxy-, acetate, constitution of,
3611⁷.

Isocadinene, 577⁸.

Isocaproamide, α -acetamido-, 61⁸.

—, α -amino-*N*-ethyl-, and salts, 1657⁹.

—, α -amino-*N*-methyl-, and picrate,
1657⁸.

—, α -amino-*N*-phenethyl-, and -HCl,
1657⁸, 1658¹.

—, α -bromo-*N*-ethyl-, 1657⁸.

—, α -bromo-*N*-methyl-, 1657⁸.

—, α -bromo-*N*-phenethyl-, 1657⁸.

—, α -butylamino-*N*-ethyl-, and salts,
1657⁹.

—, α -diethylamino-*N*-ethyl-, 1657⁹.

—, α -disocamylamino-*N*-ethyl-, 1657⁹.

—, α -dimethyl-, 1796⁷.

—, *N*-ethyl- α -ethylamino-, and -HCl,
1657⁹.

—, *N*-ethyl- α -heptylamino-, 1657⁹.

—, *N*-ethyl- α -isocamylamino-, and -HCl,
1657⁹.

—, *N*-ethyl- α -isohexylamino-, and
-HCl, 1657⁹.

- , *N*-ethyl- α -methylamino-, and salts, 1657⁹.
 —, *N*-ethyl- α -nonylamino-, 1657⁹.
 —, *N*-ethyl- α -propylamino-, and salts, 1657⁹.
 —, γ -formyl- β -phenyl- \dagger , 3044⁴.
 —, α,α' -iminobis[*N*-ethyl-, -HCl, 1657⁹.
 —, *N*-phenethyl- α -phenethylamino-, -HCl, 1658¹.

Isocaproic acid (γ -methylglutaric acid).

- , α -amino-. See *Leucine*.
 —, α,ϵ -diamino-. See *Lysine*.
 —, γ - (dihydroxymethyl)- α -ethyl- β -phenyl- \dagger , lactone, 3044⁴.
 —, γ - (dihydroxymethyl)- α -methyl- β -phenyl- \dagger , lactone, and its acetate, 3044⁴.
 —, γ -(dihydroxymethyl)- β -phenyl- \dagger , lactone, acetate, 3044⁴.
 —, α,α -dimethyl-, 1796⁷.
 —, α -ethyl- γ -formyl- β -phenyl- \dagger , oxime, 3044⁴.
 —, γ -formyl- α -methyl- β -phenyl- \dagger , derivs., 3044⁴.
 —, γ -formyl- β -phenyl- \dagger , and derivs., 3044⁴.
 —, γ - (hydroxymethoxymethyl)- β -phenyl- \dagger , lactone, 3044⁴.
 —, α -(β -hydroxypropyl)-, γ -lactone, 1097¹.
 —, α -methyl-, resolution of, 54⁸.

Isocaproitrile, α -chloro-, reaction with EtMgBr, 2271³.

Isocaprophenone, α -phenyl-, 567⁴.
 —, 2,4,6-trihydroxy-. See *Phloroisocaprophenone*.

Isocaproyl chloride, α,α -dimethyl-, 1796⁷.
Isocarbazole,

- 4a - Isocarbazol - 4a - ol, 1,2,3,4-tetrahydro-6-methyl-, and acetate, 91⁶.
 8a - Isocarbazol - 8a - ol, 5,6,7,8-tetrahydro-3-methyl-, acetate, 91⁶.

Isocaryophyllene alcohol, reaction with CrO₂, 237⁴.

Isocellulose*, 3456².

Isochlorhydria, alkali reserve of blood in, 3953⁶.

3-Isochromanone, 6,7-methylenedioxy- \dagger , 1276⁴.

Isochromats, Röntgen-ray, of Cu, 2099⁹

Isocilicic acid, 1992⁴.

Isocitronellal, in oil of lavender, 985²

Isocoproporphyrin, synthesis of, and derivs., 1041².

Isocorybulbine, constitution of, and derivs., 1963⁵.

synthesis of, 1125⁹.

—, ethoxy-*, derivs., 1963⁵.

—, ethoxy-des-*N*-methyl-*, chloroaurate, 1063⁵.

Isocotoin, constitution of, 2256⁷.

Isocoumarone. See *Isobenzofuran*.

Isocresol (2 - methoxy - 5 - methylphenol).

—, 3,4-dinitro-, and sodium deriv., 3807⁴.

—, 4-nitro-, 3807⁴.

Isocrotonic acid. (See also *Crotonic acid*.)

—, γ -phenyl-, reaction with I, 2259⁷.

Isocrotonyl aside, rearrangement of, 3900⁶.

Isocyanates, 1832⁹, 2130⁷.

Isocyanic acid, esters, 1120⁷.

methyl ester, condensations of, in presence of PEts, 2132⁷.

methyl ester, polymerization of, in presence of PEts, 1632⁹.

phenyl ester, diethylhydrazone, 570⁴.

phenyl ester, reaction with isatic acid, 587².

Isocytosine, disocn. const. of, 97⁴.

Isodecylenic acid*, and methyl ester, 3350¹.

Isodecylenic alcohol*, 3350¹.

Isodehydrongaiene dioxide*, 2264⁴.

Isodialuric acid (1,6 - dihydro-6-hydroxy-

2(3),4,5 pyrimidinetrione).

and derivs., 1447⁵.

—, 1,3-dimethyl-, phenylhydrazone, 1447⁵.

Isodibenzanthrone*, P 655².

Isodibenzophenoxazine,

5 — $\gamma\gamma'$

5 — $\alpha\alpha'$

5 - Iso- α,α' -dibenzophenoxazine, 5 - (acetyl-
imino)-, 241³.

—, 5-imino-, 241³.

—, 5-phenylimino-, 241³.

5 - Iso - γ,γ' - dibenzophenoxazine, 5 -
(acetylmino)-, 240⁹.

—, 9-anilino-5-imino-, 1124⁷.

—, 9-anilino-5-phenylimino-, 1124⁷.

—, 5-imino-, -HCl, 240⁹.

—, 5-phenylimino-, 241³.

5 - Iso - α,α' - dibenzophenoxazin-5-one,
241³.

5 - Iso - γ,γ' - dibenzophenoxazin-5-one, 240⁹.

—, 9-anilino-, 1124⁷.

Isocentrine, 3368¹.

Isodimorphism, of alk. earth sulfates and alkali
perchlorates, 3501³.

Isoelectric points, of ampholytes, equation for
2210⁶.

detn. in corn sugar and corn sirup manuf.,
1562⁸.

detn. in wool and silk, 1552⁷.

for plant tissue and its importance in absorp-
tion and toxicity, 941⁷.

of sulfanilic acid, 1131³.

Isoemetine, 2699¹.

Isoerucanilide, 1620⁹.

Isoerucic acid, and derivs., 1629⁹.

p-Isoerucitoluide, 1629⁹.

Isotioprophyrin, and derivs., 103².

fluorescence of, 109⁹.

Isoeugenol (4-propenylguaiacol), detection in
oil of cloves, 2757⁸.

—, methyl-*, as catalyst in prepn. of SO₂Cl₂,
55⁸.

o-**Isoeugenol** (6-propenylguaiacol).

—, 4-propyl-, and carbanilate, 72¹

Isoeugenolsulfonic acid*, potassium salt,
electrochem. oxidation of, 1453⁴.

Isofenchyl alcohol, 2679⁹.

Isoflavone (3-phenylchromone).

- , 5,7 - dihydroxy - 4' - methoxy-2-methyl-, and diacetate, 246⁴.
 —, 5,7-dihydroxy-4'-methoxy-2-styryl-, and esters, 246⁴.
 —, 5-hydroxy-7,4'-dimethoxy-2-(and 6)-methyl-, 246⁴.
 —, 5 - hydroxy - 7,4' - dimethoxy-6-methyl-2-styryl-, and acetate, 246⁴.
 —, 5,7,4' - trihydroxy-2-methyl-, and di- and triacetate, 246².
 —, 5,7,4'-trimethoxy-2-methyl-, 246⁴.

Isohemagglutination. See *Hemagglutination*.

Isohexyl alcohol, reactivity of OH-H atom in, 3887⁴.

Isoimidazimidazole,

- 1,3,5,7(2,6,7a) - Isoimidazimidazoletrione, 2,6-dimethyl-, 3353².
 —, 2-methyl-, 3353².

1,3,5(2,6) - Isoimidazimidazoletrione, 7-methoxy-2,6-dimethyl-, 3353².

Isoimidazole,

4 - Isoimidazol-4-one, 5-chloro-2-phenyl-, 3613⁴.

—, 5-chloro-2-*p*-tolyl-, 3613⁴.

Isoindazole (1,2 - benzodiazole; benzopyrazole),

- , 5-acetamido-4-chloro-1,3-diphenyl-, 2693⁴.
 —, 5-acetamido-1,3-diphenyl-, 2693⁴.
 —, 1-acetyl-3-bromo-6-nitro-, 1120¹.
 —, 1-acetyl-4-chloro-, 1119⁴.
 —, 1-acetyl-6-(*p* - hydroxyphenylazo)-, 1120⁴.
 —, 1-acetyl-7-nitro-, 1120⁴.
 —, 1-acetyl-6-salicylalmino-, 1120⁴.
 —, 5 - amino-4-chloro-1,3-diphenyl-, 2693⁴.
 —, 5-amino-1,3-diphenyl-, 2693⁴.
 —, 5-amino-1-methyl-, 2693⁴.
 —, 6-amino-1-methyl-, 1120⁴.
 —, 1-benzoyl-3-methyl-, 1119⁴.
 —, 1-benzoyl-7-nitro-, 1120⁴.
 —, 1-benzoyl-4,5,6,7-tetrahydro-, 2900¹.
 —, 1-benzoyl - 4,5,6,7-tetrahydro-7-methyl-, 2900¹.
 —, 1,1'-carbonylbis[6-nitro-, 1120⁴.

Isozingerone (4 - (3 - hydroxy-*p*-anisyl-2-butanone), and derivs., 1449^a.
Istisin, as cathartic, 2033¹.
Itaconic acid (*methylene-succinic acid*). (For derivs. see under *Succinic acid*.)
 dyes from, 3194^a.
 ester of, for cementing glass and cellulose esters, P 2540^a.
Itamin, vitasterol A in, 3388^a.
Ives, Herbert Eugene, biography, 1766^a.
Ivory, dyeing, 2987^a.
 polishing compn. for, P 480^a.
Ivory nut, carbohydrates of, 3932^a.
 dyeing, 2987^a.
Ivory substitutes, from polymerized chloroethylene, P 2906^a.
Ivy. (See also *Poison ivy*.)
 leaves of, potash content before and after autumnal death of, 3214^a.
 osmosis in leaves of, plasmolyzing agents for, 2720¹.
 saponins and tannins of, distribution of, 1830^a.
Jaboty. See *Erisma calcaratum*.
Jackson, C. T., biography, 611^a.
Jaffa, Meyer E., biography, 4^a.
Jaggery, compn. of, 1026¹, 2753^a.
 from sugar-cane juice, 2395^a.
 sugar manuf. from, in India, 1024^a.
Jam. See *Conserve*.
Jamba oil, 505^a.
Janus green B, staining protozoa with, 1282^a.
Japan, baked finishes, evaluation of, 182^a.
 book: Untersuchungen über den Japanlack, 2992¹.
 film thickness, effect of speed of withdrawal in dipping on, 1888^a.
 leather, Fe compds. as driers in, 508^a.
 rubber base for, P 3137^a.
 water, application of, 3753^a.
Japanese acid clay (*Kambara earth*). (See also *Fuller's earth*.)
 catalytic action of, 66^a, 892^a, 1101^a.
 on cineole, 3612^a.
 on linalol, 1642^a.
 constitution of, 1785¹.
 cracking petroleum with, 1003^a.
 dehydration of cyclic terpene alcs. by, 1250^a.
 physicochem. properties of, 3008^a.
 reaction with Ca cyanamide, 2232^a.
Japanese beetle. See *Popillia japonica*.
Japanning, 3754¹.
Japan wax, decompn. of, 4082^a.
Jasmin-flower oil, farnesol in, 290^a, 2528^a.
Jatrotrichine, tetrahydro-*, synthesis of, 1654^a.
Jaundice, albumoses of blood in catarrhal, 452¹.
 basal metabolism and sp. dynamic action of proteins in, effect of spleen on, 604^a.
 Bergh reaction, 1471¹.
 bilirubin content of blood serum in, 1486^a.
 bilirubinemia in obstructive, 2501^a.
 bilirubin in, 3078^a.
 bismuth effect in, 1491^a.
 calcium content of blood and coagulation in, relation of parathyroid hormone to, 3084^a.
 calcium in blood in, 2501^a, 3670^a.
 calcium soap formation in feces in, effect of alkalies and alk. earths on, 2932^a.
 catalase content of blood in, 2735^a.
 from cinchophen, 961¹.
 detection of latent, 3921^a.
 effect of liver extirpation on, 448^a.
 fat in blood in, 2031^a.
 index, detn. of, 2710^a.
 sugar detection in urine in, 111¹.
 treatment of, 3974^a.
 treatment with splenic hormone, 2929^a.
 uric acid content of blood in, 2735^a.
 urinary diastase in, 2735^a.
Javelle water, effect on bacteriophages, 2291^a.
Jegosaaponin, hydrolysis of, 3624^a.
Jejunostomy, blood in, 273^a.
Jelly. (See also *Colloids*; *Gelatin*.) P 2342¹.
 carrageen detn. in, 2743^a.
 factory control of, app. for, 1504^a.
 fruit, 3688^a, 3968^a.
 fruit flavors in, effect of fruit acids on, 1318¹.
 glucose detn. in, 283^a.
 pectin, 3400^a, 3989^a.
 pectin for, P 3990¹.
 from pectinuous fruit juices, 141^a.
 pectin, viscosity of, 613^a.
 prepn. for, P 142^a.
Jellyfish. See *Velella spirans*.

- Jelly strength**, detn. of, of pectins, 3007².
of gelatins, 1896².
- Jelutong**. See *Rubber*.
- Jemalt**, biol. evaluation of, 3072².
compn. of, 800¹.
- Jet**, 3863².
- Jimson weed**. See "stramonium" under *Datura*.
- Joannesia princeps**, oil of, 1021¹.
- Joints**, ground-glass, lubricants for, 490².
of phenolic condensation products, etc., P 161⁴.
for pipes, conduits, etc., P 2202².
- Joule effect**, calorimetry by compensation with aid of, 3012².
detn. in rubber when stretched, 1565².
in rubber, 3488¹.
in rubber, anisotropic swelling and, 1898².
in rubber (raw), 4092⁴.
- Joule-Thomson effect**. See *Thomson effect*.
- Journals**. See *Literature*.
- J phenomenon**, 18².
Compton effect and, 701².
control of, 702¹.
of Röntgen rays, 702².
- Juglans**. See *Butternut*; *Walnut*.
- Juglone**, phytochem. reduction of, 2013².
- June-bug oil**, 298².
- Juniperic acid** (*o-hydroxypalmitic acid*), and lactone and acetate, 2110¹ A.
—, α -methyl-, 3350¹.
- Juniper oil**, 775¹, 2531¹.
- Jute**, batching of, 2068².
bleaching and dyeing, 4074².
oil from seeds of, 3647².
oiling, bleaching and other treatments of, P 502².
protecting from chem. action and increasing its strength, P 4077².
rotting in shipment and storage, 2803².
seeds, 3647².
spectrum (Röntgen) of, 1358².
- Jute red**, as desensitizer, 863².
- Kaempferia galanga**, oil from rhizomes of, 798².
- Kafir corn**, silage, utilization of grain in, by dairy cows, 3937¹.
- Kahn albumin-A reaction**, 268².
- Kala-azar**, serologic test for, 3677².
treatment with Sb compds., 3967⁴.
- Kale**, fertilizers for, 4007².
proteins of, 1503².
- Kamacite**, constitution of, 1783⁴.
crystal structure of, 3775⁴.
in plesite in meteorites, 41¹.
- Kamala**, as anthelmintic, 3968².
powder, 1520².
tapeworm removal in chickens with, 774².
- Kambara earth**. See *Japanese acid clay*.
- Kambara nendo**. See *Japanese acid clay*.
- Kamperferide**, and triacetate, synthesis of, 93¹ A.
- Kaolin**. (See also *Clays*.)
analysis of, 2366².
analysis (rational) of, 2968².
changes at high temps., 2773².
chem. and mineralogical studies of, 877².
colloid chemistry of, 1736².
compn. of, 2966², 3112¹ A.
constitution of, 3722².
dehydration of, 1610⁴.
electrolyte effect on, and relation to soil, 4003⁴.
as filler for pigments, 656⁴.
- glycerol paste gynecol. therapeutics, 4020².
- for high-tension porcelain insulators, 3435².
Indian, 3033².
microscopical character of, 181¹.
molding, chem. action in, 4038².
origin in nature, 2860².
pastes contg., flow through tubes, 3691².
plant, 3112².
porcelain, 633².
for pottery, 2773².
purification of, electroosmosis in, 3435².
refining of Pacific Northwest, app. for, 1172².
review of mining and trade information, 1079².
—silica, refractoriness of, compn. and, 2055².
from South Africa, 3112².
surface properties of, heat and, 807².
suspensions contg. colloidal silicic acid, rate of sedimentation of, 3784².
suspensions of, effect of MgCl₂ on, 2829².
- Kaolinite**. See *Kaolin*.
- Kapok**, as filling material for bedding, law of Pa. on, 1888¹.
properties and compn. of, 3131².
- "Karbomite"**, 1020².
- Karite**, 1719².
- Karite butter**. See *Fats*.

 by process of Lurgi, 2180^o.
 classification of, 631^o.
 coke, production of NH₃ and hydrocarbons from, 1880^o.
 coke, structure and combustibility of, 1536^o.
 coking, 4053^o.
 compn. of, 641^o.
 density of, and of carbonization products, 1001^o.
 deposits, 1340^o.
 destructive decompn. of, P 321^o.
 distillate oxidation, motor fuel from, P 3123^o.
 distillates, oxidation of, P 2793^o.
 distillates, oxidizing to produce aldehydes, alcs., etc., P 1546^o.
 distn. gases, vapor recovery from, P 1320^o.
 distn. of, P 1002^o, P 1343^o, P 3404^o.
 app. for, P 643^o.
 with superheated steam in vacuum, 2781^o.
 for tar oils, P 318^o.
 distn. products of, cyclopentanone in, 167^o.
 distinguishing peat from, 3116^o.
 driers (steam and flue gas) for, 639^o.
 drying, 4047^o.
 -dust firing, economy of, 4049^o.
 formation from coniferous plant residues, 723^o.
 gas (city) from, 2547^o.
 gasification and oil production from Roumanian, 2373^o.
 gasification (complete) of, 3263^o.
 gasification of German, 312^o.
 gas (illuminating) from, 3118^o.
 gas (illuminating) from, by circulating gas method, 3263^o.
 gas, light oil recovery from, 640^o.
 heating, oils and gases from, P 2978^o.
 heating value of, detn. of, 1532^o.
 Hessian, 812^o.
 humic substances in, 2781^o.
 hydrogenation of, 640^o, P 643^o, P 2793^o, P 3123^o, 3445^o, 4047^o.
 hydrogenation of, app. for, P 3771^o.
 ignition temp. of oriental, 1340^o.
 industry in Roumania, 2547^o.
 industry, review on, 2547^o.
 lignin detection in, 639^o.
 microstructure of New Zealand, 3117^o.
 mining and treatment of, 1834^o.
 oil and wax from, 1533^o.
 phenols extd. from, oils, decolorization and deodorization of, 4052^o.
 powd., firing of, 1000^o.
 prepn. and use of, 1879^o.
 primary decompn. of, 2375^o.
 review, 639^o.
 semi-coke, gas from, 4053^o.
 specific heat of, and of lignite semicoke, 4054^o.
 spontaneous ignition of filter dust of Rhenish, 1000^o.
 storage, explosion prevention in, 812^o.
 sulfur in, 2781^o.
 tar from, 2779^o.
 aromatic and hydroaromatic compds. from, 2122^o, 3893^o.
 cracking of, 1535^o, 2379^o, 3120^o.
 distn. of, 4052^o.
 by steam distn., 4051^o.
 thermal decompn. of, 2783^o.
 tar oils, decolorization and deodorization of hydrocarbons and phenols of, 1880^o.
 tar products of, 1170^o.
 tar yields from, variations in, 640^o.
 utilization by Kohlenveredlung Gesellschaft process, 812^o.
 utilization of, 1001^o, 2180^o, 4047^o.
 vol. relations on drying and on coking, 312^o.
 wax extn. from, 2548^o.
 of Zillingdorf, 639^o.
- Lignocellulose**, detection of, 1077^o.
 gelatinization of, 1707^o.
- Lignoceric acid**, in brain, 2277^o.
 compd. with desoxycholic acid, 1127^o.
 constitution of, 2458^o.
- Lignone**, derivs., condensation products for dyeing and printing, P 826^o.
- Ligroin**, dehydration of, app. for, 1033^o.
 effect on body temp., 1678^o.
- Ligustrum vulgare**, bark, compn. of, 600^o.
- Lima beans**, globulins of, immunol. reactions of, 1673^o.
- Lime.** (See also *Calcium, analysis; Sugar manufacture; Water, purification of.*)
 absorption of SO₂ by, app. for speeding, P 2402^o.
 agricultural, detn. of optimum dressing of, 3098^o.
 from lime sludge, 1355^o.
 from synthetic Ca silicates, 1162^o.
 alfalfa inoculation on lime-deficient sandy soils, 3700^o.
 analysis of, 1076^o, 2235^o, 2347^o.
 in Bordeaux mixt. prepn., 2955^o.
 burning, P 2178^o, P 2545^o, P 2973^o, 2535^o.
 with bituminous alum slate, P 4036^o.
 with natural gas, 1167^o.
 in rotary ss. shaft kilns, 2535^o.
 with steam, 3254^o.
 x-ray study of, 3715^o.
 burnt, behavior in air, 158^o.
 burnt, fixation of Ca-Mg from incorporations of limestone, dolomite and, in 2 soil zones, 977^o.
 in butter making, 2511^o.
 casein-, in sprays, effect of order of mixing on formation of injurious compds. in, 794^o.

- causticizing with, 2172^o.
 in cement, 2071^o.
 in cement, excess of, 1528^o, 2970^o.
 in chem. industry, 2510^o.
 chlorosis induced by, relation of Mn and Fe to, 1164^o.
 -clay complex, ion exchange in, 2523^o.
 coatings, mold prevention on, 1696^o.
 comm. rept. on, 1530^o.
 compn. of com., 3715^o.
 compn. of, used in sugar industry, 2074^o.
 contamination in kilns, 3426^o.
 cooling app. for, P 838^o.
 crystal structure of, 3498^o.
 crystals, x-ray diffraction of, 2071^o.
 decompn. by slow electrons, 3154^o.
 detn. in cement, 481^o, 2776^o, 2777^o.
 in cement and its raw materials, P 1528^o, 2970^o.
 in cement and materials contg. blast-furnace slag, 2971^o.
 in feeds, 2341^o.
 in slag, clinker and cement, P 1528^o.
 dolomitic, effect of burning temp. on, 2071^o.
 dry mixt., P 311^o.
 effect in flotation, 3034^o.
 effect on crop yields and on soil supplies of N and humus, 2753^o.
 on org. matter in soil, 1161^o, 4002^o.
 on H_2PO_4 in soils, 976^o.
 on podsolized soil, 4003^o.
 on potash content of soil and crop, 1514^o.
 on soil potash availability, 3247^o.
 on soils, 2952^o.
 on soy bean compn., 3246^o.
 evaluation of, for beet sugar industry, 2570^o.
 as fertilizer for pasture, 3247^o, 3248^o.
 as fertilizer for sugar cane, 190^o.
 finishing, plasticity of, 1205^o.
 formation of, 2111^o.
 fusibility of mixts. with SiO_2 , Al_2O_3 , TiO_2 and TiO_2 , 2452^o.
 for glass industry, 2966^o.
 hydrated, P 2973^o.
 analysis of, 2234^o.
 manuf. of, P 638^o.
 prepn. from C_2H_5 residue, P 2363^o.
 specifications of A. S. T. M. for, 1158^o.
 hydration of, P 3428^o.
 app. for, P 479^o, P 3107^o, P 3428^o.
 effect of particle size on, 2535^o.
 industry, problems, research, progress, trade, etc., in, 2172^o.
 kiln operation in NH_3 -soda plant, 2760^o.
 kiln operation in sugar manuf., 1893^o.
 kilns—see *Kilns*.
 kiln waste as fertilizer, 3608^o.
 manuf. of, P 1000^o, P 3107^o, 3724^o.
 methods of A. S. T. M. for testing, sampling, packing and marking of, and its products, 1158^o.
 nomenclature, definitions of A. S. T. M., 1158^o.
 in open-hearth process, 2864^o.
 in paper bleaching for absorption of Cl, 2798^o.
 in paper industry, 2557^o.
 in pea-cannery waste treatment, 2520^o.
 plastic materials from, P 2360^o.
 prepn. of, 3254^o.
 prepn. of, grinding and sepg. system for, 627^o.
 properties at various temps., 1338^o.
 quick-setting, P 168^o.
 quick-setting products, P 165^o.
 reaction velocity with soil, 2952^o.
 reaction with Fe_2O_3 , 3323^o.
 reaction with MnO_2 , 1410^o.
 removal from sugar juices, 667^o.
 resources of U. S. in 1925, 1167^o.
 review, 2971^o.
 roasting or calcining, shaft furnace for, P 198^o.
 Röntgen-ray study of, 2535^o.
 sensitivity of lupines to, 3068^o.
 silica melts of, immiscibility of, 1240^o.
 slaking, 1333^o.
 sludge for building blocks, etc., P 2973^o.
 smoke, ds. of particles in, 844^o.
 in soils, changes in, 4005^o.
 dynamics of, 4004^o.
 effect of NaN_3 on, 1162^o.
 soil treatment with, 470^o.
 for betel, 3699^o.
 rate of, 2523^o.
 specifications of A. S. T. M. for, 143^o, 1157^o.
 system: Al_2O_3 - SiO_2 , 2220^o.
 system: CaC_2 , 159^o.
 system: CaCO_3 - CO_2 , 351^o.
 system: Cr_2O_3 -O, 2442^o.
 system: SiO_2 - Al_2O_3 , 208^o.
 system: SiO_2 - Al_2O_3 , optical behavior in ultra-violet light, 3313^o.
 systems: MgO - SiO_2 , and Al_2O_3 - SiO_2 , 1241^o.
 system: soda- SiO_2 , x-ray diffraction measurements on compds. in, 346^o.
 in tanning, 2572^o.
 waste, cement from, P 2545^o.
Lime-nitrogen. See *Calcium cyanamide*.
Lime-seed oil, 1194^o.
Limestone, analysis of, methods of A. S. T. M. for, 1158^o.
 burning, loss in wt. as function of time and temp. of, 3724^o.
 calcium-Mg fixation from incorporations of burnt limes, dolomite and, in 2 soil zones, 977^o.
 carbon dioxide loss and reabsorption by, 3426^o.
 compn. of, 2452^o, 3247^o.
 decompn. of, effect of steam on, 2535^o, 3254^o.
 dolomitic, calcination of, 1333^o.
 effect on org. matter in soils, 4002^o.
 furnace for heating, by combustion products from blast-furnace or producer gas, P 479^o.
 hydrogen sulfide in carboniferous, of Donetz basin, 3863^o.
 of Illinois, 2630^o.
 inclusions in basalt lava of Mayen, 3863^o.
 of India (Chhota Udepur State), 1240^o.
 Indian, 3033^o.
 lithographic, of Manchuria, 3330^o.
 metallurgical, 2637^o.
 of New Brunswick (L'Etang), 3330^o.
 in open-hearth process, 2864^o.
 of Quebec and Ontario, 3329^o.
 of Quebec (St. Urban Area), 3329^o.
 from Rott Island, 43^o.
 for sewage filter beds, 2520^o.
 silicification of, 3585^o.
 young-tertiary, with spherites, 1241^o.
Lime sulfur, as insecticide against sugar-cane mites, 2754^o.
 sprays, effect of order of mixing on formation of injurious compds. in, 794^o.
Liming. See *Hides; Lime; Soils; and "clarification" under Sugar manufacture*.

- Limiting-factors theory.** See "of the minimum" under *Laws*.
- Limone**, as catalyst in prepn. of SO_2Cl_2 , 55².
 derivs., prepn. from pinene and nopinene, 818².
d-, polymerization of, 1735².
d-, soly. in liquid NH_3 and in liquid SO_2 , 3047⁷.
l-, polymerization of, 1735².
 prepn. and properties, 3893².
- Limonite**, calcite in, 1610².
 constitution of, 3801².
 formation of hollow pebbles of, 3863².
 of Island of Giglio, 548².
 resources of Albania, 1079².
- Limulus.** See "king" under *Crab*.

 alkyl naphthalene derivs. as, P 3370^a.
 analysis of, with small samples, 817^a.
 for automobile gears, P 1007^a.
 automotive, 3738^a.
 for automotive engines in cold weather, P 1007^a.
 bearing metal impregnated with, P 2557^a.
 blending of, 1181^a.
 bloom of, measurement of, 817^a.
 books: 3739^a; Lubrication and, 3453^a.
 carbon deposition by, 2790^a.
 carbonization test for, 2792^a.
 castor oil as, 1181^a.
 changes in use, 1181^a.
 from coal, 3738^a.
 cold point of, detn. of, 1545^a, 1882^a.
 for cold weather, P 3268^a.
 color in acid stage, 2791^a.
 color of, effect of treatment with acid contg. N on, 1540^a.
 compn. and manuf. of, 3738^a.
 compn., structure and synthesis of, 840^a.
 crankcase, acids in, 1347^a.
 contamination of, 1182^a.
 from corroded engines, analyses of, 2381^a.
 dilu. of, 1347^a.
 dilu. of, measurement of, 1182^a.
 reclaiming, 616^a, 1545^a.
 Diesel oil, 2183^a.
 Diesel oil, blending, 2183^a.
 diln. by gasoline, app. for detn. of, 514^a.
 distn. and refining of, 1005^a.
 distn. of, 171^a.
 distn. of, app. for, P 2349^a, P 3126^a, 3266^a.
 from distn. of carbonaceous material, P 3123^a.
 distn. of petroleum for, 2184^a.
 from distn. of tar with steam, 2781^a.
 for elec. app., P 319^a.
 emulsified oil as, 1181^a.
 emulsions of, P 2557^a.
 engine service tests of, 1882^a.
 evaluation of, 2791^a.
 for explosion engines, P 3127^a.
 for explosion engines, physico-chem. identification of, 645^a.
 explosions caused by oil vapor, 4072^a.
 film thickness of, elec. detn. of, 1545^a.
 flash point of blends of, prediction of, 1317^a.
 for gasoline plants, 2792^a.
 graphite effect on, 171^a.
 grease, P 1349^a.
 for ground-glass joints, 490^a.
 high-temp., P 3127^a.
 from hydrocarbon oil distn., P 1546^a.
 hydrocarbons of, satn. of, 1882^a.
 as insecticides, 2955^a.
 iodine color of, 2787^a.
 lead detn. in, 3738^a.
 lignite benzene as internal-combustion fuel and its relation to the, 4050^a.
 from lignite tar residue, P 2980^a.
 from low-temp. carbonization tars, 3448^a.
 from machine oils, 1181^a.
 for machinery, P 1183^a.
 manuf. of, 2791^a.
 modifications of motor, on use, 1540^a.
 naphthenic acids in, 1181^a.
 neutralization no. and saponification of, 1347^a.
 oiliness of, effect of kerosene on, 1181^a.
 oxidation of, 1703^a.
 from paraffin-contg. distillates, P 4060^a.
 petroleum, 2184^a.
 preheating with flue gases, 3736^a.
 preserving, P 3740^a.
 properties of, 1178^a, 2184^a.
 purification of, 2380^a, 2382^a.
 purification of, plant for, 1701^a.
 purifying used, app. for, P 3455^a.
 raisin-seed oil as, 3278^a.
 recovery from Diesel engines, app. for, P 3455^a.
 "rectifier" for, 1182^a.
 regeneration of, 2184^a, 2792^a.
 regeneration of, app. for, P 3127^a.
 reviews, 1178^a, 3734^a.
 Röntgen-ray structure of, 2406^a.
 for rubber stopcocks, 3453^a.
 sand detn. in, 1181^a.
 sapon. nos. of, detn. of, 3852^a.
 for screw posts of musical instruments, etc., P 3127^a.
 for sheet metal manuf., P 1183^a.

- soap-contg., P 2180.
 specifications, etc., of A. S. T. M. for, 2553.
 specifications for, 2701.
 for springs, P 491.
 squalane as, 4081.
 for stopcocks, 1545.
 for stopcocks, absorption of, errors in org. elementary analysis from, 1603.
 sulfur detn. in, 316.
 testing, 1181, 2184.
 app. for, 3492.
 methods of A. S. T. M. for, 1158.
 for textile machinery, 1347.
 treating, fuller's earth vs. clays in, 2792.
 turbine oils, comm. rept. on, 1346.
 evaluation of, 1346.
 manuf. of, 3738.
 after use in automobile engines, 490.
 for use in presence of water, P 1349.
 viscometer for, 2184, P 2981.
 viscosity and C residues of, 1181.
 viscosity of, 1180, 3452.
 viscosity tests of A. S. T. M. for, 143.
 volatility and carbonization of, 266.
 volatility test of, 1541.
 for wool, P 502.
 wool-fat and mineral oil mixt. for, P 1705.
 "Zicel" spindle, 2059.

Magnesium chromate, heptahydrate, crystal structure of, 1384^a.
 manuf. of, P 994^a, P 2537^a.
Magnesium citrate, citric acid detn. in, 4027^a.
Magnesium compounds. (See also *Grignard reaction; Grignard reagents*.)
 amino-, 689^a, 1235^a.
 benzyl—chloride, reaction with glutaronitrile, 1108^a.
 constitution of org., 564^a, 892^a.
 disulfite complex, 3169^a.
 of dyes, P 655^a.
 ethylenic, 2457^a.
 2-arylethynyl—bromide, 2896^a.
 from Italian "Stassfurt" salts, 1784^a.
 methylenebis—dihalide, 563^a.
 phenyl—bromide, reaction with CO presence of CrCl₃, 3554^a.
 reaction with Cr compds., 3572^a.
 reaction with PhNO and with *p*-Me₂NC₆H₄NO, 1800^a.
 reaction with trisubstituted acetonitriles, 1626^a.
 phenyl—chloride, reaction with Cr chlorides, 3323^a.
 phenyl—iodide, reaction with WCl₆, 3322^r.
 phosphine derivs., 3049^r.
 pyrryl—bromide, reaction with di-Et oxalate, 1261^a.
 pyrryl—halides, syntheses with, 211^a, 2424^a, 1459^a.
 reaction of org., with CNCl, 563^r.
 resources of U. S. in 1925, 1167^a.
 silver-, at. structure of, 855^a.
 zinc-, crystal structure of, 1884^a.
Magnesium cyanide, manuf. of, P 305^a.
Magnesium cyanoplatinite, heptahydrate, crystal structure of, 1572^a.
 hydrates of, 1602^a.
Magnesium dichromate, manuf. of, P 2537^a.
Magnesium diethyl, reaction with AcCl, 3345^a.
Magnesium ethoxide, solidifying alcs., oils, etc., with, P 3434^a.
Magnesium fluoride, mixts. with LiF, fusibility of, 3801^a.
 systems: LiF—, and LiF—MgO—, 2436^a.
Magnesium fluosilicate, hydrate, crystal structure of, 3500^a, 3777^r.
Magnesium fluostannate, crystal structure of, 3777^r.
Magnesium fluotitanate, crystal structure of, 3777^r.
Magnesium hexafluoroborofluoride, 1235^a.
Magnesium hydroxide, analysis of, 2234^a.
 as antidote to poisoning by HgCl₂, 2031^a.
 chewing gum contg., P 2364^a.
 as coagulating agent in water purification, 1506^r.
 effect on decompn. of H₂O₂ and on its catalysts by Pb(OH)₂, Fe(OH)₃, Mn(OH)₂ or Ag₂O, 2088^a.
Magnesium iodide, reducing action of Mg and, on aromatic ketones, 579^a, 3902^a.
Magnesium lactate, tetany cure with, 1489^a.
 tetany prevention with, 1489^a, 3969^a.
Magnesium nitrate, system: KCl—MgCl₂—NaCl—KNO₃—NaNO₃—, 850^a.
Magnesium nitride, 3800^a.
Magnesium oxalate, soly. and elec. cond. of, 3322^a.
Magnesium oxide. See *Magnesia*.
Magnesium oxychloride, cement—see *Cement, hydraulic*.
 mixt. for bricks, etc., P 3442^a.
 molded articles from, P 3256^a.
 telescope mirror of, 2773^a.
Magnesium perchlorate, trihydrate of, as absorbent for water in metabolism detn., 2711^a.
Magnesium phosgeno-aluminate, 3572^a.
Magnesium phosphate, as fertilizer for oats and barley, 3100^a.
 soly. of, 2752^a.
Magnesium potassium chloride. See *Carnallite*.
Magnesium potassium sulfate, crystals, growth in diff. directions, 3501^r.
Magnesium salts, antagonism to Ca salts, 281^a.
 in blood in disease, 2026^a.

- effect on coagulation of blood rendered in-coagulable by citrate or phosphate, 3915^a.
 effect on cocaine anesthesia, 3680^a.
 glucemia production by injections of, 2318^a.
 resonating power of, in solns. irradiated by filtered light from a Hg arc, 3833^a.
 in river water, disappearance of, 3996^b.
Magnesium selenide, crystal structure of, 3498^a.
Magnesium silicide, alloys of Al and, 559^t.
Magnesium sulfate, crystals, growth in aq. soln., 3501^a.
 decompn. of, 2232^a.
 dehydration of, 3321^a.
 dielec. const. of aq. solns. of, 3782^a.
 double salts with ZnSO_4 , 1573^a.
 effect on biliary tract, 954^a.
 on corn seed, 3382^a.
 on gall bladder, 1314^a.
 on H-ion concn. of duodenal contents, 1669^a.
 on liver damage done by CCl_4 , 135^a.
 on small intestine, 2934^a.
 on water economy in muscle, 1485^a.
 elec. cond. of solns. of, 525^a, 3800^a.
 evaporator for, P 160^a.
 heptahydrate, crystal structure of, 1384^a.
 of La Higuera, Spain, 723^a.
 from magnesite, 1872^t.
 octahydrate of, 2229^a.
 refractive index of, detn. of, 1749^a.
 solid soln. with Zn sulfate, 2406^a.
 spectrum of, 2431^a.
 system: $\text{H}_2\text{O}-\text{NaCl}-\text{MgCl}_2-\text{Na}_2\text{SO}_4$, 3713^a.
Magnesium sulfide, crystal structure of, 3198^a.
Magnesium sulfate, from sulfite liquors, P 176^a.
Magnesium telluride, crystal structure of, 3778^a.
Magnesium triethylsulfonium sulfate, 2623^a.
Magnesium zinc sulfates, 1573^a.
Magnesiylglyoxaline*, reactions of, 1263^t.
Magnesiylindoles*, reactions with aldehydes, 1117^a.
Magnesiylpyrrole*, derivs., syntheses with, 241^a, 242^a, 7.
 reaction with di-Et oxalate, 1261^a.
 syntheses with, 1458^a.
Magnetic analysis, 3332^a.
Magnetic anisotropy, of cubic crystals, 1401^a.
Magnetic apparatus, iron alloy for, P 2217^a.
Magnetic cores, P 221^a, P 863^a, P 1094^a.
 for telephone circuits, P 729^a.
Magnetic double refraction. See *Refraction*.
Magnetic field. (See also *Optical rotation*; *Zeeman effect*.)
 atomic deflection in inhomogeneous, effect of velocity distribution on, 2424^a.
 cathode rays in axially symmetric, detn. of paths of, 1406^a.
 deflection of at. H rays by, 1755^a.
 deflection of mol. rays in, 1754^a.
 deflection of mol. rays in, splitting-up image in, 1754^a.
 deflection of spectrum by, 1408^a.
 dielec. const. of anisotropic melt of *p*-azoxyanisole in, 1920^a.
 disturbance of supracond. with Sn and Hg, 696^a.
 of earth, theory of, 2602^a.
 effect on anisotropic liquids, 2207^a.
 on crystn. of piperine and salol, 2207^a.
 on dielec. consts., 3538^a.
 on dielec. consts. of diat. dipole gases, 1211^a.
 on dielec. consts. of HCl and NO, 700^a.
 on elec. cond., 3305^a.
 on elec. cond. of Sn, 1748^a, 3305^a.
 on elec. resistance in single Fe crystals, 1748^a.
 on germinating seed, 938^t.
 on optically active substances, 3811^a.
 on polarization of resonance radiation, 15^a.
 on polarization of resonance radiation of Cd, 3312^a.
 on polarization of resonance radiation of Hg vapor, 2102^a.
 on refractive index of CO_2 , 527^a, 1588^a.
 on state of polarization of light given out by H canal rays, 3822^a.
 elec. polarization of paramagnetic mols. in, 2600^a.
 inhomogeneous, force exerted by, 1921^a.
 luminescence of Grignard compds. in, 3313^a.
 orientation of gaseous mols. in, 1908^a.
 polarization of canal ray light in weak, 205^a.
 polarization of Hg lines emitted from discharge tube in, 2424^a.
 relation between cond. and thermoelec. power in, 3810^a.
 rotatory polarization in, 527^a.
 space quantization of atoms in, optical detection of, 3581^a.
 thermionic phenomena in, 1057^a.
Magnetic moment, of alkali metal atoms, 206^a.
 of atomic H, 526^a, 2424^a.
 of atoms, 3151^a.
 quantum mechanics and, 1209^a.
 vector formulas for, 3818^t.
 of electrons, effect on dispersion of cathode rays, 3819^a.
 of ions of first transition series of elements, 1224^a.
 of iron and Co ions, 1921^a.
 of manganese ion, measurement of, 1920^a.
 of mols., detection of small, 696^a.
 of potassium, Na and Ti, 1754^a.
Magnetic permeability, of cold-worked steel, 556^a.
 of iron and magnetite in high-frequency alternating fields, 1754^a.
 of steel, temp. coeff. of, 1792^a.
Magnetic properties, of carbon dioxide and N_2O , 3016^a.
 characterization of Fe oxides and hydroxides by means of, 526^a.
 chem. properties and, of elements, 1224^a.
 of cobalt-Ni alloys, 3592^a.
 correlation with mech. hardness in cold-worked metals, 3870^a.
 elimination on heating, changes of sp. heat, vol. and elec. cond. in, 1581^a.
 of gadolinium sulfate at low temp., 3811^a.
 of hydroxides, effect of H_2O_2 on, 2597^a.
 of iron-Mn alloys, 2648^a.
 of iron-Ni alloys, 218^a.
 of iron sesquioxide, 696^a.
 of iron single crystals, 1218^a.
 of magnetite, 1401^a.
 of manganese pyrophosphate, 1920^a.
 measuring, app. for, P 3772^a.
 mol., 3540^t.
 of nickel and Fe films, 1402^a.
 of nickel single crystals, 520^a.
 of pyrosulfurous chloride mol., 1070^a.

- of silicon Fe sheet, effect of grain size on, 1435⁴.
- of steel, 1435⁴.

soly. of metals in, 2416^o.
specific heat of, 2215^o.
spectrum of, 16^o, 17^o, 20^o, 359^o.^o, 704^o.^o, 858^o.^o, 1057^o, 1061^o.^o, 1062^o, 1225^o.^o, 1594^o, 1755^o, 1756^o, 1932^o, 2224^o, 2226^o, 2429^o, 2430^o, 2609^o, 2610^o.^o, 2845^o, 2846^o, 3015^o, 3022^o.^o, 3157^o.^o, 3158^o, 3169^o.^o, 3554^o, 3558^o.^o, 3824^o, 3828^o, 3829^o, 3830^o.
spectrum of, polarization of, emitted from discharge tube in magnetic field, 2424^o.
as standard in volumetric analysis, 3847^o.
surface tension of, 682^o, 2583^o.
transmutation of, 16^o, P 536^o.^o, 677^o, 699^o.^o, 1055^o, P 1231^o, 1404^o, 1751^o.^o, 1926^o.
vapor, decompn. of NH₃ sensitized by, effect of A, N and H on, 3024^o.
effect of purity on vacuum in diffusion pumps, 6^o.
electrification by friction between Fe or Pt and, 1050^o.
general x-radiation produced by single impacts of electrons on, 3828^o.
selective dispersion of, 204^o.
Zeeman effect in, 1594^o, 2844^o.
- Mercury, analysis, cupferron in, 3791^o.**
detection, 545^o, 1779^o.
detection, app. for, 3491^o.
detection, reagent for, 1779^o.
detn., 717^o, 1779^o, 2233^o, 2634^o, 3423^o, 3575^o.^o.
detn. in Hg salicylate, 624^o, 2531^o.
detn. in presence of other metals, 3178^o.
detn. of Cu, 622^o.
sepn. from Cu, 1943^o.
sepn. from Te, 3850^o.
- Mercury, metallurgy of, from cinnabar, P 3040^o.**
in elec. furnace (high-frequency) fed by alternator, 22^o.
- Mercury acetate, (Hg(OAc)₂), reaction with acetylenic acids and their esters, 3348^o.**
reaction with o (and p)-iodoaniline, 395^o.
reaction with nopinene and with pinene, 400^o.
- Mercury alloys. See Amalgams.**
Mercury borofluoride, prepn. of, 214^o.
Mercury bromides, HgBr₂, electrode, electro motive force of, 2836^o.
HgBr₂, solid solns. with HgCl₂, 1908^o, 3502^o.
HgBr₂, vapor, color of, 3557^o.
vapor, crit. potentials of, 604^o.
- Mercury cadmium sulfide, in analysis, 1424^o.**
Mercury chlorides, oxidation-reduction potentials of, in HCl solns., 3807^o.
HgCl₂, antiluetic salve contg., prepu. of, 153^o.
chlorine parameter in, 1922^o.
d. of fused, 5^o.
detn. in tablets, 3423^o.
elec. cond. of fused, 6^o.
electrode, 3564^o.
electrode potential between Hg and, effect of HCl on, 3806^o.
electrode, potential of, 1217^o, 1400^o.
electrolytic prepn. for electrodes, 202^o.
intoxication by, 2738^o.
solid solns. with HgBr₂, 1908^o, 3502^o.
sol. compds. from Na carbonates and, 2910^o.
- HgCl₂, addn. compd. with thiocarbamide, 67^o.**
aster soil treatment and seed disinfection with, 1510^o.
bacteriophage resistance to, 3646^o.
as catalyst in manuf. of Al(OEt)₃, P 249^o.
complexes with alkali chlorides, affinity of, 3010^o.
detn. of, 2355^o.
effect of peptone, Na citrate or NH₄OAc and, on fermentation, 3067^o.
effect on adrenal gland, 1491^o.
effect on bile, 1147^o, 1846^o.
effect on kidney poisoned with cyanide, 459^o.
effect on leucocytes, 959^o.
effect on osmotic value of yeast cell, 3930^o.
effect on protoplasm of *Ameba proteus*, 1130^o.
effect on respiration of yeast, 445^o.
elec. cond. of fused, 6^o.
electrostatic moment of mols. of, 15^o.
as fungicide for barley smut, 3249^o.
mixt. with HgI₂ and SbCl₅ for mineralogical analysis, 1781^o.
poisoning, blood changes in, 132^o.
poisoning, eggs and milk as antidotes for, 1493^o.
poisoning, Mg(OH)₂ as antidote for, - 2031^o.
poisoning, treatment with Na₂S₂O₄, 3981^o.
reaction: HgCl₂ + AgI₂ → HgI₂ + AgCl₂, 523^o.
reaction of NaCl in soln. of litmus and, 3792^o.
reaction with NaHCO₃, 1398^o.
smoke, ds. of particles in, 844^o.
soly. in Et₂O, 2169^o.
vapor, color of, 3557^o.
vapor, crit. potentials of, 604^o.
- Mercury cobaltthiocyanate, formation in presence of HNO₃ as qual. test for Hg, 1779^o.**

Mercury compounds. (See also *Mercury preparations.*)

- analysis of, 8423².
 of benadine, 2255².
 colloidal organo-, 1044².
 with cupferron, soly., of, 3791².
 cyanoguanidine, 2444¹.
 for disinfecting seeds, P 1165¹.
 effect on glucolysis of yeast, 1473².
 as fungicides and effect on seed germination, 2955².
 of furan, 2686².
 with hydroxysulfobenzoic acids, P 620².
 of 2-imidazolemercaptan derivs., and their pharmacol. properties, 3614².
 manuf. of org., P 2274².
 for marine pilling, 810².
 methylmercuric hydroxide and halides, 3600¹.
 of 6-methylphenothiazine, 3055².
 of nopinene, 400².
 nuclear substituted aromatic cyanogen, P 1164².
 pharmacol. action of, antagonism to HCN, 2319².
 pharmacol. action of org., 133², 281².
 with potassium and halogens, 3570².
 of pyrrole, 2680².
 reaction with Al, 1569².
 with salicylic acid, 1867².
 for seed disinfectants, P 149².
 sol., from HgCl and Na carbonates, 2910².
 staphylococcal infection treatment with, chem. constitution and, 2937².
 succinate, toxicity to heart, effect of Cn on, 3977².
 unsym. org., decompn. of, 233².
 with urea nitrates, constitution of, 751².
Mercury cuprimandelate, 3168².
Mercury cyanides, basic, testing, 797².
 compd. with Cd(SCN)₂, 365².
 crystal structure of, 1210².
 refractive index of, detn. of, 1749².
Mercury fulminate, water of crystn. of, 61².
Mercury halides, fluorescence of vapors of, 703².
Mercury hydroxides, peptization in presence of sugars, 3514².
Mercury iodides, crystal structure of, 3778².
 HgI, thermodynamic studies of, 13².
 HgI₂, addn. compd. with thiocarbamide, 67².
 detn. of, 1076².
 elec. cond. in EtOH and acetone soln., effect of I on, 1913².
 elec. cond. of, effect of simultaneous blue and red light on, 2435².
 elec. cond. of fused, 6².
 mixt. with HgCl and HgShCl₂ for mineralogical analysis, 1781².
 ointment, analysis of, 153².
 polymorphic transitions of, 3783².
 reaction: $\text{HgCl}_2 + \text{AgI}_2 \rightarrow \text{HgI}_2 + \text{Ag}_2\text{Cl}_2$, 523².
 system: KI-H₂O-, 3845².
 vapor, color of, 3557².
 vapor, crit. potentials of, 694².
Mercury manganese sulfide, in analysis, 1424².
Mercury nitrates, HgNO₃, prepn., properties and mineralogical, uses of, 1781².
 Hg(NO₃)₂, system: urea-H₂O-, 751².
Mercury oxide, (HgO), in anti-fouling compns., 182².
 chlorides in, detection of, 3856².

- crystal structure of, 3777².
 radiation emission by passage of current through, 20².
 as standard in volumetric analysis, 3847².
Mercury potassium chloride, 3570².
Mercury potassium cyanide, phase-rule study of, 1215².
Mercury potassium iodide, 3845².
Mercury preparations. (See also *Ointments.*)
 albumin, 1868².
 for leprosy with positive Wassermann, 3967².
Mercury salicylate, analysis of, 2170².
 effect on phagocytes, 774².
 mercury detn. in, 624², 2531².
 prepn. and constitution of, 300².
Mercury salts, effect on nitration of aromatic compds., 2884².
 effect on reticulo-endothelial cells, 2155².
 poisoning of H electrodes by, 3537².
 rhythmic reactions of, in gelatin jellies, 1789².
Mercury selenide, crystal structure of, 1210².
Mercury sulfates, Hg₂SO₄, electrode for testing storage batteries, 3836².
 HgSO₄, catalyst of CuSO₄ and, for phthalic acid prepn., 2469².
 purification of, 3210².
Mercury sulfide, (HgS), allotropy of, 202².
 in analysis, 1424².
 colloidal, sprays, 792².
 induced pptn. of, 2825².
 minerals, crystal structure of, 1729².
 poisoning by, 279².
Mercury telluride, crystal structure of, 842².
Mercury thallium nitrate, prepn., properties and mineralogical uses of, 1781².
Mercury-vapor lamp. See *Lamps*.
Mercury zinc sulfide, in analysis, 1424².
Merenders bulbocodium, colchicine in, 2166².
Merquinoid compounds, 67².
Merodon equestris, 3250².
Merulius laeormans, humification of wood by, 2016².
Mesaconic acid (methylfumaric acid), stereo-isomerism of, viscosity and, 2583².
Mesentery, ganglia in, anticoagulating substance from, 927².
Mesitylene (*s*-trimethylbenzene), absorption in the near infra-red, 3047².
 detn. in gasoline, 645².
 Röntgen-ray diffraction in, 3827².
 soly. in liquid NH₃ and in liquid SO₂, 3047².
 system: SO₂-, 738².
Mesitylenedisulfonamide. See *m-Benzene-disulfonamide*, 2,4,6-trimethyl-.
Mesitylenedisulfonyl chloride. See *m-Benzenedisulfonyl chloride*, 2,4,6-trimethyl-.
Mesitylenedisulfonyl fluoride, 3604².
 —, nitro-, 3604².
Mesityl oxide (4-methyl-Δ²-2-pentenone). (For derivs. see under Δ²-2-pentenone.)
 chlorohydrins of, 892².
 an isomer, 565².
 prepn. from acetone, 387².
Mesobilirubinogen, hemopyrrole from, 591².
Mesohemin, spectrum of, 3912².
 —, dimethyl-, spectrum of, 3912².
Mesoplonon bidens, oil of, 1022².
Mesoporphyrin, 591².
 fluorescence of, 109².
Mesothorium, unitary character of disintegration, and half-life period of, 1055².
Mesothorium 1, sepn. from Ba, 590².

- Mesothorium 2**, beta-ray production by, 3822¹.
slow β -rays of, 580⁷.
- Mesothorium bromide**, effect on glucemia normally and in cancer, 3089¹.
- Mesoxalalanilide**, oxime, metallic derivs., 565².
- Mesoxalic acid**, oxidation of, 2664⁷.
- Mesoxalylidurethan**², hydrazones, 1654².
- Mesquite gum**, composition of, 226⁸.
- Metabolism**. (*Animal metabolism is meant unless plant metabolism is designated; see also Excretion; Feces; Nutrition; Urine.*)
in absence of suprarenal capsules, pilocarpine effect on, 136³.
absorbents for detns. of, 2711⁴.
acetaldehyde in, 430⁸.
acetaldehyde origin in, 2141³.
acid-base, 2028⁶.

 post-operative disturbances, 2154^a.
 in pregnancy, 2732^a.
 protein, 415^a.
 creatine and, 1479^a.
 effect of bile acids on, 2283^a.
 effect of insulin and of exercise on, 2299^a.
 morphine effect on, 455^a.
 after splenectomy, 128^a.
 purine, 2726^a.
 diabetes insipidus and, 3079^a.
 effect of bile acids on, 2283^a.
 effect of mineral water on, 774^a.
 effect of thyroid on, 3955^a.
 tissue NH₂ and, 3665^a.
 uric acid as end-product of, 2922^a.
 of pyruvic acid in muscle and effect of insulin, 2325^a.
 radiation from C arc and, 3916^a.
 regulation of, 2298^a, 3668^a.
 of reserve materials in young barley plants grown in dark, effect of K salts and Na salts on, 2293^a.
 respiratory—see *Respiration*.
 reversibility in, 3940^a.
 review, 3237^a.
 salt, 3933^a.
 salt, in dogs, 1467^a.
 salts and, 2328^a.
 sedatives and, 3084^a.
 sodium chloride, alteration with water metabolism by peroral administration of sugar and by adrenaline, 262^a.
 sodium, in pancreatectomy and in diabetes, 2028^a.
 of *Spirochaeta duttoni*, sugars in, 3646^a.
 spleen and, 604^a.
 in star fish, regulation of H-ion concn. and its relation to, 1151^a.
 of steers, 2406^a.
 of sterols, 1295^a.
 stimulus of food in steers, 2490^a.
 study in small animals at variable pressures, app. for, 1285^a.
 of succinic, malic and fumaric acids, 3225^a.
 sugar formation from protein, 2920^a.
 sulfur, 2493^a, 3071^a, 3224^a, 3654^a.
 chaulmoogra oil and, 770^a.
 effect of mercapturic acids and of fluorobenzene on, 3224^a.
 of yeast, 3926^a.
 in sulfur poisoning, 460^a.
 temp. control in young rats in relation to, 3653^a.
 thionine in, 1995^a.
 in thyroid diseases, 3675^a.
 thyroid diseases with increase of basal, blood Ca and glucemia in, 3392^a.
 thyroid effect on, significance of fats in, 1292^a.
 of thyroparathyroidectomized dogs, 3226^a.
 of tissue, 2923^a.
 of tissue cultures, 2306^a.
 of tomato, 944^a.
 in tropics, 125^a.
 of trypanosomes, 608^a.
 in tuberculosis, 1145^a.
 in tuberculosis and its dietetic significance, 1145^a.
 of tumors, 1675^a, 2932^a.
 in turtles, 3939^a.
 ultra-violet light and, 2303^a.
 ultra-violet light effect on Ca and P in milk-ing cows, 2493^a.
 urea, effect of internal secretions on, 3077^a.
 of uric acid, 126^a, 437^a, 598^a.
 insulin and, 3962^a.
 in invertebrates, 2508^a.
 urine acidity and, 3920^a.
 variations in basal, 3070^a.
 vitamin B action in regulating CN, effect of nicotinic acid in rice on, 764^a.
 vitamin B and, 949^a.
 in vitamin-B starvation, 3654^a.
 with vitamin-rich diets poor in mineral matter, 441^a.
 waste product of plant, oil of mint as, 1665^a.
 water, 261^a.
 central regulation of, 3970^a.
 insulin and, 1841^a.
 intra-dermal salt soln. test and post-operative, 3955^a.
 reticulo-endothelial system and, 604^a.
 review, 1140^a.
 of water and salt after sweating, 1675^a.
 of water in myxedema and goiter, 1675^a.
 of wheat, effect of temp. on, 3931^a.
 of women, 2925^a.
 of women, effect of sexual processes on, 763^a.
 of yeast, effect of CO on, 1472^a.
 of zinc, 118^a.
Metacotin. See *p-Acetoniside*.

 detn. with x-rays, 1078^a.
 evolution of, and its application in analysis, 3849^a.
 fertilizer, distribution of, 1688^a.
 formation in Kuromono deposits with colloidal solns., 1784^a.
 formulas of, 2860^a.
 in gabbro from Radautal, Harz, 3330^a.
 in India, production during 1925, 1239^a.
 iodine content of, 43^a.
 of iron oörites of France, 3033^a.
 in iron ores of Alabama, liberation after grinding, 550^a.
 of Island of Giglio, 548^a.
 of Ivory Coast, 1948^a.
 lithium-bearing, of Canada, 360^a.
 luminescence and color change in, through Becquerel rays, 1410^a.
 manganese-bearing, 1782^a.
 of mica group, mol. vols. of, 2241^a.
 from nepheline-syenite area, French River, Ont., 877^a.
 new, aramayoite, 2241^a.
 bolivianite, 39^a.
 cornuite, 41^a.
 droogmansite, 878^a.
 ianthinite, 2242^a.
 kipushite, 2242^a.
 kôchite, 1782^a.
 from Långban, 1948^a.
 loparite, 3862^a.
 malladrite, 369^a.
 of mosandrite group from Chibine Mts., 3583^a.
 of olivine group, 3860^a.
 oroseite, 217^a.
 scharizerite, 3862^a.
 schultenite, 2242^a.
 silesite, 39^a.
 tanatarite, 1781^a.
 tangeite, 1783^a.
 ternovskite, 1238^a.
 traversite, 217^a.
 usbekite, 3584^a.
 weissite, 1948^a.
 from Ontario, Hastings Co., 41^a.
 from Ontario, Lake Nipigon, 40^a.
 of ores, detn. of, 1781^a.
 oxidation of sulfide, 39^a.
 palladium-contg., 3859^a.
 phlogopite, 1238^a.
 physicochem. methods in study and utilization of, 2636^a.
 for pigment, paint, linoleum and allied industries, 1190^a.
 platinum in Norwegian, 2636^a.
 pleochroic halos of, 1078^a.
 production in countries foreign to U. S. in 1920-1924, 2636^a.
 radioactive, detn. of age of, 530^a, 3601^a.
 radioactive, from Santa Clara estate, Pomba, Minas Geraes, 3861^a.
 radioactivity of residues, detn. of, 1078^a.
 rock-forming, soly. during cyanidation, 45^a.
 in serpentine of Piosasco, Piedmont, 3691^a.
 silicate, hydrolysis and decompn. of, 3585^a.
 in soils of Holland, 2243^a.
 spectroscopy of, 40^a.
 sulfuric acid in, 1781^a.
 suspensions of, settling, P 470^a.
 synthesis under high pressure and temps., 210^a, 3143^a.
 from Szentendre-Visegrad Mts., 42^a.
 transformation of, 1948^a.
 ultra-violet light effect on, 3257^a.
 uranium, detection and detn. of secondary, 3584^a.
 of Ferghana, 3584^a.
 of Katanga, 1610^a.
 from Katanga, pseudomorphs of, 2636^a.
 from Lotsmanskaja Kamenaka and from Khutor Golowin, 3820^a.
 of Werfen, Sulzkaunmergut, 3862^a.
 world production and trade in, 3586^a.
 of Yukon, Galena Hill, Mayo Dist., 1239^a.
Mineral springs. See *Waters, natural*.
Mineral waters. See *Waters, natural*.
Mines, air in, sampling and analysis of, 3327^a.
 coal-dust explosions in, 2086^a.
 coal, silicosis among workers in, 972^a.
 explosions in, prevention of, P 3740^a.
 fires or explosions in, cartridges for preventing or quenching, P 1357^a.
 flameproof elec. app. for coal, 324^a.
 gases in, app. for detecting, 1033^a.
 ignition of explosives in, 2799^a.
 safety in, rept. of Research Board on, 3271^a.
 sealing fissures in coal, P 2973^a.
Mining, industry, regional summaries for 1926, 1079^a.
 rubber in, 1904^a.
 waste, recovery and use of, 551^a.
Minium. See *Lead oxides*.
Mint oil. See *Oils*.
Miosis, by synthetic urethans, positive isomerism and, 962^a.
Miré, properties and pharmacol. tests of, 1332^a.
Mirrors, copper, on glass, 838^a.
 with gum arabic adhesive, P 161^a.
 iron, passivity of, 3784^a.
 non-glare, P 3439^a.
 protecting, P 4040^a.
 silvering, P 808^a.
 telescope, of Mg oxychloride, 2773^a.
Miscibility, of chromic chloride hexahydrate solns., 849^a.
 of hydrocarbons (aliphatic satd.), 1395^a.
 temp. of systems of EtOH or MeOH with paraffins, effect of salts on, 849^a.
Miscometer, 1^a.
Mistletoe, chemistry of, 600^a.
 pharmacology of, 773^a, 2756^a.
Mists. (See also *Clouds*.)
 corrosion by, 3882^a.
Mitochondria, 109^a, 2022^a.
 lipid in, function of, 3208^a.
Mitosis. See *Karyokinesis*.

- Mitragyna macrophylla**, paper manuf. from, 1712^o.
- Mitscherlich-Baule law**. See *Laws*.
- Mitscherlich's law**. See *Laws*.
- Mixed crystals**. See *Liquid crystals*; *Solutions*, *solid*.
- Mixing**. (See also *Heat of mixing*.)
of liquids, temp. effects on, 2084^o.
logarithmic rule for, 1582^o.
of oils, pitches, bituminous substances, etc., P 3096^o.
reversible, of substances at abs. zero, 3812^o, 3814^o.
- Mixing apparatus**, P 1381^o, P 2402^o.
for acetylene generators, P 197^o.
for air and gas, safety device for, P 838^o.
for coal dust with oil, etc., P 1034^o.
colloid mill, P 675^o.
for colors, 3285^o.
countercurrent, 3285^o.
gear-pump, P 3002^o.
for hot and cold water, thermostatic valve for, P 2823^o.
ink- and color-, 3472^o.
for liming sugar juices, etc., P 468^o.
for liquid fuels or other materials, P 3003^o.
for liquids, P 515^o, P 1906^o.
for rubber, 2574^o.
for rubber, etc., P 1570^o.
for sizing for paper, etc., P 344^o.
thermoregulator for, P 2403^o.
for water baths, 2401^o.
for water purification, hydraulic jump as, 1507^o.
for water-softening or other chemicals, P 3144^o.
for wool, 1552^o.
- Mixtures**. (See also *Systems*.)
azeotropic—see *Azeotropes*.
binary, dielec. const. of, 3151^o, 3783^o.
 surface tension of, relation to vapor pressure, 1042^o.
 theory and properties of, 1915^o.
 of volatile substances, 3146^o, 3303^o.
binary liquid, 14^o, 2414^o.
 analogy to systems formed from a liquid phase and a vapor phase in equil., 1744^o.
 const. of, 1215^o.
 densities of, 1037^o.
 mol. scattering of light in, 1900^o.
calcg. properties of, free from mixed crystals, 3777^o.
dielec. const. of, 1401^o.
dielec. const. of heterogeneous, 1919^o.
distr. of heterogeneous ternary, 1744^o.
distribution of constituents between phases, thermodynamics of, 2594^o.
Einstein's paradox of, 2083^o.
gaseous, pressure of, 2083^o.
malaxation, agitation and, 1736^o.
prepn. of, 1043^o.
refractive index of, calcn. of, 1053^o.
theory of, 1582^o.
theory of normal and abnormal, 3790^o.
at zero abs., properties of, 2594^o.
- Mobliometers**, applications of, 2402^o, 2577^o.
- Models**. See *Atoms*.
- Modenol**, syphilis treatment with, 2320^o.
- Moellons**, types of, 834^o.
- Mohr's salt**. See *Iron ammonium sulfate*.
- Moine macroscops**, rate of killing. at higher temps., 3983^o.
- temp. characteristic for duration of instar in, 966^o.
- Moisture**. See *Water*.
- Mokutsu**, 2358^o.
- Molasses**, analyses of, comparison of factory, lab. and expt. station results, 4087^o.
analysis of, 1911^o.
ash detn. in, 1025^o, 3480^o, 3481^o.
beet, in yeast nutrients, assimilability of N in, 113^o.
beet, yeast production with, 1558^o.
as binding material in sand molds, 2640^o.
blending, 2393^o.
blending and handling, 1558^o.
canned, swells in, 668^o.
clarification of, 2570^o.
coloration of, 1368^o.
colors for, 1026^o.
cracking and hydrogenating, P 2556^o.
distillery slop, potash salt recovery from, 1204^o.
effect of charcoal decolorants on, 2900^o.
effect on nitrification in soil, 4004^o.
effect on soils, 3414^o.
elec. cond. of, ratio to ash, 3281^o.
feeding stuff contg., 289^o.
feeding stuff from, P 3095^o, P 3993^o.
fermentation of, 3417^o.
fermentation of, H-ion concn. in, 3418^o.
as fertilizer for sugar cane, 1163^o, 1893^o.
formation, theory of, 190^o.
as fuel, 3283^o.
gas formation in, 4086^o.
glucose in, 191^o.
glycerol from fermented mash, P 2528^o.
hydrogen-ion concn. of, detn. of, 3102^o.
hydrogen-ion concn. of French and of German, 833^o.
invert sugar in, H-ion concn. and, 189^o.
Java, products from, 190^o, 2572^o.
pressed yeast from, 982^o.
residues from alc. manuf., briquet binder contg., 812^o.
sucrose-free non-sugar solids of, prepn. of, 2393^o.
as sugar-factory operation touchstone, 833^o.
sugar recovery from—see *Sugar manufacture*.
sulfur compds. in, 668^o.
theory of, 3482^o.
utilization of, 3761^o.
viscosity detn. of, 3506^o.
waste, fertilizer from, P 2526^o.
waste, treatment of, 145^o.
for yeast manuf., P 3703^o.
- Moldable materials**. (See also *Plastic materials*.) P 307^o, P 990^o.
binders for, P 631^o.
of cellulose derivs. and albuminous substances, P 806^o.
cellulose ethers or esters, P 1548^o.
horn compn., P 3095^o.
from paper pulp "black liquor," P 822^o.
resistant to heat and acids, P 480^o.
urea-aldehyde condensation products, P 2539^o, P 3431^o, P 3432^o.
of wood and casein, P 631^o.
- Molded products**. (See also *Phenol condensation products*.) P 2174^o.
aggregate for making, P 4040^o.
of asbestos, etc., P 3109^o.
from asphaltic or similar materials, P 1693^o.
automobile windshield frames of synthetic resin, P 1365^o.
from buckram waste, etc., P 3719^o.

- cellulose-contg., P 822⁴.
 from clay, P 2545⁷.
 dolls, etc., P 308¹.
 from magnesium oxychloride, etc., P 3256¹.
 from oil and SnCl_4 , P 3719⁸.
 from polymerized chloroethylene, P 2906¹.
 of resinous products, P 3276⁷.
 from slags, etc., P 3110⁸.
 waterproofing, P 311⁸.
 of wood and silicic acid, P 1169⁸.
- Molding**, of abrasives, P 3439⁷.
 of algin-contg. material, P 161⁴.
 with binders of glyptal class, P 1337¹.
 of casts of living bodies, etc., compn. for, P 1527¹.
 of celluloid, artificial resin or horn, etc., P 292⁸.
 celluloid, etc., P 4036⁸.
 coating metal plates for, P 631⁸.
 of crucibles, P 3002⁸.
 of elec. insulators, 3241⁴.
 of fiber cement mixts., P 3115².
 of glass, machine for, P 4040⁸.
 of granulated cork, etc., P 3110¹.
 of laminated articles with curd base, P 161⁴.
 of mica with synthetic resins, P 1336⁸.
 of paper-pulp articles, P 3458⁸.
 of phenol condensation products, P 333⁴, P 2054¹.
 of pipes, P 3040⁷.
 of pipes, etc., P 3432⁴.
 plastic compns., P 2363⁸.
 powders contg. cellulose acetate, etc., P 1011¹.
 of resinous plastics, P 3376⁷.
 of rubber, P 674⁴, 4098¹.
 of vulcanized oil compns., P 2576⁸.
- Molding sand**. See *Sand*.
- Molds** (I). (See also *Glass*) P 2869⁸.
 for aluminum and its alloys, P 222².
 for belt pulleys, etc., P 3040⁷.
 binding material for sand, 2640².
 casting ingot, app. for, P 3886⁸.
 for casting metals, P 729¹, P 1443⁸, P 3342¹.
 for castings of varying cross-section, P 221².
 for cast iron, 2453¹.
 cement mixt. for, P 810⁸.
 for centrifugal casting of metal tubes, gears, ingots, etc., P 372¹.
 for chambered metal bodies, P 3886⁸.
 coating for, P 883⁸.
 coating of graphite for, 2640².
 coating with C, app. for, P 2870¹.
 for dental plates, etc., P 3432⁴.
 double-wall metal, for casting metals, P 729¹.
 drying furnace, P 2656².
 drying oven for, 2640².
 dry-sand cores, effect of moisture absorption on properties of, 2640².
 foundry, P 561⁸.
 ingot, P 222¹, P 372¹, P 1248², P 1443⁸, P 2870¹, P 3598¹.
 ingot, finishing, P 2870¹.
 for phenolic condensation products, etc., P 161⁴, P 996⁸.
 plaster of Paris, effect of Na_2CO_3 and NaSiO_3 on, 2641¹.
 plaster of Paris, re-use of, 2556¹.
 pottery, economic life of, 1875⁴.
 for stone pattern plates, P 2973⁸.
 wash for, P 372¹.
- Molds** (II). (See also *Aspergillus*; *Penicillium*.)
 of *Drosophila melanogaster*, relation to red toruli, 116⁸.
 effect on butter compa., 3987¹.
 on flour sacks (new and refilled), 2086⁸.
 growth of, CO_2 and, 2008⁸.
 growth of, vapor pressure and humidity for, 3647⁷.
 on lime coatings, prevention of, 1696⁸.
 nitrate assimilation by, 597⁷.
 on rubber, 3488⁸.
 rubber, prevention of, 1904⁸, 2077⁸.
 of sirups, prevention of, 1328⁸.
- Mole**, metabolism in, 3658⁸.
- Molecular association**, absorption spectrum of formic acid in relation to, 209⁴.
 effect on dielec. const., 852⁴.
 internal pressure of, 3780¹.
 in liquids, 3781¹, 4.
 molar concn. and, 3004⁴.
 of phenol in C_6H_6 and H_2O 71⁴.
 in phosgene solns., 3572⁸.
 phys. properties of, solns N in relation to, 1732⁸.
 temp. and, 2084⁷.
- Molecular asymmetry**. See *Asymmetry*.
- Molecular compounds**. See "addn." under *Chemical compounds*.
- Molecular heat**. (See also *Atomic heat*, *Specific heat*.)
 calcul. from equil. consts., 3150⁸.
 of gases, thermodynamics of, 2215⁴.
 temp. coeff. of, velocity of sound in steam, NiO and CO_2 with reference to, 1399⁸.
- Molecular induction**, in activation by impact, 2612⁴.
- Molecular number**, components of terrestrial strata and, 1907¹.
- Molecular refraction**. See *Refraction*.
- Molecular volume**, atomic vol. and, 1037¹, 2824¹.
 at boiling points, 681¹.
 of cobaltammines, 677⁸.
 contraction in, during compd. formation, 1218⁸.
 of cyclohexane derivs., 3780⁷.
 decrease in formation of solid compds., 3496⁸.
 of fused salts, periodic table and, 6¹.
 of halides, 1383¹.
 of homologous series, constitution and, 2826⁸.
 laws of solids, 3496⁸.
 linear relationship of, Biltz law of, 1801⁴.
 of methyluric acids, 2824⁸.
 of minerals of mica group, 2241⁸.
 of mixts. of Et_2O and HBr , 2592⁸.
 of platinum halides, 3289⁸.
 in soln. and in solid state, 847⁸.
 of uranium oxides, 3301⁸.
 variations of, in formation of halides, oxides and sulfides, 1382⁸.
 of water and salt in solns. of alkali halides, 2211¹.
 at zero abs., 3496¹.
- Molecular weights**, cryoscopic law of Raoult and, 2826⁸.
 detn. of, 2580⁸, 3495⁷.
 app. for, 3143⁸.
 by boiling-p. method, app. for, 2⁸.
 by centrifuging, 3289⁸.
p-dioxane as solvent in, 1098⁷.
 of org. substances, by f.-p. depression, 3495⁷.
 ultracentrifuge for, 1905⁸.
 from vapor d., 2296⁸.
 detns. of difficultly sol. substances in camphor, 2081¹.

- effect on ratio of internal pressure to d., 1728¹.
 of polymeric substances, detn. of upper limit by x-ray analysis, 1593¹.
Molecules, activated, nature of, 3832².
 activation of complex, by collision, 1047¹.
 activation of, theory of, 1046⁷.
 active section of gas, 2425².
 adsorbed, phys. properties of, 340¹.
 adsorbed solvent, motion of perisphere of, 2589².
 aggregation of, vol. and, 3783³.
 anisotropic, optical rotation detn. in systems of, 2419⁷.
 anisotropic, refractivity of, 1402².
 arrangement of, bending of x-rays in liquids as effect of, 1730⁹.
 beams of, intensities of, 2422².
 binding, band spectra and, 3023².
 books: Atoms and, 2848²; Die Verteilung der Elektronen in den, 3314².

 respiration in broth with continuous presence of phosphatization, effect of H-ion concn. on, 3940^a.
 respiration of, in tonus, 1485^a.
 respiratory quotient of exercising, 2299^a.
 rigor mortis, 2935^a.
 rigor mortis of glycogen-rich or glycogen-poor, 2308^a.
 Röntgen-ray effect on, 2318^a.
 striction in, effect of ions on, 2313^a.
 succinic acid detn. and formation in, 3210^a.
 succinic acid in, 3225^a.
 sugar degradations in, 2485^a.
 tensile strength of haddock, before and after various treatments, 3958^a.
 thiocyanate stiffening of, acid formation in, 2319^a.
 tissue, content in Ca, Mg and K from *Ilkibilol*. point of view, 2311^a.
 tissue, effect on acid-base equil. of blood, 3946^a.
 tonus, 457^a, 1845^a, 3661^a.
 tyramine effect on smooth, 461^a.
 ultra-violet light and, 2320^a.
 urea formation in, 1294^a, 3075^a.
 veratrine contractions of, effect of Mg and Ca on, 2332^a.
 veratrine effect on, 964^a, 2507^a, 3959^a, 3966^a.
 veratrine poisoning of degenerated, 1307^a.
 water content of, 2499^a.
 water storage by, 3661^a.
Muscol, 571^a.
 and derivs., 4016^a.
Musccone, 901^a, 3707^a, 3708^a.
 constitution of, and semicarbazone, 571^a and derivs., 4016^a.
 synthetic, 1329^a.
 —, benzylidene-, 901^a.
Muscovite, compn. of, 3031^a.
 crystal structure of, 3778^a.
 hydrolysis of, 2860^a.
 phys. and optical properties of, compn. and, 3584^a.
Museum exhibits, book: The Cleaning and Restoration of, 854^a.
Mushrooms. (See also *Amanita*.)
 acid formation in, 2490^a.
 edible, 285^a.
 growth of, dependence on quantity of nutritional factors, 2014^a.
 paste, P 2514^a.
 urea formation in, 2013^a.
Musk, artificial, 3705^a, 4017^a.
 natural, 3708^a.
 odorous principle of vegetable, 2118^a.
 oil of, 4016^a.
Mussels, chem. constituents of, 281^a.
 respiratory exchange of, 462^a.
Mustard, enzymes in black, 1666^a.
 flour, 2532^a.
 flour, allyl isothiocyanate in, 2759^a.
 seed, compn. of, 3382^a.
 detection of black, 1869^a.
 detection of white, 1869^a.
 seed preps. of black, decrease in mustard oil content of, 2758^a.
Mustard gas. See *Sulfide, bis(β-chloroethyl)*.
Mustard oil. See *Isothiocyanic acid* and "mustard" under *Oils*.
Musts, Algerian, 1517^a.
 compn. of, for 1925 in region of Hessian province of Starkenburg, 980^a.
 defecation and clarification of, pptn. of albuminoid substances in, 2526^a.
 fermentation of grape, effect of EtOH on selective action of yeasts in, 3417^a.
 pectins and gums in grape, 4012^a.
 sulfited, effect of O₂ and O₃ on, 150^a.
Mutarotation. See *Optical rotation*.
Mutase, in *Bacterium ascenden*s and *Lactobacillus*, 426^a.
 keto-aldehyde, 419^a.
 keto-aldehyde, in wheat, rye and soy-bean seeds, 3633^a.
Mutton-bird oil, 3064^a.
Myatonia, congenital, bleed P in, 2672^a.
Mycales, 1858^a.

Mycelium, of *Fusarium lycopersici*, protein analogies of, 1477¹.

luminous, of *Armillaria*, 1290⁸.

Mycobacteria, metabolism of, grown on paraffin, 3381⁴.

Mycology. See *Fungi*.

Mydriasis, cocaine, 2322⁴.

Mydriatics, analysis of, 3423⁷.

Myelin, kidney, 602⁹.

staining, 128⁴.

Myoarsphenamine, chemotherapeutic activity of, 2032³.

Myoma, basal metabolism in, 2731⁷.

inorg. content of myomatous uterus, 1298⁹.

Myophosphate, 439⁹, 440⁹.

Myophosphatase, 105⁴.

Myoporum laetum, constituents of, 2263⁷.

Myristamide, heat of crystn. and m. p. of, 2874⁴.

—, *N, N'*-*p*-phenylenebis-, 2884⁴.

Myristate ion, partition between water and EtOH, coeff. of, 3309⁴.

Myristic acid (tetradecanoic acid), addn. compd. with desoxycholic acid, 1127⁴.

butyl ester, P 593⁴.

and esters, m. p. and heat of crystn. of, 2874⁴.

heat of crystn. of, 13⁷.

prepn. of, 3347⁹.

salicylate, therapeutic action of, 1328⁹.

surface tension of naphthene solns. of, 3004⁹.

—, *ν*-carbamyl-β (or μ)-methyl-, 3349⁹.

—, α-mercapto-, 3045⁹.

Myristicin, ring cleavage in, 2256⁷.

Myristyl alcohol. See 1-Tetradecanol.

Myrobalans, 834⁴, 1895⁵.

Myrosin, 983⁹.

Myrosinase, sulfatase and, 923⁹.

Myrrh, coniferyl reaction of, 183⁴.

Myrtle, oil of, 1869⁹.

Mytilitol, from mussel, 281⁹.

Mytilus. See *Mussel*.

Mixedema, basal metabolism in, 3675⁹.

blood changes in, 3670¹.

blood P in, 3672³.

calcium excretion in, 3949⁷.

diabetes mellitus and, 956¹.

from thyroidectomy, 608¹.

water metabolism in, 1675⁴.

Naccari, Andrea, biography, 3773¹.

Nacre, pearl, crystal structure of, 2141³.

Nacrite, chem. and mineralogical studies of, 877².

Nadorite, 3584⁴.

Nadsonia fulvescens. See *Yeasts*.

Naegleria, specific wt. and vol. of, 3685⁴.

Naganol, treatment of trypanosomiasis of camels with, 3956⁹.

Nandina domestica, alkaloids of seeds of, 3703^{4, 9}.

Nantenine, 3708^{4, 9}.

Nao-yang-hua, poison from, 3679⁹.

Naphtha. (See also *Benzine*; *Gasoline*.)

blending of natural gasoline and, 3125⁴.

corrosion by S and S compds. in, 2785⁹.

cracked, gasoline from, 2788³.

sol. of C₁₀H₁₄ in, 1678⁹.

solns. of org. S compds. contg., S removal by NaOCl, 1004⁹.

solvent—see *Solvent naphtha*.

yield from coal tar, effect of steaming on, 486⁴.

Naphthacridine,

1,2-Naphthacridine. See 1,2-Benzacridine.

2,3-α-Naphthacridine, 6,7-dihydro-, 1123⁴.

2,3-α-Naphthacridine-5-carboxylic acid, 6,7-dihydro-, 1123⁴.

4-Naphth-1,8-αβ-acridine-8-carboxylic acid, 5,6,6a,7-tetrahydro-, 1123⁴.

9-Naphth-3,1-δε-acridine-9-one, 1,3 (and 1,4)-dimethyl-, 1268¹.

—, 3-methyl-, 1268¹.

Naphthalen, benzal-α-naphthyl-, 3197³.

—, benzal-α-tolyl-, 3197³.

Naphthalanilide, 2682⁹.

—, *N, N'*-dimethyl-, 2682⁹.

1-Naphthaldehyde, manuf. of, P 1272⁸.

—, 2,4-dinitro-, 2268⁹.

—, 2-hydroxy-, acetyloxime, 3363⁵.

—, 2 (and 4)-methoxy-, oximes, and their derivs., 3618⁷.

—, 5-methoxy⁹, and derivs., 909⁹.

—, 5,6,7,8-tetrahydro-2-hydroxy-(7), derivs., 1983⁷.

2-Naphthaldehyde, 1-hydroxy-, condensation with benzoylacetone, 378⁴.

—, 5,6,7,8-tetrahydro-2-hydroxy-(7), derivs., 1983⁷.

Naphthalene, addn. compd. with 2,4-dinitrophenol, 232².

alkyl derivs., as lubricants for refrigerating app., P 3370⁴.

autoxidation of, 3451⁶.

azine dyes from, 1987⁹.

book: Compds., Terpenes and Camphors, 916².

carbureting air with, for operating internal-combustion engines, P 315².

cataracts from, effect of insulin on, 1311⁵.

comparison with bicyclic compds., 2689⁹.

crystn. of, P 2703⁴.

deriv., (C₁₀H₁₄), from tetracyclosqualene, 1112².

derivs., P 916⁴.

dictn. in gases, 3327⁹.

diffraction of x-rays in, 3551⁴.

effect on d. of solvent, 3794⁹.

effect on fermentation, 3067³.

elec. cond. in solid and liquid state, 3523⁴.

- extn. with tetralin, 3446².
 fumigation of greenhouses with, 792⁷.
 in gas, effect of cooling on, 3119⁴.
 in gas mains and meters, 2373⁴.
 gas-pipe deposits, removal of, 2180⁴.
 in gas pipes, prevention of collection of, 1880⁴.
 from high-temp. carbonization, 2376².
 hydrogenated, detn. of alcs. in mixts. of, 3581².
 hydrogenation of, 2470⁴, 3197⁵.
 hydrogenation of, catalysis of, P 2556².
 light phenomena of, 3832².
 manuf. of, 1880⁴.
 molding compn. from reaction of S, etc., with, P 996⁴.
 nitration of, 2256⁴.
 ocular lesions from, 1311⁴.
 phthalein prepn. from, 239⁴.
 poisoning, glucemia in, 3088⁷.
 polyhalogenated, as vermin-proofing agent for textiles, wood, furs, leather, etc., P 2540⁷.
 reaction with H, 166⁷.
 recovery from gaseous mixts., P 617⁴.
 reflecting power of atom for x-rays, 1058⁷.
 removal from coal gas, app. for, P 2378¹.
 removal from gas, 2975⁴.
 singular isotherms of soly. of, in mixts. of aniline and allyl mustard oil, 3803⁷.
 soly. in aromatic hydrocarbons, 1578⁴.
 in C₆H₆, toluene and xylene, 2211².
 in liquid NH₃ and in liquid SO₂, 3047⁴.
 soly. relations of, 11².
 stereochemistry of hydro derivs., 909⁴.
 sulfonation of, 1450⁴.
 sulfuric acid used in refining, recovery of, P 3454⁴.
 sulfur removal from, P 3454⁴.
 synthesis of homologs of, 581⁴.
 system: *m*-dinitrobenzene-, 523⁴.
 system: guaiacol-, 1583⁴.
 in tar, 3731⁴.
 temp. for initial combustion of, 1697⁴.
 titration in gases, 4051⁴.
 vapor pressure at low temps., 681⁴.

Narcissus bulb fly. See *Merodon equestris*.

Narcosin, for drug addiction treatment, 3253².

Narcosis. (See also *Anesthesia*.)

by anesthetics, increasing by simultaneously affecting diff. portions of brain, 458².

with barbituric acid derivs., 3085².

carbonic auto-, in silkworm, 1499².

chloralose, gastric secretion during, 3627².

chloroform, lobeline tolerance in, 1849².

cocaine, effect of pyrogallol and of ethyl carbamate on, 1850².

effect on brain compn., 2328².

effect on labor pains, 3963².

of heart modifying, 460².

inhibition of diuretic action of caffeine and theobromine through midbrain, 3970².

ion shift in blood during, and conditions of stimulation, 1496².

law of, 454².

partition coeff. of hypnotics between water and org. solvents, 961².

rectal, with avertin, 2154².

with solästhin, 2032².

thyroid exts. and, 453².

by urethan, effect on sp. dynamic action of glycine and glucose, 2325².

Narcotics, activity of, detn. of, 1497², 1498¹.

effect on convulsions from strychnine, picrotoxin, and physostigmine, 3681².

effect on rotary reflex, 2335².

hormones and, 3962².

sedative action of, 2335².

tolerance to, 459².

triacetylpyrogallol-*o*-carboxylic acid, 2329².

Narcotine. (See also *Opium alkaloids*.)

in opium smoke, 3965².

oxidation of, 247².

spectrum of mixt. with morphine, 915².

thread formation and surface tension of, 3291².

Narcotine oxide, 247².

Narcysten, effect on circulation, 2334².

effect on labor pains, 3963².

Nardostachys jatamansi, oil of, 4015².

Naringin, in grape-fruit rind, 1833².

Natalite, as internal-combustion fuel, 2974².

National defense, chemistry and, 3691¹.

Natrolite, 3861².

Naumannite, 3859².

Navy bean. See *Beans*.

Nebulae, theory of, 531².

Necrologies. See *Obituaries*.

Necrophorus, olfactory sense of, 3235².

Necrosis, pancreatic, diagnosis by detn. of diastase in urine, 3229².

phosphorus, in manuf. of fireworks and in prepn. of P, 1887².

Nectar, of Sarracenaceae, 2916².

Needles, pleochroitic fat fibers on, with which insects have been pierced, 923¹.

Negatives. See *Photography*.

Nekal, as wetting-out agent for textiles, 2988¹.

Nekal A, as wetting-out agent for textiles, 2988¹.

Nematode, glycogen content of larva of, relation to its wandering in host, 139².

Neocarsenobenzene, standardizing dose of, 3709².

Neocarsphenamine. (See also *Arsphenamine*.)

compn. and analysis of, 3104².

effect on immune body formation, 3981².

effect on leucocytes, 959².

infectious anemia treatment with, 1307².

pharmacol. action of, 133².

sensitivity to, in vitamin-poor diet, 2329¹.

syphilis sterilization with, 1311².

Neobornylamine, *d*-, sepn. from *d*-bornylamine, 2264².

Neobrucinilium compounds, dihydromethyl—iodide², 3367².

methyl— salts², 3367².

Neodymium, atoms, electron formation in, 2421².

spectrum of, 857², 1210², 2606², 2609², 2609², 3020², 3159², 3310².

thermal emission of, 701².

Neodymium, analysis, detn., 1939², 3849².

Neodymium ammonium sulfate, 3841².

Neodymium bromate, soly. of, 870², 1045².

Neodymium compounds, amino-, spectrum of, 1218².

with pyrocatechol or pyrogallol, 867².

Neodymium oxalate, soly. of, 1939².

Neodymium oxides, soly. of Nd₂O₃, 2412².

spectral distribution of radiation from mixts. with ThO, 4051².

Neodymium potassium silicate, 3843².

Neodymium rubidium sulfate, properties of, 2855².

Neodymium sulfate, system: (NH₄)₂SO₄—H₂O—, 3841².

system: Rb₂SO₄—H₂O—, 2855².

Neoglucose, 1671².

in blood in diabetes, 1677².

in blood in diabetes, effect of insulin on, 1677².

oxidizability of, 1129².

Neomenthol. See *Menthol*.

Neomenthylamine. See *Menthylamine*.

Neomerpin, as wetting-out agent for textiles, 2988¹.

Neomerpin N, as wetting out agent for textiles, 2988¹.

Neon. (See also *Helium group*.)

crit. consts. of, 1036².

density of, 1576².

glow discharge of, gradient in positive column of, 2221².

ionization and luminosity produced by stationary elec. oscillations in, 3824².

ionization by electron impact in mixts. of, 2098².

ionization potentials of, 3309², 3827².

metastable states of, life period of, 1588².

mixing with He, pressure effect in, 2408².

mixts. with CO and N, simultaneous ionization and excitation by foreign ions in, 2426².

potential difference between striations in positive column in, 2220².

rays of, 2101².

soly. in cyclohexanol, 1741².

soly. in water, 2210².

soly. of, temp. and, 680².

sparkling potentials of, 2604².

spectrum of, 15², 1059¹, 1407², 1930¹, 2226²,

2843², 2844², 3020², 3553¹, 3554², 3558², 3828^{1,2}.

stopping power for α -particles, 2423².

surface tension of liquid, 202².

thermal cond. of, 2206².

in vacuum tubes, 529², 700¹.

vapor pressures of solid and liquid, 2206².

Zeeman effect of, 3021².

Neoplasms. (See also *Cancer*; *Sarcoma*; *Tumors*.)

carbohydrate metabolism in, 1489².

- catalase activity of, 2027⁴.
 cholesterol production by, 2931⁴.
 formation of malignant, effect of vitamin deficiencies on, 2149⁴.
 hydrogen-ion concn. of, 2030⁴.
 nucleo-plasmotic relation in tissue of, 268⁷.
 physico-chem. and biochem. aspects of malignant, 955⁵.
 treatment of malignant, with colloidal Pb, 3967⁴.

 reaction with Grignard reagents, 1108¹, 2270¹, 2271¹.
 with H₂S, 1453¹.
 with H₂S, velocity of, 77¹.
- Nitrites**, blood poisoning by, 2737¹.
 detection, 873¹.
 detection and detn. of, 2629¹.
 detn., 30¹, 1075¹, 2629¹.
 detn. in meat products, 2943¹.
 effect on plant growth, 942¹.
 oxidation and reduction by insol. Fe compds., 2855¹.
 production by *Verticillium*, 3930¹.
 in sea water, 1825¹.
 in urine as indication of *B. coli*, 1674¹.
- Nitroacetic acid**, carbon dioxide formation from, reaction velocity consts. for, 1580⁷.
- Nitrocellulose**. (See also *Explosives*; *Pyroxylin*.)
 absorptive power for gases and reducing power of, 1707¹.
 adhesive action of, 990¹.
 analysis of, 648¹.
 bleaching of, 1008¹.
 for celluloid, 1008¹.
 for cellulose varnishes, 504¹.
 coatings, P 1717¹.
 for coatings, etc., P 2798¹.
 collodions, 3741¹.
 colloidal, viscosity anomalies in, 1707¹.
 colored coating contg., P 3751¹.
 color in polarized light, N content and, 496⁷.
 consistency of solns. of, effect of thinners on, 3276¹.
 crystal structure of, 174¹.
 electrodeposition of, P 2438¹.
 explosion of, at Hasloch, 3464¹.
 films, artificial leather, etc., from, P 650¹.
 films, effect of org. bases in plasticized, 2984¹.
 films from, phys. properties of, 182¹.
 gelatinizing, P 3464¹.
 lacquers—see *Lacquers*.
 for lacquers, P 4068¹.
 for lacquers, storage and handling of, 183¹.
 manuf. of, P 495¹, 496¹, 1547¹, 2567¹.
 paints—see *Paints*.
 plastics contg., P 650¹.
 plastics, stabilizing, P 2189¹.
 prepn. by nitrating cellulose in presence of H₃PO₄, 2795¹.
 prepn. of slightly sol., 2559¹.
 properties of, 1707¹.
 reviews, 2383¹, 2795¹.
 Röntgen-ray diffraction of, 3552¹.
 soly. of, 3403¹.
 soly. of, in alc., 3269¹.
 solvents, diluents and plasticizers for, 827¹.
 solvents for, P 307¹, 2567¹, P 3478¹.
 diln. ratios of, 3275¹.
 recovery during spraying, 182¹.
 storage and transport, P 2384¹.
 varnishes—see *Varnishes*.
 varnishing with, 1716¹.
 viscosity of, altering, P 1548¹.
 constitution and, 3457¹.
 in mixts. of solvents, 1889¹.
 reducing, P 2558¹, P 2985¹.
 waste, recovering values from, P 3129⁷.
 from wood cellulose, 651⁷.
 wood-grain designs on sheet compns., P 650⁷.
 from wood pulp, P 3461⁷.
- Nitro compounds**, addn. compds. with Sn and Ti chlorides, 1418¹.
 constitution of, 2673¹, 2681¹.
 detn. of, 38¹.
 from isonitro compds., 2668¹.
 o-, reaction with CH₃N₃, 2897¹.
 oxidation of aromatic, by K₂S₂O₈, 2674¹.
 oxidation of side-chains by, 231¹.
 persubstituted, similar behavior of, and N-halo acid amides, 52¹.
 reaction of aromatic, with hyponitrous acid, 904¹.
 reduction of, 1637¹, P 2439¹, 2466¹, P 3205¹, P 3370¹, P 3908¹.
 reduction of aromatic, 1799⁷.
 reduction of, with Na-Hg, 376¹.
 relation of aromatic, to, azoxy compds., 2133¹.
- Nitroferrocyanides**, reaction with alkalies, 3323¹.
- Nitrogen**. (See also *Azotemia*; *Fertilizers*; *Nitrogen fixation*.)
 absorption by Fe in open-hearth process, 1614¹.
 absorption of H-rays by, 2601¹.
 absorption of slow cathode rays in, 3547¹.
 active, 620¹, 1036¹, 1588¹, 2840¹, P 3255¹.
 afterglow of, 3313¹.
 chemiluminescence of, 705¹.
 elec. cond. of, 3548¹.
 elec. properties and nature of, 3155¹.
 electrodeless discharge and, 2220¹.
 energy of, 2613¹.
 film production on W by, 3548¹.
 ionization in, 3546⁷.
 nature of, 3823⁷.
 reactions with gases, 2093¹.
 spectrum of C₂H₂ in, 20¹.
 adsorption by activated charcoal, 1042¹.
 adsorption on thoria catalyst, 690¹.
 in albumin of developing egg, 1838¹.
 alpha-particle attachment to nucleus of, 855¹.
 of amino acids in blood of angiotomized dogs, reaction of organs to, 1142¹.
 in apple flowers and fruit, 2292¹.
 assimilation in sunflower, 1289¹.
 assimilation of fixed, by Havana tobacco, 3701¹.
 atomic decompn. by α -rays of Po, 3152¹.
 atomic wt. of, 1381¹, 1882¹.
 in avian embryos, rhythm of chem. differentiation and, 2939¹.
 barley yield from seed of same stock but of diff. content of, 3249¹.
 beer turbidity and, 2527¹.

- in blood and urine of turtle, 3983¹.
 in blood, in alkalosis, 605¹.
 in dermatitis, 2930⁴.
 effect of adrenalectomy on, 1670⁴.
 effect of insulin and of hypophyseal ext. on, 456¹.
 effect of spleen and reticulo-endothelial system on, 3225⁹.
 of hen embryos, 1839¹.
 as index of urogenic function, 2006².
 of blood normally, in inanition and in diseases 2027⁹.
 blood peptide, in arterial hypertension, 3670⁵.
 in blood serum in kidney impermeability, 1146⁹.
 in blood sugar and urine, ratio to dextrose following pancreatectomy, 764⁸.
 in cacao by-products, plant-food value of, 1324⁹.
 -carbon ratio in urine, 3684².
 after castration, during pregnancy and after administration of ovarian substances, 445¹.
 effect of alkali salts on, 1480¹.
 effect of feeding preps. of thyroid and hypophysis on, 456⁸.
 effect of feeding NaCl, NaBr and NaI on, 1479⁹.
 effect of food compn. on, 3655⁴.
 effect of inorg. and org. alkali salts and hormones on, 763².
 effect of Fe₂O₃ on, 457².
 effect of medicines on, 454¹.
 effect of phenylhydrazine anemia on, 457¹.
 with vitamin-rich mineral-matter-poor diets, 441⁷.
 of cartilage at diff. ages, 2303⁴.
 in cerebrospinal fluid in nephritis, 2931¹.
 chem. const. of, 3504².
 chem. inertness of, 3016².
 from coke-oven gas, 3119².
 compressed, water vapor concn. in, 844¹.
 compressibility isotherms of, and of its mixt. with H, 1387¹, 3504².
 condition equation for, 680⁴.
 consumption, quant. law of min., 1835⁴.
 crit. const. of, 1036¹.
 crit. potentials of, 3823⁷.
 cryst., 345⁷, 1219².
 density, compressibility and at. wt. of, 1035⁹.
 density of, 1381⁹.
 density of, temp. and, 3505⁷.
 deposition when food protein is replaced by glycooll and NH₄ acetate, 441⁹.
 detonation of mixts. with O and C₂H₂ or pentane, 2065^{2,3}.
 dielec. const. of liquid and solid, 1401⁴.
 dielec. const. of, pressure influence on, 1587².
 diffusion into gelatin of mixt. with NH₃, Liesegang ring formation in, 1911⁸.
 diffusion into iron and steel, 1623¹.
 disocn. by Hg atoms excited in an arc, 1762⁹.
 effect on coke, 3265².
 on decompn. of NH₃ sensitized by Hg vapor, 3024⁷.
 on protein content of soy bean, 1136⁴.
 on soly. of ferrous materials in HCl, 544⁴.
 elec. glow discharge in, gradient in positive column of, 2221⁹.
 elec. glow discharge in, study with exploring electrode, 2424⁹.
 elec. oscillations in, and in mixts. of H and N, 2596².
 elec. spark in, 2847².
 electrons, energy loss on collision with mols., 2099⁸.
 electrostriction in, 524⁵.
 energy efficiency in function of nature of alimentary, in higher plants, 1130⁷.
 equil. in distn. of coal, 2547².
 equil. in growing animals, effect of long-continued maintenance of, 438⁹.
 equil. in secretions under normal and pathol. conditions of gland innervation, 446⁹.
 equil. pressures of NH₃ mixed with, 2213².
 excretion of, during addn. of carbohydrate to protein diet, 3936¹.
 in curarized frog, 123⁹.
 during fast, effect of protein in previous diet on, 2495¹.
 after gastrointestinal obstruction, 1306⁷.
 in hunger and in vitamin-B starvation, 3654⁴.
 during pregnancy, 2505⁸.
 through skin, 766².
 in urine in diabetes, diet and, 3219⁴.
 explosive limits of mixts. with other gases, 850¹.
 in fertilizers, detg. availability of, 2349¹.
 in flax plant, 2803⁸.
 formation of, ionization potentials for, 2603².
 in green manures, availability of, 978¹.
 heat of adsorption by charcoal, 3535⁴.
 heat of adsorption of, pressure and, 1577².
 heat of assocn., lower limit for, 1062².
 heat of disocn. and ionization potential of, 3548¹.
 heat of disocn. of, 851².
 in hide substance, 192².
 -hydrogen bond, infra-red absorption by, 1224².
 industry, 802², 2762².
 in industry, 1524².
 industry in Germany, 1167².
 inorg., world's industry in, 990¹.
 internal pressure and coeff. of expansion of, 348⁹.
 ionization and luminosity produced by stationary elec. oscillations in, 3824⁸.
 ionization by collisions of 2nd kind in mixts. of, with rare gases, 2427².
 ionization in, 3017⁷, 3823².
 ionization in collisions between electrons and atoms in, 2590⁸.
 ionization of atm., 1406⁴.
 ionization potentials of, 3309², 3827⁷.
 ionization potentials of, on metals, 17¹.
 in life cycle of *Malacosoma americana*, 3237².
 in liver at high altitudes, 3664⁴.
 luminescence of solid, auroral spectrum and, 2428².
 under cathode-ray bombardment, 3831⁹.
 at temp. of liquid H, 3311⁷.
 magnetic susceptibility of, 356⁹, 1921².
 manuf. of, P 478².
 in manure (hot fermented) action of, 2954⁷.
 metabolism of, app. for study of, of animals, 931².
 in As and Sb poisoning, 3969¹.
 in bacteria, effect of degree of vaccination of medium on, 2007².

- in chick embryo, 123¹.
 in dairy cattle, 1482⁹.
 effect of bleeding and of blood transfusion on, 1142³.
 effect of diet of fresh and treated milk on, 437⁸.
 effect of feeding active Fe₂O₃ on, 3655⁸.
 effect of iodides on, 3393⁸.
 effect of salicylates on, 3977⁸.
 encephalitic rigidity and, 3675⁸.
 in lead poisoning, 3972⁴.
 of nervous system, 3659⁸.
 in plants, deficiencies in, 435⁸.
 in potato tubers (dormant and non-dormant), 3231².
 in puerperium, 2493⁷.
 in scurvy, 1479⁹.
 of steers on rations contg. alfalfa as sole source of N, 1480⁷.
 metabolism of endogenous, in molting hens, effect of cystine on, 3387⁴.
 mixts. with A, Ne and Hc, simultaneous ionization and excitation by foreign ions in, 2426⁸.
 mixt. with H for NH₃ synthesis, P 4034².
 mol. heat of, 3151¹.
 mols., active section of, 2425⁸.
 cross-sections of, 529⁹.
 cross-sections toward slow electrons, 2425².
 in mycelium of *Aspergillus niger*, 2715⁹.
 non-protein, in blood of Indians in health and in disease, 3301⁸.
 in blood of natives and Europeans in tropics, 602⁸.
 in dairy rations and partition of N in urine produced thereon, 3935⁸.
 in nutritional disturbances of infants, 259⁷.
 nutrition of Mucors, 2294⁸, 3069⁸.
 oxidation in mixts. of O and, 3576⁸.
 oxygen removal from, 1602⁹.
 partition in brain ext., 2309⁸.
 partition in lobes of frog liver, 3668².
 in peat fertilizers, increasing, 790⁸.
 phosphorescence of, 207⁸.
 phys. properties of gaseous, mol. aggregation and, 1732⁴.
 plant distribution and, 3217².
 in plant nutrition, 2351⁴.
 in plants, ratio to carbohydrate, 3383⁸.
 pressure of, in discharge tubes, 3155⁹.
 production statistics, 466⁴.
 proportionality between constituent gases in crude, 2405¹.
 in protamine of sardine, 462².
 protein increase in wheat by supplying, during growth, 1827⁸.
 of proteins, assimilation of, 1832².
 purifying, for NH₃ synthesis, etc., P 3427⁹.
 in rain water in New York, 785⁸.
 ratio to A in gases of thermal springs of Bulgaria, 3864⁴.
 ratio to dextrose in fasted, depancreatized dogs, 3230².
 reaction with H, electronic activation of, 3548³.
 with incandescent W, 3573².
 with light metals and their carbides in KCNS, 366⁴.
 with Li, 689⁸.
 residual, absorption of amino acids by red blood cells in relation to distribution of, 449⁸.
 review, 158⁹.
 secondary β -rays in, ranges of, 698⁴.
 sepn. by fractional liquefaction, P 783⁷.
 sepn. from air, P 1320⁸, P 2749⁸, P 3095⁷, 3993⁹.
 sepn. from air, app. for, P 144⁴, P 291⁹, P 344¹, P 783², P 1208¹, P 2578⁹.
 in soils, effect of growing legumes on, 1163⁴, 3698⁴.
 ratio to C, 3099⁴.
 relation to yield and protein content of wheat, 4006⁸.
 of rice fields, ratio to C, 2951⁸.
 in soils (irrigated), effect of cropping on, 3246⁸.
 soil supplies of, effect of liming and green manuring on, 2753⁸.
 solid, in atmosphere, 38321².
 soly. of, effect of salts on, 686⁷.
 in metals and alloys, temp. and, 553⁸.
 in petroleum, 1741⁸.
 temp. and, 680⁷.
 soly. of pure and atm. in, in distd. and sea water, 844⁷.
 solns. in SnCl₄, f. ps. of, 1578⁸.
 source for bacilli, incubator air as, 1474¹.
 sources for yeasts, NH₄ tartrate and asparagine as, 113⁸.
 specific heats of, 1550⁹.
 spectrum of, 20⁸, 206⁸, 359⁸, 359⁹, 530⁸, 1062², 1407⁴, 1408⁸, 1750⁹, 1931¹, 2224⁸, 2431¹, 3021⁴, 3159⁴, 3541⁴, 3829⁹.
 spectrum of, excitation by electron collision, 1758⁸.
 in sugar cane root dry matter, 3414⁹.
 system: O, 1732⁷.
 thermal diffusion with CO, 2408⁸.
 treating with gases, app. for, P 1208².
 urinary, not determinable by Kjeldahl procedure, 1144⁸.
 in urine after pancreatectomy, ratio to glucose, 3669⁹.
 protein intake as indicated by, 601¹.
 in wheat diet, 2721⁷.

Octene, polymerization of, 1735⁴.
 soly. in liquid NH_3 and in liquid SO_2 , 3047⁷.
 Δ^4 - 3 - Octenol, 3,7-dimethyl-, 732⁸.
 Δ^2 - 4 - Octenol, 2-methyl-6-methylene-, 907².
 Δ^2 -4-Octenone, 2,6-dimethyl-, 907².
 —, 2-methyl-6-methylene-, 907².
 α -Octinamide, 2875⁴.
***n*-Octoic acid. See Caprylic acid.**
Octyl alcohol, diffraction of x-rays in, 3551⁷.
 effect on atropine action on nerves, 3970¹.
sec-Octyl alcohol. See 2-Octanol.
Octylene. See Octene.
Odors. (See also Deodorants; Deodorization; Perfumes.)
 absorption by milk, 3239³.
 butter aroma, bacteria of, 935⁴.
 chem. constitution and, 107⁹, 255⁹, 1985⁹, 2140⁹, 2262⁹.
 in dyed goods, 1188⁴.
 of Leyden grachten, 1509³.
 mol. asymmetry and, 229³.
 in Pharmacopoeia, codification of, 2758⁹.
 sense of Coleoptera, 3235⁹.
 sensitivity of insects to, 3235⁹.
 in sewage disposal, control of, 2041⁴.
 in sulfate pulp manuf., 178⁹.
 in woolen goods, 1188⁴.
Oenothera biennis, compn. of, 1829⁷.
Oenlager, biography, 1373⁹.
Ohm's law. See Laws.
Oidium, *lactis*, cleavage of phenylaminoacetic acid by, 1862¹.
 lupuli, fermentation of glucose by, 2354¹.
Oil cake. (See also Press cake.)
 chem. nature of, 4081⁴.
 lime-seed, 1194⁹.
 treatment of die-back disease of orange trees with, 3249⁷.
Oilcloth. (See also Linoleum.) P 332⁹.
 coated fabric similar to, P 1194⁴.
Oil gas. See Gas, illuminating and fuel.
Oiliness, of lubricants, effect of kerosene on, 1181⁹.
 in milk, 8091⁴.
Oil meal, of *Commiphora zanzibarica*, 1022⁴.
 of *Trichodesma zeylanicum*, 1022⁴.
Oil Red O, as fat stain, 1283¹.
Oils. (See also Emulsions; Fats; Hydrogenation; Petroleum; Saponification; Saponification number; Seeds.)
 absorbent for, P 479⁹.
 absorption by pigments, 845⁴.
 absorption, for natural gasoline plants, 3125⁴.
 acetone—see Acetone oil.
 acetyl no. detn.—see Acetyl number.
 acidity detn. in fatty, 661².
 of *Acorus gramineus*, 2049⁴.
 of *Acrodictidium mahuba*, 1365⁴.
 adsorbent for treating, P 3287⁴.
 aging of, 2223⁷.
 from *Aleurites* species, 662⁹.
 of *Aleurites trisperma*, 662⁹.
 analysis of, 185⁴, 1197⁷, 3103¹.
 ancient Egyptian, 199⁹.
 of *Angelica*, musk-like lactone of, 3707⁹.
 anise, 1870⁷, 2531¹.
 cholera prevention and treatment with, 775⁴.
 distinguishing from star anise oil, 1327⁴.
 of *Anona squamosa* seeds, 3278¹.
 anthracene—see Anthracene oil.
 argan, consts. of, 2195⁴.
 of *Argania sideroxyylon*, 2073⁹.
 of *Artemisia maritima*, 4020².
 of *Asarum caudatum*, 4026⁷.
 of Australasian petrel stomach, vitamin D content of, 3072².
 autoxidation of, 1914⁴, 3451⁴.
 bay, 2168⁴.
 bay, compn. of Grecian, 1327⁷.
 bergamot, 4014⁴.
 of bitter almond, 1870⁷.
 bleaching earths for, action of, 663⁴.
 bleaching with earths, 1717⁷, 2811³, 3757⁷.
 of *Bombax angulicarpum* seeds, 663¹.
 books: Untersuchungs-methoden der, 665⁹; Edible, 665⁹; The Essential, 2051⁹; The Oil and Colour Chemists' Handbook, 2072⁹; Technologie der, 2074⁹; Chemistry of the Oil Industries, 2074⁹; A Short Hand-Book of Oil Analysis, 2095⁹; Die Raffination der, 3476⁹; Essence naturali (oili essenziali), 3711³; d'animaux marins, 3759⁹; Fabrication des savons industriels—Emulsions pour l'ensimage et huiles solubles, 3759⁹.
 in bread-making, 613¹.
 cajaput, 1870⁷.

- cajaput, cholera prevention and treatment with, 778^a.
 of *Calamintha nepeta*, 2165^a.
 of camomile, 984^a.
 camphor—see *Camphor oil*.
 candlenut, 1195^a.
 candlenut, bromides of, 183^a.
 caraway, 1890^a.
 carbon for purifying and clarifying, P 3430^a.
 of *Carpotroche brasiliensis*, Et esters of fatty acids of, leprosy treatment with, 2034^a.
 cashew-nut shell, manuf. of, P 3476^a.
 cashew-nut shell, reaction products from, P 3759^a.
 castor—see *Castor oil*.
 cedar, color reaction of, 425^a.
 from cedar wood, 2555^a.
 from cellulose waste liquors, P 4069^a.
 centrifuge for, P 1381^a.
 from *Cerbera odollam* seeds, 3277^a.
 of *Chamaecyparis nootkatensis*, 2532^a.
 chaulmoogra—see *Chaulmoogra oil*.
 chaulmoogra-group, 2958^a.
 chemistry of, 949^a.
 chenopodium—see *Chenopodium*.
 of cherry laurel, 1870^a.
 cineole detn. in essential, 2758^a.
 cinnamon, 1870^a, 4015^a.
 cinnamon, soln. of, 2530^a.
 citronella, 2048^a, 4014^a.
 alc. detn. in, 2960^a.
 analysis of, 2167^a.
 distn. of, 3421^a.
 production of, 3707^a.
 properties of, 3707^a.
 citrus, 1870^a, 3938^a.
 origin and function of, 757^a.
 vitamin content of, 3219^a.
 clarifying, P 1320^a.
 clarifying and decolorizing material for, P 3718^a.
 clarifying with centrifuges, 466^a.
 closure for tanks, stills, vats, etc., P 2822^a.
 clove, 1870^a, 2531^a.
 clove, detection of eugenol and isoeugenol in, 2757^a.
 coconut—see *Coconut oil*.
 cod-liver—see *Cod-liver oil*.
 of coffee nut tree seed, 3137^a.
 cold test on, detn. of, 4080^a.
 color and transparency of, detn. of, 1192^a.
 color reading of, 1197^a.
 colors of, 3278^a.
 of *Commiphora sansibarica* seeds, 1022^a.
 core, specifications for, 2640^a.
 coriander, 4014^a.
 corn—see *Corn oil*.
 for cotton dyeing and finishing, 326^a.
 of cotton plant, 944^a.
 cottonseed—see *Cottonseed oil*.
 cracking and hydrogenating, P 2556^a.
 creosote—see *Creosote oil*.
 croton, 2531^a.
 cubeb (false), 577^a.
 cuirol leather, 1565^a.
 from *Curcuma aromatica* rhizomes, 798^a.
 decompn. in, 2809^a.
 deodorizing, cooling and dehydrating, app. for, P 3288^a.
 dephlegmator for, P 2579^a.
 by destructive distn. of waste cellulose liquor or other org. materials, P 321^a.
 detn. in cyanamide, 2447^a.
 detn. in seeds, 2810^a.
 detn. of added, in opium, 876^a.
 detn. of fatty, in balsam (Peru), 4016^a.
 detn. with refractometer, 1198^a.
 of *Digitalis purpurea* seeds, 4019^a.
 of dill seed, 2960^a.
 disperse systems of, 3789^a.
 distn. of, 2811^a, P 3404^a, P 3476^a.
 distinguishing, ultra-violet app. for, P 199^a.
 of dogfish liver, 2814^a.
 of dogfish liver, vitamin A content of, 3936^a.
 from dolphin head, 185^a.
 driers for, metals as, 827^a.
 drops, effect of interfacial tension on division of, 2139^a.
 drying, P 1003^a.
 chemistry of, 2070^a.
 drying process of, 1718^a.
 effect of cathode rays on, 3136^a.
 oxidation of, 184^a.
 requirements for, 2071^a.
 storing, P 2567^a.
 tertiary Br (I) no. of, 503^a.
 yellowing of films of, 3274^a.
 drying app. for, 1195^a.
 drying fatty, classification of, 184^a.
 drying of, 1720^a, 2193^a.
 drying of fatty, gas coagulation theory of, 3475^a.
 drying phenomenon of, 2993^a.
 effect of SO₂ and H₂O on, 1182^a.
 effect on blood sugar, photoactivity and, 455^a.
 of clasmobranch fish, unsaponifiable matter in, 1111^a, 1112^a.
 elemi, 4014^a.
 emulsifying, P 2038^a.
 emulsifying and mixing, P 3096^a.
 emulsions of, P 2540^a, P 3095^a.
 emulsions of water and, effect of emulsifier and protective colloid on, 1391^a.
 emulsions of water in, making and breaking of, 1390^a.
 enzymic splitting of, 2809^a.
 of ergot, 1891^a, 4017^a.
 of *Eriostemon coxii*, 2058^a.
 from *Erythroxylon monogynum* wood, 798^a.
 essential, adulteration of, 798^a.
 alc. and phenol detn. in, 153^a.
 analysis of, 1089^a.
 from aromatic plants of Sardinia, 297^a.
 bactericidal action of vegetable, 3646^a.
 color reactions of certain, 4018^a.
 constituents of, 1689^a, 4023^a.
 of Crimean plants, 3421^a.
 Crismer test with, 2529^a.
 detection of, 797^a.
 detn. of sp. gr., n_D , and optical rotation and statement of temps., 4019^a.
 examn. of, 475^a.
 extrn. from plants and flowers, 153^a.
 germicidal values of Australian, 2530^a.
 of India, 298^a.
 infertilizing power against *B. tuberculosis*, 3928^a.
 infertilizing power against microorganisms, weakening action of colloidal state on, 3928^a.
 I-Br values of, 3103^a.
 manuf. of, 984^a.
 plants contg., of Crimea, 4020^a.
 review, 2264^a.
 work of scientific chemico-pharmaceutical inst., 4019^a.
 ethyl alc. detection in, 1328^a.
 eucalyptus, 1870^a, 4014^a.

- eucalyptus, optical rotation of, in magnetic field, 8811².
- of *Euphorbia amygdaloides* seed, 1869², 2048².

- rosemary, 2959.
 adulteration of, 4015.
 analysis of, 4027.
 compn. of Grecian, 1827.
 rosin—see *Rosin oil*.
 in Roumanian Pharmacopeia, 3709.
 safflower, as drying oil, 1019.
 of sage (clary), 2930.
 of sage (clary), effect of reaction of soil on
 formation and compn. of, 154.
 of sage (glutinous), 299.
 of *Salvadora oleoides*, 662.
 of *Salvia spinosa* seeds, 2810.
 sampling and analysis of, standard methods
 for, 660.
 sandalwood, 4015.
 adulteration of, 799.
 B. P. and, 4018.
 of *Santalum album*, 2530.
 of Sapucainha seed, 2168.
 sardine, 1365, 3758.
 I no. of, 2195.
 unsatd. acids of Japanese, 661.
 sassafras, 1870.
 of *Satureja obovata* var. *intricata* and of *S.*
 montana var. *prostrata*, 4015.
 of sea-urchin egg, 2035.
 of seeds, climate and, 2294.
 from seeds, etc., P 335.
 sepn. of, P 1023.
 from exhaust steam, app. for, P 344.
 from soap, P 2569.
 from steam or hot gases, app. for, P 3288.
 from vapors, app. for, P 1380.
 from water, P 2749.
 from water, app. for, P 3287, P 3771.
 from water, etc., app. for, P 2981¹, P
 3003.
 from water, gas and solids, app. for,
 P 1570.
 separators for steam lines, 1892.
 sesame, detection of, 2169.
 sesame, sepn. temp. for, 829.
 shark and ray liver, fatty acids of, 1022,
 1719.
 of *Siler trilobum*, 3422.
 solidifying, P 3434.
 soly. of, 3402.
 soins. of, P 1320.
 solvent detn. in, distn. app. for, 2202.
 soy-bean—see *Soy-bean oil*.
 sperm, 1720.
 alcs. from, 564.
 compn. of, 4079.
 unsatd. aliphatic alcs. of, 3278.
 spontaneous heating of, 1720.
 star anise, 1331.
 of star-fish egg, 2035.
 stearin sepn. from vegetable, by cooling, P
 3455.
 sterol, cholesterol and, 107.
 storage tank for, P 3771.
 straw, system: butane-, vapor pressure-
 compn. data for, 1583.
 from sucupira kernels, 4015.
 sulfonated, 2810, 3758.
 detn. of acid- and Ca-resistant properties
 of, 2994.
 in leather industry, 2396.
 sulfonation of, P 3476, P 4084.
 sunflower, disperse systems of, 3780.
 as drying oil, 184.
 hydrogenation of, 1556.
 sapon. of, P 1557.
 sunflower-seed, 3757.
 of supa, constituents of, 906.
 of sweet clover seed, 662.
 sweet-orange, 1519.
 of *Tagetes glandulifera*, olefinic terpene
 ketones from, 907.
 tar—see *Tar oils*.
 taste of, effect of ultra-violet irradiation on,
 2631.
 tea-seed, and uses as adulterant of olive oil,
 3757.
 tea-seed, spectrum of, 2810.
 terpeneless, 984.
 testing, 797.
 testing methods, standardization of, 3277.
 textile treatment with, P 502.
 from *Thevetia nerifolia* seed, 3277.
 thickening of, polymerization in, 1192.
 of thyme, 984, 1870.
 train, hydrogenated, detection in lard, 3398.
 train, vitamin content of emulsions of, 3386.
 transformer—see *Transformer oils*.
 treatment with adsorptive C, 4080.
 of *Trichodesma seylanicum* seed, 1022.
 from *Tropaeolum majus*, 506.
 tung—see "wood" below.
 Turkey red—see *Turkey red oil*.
 turpentine—see *Turpentine oil*.
 valerian, 4014.
 of valerian root, 300.
 varnish, P 184.
 vegetable, contg. glycerides of erucic acid,
 505.
 vitamin A- and 1D-contg., effect of irradi-
 ation with ultra-violet light on, 117.
 vitamin A content of vegetable, 947.
 vitamin addn. to, P 142.
 vitamins A, B and C in, 121.
 volatile, detn. in emulsions, 1077.
 volatile, temp. modulus of sp. gr. and rotation
 of, 2165.
 vulcanized, for rubber manuf., 2574.
 vulcanized, molding, P 2576.
 walnut, as drying oil, 184.
 water detn. in, 3279, 4080.
 water detn. in, app. for, 2578.
 water-sol., hydrohexalin in manuf. of, 1367.
 wax, etc., sepn., from, centrifuge for, P
 2579.
 whale, extrn. from speck whale, P 1023.
 fatty acids of, 829.
 from gray-whale, 1366.
 from sei-whale, fatty acids of, 1719.
 spectrum of, 2810.
 wheat, dihydrositosterol in, 758.
 phytosterols of, 101.
 refractive index of, 3987.
 as vitamin E source, 949, 2921.
 for white enamels, treatment and bodying of,
 1363.
 wood, -1193, 1195, 1716.
 of Am. trees, 1193.
 boiling of, mol. wt. increase in, 658.
 chemistry of, 658.
 cultivation of, 332.
 detection and detn. of, 1193.
 detn. of, 184.
 disperse systems of, 3789.
 drying of, 184, 2071.
 effect of cathode rays on, 3136.
 extrn. of, P 2189.
 opaque drying of, 184.
 oxidation and hydrolysis of, 1193.
 polymerizing, P 1194.

- Röntgen-ray diffraction of, 3552^a.
 specifications of A.S.T.M. for, 1157^a.
 spectrum (Röntgen) of, 1730^a.
 storage of, 658^a.
 ultra-violet light absorption by, 3136^a.
 from *Xanthorrhoea arborea*, *X. hastilis* and *X. reflexa*, 798^a.
 of Yamato-torpedo liver, fatty acids of, 1022^a.
 of ylang-ylang, production in Java, 985^a.
 of *Zieria macrophylla*, 474^a, 2530^a.
- Oil shale.** See *Shales*.
- Ointments**, iron phosphate, P 801^a.
 manuf. of, Ca oleate in, 1330^a.
 mercuric iodide, analysis of, 153^a.
 mercury, prepn. of, 475^a, 4026^a.
 Phoscolin, 1328^a.
 silver, prepn. of, 4026^a.
 therapeutic and cosmetic colloidal, polysaccharide jellies as bases for, 2357^a.
 of United States Pharm. X, 797^a.
- Okra**, pod analyses, 2514^a.
 seed, compn. of, 662^a.
- Oleander**, chemistry of, 939^a.
- Oleandrin**, 299^a.
- Oleates**, for varnish, 1020^a.
- Olefins**, alcs. from, P 249^a, P 818^a.
 benzene derivs. from, P 3369^a.
 effect of silent discharge on, 3344^a.
 from methane, P 3368^a.
 reaction with NCl_3 , 903^a.
 reaction with H_2SO_4 , 2554^a.
- Oleic acid**, adhesive action of, 990^a.
 adsorption by charcoal, 200^a.
 adsorption of, detn. of, 1735^a.
 calcium and Mg salts of, thermal decompn. of, 2372^a.
 calcium salt of, in pharm. preps., 1330^a.
 calcium salt, pharmacol. action of, 3083^a.
 as catalyst in prepn. of SO_2Cl_2 , 55^a.
 cholesteryl ester of, antirachitic principle of irradiated, 3210^a.
 combustibility of, 950^a.
 cryst. compd. with K oleate, 2874^a.
 detn. in presence of elaidic acid, 2993^a.
 effect on blood sugar, 2327^a.
 on cataphoretic rate of oil particles in water, 1391^a.
 on spreading of crystal violet on surface of water, 1734^a.
 in emulsification, adsorption by kerosene and Nujol contg., 1391^a.
 emulsification with Mg, Al and Na salts of, 1391^a.
 esterification of, bacterial lipases and, 589^a.
 feeding, relation between fat and lipid after, 2290^a.
 hydrogenating with activated H, 1365^a.
 hydrogenation of, 4081^a.
 methyl ester, hydrogenation of, 2458^a.
 oxidation of, 2810^a.
 phenyl ester, superheating of, 2126^a.
 prepn. of, 732^a, 2458^a, 2602^a.
 purification of, 2874^a.
 reaction with aromatic hydrocarbons, 1542^a.
 Röntgen-ray diffraction in, 3827^a.
 sodium salt, effect on bile secretion, 1307^a.
 evapn. of, 2411^a.
 pharmacol. action of CaCl_2 and, 2737^a.
 surface tension of, periodic change in, 3295^a.
 surface tension of solns. of, effects of acids, bases and salts on, 1041^a.
 as washing compd., 2812^a.
 soly. in liquid NH_3 and in liquid SO_2 , 3047^a.
 spectrum of, 1407^a.
 spreading of, 2584^a.
 structure of, 3601^a.
- , λ -hydroxy-. See *Ricinoleic acid*.
- Oleic acid series**, constitution of acids of, 2661^a.
- Olein**, films of, dielec. const. of, 2596^a.
 for textile industry, 2068^a.
 textile, inflammability of, 499^a.
- Oleomargarine**. See *Margarine*.
- Oleone**, decompn. of, gases from, 2372^a.
 formation by thermal decompn., 2372^a.
- Oleoresins**. See *Resins*.
- Oleyl alcohol**, constitution of, 4080^a.
- Olfaction**. See *Odors*.
- Olfactology**. See *Odors*; *Perfumes*.
- Oligist**. See *Hematite*.
- Olive oil**, adulteration with tea-seed oil, 3757^a.
 antirachitic action of, photoactivity and, 3654^a.
 antirachitic activation with ultra-violet rays, 1480^a.
 antirachitic principle of irradiated, 3219^a.
 bleaching earths for, 302^a.
 bromine-I no. of, 2746^a.
 changes after long standing, 2073^a.
 color detn. in sulfur, 1198^a.
 compn. of Bitonto type of Italian, 2994^a.
 deacidifying, P 3138^a.
 detection of, 3474^a.
 detection of extd., 4080^a.
 detection of oil extd. with CS_2 , 3578^a.
 effect on blood C, 2027^a.
 on Et_2O action, 2321^a.
 on gastric digestion, 2023^a.
 extn. with solvents, detection of, 2073^a.
 feeding, relation of fat to lipid after, 2296^a.
 grain oils in, detection of, 2043^a.
 irradiation with ultra-violet light, effect of cholesterol on, 761^a.
 lime soaps in foods, 1721^a.
 mixts. with peanut oil, analysis of, 4081^a.
 peanut oil detection in, 500^a.
 permeability to ultra-violet rays, 1933^a.
 residual oil from production of, distn. of, P 3476^a.
 sapon. of, 1021^a.
 sepn. temp. for, 829^a.
 spectrum of, 2810^a.
 Tunisian, 1720^a, 2568^a.
 vitamin A content of, 947^a.
- Olives**, pickling and preserving, P 1505^a.
 pickling ripe, P 2037^a.
- Olivil**, alcoholate, crystallography and optical properties of, 1272^a.
- Olivine**. See *Chrysolite*.
- O'Neill, Edmond**, biography, 1906^a.
- Onions**, freezing, effects of, 3990^a.
 juice, concn. of, P 1318^a.
 juice, reaction with Al, 3492^a.
 therapeutic effect of, 2920^a.
 varnish contg., juice for stringed instruments, P 1717^a.
- Onnes, Kamerlingh**, biography, 2404^a.
- Onofrite**, crystal structure of, 1729^a.
- Ontogeny**, of frogs, body vol. during, 3394^a.
- Oophorectomy**. See *Ovariectomy*.
- Opacifiers**, antimony, for enamels, 1875^a.
 cryolite as, in enamels, 2967^a.
 for glass, 3720^a.
- Opacity**, detn. of, of colloids, 2209^a.
- Opalescence**, of colloids, 3518^a.
 detn. in pharmaceutical preps., 2167^a.
 of gelatin, 3009^a.

- in German Pharmacopeia, 799^a.
in glasses contg. potash-Pb oxide-SiO₂,
production by chlorides, 2768^a.
on glass, etc., coating compn. for, P 806^a.
in photographic negatives, 213¹.
- Opalina ranarum**, protoplasm lipids of, 2010^a.
- Opalometer**, 1675^a.
- Ophiobolus graminis**, growth of, H-ion concn.
and, 758^a.
- Ophthalmia**, vitamin A deficiency and, 1833¹.
- Opilonic acid** (*6-formyl - 2, 3- dimethoxybenzoic
acid*), 1258¹.
condensation with phenols and their ethers,
3356^a.
- Opilanyl chloride**, 1258^a, 1642^a.
- Opiates**, pharmacol. action of, 962^a.
- Opium**, active principle of, when smoked, 3965^a.
detn. in stomach contents, 1077^a.
detn. of total alkaloids, sugar and oily sub-
stances in, 876^a.
dry ext., absorption of water by, 156^a.
effect on motor and secretion functions of
stomach, 453¹.
effect on respiration, 453^a.
morphine detn. in, 151^a, 796^a.
morphine loss in powd., by keeping, 154⁷,
4019^a.
powd., 2757^a.
tinctures, morphine detn. in, 2758^a.
tinctures, prepn. of, 797^a.
- Opium alkaloids**, 1124⁷, 1125^{a,4}, 1817⁷.
constitution of, 588^a, 2697^a.
detn. of, 876^a.
prepn. of, 299^a.
sepn. of, 2530^a.
synthesis of, 3367^a.
- Opiolin**, acetic acid as, 1993^a.
complement and, 957^a.
- Opsopyrrole***, 102^a.
- Opsopyrrolecarboxylic acid***, 102^a.
- Opsopyrrolecarboxylic acid aldehyde***, 1658^a.
- Optical activity**. See *Optical rotation*.
- Optical dispersion**. See *Dispersion*.
- Optical isomerism**. See *Isomerism*.
- Optical properties**, anomalous, of isomorphous
double tartrates, 697^a.
in atomic synthesis, 3542^a.
of colloids contg. cellulose, 684¹.
of colloids, detn. of, 351^a.
and cryst. form of some org. compds., 1272¹.
of molybdenite in ultra-violet, 532¹.
of single crystal Bi, 1748^a, 3558^a.
of sugars, 2421¹.
of unsatd. compds., 3014⁷.
- Optical rotation**. (See also *Walden inversion*.)
of aspartic esters, 1798^a.
atomic dimension and, 357^a.
of camphorquinone solns. in toluene, 3023^a.
of carbon atom 1 of trimethyl- and tetra-
methyl- β -methylglucosides, 3891^a.
chem. constitution and, 52^a, 1253^a, 2265^a.
chem. constitution and, in sugar group, 63¹,
899^a, 3602^a.
crystal structure and, 2094^a.
in dehydration of optically active glycols,
854¹.
detn. in systems of anisotropic mols. or
atoms, 2419⁷.
detn. of, of essential oils, 4019⁷.
dispersion—see "rotatory" under *Dispersion*
(*of rays*).
effect of solvents on, 1642^a.
in gasoline identification and analysis, 645⁷.
- hydrogen-ion concn. and, of org. compds.,
3045^{1,4}.
- ionization and, 100^a, 1965^a, 3892¹.
of iron salt solns., 2233^a.
magnetic field and, 3811¹.
magnetic, of substances whose optical dis-
persion exhibits anomalous rotation, 1224^a.
mol. theory of, 3014^a.
mutarotation, 2838^a.
in aq. alc. soln., 3181^a.
double phenomenon of, 3321^a.
effect of alky. of medium on, 1923¹.
of galactose, 697^a.
of glucose, 3803^a.
of α -glucose, 2252^a.
of org. compds., H-ion concn. and, 1402^a.
of plane of polarization of primary Röntgen
rays, 700^a.
polarity and, of substituent groups, 1095^a,
2657^a.
of proteins, 2278^a.
of quartz in ultra-violet, 2431⁷.
of urine, viscosity and, 1279^a.
- Optical superposition**, 1258^a.
non-validity of, 1100^a.
- Optochine** (*ethylhydrocupreine*), binding to
erythrocytes, 771¹.
as disinfectant for biliary passages, 800^a.
effect on metabolism and on heat regulation,
459^a.
effect on uterus, 2330^a.
- Optones**, of ovary and placenta, sterility pro-
duction in females with, 3227⁷.
- Orange juice**, corrosion of alloys and metals
by boiling, 3881^a.
pectic substances in, 758¹.
vitamin C content of concd., 1291^a.
vitamins of, 3938^a.
- Oranges**. (See also *Oils*.)
constituents of, 3938^a.
die-back disease of trees, remedy for, 3249⁷.
exts. of Ger. Pharmacopeia, 152^a.
exts., prepn. of, 983⁷.
flower water, 2358¹.
growth of trees, elements in culture solns. for,
2012^a.
gum, compn. of, 1477^a.
preservation of, 2037¹.
rhamnose on peel, 1290^a.
therapeutic effect of, 2920⁷.
vitamin content of, 3219^a.
waste, pectin from, 2156¹.
